FOREWORD BY THE MEC**MEC SPD SKHOSANA (MPL)**

The 2011/12 consolidated report of Municipal performance in Mpumalanga is indicative of the work that has gone into building a smooth transition from the 3rd local government to the 4th. The overarching message of the transition has been the building of better communities together with all the stakeholders.

In the process of building these better communities, we have experienced challenges which are surmountable. We have since realised that we must focus a lot of our energies to matters of internal controls.

This culminated on the convention of a Local Government Indaba in July 2012 which performed the induction of the newly elected councillors.

The Department commits to focus, going forward on the issues that continue to challenge the effective running of municipalities. To stem the tide of regression on audit opinions, the Department must channel its energy on supporting municipalities to put in place correct internal controls.

It has come to our attention that we need to continue our focus on structures of governance. There is lack of implementation of policy by administration and we have since trained councillors and oversight bodies like MPAC.

The other challenge which is a cause for concern is the filling of vacant critical posts with appropriately skilled and competent personnel. This in turn will lead to the poor management of finances in municipalities and sustainable service delivery. We have placed great emphasis on maintaining constructive working relations with all spheres of Government, especially the local government sphere. All municipalities in the province are service delivery agents for the province. The department has committed to support municipalities on Good Governance, fighting corruption and ensuring that we fulfil the mandate of outcome 9; responsive, accountable, effective and efficient local government system.

This report also binds the department to continuously monitor the vacancy rates on section 54A and 56 Managers, ensuring that there is compliance to all the prescripts. We will continue to implore the municipal political leaders to closely monitor and provide oversight on the municipal administration.

The department will continue to support municipalities with the development and implementation of action plans to address audit issues and to achieve clean audits in line with the operation clean audit 2014. All municipalities need assistance to develop revenue enhancement strategies and plans. The observation made was the improvement on debt collection in municipalities such as Mbombela, Nkomazi, Msukaligwa, and Steve Tshwete. Municipalities have also indicated that Government was one of the debtors. In that regard, the Department will assist the municipalities on debt recovery from the government departments.

The sum total of the report is that municipal councils, executive mayors and municipal managers must take full ownership of the key controls and satisfy themselves that internal control weaknesses receive the required attention. It is incumbent upon councils and executive mayors to ask for regular financial and performance reports and subject them to intense quality assessments.

For the following financial years the department must make sure that all role players and stakeholders have clear, coherent and well-co-ordinated modus operandi to address the issues of leadership financial and performance management as well as governance.

Together with Provincial Treasury, SALGA, and the Districts we will continue to work on a consistent approach to assist municipalities to improve on the work that has been allocated to them until 2016.

MEC SPD SKHOSANA**MEC: COOPERATIVE GOVERNANCE AND TRADITIONAL AFFAIRS**

DATE: 28/02/2014

EXECUTIVE SUMMARY BY THE HEAD OF DEPARTMENT

**MR MD MAHLOBO
HEAD OF DEPARTMENT**

What we have picked up from the Auditor General's report for 2011/12 financial year is perturbing in as far as municipal performance is concerned. Credit should be given to Ehlanzeni District and Steve Tswete municipalities respectively for their consistency in doing the province proud on the clean audit.

This report is submitted without information from two municipalities (Thaba Chweu and Dipaleseng LM's). The department should gear itself for rigorous and determined interventions strategies towards achieving clean audit at the seven (7) municipalities that also carried out flag with their unqualified audit reports. The department further congratulates the five (5) improvements in as far as our municipalities are concerned. However, disclaimers and qualifications will not be tolerated.

The provision of municipalities dictates that people are closer to the Local Government and Local Government closer to the people it serves. Monitoring from the department will henceforth get closer and new plans will be introduced so that people on the ground receives their deserved services. Summary of performance of municipalities in the province can be summarised in the following manner;

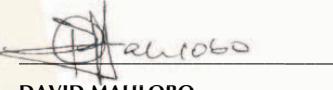

Highlights of Municipal Performance per KPA

KPA	Municipality/s	Highlight of Performance	Findings
KPA 1: Municipal Transformation and Organisational Development	Ehlanzeni District Gert Sibande District Chief Albert Municipality Msukaligwa Municipality Dr Pixley Ka Isaka Seme Municipality Steve Tswete Municipality	Assurance of information in the Annual Report	Level of assurance provided; All role players Oversight Committee Audit Committee Executive mayor Exec. Mayor and Senior Managers All role players
KPA 2: Basic Service Delivery	Thaba Chweu Municipality Umjindi Municipality Victor Khanye Municipality and Steve Tswete Municipality	100% spending of MIG	100% spending of MIG
KPA 3: Local Economic Development	Ehlanzeni District Municipality	4500 jobs created through Community Works programme	

KPA 4: Municipal Financial Viability and Management	Ehlanzeni District and Steve Tshwete Municipality	Sustained clean audit status	The 2 municipalities have been able to sustain their clean audit status for the past three years
		Credible and reliable financial statements	Submitted Annual Financial Statements without material misstatements
KPA 5: Good Governance and Public Participation	Ehlanzeni District and Steve Tshwete Municipality	Interaction with Mayors	Interactions extend to provincial legislative oversight to share insights and enable improved oversight of local government
KPA 6: Cross Cutting	Mbombela Municipality	Predetermined objectives	Mbombela Local Municipality improved to having no Predetermined Objectives findings

INTRODUCTION

The introduction will cover the following areas:

1. Background to Municipal Performance Reporting
2. Purpose of the Report
3. The Assessment Process and the Methodology followed in Compiling the Report
4. South African Population
5. Structure of the Report
6. The municipal reporting process
7. Limitations for the municipal reporting process
8. The provincial reporting process
9. Limitations for the provincial reporting process
10. Concluding Remarks

INTRODUCTION

1. Background to Municipal Performance Reporting

This report is compiled in terms of the legislative requirements of Chapter 6 of the Municipal Systems Act, 32 of 2000 and Chapter 12 for the Municipal Finance Management Act, 56 of 2003. The Municipal Systems Act prescribes the role of each sphere of government in the municipal performance reporting.

2. Purpose of the Report

The main purpose of this report is to account to MEC for Local Government, Provincial legislature, NCOP, Minister of Cooperative Governance and Traditional Affairs, National Treasury, Auditor-General and to the citizens of South Africa on progress being made by municipalities towards achieving the overall goal of a better life for all. Furthermore, the report is a key performance report to the communities and other stakeholders in keeping with the principles of transparency and accountability of government to the citizens. It subscribes to the South African developmental nature of participatory democracy and cooperative governance and responds to the principles of the Constitution, Batho Pele, and White Paper on Local Government, MSA and the MFMA.

3. The Assessment Process and the Methodology followed in Compiling the Report

According to the provisions of the Municipal Systems Act, 32 of 2000, municipalities must monitor and measure the progress of their performance by preparing quarterly and mid-year performance reports, in terms of Chapter 6 of the MSA, on performance management systems. These quarterly and mid-year reports make up the municipalities annual performance reports (Section 46 report), which are submitted to the Auditor-General, together with the financial statements, for auditing. After adoption of the audited performance report by the municipal council, it must then be submitted to the MEC for Local Government.

4. Compilation and Structure of the Report

The report presents an analysis and comparison of past and current progress on performance which has been conducted. A brief assessment summary is presented at the end of each Key Performance Area (KPA), followed by the sub-section that relates to the challenges experienced by municipalities in performing in these KPA's. The performance report on each KPA will end with concluding remarks that reflect on the full assessment and evaluation of the reported progress on a provincial perspective and the impact on service delivery.

The report is structured as follows:

- **Section One** provides the background, purpose of municipal reporting and the responsibilities assigned to each of the three spheres of government in monitoring and reporting on municipal performance on an annual basis. The section should also outline the process followed in collecting, collating, validating, analysing and assessing the performance information provided by relevant sources on compiling the consolidated report on municipal performance for the 2009/10 financial year.
- **Section Two** should give an overview of the developmental agenda and the strategic direction taken by the South African government to support the local government transformation process in a cooperative and intergovernmental framework.
- **Section Three** should present an analysis of the performance information provided in the municipal Section 46 reports and provincial trend analysis report. This should give a trend analysis of performance over a period of the years previous years (2009/10, 2010/11 and 2011/12). This information is categorized under each of the five Key Performance Areas, cross-cutting issues and a comparison of the previous years trends. The challenges encountered by municipalities and the interventions carried out by other spheres of government and stakeholders are contained in this section.
- **Section Four** will furnish an evaluation of the analysed performance information and drawing pertinent conclusions on how far the municipalities performance in the year under review and previous years after the country's attainment of democracy, had been able to change the character of local government to being sustainable, developmental and performance-driven institutions. It assesses whether there is any progress towards achieving the developmental outcomes which will lead to realising the country's Vision 2014 and meeting MDG targets, using the outcomes 9, turnaround strategy and Intergovernmental Relations (IGR) structures.
- **Section Five** will examine what still needs to be achieved in the remaining leg of local government transformation up to the year 2014.
- **Section Six** concludes with a summary of the whole report.

5. The municipal reporting process

Section 46 (1) of the Municipal Systems Act (MSA) 32 of 2000, states that

- (1) A municipality must prepare for each financial year a performance report reflecting:
 - (a) the performance of the municipality and of each external Service provider during that financial year; also
 - (b) a comparison of the performances referred to paragraph (a) with targets set for and performances in the previous financial year; and
 - (c) measures taken to improve performance.
- (2) An annual performance report must form part of the municipality s annual report in terms of chapter 12 of the Municipal Finance Management Act

2.2 Section 121 of the Municipal Finance Management Act (MFMA) 56 of 2003, requires that:

- (1) Every municipality and every entity must for each financial year prepare an annual report. The Council of a municipality must within nine months after the end of a financial year deal with the annual report of the municipality and of any municipal entity under the municipality s sole or shared control in accordance with section 129.

2.3 Section 129 of the Municipal Finance Management Act (MFMA) 56 of 2003, requires that:

- (1) The Council of a municipality must consider the annual report of the municipality and of any municipal entity under the municipality s sole or shared control, and by no later than two months from the date on which the annual report was tabled in the council in terms of section 127, adopt an oversight report containing the council s comments on the annual report, which must include a statement whether the council:
 - (a) has approved the annual report with or without reservations;
 - (b) has rejected the annual report; or
 - (c) has referred the annual report back for revision of those components that can be revised.

6. Provincial Reporting Process

Section 47 of the Municipal Systems Act, 32 of 2000 says that:

- (1) The MEC for local government must annually compile and submit to the Provincial Legislatures and the Minister a consolidated report on the performance of municipalities in the province.
- (2) The report must:
 - (a) identify municipalities that under-performed during the year;
 - (b) propose remedial action to be taken; and
 - (c) be published in the Provincial Gazette.
- (3) The MEC for local government must submit a copy of the report to the National Council of Provinces.

The reporting compilation process comprised of five (5) phases, as follows:

- **Phase 1:** Using the previous year's report, template developed by National, provincial template for collection of information, circular 11 and 63 template for S46 and the Guide from the Auditor-General, support municipalities to develop a section 46 report.
- **Phase 2:** Collection of from different sources. Sources of information were divided into three categories; namely, baseline information, primary and secondary sources of information (The use of the quarterly reports as per the IDP, POA reports, financial statements, A-G report and evidence).
- **Phase 3:** Information sourced in Phase 1 to develop a report as per the Provincial reporting template.
- **Phase 4:** Information is categorized according to the five key performance areas (KPAs) and cross-cutting issues, identified indicators and focus areas that fell under each KPA. A high-level gap analysis is developed, informed by further data collection to close the gaps. The data is then collated and analysed.
- **Phase 5:** Characterized by an assessment and evaluation of the municipal performance, using baseline information and information contained in previous year's reports and make comparisons with performance in the year under review. During this phase, report writing also begins.
- **Phase 6:** Integration of the report into one consolidated report, outlining the overall challenges, interventions, recommendations, giving the outlook for the future and submission of the report to different structures for comment and finally, to the MEC, Legislature, NCOP and gazetting.

7. Limitations in Provincial Reporting

- Non and late submission of S46 report by municipalities delaying the compilation of S47 report
- Credibility and quality of reports as submitted by municipalities
- Validation and consistency of information of previous years due to lack of information management and organisational/institutional memory

DEMOGRAPHICS OF MPUMALANGA

- Largest population Mbombela (14.6%) and smallest Dipaleseng (1%)
- Almost 50% of the population in only 4 municipal areas Mbombela, Bushbuckridge, Emalahleni and Nkomazi
- High population growth areas with more than the provincial growth of 20% (between 2001 & 2011) Steve Tshwete (61%), Emalahleni (43.1%), Victor Khanye (34.2%), Govan Mbeki (32.8%), Umjindi (29.5%), Mbombela (23.5%) and Thembisile Hani, Thaba Chweu & Mkhondo just more than 20%
- Negative population growth for Albert Luthuli and low growth of less than 10% for Dr. JS Moroka, Dr. Pixley Ka Isaka Seme, Bushbuckridge, Emakhazeni and Dipaleseng
- Over-estimation of population in 2007 CS of StatsSA Emalahleni
- Under-estimation Nkomazi, Mkhondo, Lekwa, Dr. Pixley Ka Isaka Seme, Victor Khanye and Emakhazeni

8. Provincial Population of Households Per Municipalities

8.1 EHLANZENI DISTRICT MUNICIPALITIES

8.1.1 Bushbuckridge Municipality

Demographic Indicators	StatsSA Census	StatsSA Census	Shares of Ehlanzeni's Figure	Shares of Mpumalanga's Figure	Ranking: Highest(1)- Lowest (18)
	2001	2011	2011	2011	
Population number	500 128	541 248	32.1%	13.4%	2

Area size km ²		5 720	20.5%	7.5%	3
Population per km ²		17			

- According to Stats SA (2011 Census), 98 387 people were recorded in this area which was 5.8% of Ehlanzeni's population in 2011.
- Population grew by 20.5% between 2001 and 2011 and the average population growth rate was measured at 1.9% per annum.
- Community Survey 2007 population was estimated at 87 544.
- 51.2% females and 48.8% males.
- 81.6% Africans, 14.5% Whites, 2.6% Coloureds & 0.6% Asians and 0.6% Others.
- Youth up to 34 years, 63.7% of Thaba Chweu's population.
- 33 352 households (2.9 people per household) 7.5% of Ehlanzeni's 445 087 households.
- Female headed households 33.2% and child headed (0-17 years) households 0.5 % in 2011.

8.1.5 Umjindi Municipality

Demographic Indicators	StatsSA Census	StatsSA Census	Shares of Ehlazeni's Figure	Shares of Mpumalanga's Figure	Ranking: Highest(1)-Lowest (18)
	2001	2011	2011	2011	
Population number	53 744	69 577	4.1%	1.7%	16
Number of Households	14 458	20 255	4.6%	1.9%	15
Area size km ²		1 746	6.3%	2.3%	16
Population per km ²		38			

- According to Stats SA (2011 Census), 69 577 people were recorded in 2011 which was 4.1% of Ehlazeni's population.
- Population grew by 29.5% between 2001 and 2011 and the average population growth rate was measured at 2.6% per annum.
- Community Survey 2007 population was estimated at 60 477.
- 47.7% females and 52.3% males.
- Youth up to 34 years - 67.5% of the population.
- 87.0% Africans, 9.8% Whites, 2.0% Coloureds, 1.0% Asians and 0.2% Other.
- 20 255 households (3.4 people per household) 4.6% of Ehlazeni's 445 087 households.
- Female headed households 34.8% and child headed (0-17 years) households 0.6 % in 2011.

8.2 GERT SIBANDE DISTRICT MUNICIPALITIES

8.2.1 Chief Albert Luthuli Municipality

Demographic Indicators	StatsSA Census	StatsSA Census	Shares of Ehlazeni's Figure	Shares of Mpumalanga's Figure	Ranking: Highest(1)-Lowest (18)
	2001	2011	2011	2011	
Population number	187 751	186 010	17.8%	4.6%	9
Number of Households	39 652	47 705	17.4%	4.4%	9
Area size km ²		5 560	17.5%	7.3%	4
Population per km ²		33			

- According to StatsSA (2011 Census), 186 010 people were recorded in 2011 17.8% of the Gert Sibande population.
- Negative population growth of - 0.9% between 2001 & 2011 while annualised population growth rate was measured at -0.1%, the only municipal area with a negative population growth rate.
- Population in 2007 Community Survey was estimated at 194 088.
- Females 53.1% and males 46.9% of the population 97.6% Africans.
- Youth up to 34 years - 72.5% of Chief Albert Luthuli population.
- Number of households 47 705 (3.9 people per household) 17.4% of Gert Sibande's households.
- Female headed households 49.3% and child headed (0-17 years) households 1.1 % in 2011.

8.2.2 Dipaleseng municipality

Demographic Indicators	StatsSA Census	StatsSA Census	Shares of Ehlanzeni's Figure	Shares of Mpumalanga's Figure	Ranking: Highest(1)-Lowest (18)
	2001	2011	2011	2011

BACKGROUND

This chapter covers the following areas:

- Introduction
- The Global Perspective
- The Millennium Development Goals
- South African Perspective
- The Constitutional Mandate
- The White Paper on Local Government
- Programme of Action
- Vision 2014
- Turnaround Strategy
- Outcomes 9
- Concluding Remarks

BACKGROUND

Introduction

The South African Constitution introduced a government consisting of three distinct yet interdependent spheres of government and mandates that these three spheres work together in a cooperative manner. This concept of cooperative governance is provided for in Chapter three of the Constitution and it supports the realization of a developmental state, where the developmental role of local government is dependent on a successful establishment of cooperative governance. It is a concept that embraces the realization that a single sphere of government cannot handle the magnitude of development challenges and responsibilities of a developmental state. The Constitution envisages an establishment of structures and institutions to foster intergovernmental relations. In that regard, the Intergovernmental Relations Framework Act was promulgated in 2005, to support the concept of cooperative governance.

Chapter 7 of the Constitution then sets out objects that mandate local government to be developmental. Section 152 of the Constitution sets out the objects and mandate of local government as the following:

- a) To provide democratic and accountable government for local communities;
- b) To ensure the provision of services to communities in a sustainable manner;
- c) To promote social and economic development;
- d) To promote a safe and healthy environment; and
- e) To encourage the involvement of communities and community organizations in the matters of local government.

Section 153 confers developmental duties of local government such that every municipality must:

- a) structure and manage its administration and budgeting and planning processes to give priority to the basic needs of the community, and to promote the social and economic development of the community; and
- b) participate in national and provincial development programmes

Section 154 reiterates the co-operative government obligations for the national government and provincial governments, by legislative and other measures, to support and strengthen the capacity of municipalities to manage their own affairs, to exercise their powers and to perform their functions.

The above provisions laid the foundation to local government transformation. Local government is no longer an administrative arm of government that is required to provide infrastructure, but is given a developmental character to improve the quality of communities and promote basic human rights. This places municipalities at the forefront of national government's efforts to address all the social and economic inequalities of the past.

The White Paper on Local Government

The White Paper on Local Government is regarded as the constitution of South African local government. It flashes out more clearly the developmental role of local government and gives meaning to the constitutional obligations placed upon the sphere of local government. It defines a developmental local government as municipalities who are committed to working with the local communities to find sustainable ways to meet their needs (social, economic and material) and improve the quality of their lives. (White Paper on Local Government of 1998).

In order to attain a developmental local government, the White Paper offers the guiding principles and outlines the unique characteristics of a developmental local government, the expected outcomes and the mechanisms that will assist in the process towards attainment of the developmental outcomes. The elements within each of the guiding areas are discussed briefly below.

Characteristics of the Developmental Local Government

Municipalities are expected to work with their communities to find innovative and cooperative ways to execute their powers and functions in order to reshape themselves into institutions that are:

- Maximizing social development and economic growth;
- Integrating and coordinating development;
- Democratizing development, empowering and redistribution of resources; and
- Leading and learning.

Since local government transformation is a change management process, at the end of each year, municipalities have to assess their performance and report on whether they are changing towards attaining the above developmental characteristics.

Outcomes or Results of Developmental Local Government

The outcomes include:

- Provision of household infrastructure;
- Creation of liveable, integrated cities, towns and rural areas;
- Local economic development;
- Community empowerment and redistribution.

The questions that need to be raised and answered during every annual reporting period by each of the three spheres of government are: whether municipalities are achieving the above outcomes? Have they reached sustainability? Are other spheres playing a meaningful role to support the developmental course?

Mechanisms to Support Developmental Local Government

The White Paper lists three mechanisms or tools to support the process of local government transformation, as well as a guide to new approaches to service delivery:

- Integrated development planning and budgeting;
- Performance management; and
- Cooperation mechanisms.

The White Paper envisages a process of transformation for local government whereby cooperative governance is a central feature. It foresees the creation of an intergovernmental framework as a pillar to the realization of the developmental state. The White Paper also clearly defines the roles and responsibilities of the national and provincial spheres of government with respect to local government. The roles and responsibilities indicates that national and provincial government are constitutionally required to take an active interest in ensuring the development of strong local government, capable of fulfilling its constitutional mandate. In return, municipalities are required to work with provincial and national government in their respective areas of jurisdiction, and enhance the effectiveness of national and provincial programmes. Local government should maintain open, cooperative and constructive relations with both provincial and national government, seeing its operation as a component of the broader developmental state structure.

Organized Local Government Priorities

The White Paper on Local Government also touches on the role of organized local government. The Constitution allows for municipalities to organise forms of municipal association and the South African Local Government Association (SALGA) was established to become the voice of local government.

SALGA's key role is the effective representation of local government in the legislative processes of all spheres of government and in intergovernmental executive processes. SALGA represents local government interests in forums such as the National Council of Provinces, the Financial and Fiscal Commission, the new Budget Forum dealing with intergovernmental transfers, intergovernmental structures such as MINMEC, and in the drafting of legislation that affects the status, institutions, powers and functions of municipalities.

SALGA is also an employers' organisation, and constitutes the employer component of the South African Local Government Bargaining Council. SALGA has a key role to play, not only as an employer in the South African Local Government Bargaining Council, but also in building capacity in the area of labour relations among its membership, and maintaining open and constructive relationships with organised labour. The successful transformation of local government requires that the relations between employer bodies and municipal trade unions are reconstructed around a common commitment to a developmental role for local government.

SALGA also has a responsibility to make a strong contribution to the development of municipalities through, amongst other things:

- The provision of specialised services to supplement and strengthen the capacity of municipalities;
- Research and information dissemination;
- Facilitating shared learning between municipalities;
- Human resource development; and
- Councillor training.

Vision 2014

Vision 2014 is South Africa's direct response to contribute and address the development challenges as set-out in the Millennium Development Declaration and to implement the above policies. At the Cabinet Lekgotla held from 20 to 22 January 2010, the adopted 12 Outcomes that reflect our mandate and derive from the Medium Term Strategic Framework. They are:

1. Improved quality of basic education
2. A long and healthy life for all South Africans
3. All people in South Africa are and feel safe
4. Decent employment through inclusive economic growth
5. A skilled and capable workforce to support an inclusive growth path
6. An efficient, competitive and responsive economic infrastructure network
7. Vibrant, equitable and sustainable rural communities with food security for all
8. Sustainable human settlements and improved quality of household life
9. A responsive, accountable, effective and efficient local government system
10. Environmental assets and natural resources that are well protected and continually enhanced
11. Create a better South Africa and contribute to a better and safer Africa and World
12. An efficient, effective and development oriented public service and an empowered, fair and inclusive citizenship

The five priorities identified in the manifesto of the ruling party correspond with the first seven outcomes while Local Government and Human Settlements have been added as priorities.

Eighteen years into the new Local Government system shows that a significant number of municipalities are in deep distress. The service delivery protests are a clear signal that the failings in local government cannot go unchecked. Problems at municipalities range from issues of poor governance and accountability, weak financial management, high vacancies in critical senior management posts and in a number of instances an inability to deliver even a core of basic municipal services efficiently and effectively.

Much of the reason for the limited success of past attempts to improve the performance of local government stemmed from the fact that we tended to treat all municipalities as uniform, undifferentiated entities. This was clearly a mistake and we now recognise, as you have in your department's Local Government Turnaround Strategy, that municipalities have different capacities and their social and economic contexts also vary. Our response to turn around local government should thus be conducive to the different contexts prevailing in municipalities. A further explanation for limited success was the inability of the national government departments that impact local government to develop a cohesive plan and co-operate fully to ensure a unified approach within their interventions.

Turnaround Strategy

The key question government undertook to reflect on with a range of role players over the past few months was *what is the state of local government in 2009, and what must be done to restore the confidence of our people in this sphere of government by 2010 and beyond?*

The Department of Cooperative Governance and Traditional undertook a process of provincial assessments of every municipality and came up with the State of Local Government produced in 2009. This report gave the status quo of municipalities' performance as per province. The report gave an overview of under-performing and performing municipalities. From this report, the department developed the Local Government Turn-Around Strategy (LGTAS). The Cabinet adopted the SLGR and LGTAS (2 December 2009). It was recommended that each municipality to develop their own MTAS as priority for intervention to derive root cause analysis and detailed evidential findings. In 2010, the Cabinet Lekgotla approved a 10 Point Plan and performance management system for municipalities to:

- Develop an implementation plan for MTAS
- Develop an Implementation Guidelines for phases 1-4 of MTAS process
- Rollout of MTAS pre-2010: January 2009 – March 2010

Local Government Ten Point Plan

The Local Government Turn-Around Strategy (LGTAS) is the basis for the Ten Point Plan for Local Government (2009-2014). The ten point plan outlines the following area:

1. Improve the quantity and quality of municipal basic services to the people in the areas of access to water, sanitation, electricity, waste management, roads and disaster management.
2. Enhance the municipal contribution to job creation and sustainable livelihoods through Local Economic Development (LED).
3. Ensure the development & adoption of reliable and credible Integrated Development Plans (IDPs).
4. Deepen democracy through a refined Ward Committee model.
5. Build and strengthen the administrative, institutional and financial capabilities of municipalities.
6. Create a single window of coordination for the support, monitoring and intervention in municipalities.
7. Uproot fraud, corruption, nepotism and all forms of maladministration affecting local government.
8. Develop a coherent and cohesive system of governance and a more equitable intergovernmental fiscal system.
9. Develop and strengthen a politically and administratively stable system of municipalities.
10. Restore the institutional integrity of municipalities.

The MEC FOR Cooperative Governance and Traditional Affairs signed a performance agreement based on the achievement of the following areas:

- Output 1: Implement a differentiated approach to municipal financing, planning and support
- Output 2: Improving Access to Basic Services
- Output 3: Implementation of the Community Work Programme
- Output 4: Actions supportive of the human settlement outcomes
- Output 5: Deepen democracy through a refined Ward Committee model
- Output 6: Administrative and financial capability
- Output 7: Single window of coordination

Analysis of Municipal Performance Information for 2011/12 Financial Year

The analysis of this performance information consists of the following KPA s:

KPA 1: Municipal Transformation and Organizational Development

KPA 2: Basic Service Delivery

KPA 3: Local Economic Development

KPA 4: Municipal Financial Viability and Management

KPA 5: Good Governance and Public Participation

KPA 6: Cross-Cutting Issues

Concluding Remarks

Key Performance Area 1:
Municipal Transformation and Organisational Development

This KPA will cover the following areas:

- Introduction
- Performance Management Systems.
- Filling of Section 57 Manager positions;
- Signed performance agreements by Section 57 Managers;
- Disciplinary processes against Section 57 Managers;
- Employment Equity
- Human Resource Development Strategy
- Municipal Budget spent on implementing workplace skills plan
- Challenges experienced in municipal transformation and organizational development (indicate specific municipalities)
- Interventions by national and provincial government, SALGA and other government agencies.

**Key Performance Area: Municipal transformation and
Organisational development**

Introduction

The main focus in this key performance area is the institutional and organisational capacity of municipalities to perform their functions and fulfil their developmental role as stipulated in the Constitution and the White Paper on Local Government. Institutional and organisational reform in local government is the key to sustainable municipalities. Having been allocated separate powers and functions entrenched in the Constitution, municipalities had to organise themselves in preparation to fulfil these functions and powers. Organisational transformation in local government is further explicitly prescribed in Section 51 of the Municipal Systems Act which provides as follows:

A municipality must, within its administrative and financial capacity, establish and organise its administration in a manner that would enable the municipality to:-

- a. be responsive to the needs of the local community;
- b. facilitate a culture of public service and accountability amongst its staff;
- c. be performance orientated and focussed on the objects of local government set out in section 152 of the Constitution and its developmental duties as required by section 153 of the Constitution;
- d. ensure that its political structures, political office bearers and managers and other staff members align their roles and responsibilities with the priorities and objectives set out in the municipality's integrated development plan;
- e. establish clear relationships, and facilitate co-operation, co-ordination and communication, between-
 - i. its political structures, political office bearers and its administration;
 - ii. its political structures, political office bearers and administration and the local community;
- f. organise its political structures, political office bearers and administration in a flexible way in order to respond to changing priorities and circumstances;
- g. perform its functions
 - i. through operationally effective and appropriate administrative units and mechanisms, including departments and other functional or business units; and
 - ii. when necessary, on a decentralised basis;
 - iii. assign clear responsibilities for the management and co-ordination of these administrative units and mechanisms;
 - iv. hold the municipal manager accountable for the overall performance of the administration;
 - v. maximise efficiency of communication and decision-making within the administration;
 - vi. delegate responsibility to the most effective level within the administration;
 - vii. involve staff in management decisions as far as is practicable; and
 - viii. provide an equitable, fair, open and non-discriminatory working environment

This key performance area focuses on organisational capacity and includes indicators that show progress on how municipalities have organised themselves in terms of building capacity to deliver, compliance with equity targets as well as implementing both the organisational and individual performance management systems. Municipal performance in this KPA was assessed in the following six (6) focus areas:

- Performance Management Systems.
- Filling of Section 57 Manager positions;
- Signed performance agreements by Section 57 Managers;
- Disciplinary processes against Section 57 Managers;
- Employment Equity; and
- Skills development.

It is important to note that not all municipalities and provinces submitted information in all of the above-listed six focus areas. The reporting varied from one province to the other, but almost all provinces reported on appointment of Section 57 Managers, employment equity and workplace skills plans. Even in these focus areas, the type of issues that were reported on were not uniform.

Performance Management System

Provincial Analysis

- Inadequate performance management and a lack of consequences for transgressions are at the root of many of the failures within municipalities
- Challenges
 - Lack of commitment and discipline
 - Controls and performance objectives of the municipality did not filter through to the performance contract of municipal official in order to direct their daily operations

Interventions

- Implementation of a sound performance management processes, evaluating and monitoring performance
- Consistence demonstration that non-performance has consequences

Recommendation

- Ensure PMS is in place to all municipalities
- Ensure that there is a robust performance management system linked to the requirements of the integrated development plan and the service delivery and budget implementation plan.
- Take oversight actions in respect of poor performance and transgression
- Provide technical support to the development of the appropriate performance management policies and systems

Source: 2011/12 Section 46 reports

Provincial Analysis

- All Municipal IDPs in the province were adopted with seven municipalities getting high scores during the analysis
- Dr JS Moroka and Thaba Chweu municipalities were the only municipalities that received the lowest ranks of 42%-48% ratings

Challenges

- Non- availability of sector plans e.g. (Water and Infrastructure Plans)
- Vacancies within municipalities making it difficult for them to perform to the expectations
- Report on the status of water quality not being mentioned by all municipalities
- Grant funding not re-infenced

Intervention

- 3 District IDP analysis were conducted to enable the sector plans to be district focused also to improve sector participation

Recommendations

- More attention to be provided to planning processes
- Sector departments to be encouraged to attend as it is very critical to have their sector plans
- More attention to be given to struggling municipalities

Provincial Analysis:

- Employment agreements for section 56 managers were coming to an end starting from 2010/11 financial year hence vacancies in this financial year increased. Other section 56 managers resigned during this period. New administration was to be elected in 2011. Most posts were not filled since other municipalities were waiting for the new administration to make appointments on vacant positions.

Challenges:

- Municipalities were delaying the process of appointing section 56 managers as a result strategic positions become vacant and that resulted in challenges on service delivery.
- Municipalities did not complying to the Municipal Systems Amendment Act specifically sections that deal with the appointment of section 57 managers as amended in 2011.

Interventions:

- Municipalities to be assisted with the development of recruitment acceleration plans in order to fill vacant positions.
- MEC to intervene by secondments on the vacant positions.
- Monitor the compliance of the Municipal Systems Amendment Act of 2011 on the appointments of municipal managers and managers directly accountable to municipal managers.

Source: 2011/12 Section 46 reports

Provincial Analysis

- The total number of cases has decrease from 125 in 2010/2011 financial to 99 in the current financial year. However Gert Sibande District is having more disciplinary cases which are 47, followed by Nkangala District with 38 cases and Ehlanzeni District with 14 cases.

Challenges:

- Out of the 77 cases that were resolved, some employees were dismissed as final verdict and non availability of a data base of dismissed is a limitation. Disciplinary cases are taking long before being finalised and the process of appeal is taking long before finalisation of cases.

Interventions:

- Development of data base for dismissed staff and continuous monitoring of appointments made in municipalities. Provide capacity in a form of training to Labour Relations Officers in municipalities.

Development and Implementation of specific HR policies and systems per municipality

The Human Resources Development Strategy (HRDS) of South Africa's key mission is to maximise the potential of our people through knowledge and skills acquisition to improve livelihoods (HRDS SA 2001). Capacity building at municipalities is crucial in achieving effective service delivery. As such, Human Resource management is aimed at strengthening institutional capacity. This is enshrined in the Municipal Systems Act of 2000:
68. (1) A municipality must develop its human resource capacity to a level that enables it to perform its functions and exercise its powers in an economical, effective, efficient and accountable way, and for this purpose must comply with the Skills Development Act, 1998 (Act No. 81 of 1998), and the Skills Development Levies Act, 20 1999 (Act No. 28 of 1999).

The HRD Strategy consists of 5 strategic objectives, namely:

1. Improving the foundation for human development;
2. Developing high quality skills that are more responsive to our developmental needs;
3. Improving and increasing employer participation in lifelong learning;
4. Supporting employment growth through creative innovation and policies; and
5. Ensuring that the four objectives above are linked.

The table below indicates the status with regards to the development and implementation of specific HR policies by municipalities.

Employment Equity

This indicator is solely to determine the targets that the municipalities have either successfully achieved or partly achieved, as stipulated in their employment equity plans approved by the municipal councils. It incorporates the General Key Performance Indicator prescribed by the Minister in terms of Regulation 10 (e) of the Municipal Performance Management Regulations of 2001 which reads as follows:

Number of people employed from employment equity target groups employed in the three highest levels of management in compliance with the municipality's employment equity plan .

Skills Development

This focus area is in response to one of the prescribed key performance indicators in terms of the Municipal Performance Management Regulations of 2001. All municipalities are obliged to report on progress in building skills capacity to deliver according to the developmental mandate.

Adoption of Workplace Skills Plans

Number of local government staff trained during the year under review as compared to 2009/10 and percentage of budget spent in implementing municipalities' Skills Development Plans

Compliance with the EEA

Provincial Analysis

- The total number of women appointed in senior manager positions in the province is 20 out of 123 senior managers positions. This constitutes only 16% of women appointments. The number of female managers has come down. Previously there were two woman municipal managers and later became one.

Challenges:

- Municipalities are not adhering to their Employment Equity Plan hence are not progressing towards reaching target of women representation at senior management level as per the Act.

Interventions:

- Continuous monitoring of compliance to the Act by municipalities and analyse Equity reports submitted by municipalities to the Department of Labour.

Provincial Analysis

- The employment rate of people with disabilities in municipalities is still low. The status quo of appointed people with disabilities in municipalities during 2011/2012 financial year compare to the previous year has no change. Only few municipalities have appointed people with disabilities. According to the Provincial trends, the number of people with disabilities is increasing from the previous financial year 2010/2011.

Challenges:

- A number of municipalities still are not complying with Employment Equity Act and EEP is mainly not considered when recruiting staff.

Interventions:

- Continuous monitoring of compliance to the Act by municipalities and analyse Equity reports submitted by municipalities to the Department of Labour.

Provincial Analysis

- All municipalities in the Province have appointed staff aged 35 or younger,

Challenges:

- Still the appointment of youth in most municipalities is below 30% which is an indication that appointment of youth is not a priority or experience is considered mostly. Even interns are not considered for recruitment after completing their experimental training.

Interventions:

- To assist municipalities in conducting workforce analysis and development of human resource plan.
- To monitor the implementation of EEP in order to ensure compliance with the Employment Equity Plan.

Provincial Analysis

- Municipalities in the Province have the above policies and plan in place.

Challenges:

- Implementation of these policies/plans during both recruitment phase and development phase of human resource.
- Most of these policies from municipalities are not addressing issues of retention strategy, succession and performance relationship between employers and employees below section 57 managers.

Interventions:

- Continuous monitoring of those plans and assists municipalities during the review period of their policies.
- Assisting those municipalities without retention strategy and succession plan.

Source: 2011/12 Section 46 reports

Provincial Analysis

- Workplace Skills Plan are very difficult to compile, most municipalities are struggle to compile it.
- Skills audit of officials are not properly conducted
- Most municipalities are not using the organisational framework of occupation code(OFO) when compiling the WSP.
- Most municipalities are using the grant allocation for skills development for other purpose

Challenges

- Workplace Skills Plan are used for compience purpose and not dealing with the real issues to address scarce and critical skills
- Employment of incompetent personnel /mismatched skills to the position is a challenge
- Sector Department and stakeholders are not planned with Municipalities , they are planning for them
- Capacity development initiatives are often supply driven than demand driven
- Department and Stakeholders are not prioritising skills development (not budgeting for skills development)
- Most Municipalities do not have a dedicated Skills Development Facilitator such as Victor Khanye, Thabu Chweu and Dr JS Moroka (post are advetised but not filled)
- Grant disbursement are used for other purpose not for skills development

Intervention

- All capacity development initiatives will use Cogta as a point of entry to encourage the Single Window of Coordination
- Advice Chief Financial Officer to create a separate vote for skills development
- Implementation of the Provincial Capacity Building Framework which is inline with the NCBF
- LGSETA has been approached to try to simplify the template of the WSP for easy compilation
- Municipalities are advised to fill the vacant funded post
- Skills Development Facilitator to sit in Management meetings and IDP forums to ensure that capacity building issues are taken in to consideration

Recommendations

- That SDF sits in Management meetings and IDP Forums to ensure that capacity building issues are taken in to cinsideration
- That WSP be not tabled on the training committee alone but to all structures such as Council and the MM must owned the document not only signed it at the end of submission to LGSETA.

- That vacant funded position of SDF's must be filled as a high priority.
- That separate vote be created for skills development
- That Municipalities must used Gapskills Tool to conduct Skills Audit

Section 139 interventions

The Provincial Government invoked major interventions as per section 139(1)(b) of the Constitution and placed the following municipalities under administration during the year under review:

Table 11:No of municipalities put under section 139 interventions

Provincial Analysis**Challenges**

- 1) 6 Months not sufficient for intervention to implement turn-around strategies;
- 2) Support from sector departments during the intervention period;
- 3) Ability of municipalities to sustain the turn-around strategies.

Interventions

- 1) Interventions were extended to ensure impact is achieved;
- 2) Sector departments such as the Departments of Finance, Public Works Roads and Transport, Safety, Security and Liaison, Office of the Premier and District supports were mobilised;
- 3) After care support programmes developed for municipalities on termination of interventions;
- 4) Assessment of municipalities to categorise them in terms of support needed;
- 5) Development of an integrated support plan for all municipalities.

Recommendations

- 1) Improve performance monitoring and evaluation in municipalities to identify challenges and to mobilise support needed pro-actively to avoid interventions.

Key Performance Area 2:
Basic Service Delivery

This KPA will cover the following areas:

- Introduction
- Progress
 - Access to Free Basic Services
 - Water
 - Sanitation
 - Electricity
 - Refuse removal
 - Access to Basic Services
 - Water provision
 - Waste Water
 - Electricity
 - Waste management
 - Housing
 - Bucket System Eradication
 - Indigent Policy implementation
 - Roads and Transport
 - Infrastructure
 - Transport (vehicle registrations)
 - Public bus transportation
 - Challenges experienced in basic service delivery (indicate specific municipalities)
 - Interventions by national and provincial government, SALGA and other government agencies
 - Impact of support by stakeholders.

Key Performance Area 2: Basic Service Delivery

Introduction

This KPA entails the assessment of the ability municipalities to deliver infrastructure and basic services, and also report on the role played by national and provincial departments in the different sectors in the execution of their functions. Local Government works in partnership with the communities to find sustainable ways to meet their needs and improve the quality of lives. As entrenched in the Constitution, the Millennium Development Goals as well as Vision 2014, government has geared itself to achieve targets for universal access to basic services.

Municipalities are at the forefront of attempts to achieve high levels of service delivery. Service delivery has assumed centre stage in South Africa, due to highly publicized events related to wide-spread protests within various communities. This has put even greater pressure on municipalities to deliver on their mandates and to ensure effective service delivery. The role of municipalities is crucial in dealing with many of the challenges that have led to such high levels of discontent. A crucial aspect of this process is the provision of basic services such as water, electricity and sanitation for all communities. The historical backlogs in the provision of basic infrastructure for service delivery require that municipalities establish a delicate balance between delivering and improving current services, maintaining existing infrastructure and extending the infrastructure to eradicate the backlog in service delivery. The COGTA must ensure that Municipalities in the province are fully functional to enable the delivery of infrastructure and municipal services. This chapter attempts to give an indication of the performance of the municipalities during the municipal financial year ending June 2011. Information used throughout this chapter was submitted by municipalities during March 2012 to provinces.

The report will reflect on service delivery trends and progress achieved over a number of years to enable an informed assessment of improvement or underperformance. The analysis will provide information on achievements per targeted services and variance for non-achievement.

The focus areas that measure the performance of municipalities in this KPA are the following:

- Access to basic services
 - Access to portable water to all households
 - Access to adequate sanitation
 - Universal access to electricity
- Municipal Infrastructure Grant (MIG)
- Bucket system eradication
- Free Basic Services (FBS)
 - Indigent policy implementation
 - Free basic water
 - Free basic sanitation
 - Free basic refuse removal

Performance Information Analysis and Progress

Provision of basic services

Government is committed to providing access to electricity, water and sanitation as basic services to address the infrastructural backlog. Seventeen (18) years into democracy, government's development programmes are beginning to show tangible results in that access to basic services has improved substantially since 1994. Analysis of progressive trends is provided below on each of the basic services.

Access to potable water to all households

In relation to water services, government's goal is for all people of South Africa to have access to potable water by 2014. The MDG goal is to halve proportion of people without sustainable access to improved water source between 1990 and 2015. The basic level of water service is an RDP standard equivalent to a minimum of 25 litres of potable water per day within 200 metres of a household not interrupted for more than 7 days in any year and a minimum flow of 10 litres per minute for communal water points. The South African service standard is substantially higher than the one defined by the MDGs as 20 litres of potable water per person per day within 1 000 metres of a household.

PROVINCIAL ANALYSIS:**Water supply backlog**

- Ageing bulk infrastructure
- Lack of Operation and Maintenance plans
- Lack of water demand management plans in municipalities
- Contamination of water resources due to poor functionality of waste water treatment works
- None availability of cost recovery plans

Sanitation Backlogs

- Lack of Operation and Maintenance plans
- Ageing bulk infrastructure
- None availability of cost recovery plans
- Limited water resources to expand the bulk infrastructure for sanitation

Refuse removal backlogs

- Lack of formal or licensed waste disposal facilities
- Lack of access to refuse removal services
- Lack of equipment s
- Lack of formal and well-coordinated recycling programmes
- Lack of regional waste disposal sites

Electricity Backlogs

- High level of illegal connections
- None availability of electricity bulk infrastructure plans in municipalities
- Insufficient bulk infrastructure to accelerate electrification programmes
- Insufficient funds to expand the current bulk electricity infrastructure in municipalities

Free Basic Services

The Free Basic Services (FBS) programme policy was adopted in 2000 after Government announced its intention to provide free access to basic services in the fight against poverty. It is required that municipalities adopt indigent policies and draw up registers of indigent people and households that are within their jurisdictions in order to accord those people who had been registered as indigent free basic services. There has been tremendous progress in municipal performance in this regard and the year under review recorded an increase in poor people who have benefitted from the free basic service policy.

Provincial Analysis

Challenges

Poor planning (projects identification, Application for project registration)

Misappropriation of the MIG funds affecting project implementation

Slow municipal procurement processes delays appointment of service providers for project implementation

Poor spending on the MIG programme

Poor quality of implemented infrastructure projects, e.g. roads

Lack of technical capacity to manage the implementation of infrastructure projects

Intervention

- Deployment of technical experts from the Development Bank of South Africa (DBSA) to municipalities in order to improve the technical capacity through the *Siyenza Marje* Programme
- Regular working sessions with the struggling municipalities
- Municipalities assisted with the development of procurement plans
- All municipalities advised to ring fence their MIG allocations to avoid misappropriation of MIG funds and bank statements to be submitted on a monthly basis

Recommendations

- Municipalities to fast track appointment of service providers to ensure a timeous implementation of projects and improve spending
- The Department to continue support municipalities to ensure projects are registered on time
- The Department to assist municipalities with the development of Infrastructure Development plans

Indigent Policy implementation with regard to provision of free basic services

Provincial Analysis**Challenges**

- Data collection and reporting is still a major challenge
- Operation and maintenance of infrastructure assets, including the development of accurate and up to date asset registers
- Insufficient funding to implement the programme
- Problems of identifying indigent households

Intervention

- A Provincial workshop conducted to discuss the FBS policy and the reporting requirements

Recommendations

- Municipalities to have FBS Officers to ensure data collection is done on a monthly basis
- Municipalities to review indigent registers twice a year to ensure they are providing to the correct people

**Key Performance Area 3:
Local Economic Development**

This KPA will cover the following areas:

- **Introduction**
- **Progress**
 - Number of jobs created through infrastructure capital projects (*this should include Previously Disadvantaged Individuals*)
 - Development and implementation of LED strategies and plans
 - Capacity for implementing LED in municipalities
- **Challenges experiences in local economic development**(indicate specific municipalities)
- **Interventions by national and provincial government, SALGA and other government agencies**
- **The impact of support by stakeholders.**

Key Performance Area 3: Local Economic Development

Introduction

This is one of the most important KPA's that the national government intended using to push back the frontiers of poverty and build a developmental state. The analysis should provide information on achievements per targeted services, capacity and variance for non-achievement. It cannot be doubted that an unemployment rate of 28.7 is high and if all spheres of government do not collectively play a meaningful role in creating conducive environments to attract jobs, more people will end up in the social grant lists, which puts a tremendous strain on government. The reports from the various provinces reveal that each sector within the municipalities supports this function and there are a lot more indicators that reflect positive outcome, some of which are outlined below. However, LED is one of those KPA's that most municipalities push to the back burner and not allocate enough attention, planning and resources to it. It is even worse that most municipalities have not reached a level of appreciating the relevance of the principles of the National Spatial Development Perspective, the importance of developing their Spatial Development Frameworks and LED strategies and linking these with their IDPs and the Provincial Growth and Development Strategies.

LED has been recognized as a critical approach to pursue within the context of empowered municipalities, pro-active actions by local communities, and the need to ensure that development is pro-poor in its focus and outcomes. However, even though LED has been encouraged in South Africa for over sixteen years, it is apparent that it is not without its difficulties. The launch of the National Framework for LED by the COGTA in August 2006 resulted in its initial implementation.

Local Economic Development (LED) strategies are at the centre of efforts by municipalities to create economic growth and development. It is an absolutely vital tool at the disposal of all municipalities and has the potential to radically improve the lives of all municipal constituents by enabling growth and reducing poverty. However, the strategies associated with LED are not to be viewed as a quick-fix solution to these problems. There are a myriad of potential challenges and obstacles that need to be overcome in implementing such a comprehensive strategy from local political conditions to the impact of globalization. In essence, the aim of an effective LED strategy is to reduce the impact of factors that adversely affect local economic growth such as the rapid increase in urbanisation (which affects all municipalities in some way), as well as global economic ruptures, such as the financial crisis which had a significant impact during the year under review. In order to mitigate these risks, LED requires absolute commitment from the various stakeholders involved in its development and implementation.

An LED strategy forms part of the IDP for each municipality. In many respects, it is the most crucial aspect of an IDP and plays a determining role in the effectiveness of the overall IDP approach. As such, an LED strategy needs to ensure the following:

- Assimilation of socio-economic conditions and needs;
- Establishment of the economic profile of the region;
- Selection of priorities;
- Development of policy thrusts;
- Formulation of strategic interventions;
- Formation of implementation plans;
- Programme and project development that addresses strategic objectives;
- Key performance areas for projects and programmes, including timeframes, targets and reporting mechanisms; and
- Indication of budget prioritization and allocation to deliver on economic priorities

LED development is also not a once-off process. Municipal LEDs need to be continually revised with comprehensive reviews taking place at least once every five years. In order for this oversight role to be effective, LED Forums need to be established. The main reason for establishing such a forum is to expand the scale and scope of LED initiatives, by systematically

leveraging support from partners in localities. This will then lead to interactions within local communities, private sector, organised businesses, sector development organisations, educational institutions and other support institutions that are rich in expertise, resources, relational capital and networks. The LED Forum will, in essence, provide the opportunity for regions to achieve enhanced cooperation through the participation of various institutions and contribute towards the economic development of the region in such a way that all parties will benefit.

A District LED Forum needs to meet at least on a quarterly basis, or when required, on a more regular basis. The District Municipality plays an important role in the co-ordination of these meetings and in ensuring proper communication between the various stakeholders. These meetings need to be coordinated according to a set agenda, which will guide the LED Forum meeting. Issues raised and decisions made at the various meetings need to be recorded in order to keep a record of all decisions made regarding economic development in the region. It is also important that implementation of the decisions made in these meetings by the various parties need to be actioned. This implies that an action plan becomes the essential output of an LED forum meeting.

Ultimately, an effective LED strategy has the potential to improve the quality of life of local communities. However, this is dependent upon the genuine prioritization of the LED by all stakeholders and the active pursuit of its effective implementation. This requires significant levels of coordination between all stakeholders, as well as effective oversight.

Development and implementation of LED strategies and plans

Challenges

- The LED strategy is outdated was developed in 2006 and never reviewed.
- Minimal funding and technical capacity to review the strategy.
- Lack of technical capacity.
- None prioritization of LED as a Key Performance Area

Intervention

- District commitment to support its constituent municipalities with the review of the LED strategy.
- LED officials placed on Skills development
- Municipality to prioritise LED like other KPA's of the municipality
- The municipality to review the LED unit organogram to have a suitable number of officials to perform the function.
- The municipality to increase the budget for the implementation of the LED programme.

Recommendations

Capacity for implementing LED in municipalities

The institutional capacity to lead and manage LED is a crucial element that is fundamental to the success achieved by the different municipalities in this KP. Municipalities are building this capacity in a variety of ways including establishing dedicated LED units and appointing LED managers, and in some municipalities they set up local economic development agencies as special purpose vehicles established outside the municipal offices to unlock economic development potential of a municipality.

Provincial Analysis**Challenges**

- Lack of technical capacity.
- None prioritization of LED as a Key Performance Area

Intervention

- LED officials placed on Skills development

Recommendations

- The municipality to review the LED unit organogram to have a suitable number of officials to perform the function.
- The municipality to increase the budget for the implementation of the LED programme.

Number of jobs created through municipalities local economic development initiatives, including capital projects

This focus area is one of the prescribed general key performance indicators provided in terms of Regulation 10(d) of the Municipal Planning and Performance Management Regulations of 2001. The purpose of this indicator is to assess and reveal the extent to which municipalities contribute towards creating jobs through the implementation of capital projects, as well as their own LED initiatives.

Table 21: Number of jobs created per District

Provincial Analysis**Challenges**

- No technical capacity to monitor CWP
- CWP structures not functionally
- None availability of indigent registers
- CWP not integrated into municipal IDP

Intervention

- To conduct training all CWP structures
- To provide technical support in integration of CWP into municipal IDP

Recommendations

- Municipalities to appoint dedicated officials to monitor CWP

Table 22: EPWP implementation per municipality in the province

EPWP Provincial Analysis**CHALLENGES**

- Under reporting on Social by Municipalities,
- Late progress reports by NDPW
- Late reporting of project data
- Poor reporting pack of information
- Failure to optimize on the Incentive Grant by some reporting bodies to optimize WO
- Inadequate of Budgets to support EPWP Unit
- Poor Turnaround time for appointing data capturers by Public Bodies,
- Lack of EPWP Champions in some municipalities

RECOMMENDATIONS

- All active projects creating jobs must be reported on time
- All projects Information should be submitted with data reports by 20- every monthly
- Incentive Grants to be fully utilized and DoRA reports submitted by 15; every monthly
- Public Bodies should budget for EPWP unit
- Public Bodies to use 5% of Incentive grant to appoint own Data Capturers and register them as a project
- Public Bodies to appoint EPWP Champion

A work opportunity is paid work created for an individual for any period of time. The same individual can be employed on different projects and each period of employment will be counted as a work opportunity. A work opportunity in the Infrastructure sector has a average duration of four (4) months and in the Environmental and Culture sector an average of duration of six (6) months. One Person-Year of work is equal to 230 paid working days including paid training days. The calculated wages paid out to employees on EPWP projects have been calculated by multiplying the minimum wage rate with the person-day's work

**Key Performance Area 4:
Municipal Financial Viability and Management**

This KPA consists of the following areas:

- Introduction
- Financial viability
- Capital expenditure by municipalities
- Compliance with the MFMA
- Municipal budgets, expenditure and revenue sources
- Financial viability defined in terms of debt coverage, outstanding debtors to revenue and cost coverage by h municipality
- Challenges experiences in municipal financial viability (indicate specific municipalities)
- Interventions by national and provincial government, SALGA and other government agencies
- Impact of support by stakeholders.

Key Performance Area 4:**Municipal Financial Viability and Management****Introduction**

Profound fiscal efficacy, discipline, prudence and monitoring all provide a sound basis for the delivery of all the key and fundamental municipal objectives. It is therefore imperative that municipalities not only purport to portray but embrace an intrinsic and frugal duty to maximize revenue potential while transparently managing public finances as set out in the Municipal Finance Management Act 2003, and the Municipal Property Rates Act 2004 following the proper International Accounting Standards as prescribed in policy and regulation. The guidelines set therein provide for effective accountability, evident financial sustainability and a financial viability conducive to infrastructure investment and service delivery.

The financial performance of municipalities is based on the 20011/12 financial statements.

- Financial viability data is based on the 20011/12financial statements of the municipalities. Municipal financial statements are not all in the same format, there are instances where it is difficult to compare the same items across municipalities. In cases where ambiguity may exit, please refer the municipality's individual financial statement.
- An attempt is made to ensure that the data tables in this report are for the status as at end June 2012.
- Audited financial statements were requested from municipalities and the statements received are considered audited unless unaudited set was received and it wasn't highlighted as such by the municipality.
- Interpretations of the annual financial statements were made based on the statements received from municipalities.

Financial Viability

This is the main prescribed key performance indicator. It is therefore compulsory for all municipalities to submit annual reports on achievements or challenges encountered in achieving according to ratios set in the 2001 Regulations.

The financial viability of Local Government is measured using three key performance indicators:

- a) **Debt coverage** which denotes the rate at which a municipality to meet its debt service payments with the financial year from its own sources of revenue. A municipality should have 20% debt coverage.
- b) **Outstanding service debts to revenue** refer to the ability of a municipality to service its debts dependent on the rate at which the municipality collects amounts owed to it. In other words it represents the ratio of outstanding debtors to total revenue.
- c) **Cash flow** measures the rate at which municipalities can cover their costs, that is the debtor collection rates which result in sufficient cash to enable the municipalities to meet their day to day operational costs. It is mandatory for municipalities to determine cash flow requirements to maintain operations and also have adequate measures to foresee the need to alter operations as required.

Provincial Analysis

Challenges

- Municipalities are not performing well with the spending of the capital budgets.
- The biggest challenge remains the ability to plan for projects.
- The delay in the supply chain management process further contributes to the slow spending of the municipal infrastructure Grants.
- Grant funds utilized for operational expenditure due to cash flow challenges

Intervention

- COGTA to assist municipalities with acceleration plans to spend.
- Municipalities will be supported with regard to capacity challenges in the areas of planning and project management.
- COGTA to co-ordinate capacity development in the areas of Supply Chain Management and through the deployment of staff.
- Deployment of experts in areas of technical and financial management.

Recommendations

- Municipalities to plan in advance for projects to start with implementation by July.
- Municipalities to keep grant funding in dedicated account.
- Municipalities to implement revenue generating strategies to improve cash flow status

Provincial Analysis

Challenges

- Grants not utilized for intended purpose
- Reporting on grant spending poor

Intervention

- Open dedicated accounts for municipal infrastructure grants
- Monitor spending of grant spending on monthly basis

Recommendations

- All municipalities to secure grant funds in separate accounts.
- All municipalities to improve on reporting on monthly basis
- COGTA and Treasury to monitor grant spending on monthly basis

Compliance with Municipal Finance Management Act, 2003

The Municipal Finance Management Act, 2003 stipulates that each municipality and municipal entity must timeously prepare and submit to the Auditor General an Annual Report for each financial year. This report consists mainly of the Annual Financial Statements (and their explanations thereof), the Auditor General's Report (including corrective action taken or to be taken based on the audit reports), audit committee recommendations, approved annual budgets and annual performance report (Section 46 Report). The Annual Financial Statements and the annual performance report (Section 46 report) must be submitted to the Auditor General's office by 31 August and the audited financial statement together with the audit reports must be ready by 31 December. The Annual Report must be tabled in council by 31 January. This annual reporting forms the basis for transparent governance and accountability and acts as a measure of performance for each previous financial year. The requirements for this statutory disclosure by municipalities are measured through their demonstration that they comply with the three Key Performance Indicators as follows:

Submission of Municipal Annual Financial Statements by 31 August 2012

Section 126(1)(a) of MFMA provides as follows. The accounting officer of a municipality must prepare the annual financial statements of the municipality and, within two months after the end of the financial year to which those statements relate, submit the statements to the Auditor General for auditing. They are the most important record of the financial status of a municipality and must be prepared and submitted to the Auditor-General no later than 31 August of each.

The following audit opinions based on the audit of the financial statements of municipalities can be issued;

- **Unqualified opinion** - The opinion is expressed when the auditor concludes that the financial statements is fairly presented.
- **Qualified opinion** - The opinion is expressed when the auditor concludes that misstatements, individually or in the aggregate, are material, but not pervasive, to the financial statements; or the auditor is unable to obtain sufficient appropriate audit evidence on which to base the opinion, but concludes that the possible effects on the financial statements of undetected misstatements could be material, but not pervasive.
- **Disclaimer opinion** - The opinion is expressed when the auditor is unable to obtain sufficient appropriate audit evidence on which to base the opinion and the undetected misstatements on the financial statements are both material and pervasive.
- **Adverse opinion** - The opinion is expressed when the auditor concludes that misstatements, individually or in the aggregate, are **both material and pervasive** to the financial statements.

Provincial Analysis

Challenges

- ✓ Performance management
- ✓ Competencies of key personnel
- ✓ Compliance with laws and regulations not reviewed
- ✓ Not all staff members' performance was monitored on a regular basis
- ✓ Performance management agreements were not signed by management
- ✓ HR policies and procedures are inadequate to ensure that only skilled and competent personnel were recruited
- ✓ Non-current assets
- ✓ Current assets
- ✓ Current liabilities
- ✓ Revenue
- ✓ Expenditure
- ✓ Unauthorized, irregular and fruitless and wasteful expenditure
- ✓ Key vacant positions
- ✓ Lack of ongoing monitoring and supervision
- ✓ Inadequate controls over daily and monthly processing and reconciliation of transactions
- ✓ Lack of regular, accurate and complete financial reports
- ✓ Lack of commitment

- ✓ Inadequate record keeping
- ✓ Inadequate risk assessment
- ✓ Management failed to implement internal audit recommendations
- ✓ Ineffective audit committees

Intervention

- ✓ COGTA and Provincial Treasury supported municipalities to conduct risk assessments and with development of audit plans.
- ✓ Additional training coordinated by COGTA for MPAC members during 2013.
- ✓ COGTA supported all municipalities with the development of Anti - Corruption Strategies.
- ✓ Steering committee formed to assist with the implementation of clean audit

Recommendations

- ✓ Constant monitoring by the steering committee on clean audit implementation
- ✓ Clean audit be a standing item on Premier's Coordinating forum as well as MPACs

Source: 2011/12 Section 46 reports

Provincial Analysis

- The total debt owed to municipalities in Mpumalanga Province amounted to R3, 6 billion in 2010 and R3, 5 billion in 2011 and R4, 4 billion as at end June, 2012
- Generally there was a 20% increase in debtors for the year under review

Challenges

- Incorrect billing
- Data cleansing
- Illegal connection
- Poor implementation of credit control measures

Intervention

- As part of supporting municipalities to collect debts owed by government departments, Debtors committee was established in accordance with section 6(4)(3)

Source: 2011/12 Section 46 reports

Provincial Analysis

- The strategy document ensures the sustainability as an organisation.
- The strategy will ensure that the municipality's future is not at risk, but viable as matter of choice and not chance. During 2011, 5 municipalities have draft revenue enhancement strategies developed and 11 municipalities have developed and approved their revenue enhancement strategies and partially implemented.
- The revenue base for municipalities increased due to the implementation of municipal property rates Act.

Challenges

- Poor status quo analysis
- Poor planning which is based on inaccurate and incomplete information
- Lack of Strategy implementation

Interventions

- Cogta, Provincial Treasury and SALGA must continue assist struggling municipalities with the development of revenue enhancement plan and a detail status quo analysis to establish the current performance of municipalities

Recommendations

- Successful revenue enhancement program implementation is dependent on a structured planning and management implementation processes.
- The four phases should be followed consecutively, as each phase is dependent on the output of the previous phase. The phases are as following;

- ✓ Municipal Status quo assessment
- ✓ Strategy developed
- ✓ Strategy implementation and
- ✓ Operational

Key Performance Area 5:
Good Governance and Public Participation

This KPA consists of the following areas:

- Introduction
- Progress
- Ward Committees
- Deployment of Community Development Workers
- Intergovernmental relations
- Anti-corruption
- Traditional leadership
- Presidential, Ministerial and Mayoral s Izimbizo
- Standard operating procedures and delegations
- Challenges experiences in good governance and public participation (indicate specific municipalities)
- Interventions by national and provincial government, SALGA and other government agencies

**Key Performance Area 5:
GOOD GOVERNANCE AND PUBLIC PARTICIPATION**

Introduction

Good governance according to the democratic principles is achieved through effective public participation. Not only does public participation allow constituents to monitor the governance record of its elected officials, but it also encourages the public to take an active interest in the performance of their municipality and region. It is only through broad public participation that citizens will recognise that their interests are taken to heart especially the needs of the most vulnerable members of society. This allows all citizens to be heard in determining the political, social and economic priorities through the establishment of a broad societal consensus that includes civil society, government and the private sector. Active ward-based plans and consultative forums are central structures through which public participation and, ultimately, good governance can be achieved.

This necessarily means that municipalities need to be enabled to perform their duties in order to ensure the implementation of good governance practices and public participation. Section 151 of Chapter 7 of the South African Constitution gives each municipality the right to govern the local government affairs of its community on its own initiative, subject to national and provincial legislation. Additionally, the by-laws of municipal councils are legislative acts that are not reviewable in terms of administrative law.

However, community participation alone is not sufficient in ensuring that good governance practices are adopted. Institutional integrity is of equal importance and individual municipalities should ensure that its Finance Committee, Audit Committee, Council and sub-committees are fully functional. This should be done through the adoption of effective by-laws and policies that entrench the effective performance of all aspects of municipal governance. As such, this chapter will analyse various indicators related to good governance and public participation in order to determine the extent to which municipalities in the provinces have succeeded in implementing these strategies.

Ward Committees

The Ward Committees were established in terms of Chapter 4 of the Municipal Structures Act, 1998. The ward committee system was designed to ensure that citizens inputs are taken into account during planning and decision-making processes at local government level. However different municipalities used different approaches to the establishment of Ward Committees leading the COGTA to gazette guidelines for Establishment and Operation of Ward Committees in 2005 to ensure that there was similar understanding within the municipalities on the establishment and functioning of Ward Committees and also to provide a clear framework for the Ward Committee members, ward councilors, metropolitan, district and local municipalities on the formation and functioning of Ward Committees. The legislation did not make provision for the remuneration of ward committee members as a result it is difficult to find dedicated members of the community who are willing to serve without remuneration.

The structures Act also make it compulsory for the Ward Councillor to be the chairperson of the ward committee. Invariably he has been tasked with the responsibility of calling ward committee meetings. Majority of ward committee have not been sitting due to Ward Councillors not calling meetings. Municipalities do not provide sufficient administrative and human resource support to the ward committees for the effective and efficient operation.

The ward committee system was established and designed to ensure that the grassroots inputs are considered in planning and decision making processes at the municipal level. This process has been supported by the COGTA, Provincial Departments of Local Government and SALGA through the provision of training and developing manuals for Ward Committee members. Table 16 below shows the progress that has been made by the different provinces in establishing Ward Committees, against all odds the municipalities have to be faced with. Good Governance and Public Participation is made up of the following three (3) KPIs:

- Ward Committees,
- Community Development Workers (CDW) and
- Traditional Leadership.

Municipalities are assessed on progress made in ensuring public participation. This is done through the Ward committees, IGR structures and public participation processes.

Table 28: Functionality of Ward Committees

Provincial Analysis

Deployment of Community Development Workers

The Community Development Workers (CDWs) programme is a presidential project announced by President Mbeki in his State of the Nation Address in February 2003 and was launched in 2004. It involves the deployment of CDWs in the wards within the municipalities to assist in strengthening the democratic social contract, advocating an organized voice for the poor and improvement of government community social networks.

Community Development Workers (CDW) serve as a channel for the provision of integrated information on government services and provide a channel for ensuring that community issues are taken forward at all levels of government. Community Development Workers (CDWs) play an important role in providing linkages between local communities and government services. These workers are defined as civil servants who are passionate about serving their local communities. As such, they have vast grassroots knowledge about local conditions and serve as a valuable resource to make service delivery more effective. Communities, especially in impoverished areas, are often unaware of their basic minimum service rights related to grant applications, service cuts and school enrolments. CDWs play a crucial role in this regard, informing local communities about government services and assisting in the clearing of service delivery backlogs. This means that these workers form an important communication link between government and communities in order to mobilize their communities to become active participants in government programmes.

Challenges

- Local supervision of the Community Development Workers
- Lack of monitoring the daily activities of the CDWs

Intervention

- Appointment of 18 supervisors in 18 Local Municipalities
- Capacitation and resourcing of the operation centre

Recommendations

- Funding of the 18 supervisors posts
- Inclusion of the Operation Centre into the departmental structure

Table 29: Shows the total number of deployed CDW s in the province in 2010/11 compared to 2011/12.

Source: 2010/11 Section 46 reports

Provincial Analysis

- 85% of Ward Committees were established.
- Workshop on the clarification of roles and responsibilities between CDWs, Ward Councillors and Ward Committees has conducted to strengthen the relationship.
- Training of Ward Committees on Ward Operational Plans in Nkangala and Ehlanzeni Districts were done
- 10 Local Municipalities, out of 18 are already implementing the Framework on the payment of out-of pocket expenses for Ward Committees
- 394 CDWs deployed in the province and supported in improving service delivery and unblocking blockages towards service delivery
- Implementation of the Early Warning system is effectively done by CDWs

Challenges

- Gert Sibande District has appointed a service provider to train their Ward Committees and the provider trained on a different aspect.
- Umjindi Municipality is providing Cell phone allowance to the Ward Committees not the out of Pocket Expense.
- Emakhazeni is providing only transport and catering for Ward Committees meeting and doesn't provide the out of pocket Expenses.
- Nkomazi Municipality was not provided with the grant and therefore unable to provide the Out of pocket expenses.
- Emalahleni does not Provide the out of pocket expenses.
- Steve Tshwete, Mkhondo, Lekwa and Thaba Chweu Municipalities will provide the Out of Pocket Expenses in the next financial year

Intervention

- Training to all ward committees to be the same aspects/fields
- Develop a standardise provisioning of out of pocket system for all ward committee members

Recommendations

- Technical team to be deployed in Gert Sibande District for intervention
- Provision of training on the reporting of the Early Warning System

Provincial Analysis

- All municipalities were advised by the department to establish both Section 79 and Section 80 committees in terms of the Local Government Municipal Structure's Act of 1998, for effective oversight on administration and the executive to promote good governance.
- Out of 21 municipalities only fifteen (15) were able to establish Section 80 committees and six (06) did not establish them. In the 15, only one municipality has non-functional Section 80 committees (Dipaleseng), which is as a result of the municipality being small.
- The municipalities without Section 80 Committees are the following: Nkangala, Thembisile Hani, Lekwa, Mbombela, Emalahleni and Mkhondo.
- In Victor Khanye and Govan Mbeki local municipalities, their Section 80 committees are not chaired by Member of the Mayoral Committee as per the legislation
- All 21 municipalities have established their Municipal Public Accounts Committees and all members were given workshops and training on their roles and responsibilities as well as how to analyse the annual report and to develop an Oversight Report.
- All MPACs do submit evidence of their sitting, in other municipalities they refuse to submit minutes of their meetings due to the sensitivity and confidentiality of the information contained but they do provide agenda and attendance registers.
- All municipalities do have council sittings as well as special council sittings.

Challenges

- Non establishment of Section 80 Committees for the 6 municipalities (Nkangala, Thembisile Hani, Lekwa, Mbombela, Emalahleni and Mkhondo)
- Composition of other council committees which leads to non sitting of those committees
- MPAC members still needs further training on their roles as some members are new to the committee as a result of having others resigned.

Intervention

- An Adopt an MPAC campaign was established to assist all Municipal Public Accounts Committees. Although some MPACs are not taking the opportunity of the Adopt an MPAC campaign due to the sensitivity and confidentiality of the information they deal with, some municipalities have welcomed the initiative by the Department. This has resulted in a drastic improvement in the performance of those Municipal Public Accounts Committees who are being assisted by the officials from the department.
- Strategic partners have been coordinated to conduct further workshops for MPACs
- SALGA was requested to conduct workshops on Separation of Powers for all councillors which was indeed conduct in all the 3 district municipalities

Recommendations

- Municipalities who do not have Section 80 committees must establish them
- MPAC Provincial Forum must be established to share experiences from various municipalities
- All MPACs must have administrative staff to assist them in their delegated duties

INTERGOVERNMENTAL RELATIONS (IGR)**BACKGROUND**

Intergovernmental Relations Framework Act was promulgated in 2005 to provide a framework for National, Provincial and Local Government to promote and facilitate intergovernmental relations in order to achieve the coherent government, effective service delivery, and monitoring implementation of legislation, policies and realization of national priorities.

It also provides for the facilitation, integration and alignment of planning, budgeting, implementation and reporting across the three spheres of government.

FUNCTIONALITY OF IGR STRUCTURES

- The Unit supported and monitored the establishment of IGR structures in all the (3) Districts, during the 2011/12 financial year in order to adhere to their annual schedules.
- The IGR Unit also facilitated the sittings of Joint Municipal meetings with the Department of Finance where the MEC for COGTA and Finance are Co-Chairs as per the MoU
- The IGR Unit continued to assist the Office of the Premier in the co-ordination of TPCF and PCF
- Regarding Municipal Demarcation issues, the Unit participated in the Redetermination of Municipal Boundaries and the delimitation of Ward Boundaries where consultations were done at District level.

CHALLENGES

- The challenge is that Municipal cycle of planning is different from that of National and Provincial Government, which possess challenges in terms of the full participation of Sector Departments into affairs of planning in the Municipalities.
- Another challenge is around the effectiveness of IGR Structures to follow schedules and not taking these forums seriously.
- The challenge of improving system amongst role players as well as how to use IGR as a strategic tool of facilitation service delivery and development in municipalities
- The challenge of achieving greater alignment and integration of intergovernmental planning, and specifically the effective participation of sector departments in the Integrated Development Plan
- Clarify the respective roles and responsibilities of various role players in the provincial IGR system, in particular Office of the Premier and the Department (Cogta).

INTERVENTION

- The Unit encouraged the participation of Sector Departments in the planning processes of municipalities to ensure the full involvement in all matters of local government, but also to strengthen cooperative governance.

RECOMMENDATIONS

- That all Sector Departments and Stakeholders be encouraged on the importance of IGR Structures.
- The strong political buy-in, where in the activities are taken serious to strengthen the implementation of resolution taken at the IGR forums sittings.

Anti-corruption

Table 31: Progress on the implementation of anti-corruption strategies by municipalities

TOTAL	21 Municipalities	3	3	3	10	10	10	19	19	19

Source: 2011/12 Section 46 reports

Provincial Analysis**Challenges**

- DCOG and COGTA supported municipalities with Anti-corruption Strategies.
- Although training was provided to several municipal officials and councilors, municipalities still did implement Anti-corruption Strategies through adoption by Council in 2008/09 (3/21 municipalities adopted) and 2009/10 (10/21 municipalities adopted).

Intervention

- COGTA started to support all municipalities by providing them with a generic anti-corruption Policy in the 2010/11 financial year.
- Although all 21 municipalities were supported only 19 adopted Anti-corruption Strategies through Council.
- Dr. JS Moroka- and Thembisile Hani's anti-corruption Strategies were still not adopted by Council and implemented in 2011/12.

Recommendations

- All 21 municipalities still need to be supported, as they must review their Anti-corruption Strategies annually.
- Thembisile Hani and Dr. JS Moroka needs to be monitored continuously to ensure adoption of their strategies by their Council and the subsequent implementation thereof

Traditional Leadership**Status of traditional leadership**

- 57 senior traditional leaders and two kings status were confirmed as of 2011/12 period and only 53 traditional councils reconstituted whose 5-year term of office had expired in April 2013

Challenges

- The landlessness and boundary issues continue to plague a number of traditional councils.
- Operation from home or residence due to challenges of lack of administration office accommodation for some is compounded by the issue of landlessness.
- Land invasions and inadequacies and lengthy judicious redress processes had rendered traditional council ineffective in dealing with the problem

Intervention

- Traditional council office renovation was embarked upon and a total of 18 were completed by the end of 2012.
- Consultation on survey maps and clarification of gazetted boundaries were conducted with the traditional councils

Participation of Traditional Leaders in Ward Committees

- Traditional leaders have representations in ward committees and other local governance structures

Cultural development

- All 59 traditional leaders and kings conduct their annual cultural ceremonies and receive support from the province through grants for cultural events.

HIV and AIDS

- Traditional leaders participate both provincial and district based and Adis Councils and participate in awareness campaigns.

Implementation of section 81 committees

- All traditional leaders except two kings were gazetted to participate in respective municipal councils at districts and local municipalities.

Key Performance Area 6:
Cross Cutting Interventions

Integrated development planning

- Introduction
- IDP capacity rankings of municipalities
- Spatial Development Frameworks (SDFs)
- Challenges experienced in implementing IDPs
- National and provincial government support for improved municipal planning

Disaster management

- Introduction
- Progress in the implementation of Disaster Management Act
- Challenges experienced in the implementation of the disaster management
- Support by Provincial Departments of Local Government and the **COGTA**
- Impact of support by stakeholders.

Realigned municipalities

- Introduction
- Municipalities affected in realignment per province
- Progress of the re-alignment
- Challenges experienced in the implementation of the re-alignment process
- Support by Provincial Departments of Local Government and the **COGTA**
- Impact of support by stakeholders.

Spatial Development Framework (SDF)

- Introduction
- Challenges experienced in the urban and rural nodes
- Progress in the implementation of urban and rural nodes
- Challenges experienced in the implementation of the urban and rural nodes

- Support by Provincial Departments of Local Government and the COGTA
- Impact of support by stakeholders.

Municipal Performance Excellence (Vuna) awards

- Introduction
- Challenges experienced in the implementation of the Vuna Awards
- Progress in the implementation of Vuna Awards
- Challenges experienced in the implementation of the Vuna Awards
- Support by Provincial Departments of Local Government and the COGTA
- Impact of support by stakeholders.

CROSS CUTTING INTERVENTIONS

Introduction

Cross-cutting interventions are specific issues that are not addressed directly by the 5 key performance areas. The interventions deal with how municipalities should organize themselves and mobilize human and financial support to discharge their mandate as provided in the Constitution of the Republic of South Africa. Progress in municipal performance in this KPA had been assessed in the following 5 focus areas:

- Integrated development planning;
- Disaster management;
- Realigned municipalities;
- Spatial Development Framework (SDF)
- Municipal Performance (Vuna) Awards

This is to be achieved through:

- Capacitating municipalities to deliver quality services to communities;
- Promoting participative, integrated and sustainable communities;
- Ensuring municipal plans reflect national, provincial and local priorities and resources through sound intergovernmental relations;
- Being the first port of call for municipalities for advice and support;
- Facilitating delivery through sound administration and the engagement of all spheres of government and social partners.

Integrated Development Planning

The White Paper on Local Government envisaged the IDP to be one of the mechanisms to promote and support the process towards developmental local government. The Municipal Systems Act entrenched the integrated development planning process as a legislated requirement for all municipalities to engage in and develop Integrated Development Plans. The IDP is a municipality's 5-year strategic plan that must be reviewed on an annual basis to track progress in implementation of the development programmes and inform future years' development planning. It has become the central pillar for development planning in South Africa, as it seeks to integrate development planning and programmes across all the three spheres of government into one document. During the first years of the implementation of Chapter of the MSA, many municipalities failed to submit their 5-year IDP's and others submitted very late. However, the main deficiency of the IDP's was the lack of integration and credibility in the strategic plans. COGTA developed a credibility framework and facilitated an intergovernmental IDP engagement process that was intended to improve the submission rate and credibility of IDP's.

Spatial Development Frameworks (SDF's)

The disintegrated nature of development planning confronted the government during its first term into democracy. The situation was compounded by a lack of clear guiding planning principles that support strategic interventions to address the country's skewed spatial settlement patterns. In 2003 government published the guiding principles in the National Spatial Development Perspective (NSDP). As part of the implementation of the NSDP principles, Cabinet approved the intergovernmental planning framework which crystallized the harmonization and alignment of the NSDP, Provincial Growth and Development Strategies and IDP's.

As provided in the Municipal Systems Act, the IDP's of municipalities must include Spatial Development Frameworks (SDF's). The intergovernmental planning framework thus sets the tone for spatial frameworks of all three spheres to be aligned and be guided by the NSDP principles. Failure by some municipalities to adopt Spatial Development Frameworks had resulted in continuous misdirected public and private sector investment. The development outcome of creating sustainable human settlements cannot be achieved if municipalities fail to create a development environment that is well planned.

Table 34: Development, submission and implementation rate of SDFs

Provincial Analysis**Challenges**

- The dominant challenges are with regards to the misalignment between the IDP projects implemented outside the SDF proposals for the development of the municipality.

Interventions

- All district and local municipalities within the province have developed and adopted Spatial Development Frameworks with support from COGTA. These plans guide future development and investment in municipalities. COGTA assess the implementation of the SDFs annually through the IDP assessments. Support is provided to municipalities based on the recommendations of the assessments.
- The COGTA spatial planning and the IDP unit have embarked on a process to assess sector departmental APPs. This will assist in ensuring that projects implemented through municipal IDPs are in line with the municipal SDF proposals

Recommendations

- It is recommended that the linkages between municipal IDPs and SDFs be strengthened throughout the province. This can be achieved through SDF proposals finding translation in the IDP, in the form of projects.
- Furthermore, the SDF should be utilised as the base strategic plan in all municipalities to ensure the appropriate location of projects, spatially. This process will aid in the positive realisation of the spatial vision of all municipalities in the province.

Disaster management

Introduction

- Progress in the implementation of Disaster Management Act
- Challenges experienced in the implementation of the disaster management
- Support by Provincial Departments of Local Government and the COGTA
- Impact of support by stakeholders.

Disaster Management

The aim of the Disaster Management Act (Act No.57 of 2002) is to ensure a uniform approach to disaster risk management in each sphere of government. According to the National Disaster Management Centre s (NDMC) The Disaster Management Act focuses on disaster prevention and risk reduction, mitigation of severity and consequences of disasters, emergency and preparedness, and a rapid and effective response to disasters leading to restoration of normal conditions. In terms of the Sections in the Constitution of the Republic of South Africa that provide for disaster management includes the Intergovernmental Relations Framework Act, 2005 (Act number 13 of 2005), the Local Government: Municipal Systems Act, 2000 (Act number 32 of 2000), the Disaster Management Act, 2002 (Act number 57 of 2002) and the National Disaster Risk Management Policy Framework of 2005. These sections provide for:

- the establishment, implementation and maintenance of an integrated rapid and effective disaster response system, post-disaster recovery and rehabilitation;
- the identification, assessment, classification and prioritisation of hazards and vulnerable elements;
- the development, implementation, monitoring and evaluation of disaster risk reduction (prevention, mitigation and preparedness) programmes, projects and measures;
- and the establishment, implementation and maintenance of systems and structures through and across the three spheres of government, the state-owned enterprises (SOEs), the Private Sector, non-governmental organisations (NGOs), communities and individuals.

These policies require the metropolitan and district municipalities to:

- Establish a fully functional disaster management centre
- Appoint a head of the centre
- Establish disaster management forums
- Finalise disaster management plans

The NDMC is located within the COGTA. Its main objective is to contribute to the overall resilience of communities and infrastructure to disaster risk, to strengthen the capacity of provinces and municipalities in pre-empting and responding to disasters, as well as ensuring cross-functional disaster management in all spheres of government.

The effects of global warming and climate change are beginning to be felt in South Africa. Managing disasters such as floods, drought, tornadoes, or veld fires requires government and people working together in a coordinated way through a coherent disaster management system. Municipalities for instance, have an important first response role to disasters, and therefore must always be in a position to combat disasters. Disaster management plans must be included in the municipal IDPs. The success of disaster management at the local level is dependent on the capacity and capabilities to combat disaster at national and provincial levels.

Provincial Analysis**Ehlanzeni District**

- a) The District has insufficient reliefs and funding will have to be made available for acquisition during the adjustment period or in 2014/15 financial year.
- b) The District has functional centres with satellite centres in the local municipalities.
- c) The Municipalities does not meet the minimum requirements on fire and rescue vehicles and funding to acquire this equipment should be made available in the next financial year.
- d) With regards to human resource the Municipalities must appoint dedicated Disaster Management officials in order to deal with the function effectively in terms of the key performance areas.

Gert Sibande District

- a) The District does not meet the minimum requirements on relief materials. Funding should be made available during the adjustment period.
- b) Although the District does not have a functional disaster management centre, 3 satellite centres have been built. The municipality will have to build the main centre and funding must be made available in the next financial year.
- c) The District must acquire fire fighting vehicles and personnel to meet the minimum requirements.

Nkangala District

- a) The District does not meet the minimum requirements on relief materials. Funding should be made available during the adjustment period.
- b) The District must acquire fire fighting vehicles and personnel to meet the minimum requirements.
- c) The Municipality must appoint dedicated Disaster Management personnel to effectively deal with the management of disasters.

Provincial Analysis**Challenges**

- The Districts does not meet the minimum requirements on relief materials.
- Not sufficient dedicated staff to the function.
- A lack of Emergency equipment and maintenance budgets.
- Disaster plans not well planned and funded in IDPs.

Interventions

- PDMC assisting municipalities with analysis of DM plans for inclusion and prioritization into IDPs with funding for projects and programs to address the challenges.

Recommendations

- That Municipalities with the assistance of CoGTA (PDMC) prioritize the function by appointing dedicated staff and ensuring that funding is made available through the inclusion in IDPs

Spatial Development Frameworks (SDF's)

The disintegrated nature of development planning confronted the government during its first term into democracy. The situation was compounded by a lack of clear guiding planning principles that support strategic interventions to address the country's skewed spatial settlement patterns. In 2003 government published the guiding principles in the National Spatial Development Perspective (NSDP). As part of the implementation of the NSDP principles, Cabinet approved the intergovernmental planning framework which crystallized the harmonization and alignment of the NSDP, Provincial Growth and Development Strategies and IDPs.

As provided in the Municipal Systems Act, the IDPs of municipalities must include Spatial Development Frameworks (SDF's). The intergovernmental planning framework thus sets the tone for spatial frameworks of all three spheres to be aligned and be guided by the NSDP principles. Failure by some municipalities to adopt Spatial Development Frameworks had resulted in continuous misdirected public and private sector investment. The development outcome of creating sustainable human settlements cannot be achieved if municipalities fail to create a development environment that is well planned

Table 37: Development, submission and implementation rate of SDF's

Provincial Analysis

Challenges

The dominant challenges are with regards to the misalignment between the IDP projects implemented outside the SDF proposals for the development of the municipality.

Interventions

All district and local municipalities within the province have developed and adopted Spatial Development Frameworks with support from COGTA. These plans guide future development and investment in municipalities. COGTA assess the implementation of the SDFs annually through the IDP assessments. Support is provided to municipalities based on the recommendations of the assessments.

The COGTA spatial planning and the IDP unit have embarked on a process to assess sector departmental APPs. This will assist in ensuring that projects implemented through municipal IDPs are in line with the municipal SDF proposals.

Recommendations

It is recommended that the linkages between municipal IDPs and SDFs be strengthened throughout the province. This can be achieved through SDF proposals finding translation in the IDP, in the form of projects.

Furthermore, the SDF should be utilised as the base strategic plan in all municipalities to ensure the appropriate location of projects, spatially. This process will aid in the positive realisation of the spatial vision of all municipalities in the province.

Urban and Rural nodes

Introduction

- Challenges experienced in the urban and rural nodes
- Progress in the implementation of urban and rural nodes
- Challenges experienced in the implementation of the urban and rural nodes
- Support by Provincial Departments of Local Government and the COGTA
- Impact of support by stakeholders.

Urban and rural nodes

The main developmental outcomes of the Urban Renewal Programme (URP) and the Integrated Sustainable Rural Development Programme are to eradicate urban and rural poverty in the poorest areas within South Africa as well as to attain social cohesion and equity. The rural nodes and 8 urban nodes are the following:

Table 38: Functionality of rural nodes and 8 urban nodes

Districts	Names of Municipalities	2009/10	2010/11	2011/12
Not performed	Not performed	Not performed	Not performed	Not performed

The Vuna Awards were initiated in 2003 with the main objective of motivating municipalities to enhance their performance and productivity, with the net effect being an improvement in municipal service delivery. The Vuna awards are a component of a much larger system as envisaged in the legislated policy framework for monitoring local government which is aimed at enhancing municipal accountability and efficiency. The awards are a response to the responsibilities of the Minister to encourage, but also recognize municipal performance excellence.

The aims of the Vuna Awards are the following:

- Promote creative and innovative municipal service delivery;
- Promote efficiency of expanded development programs, such as, the Consolidated Municipal Infrastructure Programme (CMIP), Local Economic Development (LED), Integrated Development Plans (IDPs) and Integrated Sustainable Rural Development Programme (ISRDP)
- Recognize the effectiveness and efficiency of municipal institutions;
- Promote good local governance;
- Provide a benchmark for performance;
- Identify and provide support to "poor performing municipalities";
- Improve the profile / image of local government;
- Build community and stakeholders' confidence in municipalities; and
- Enhance systems of developmental local government

Table 39: Vuna Awards participation

IDP Analysis 2011/12

KEY CHALLENGES**High level challenges as identified by province and per KPA**

- Vacancy rate
- Non-compliance with applicable laws and regulations
- Lack of willingness on the part of the political leadership
- Lack of consequences for poor performance and transgressions
- Lack of risk assessments and risk management strategies
- IT risk plans and fraud prevention plans were not adequately implemented.
- Poor planning and ineffective SCM processes, resulting in delays in appointing service providers.
- Lack of action to address delayed projects.
- A lack of capacity to deliver on capital projects
- Inadequate monitoring and oversight of key projects.
- Inadequate monitoring as per the requirements of the Division of Revenue Act and the MFMA.
- Non development or review of LED strategies
- A lack of basic financial discipline
- Poor and deteriorating controls that had a negative impact on the audit outcomes
- Lack of risk assessments and risk management strategies
- A lack of basic financial discipline
- Internal controls that failed to prevent or detect the misstatement or non-compliance.
- Slow response to the AGSA's message and not taking ownership of key controls.

FUTURE OUTLOOK FOR 2012 - 2016**Introduction**

Addressing the key challenges per KPA: Outlook for 2011-2016 including timeframes

Table 42: Future Outlook**KPA 1: Municipal Transformation and Organisational Development**

			state	of Co-operative governance to ensure developmental.	

KPA 6: CROSS CUTTING ISSUES:

KPA 6	KEY CHALLENGES	KPA OUTLOOK FOR 2011-2016			
		2012/13	2013/14	2014/15	2015/16
Cross-cutting	Predetermined objectives	COGTA to conduct training targeting development of objectives, indicators and targets	COGTA to conduct training targeting development of objectives, indicators and targets	COGTA to conduct training targeting development of objectives, indicators and targets	COGTA to conduct training targeting development of objectives, indicators and targets
SDF&LUM linkages to the IDPs	COGTA to assist local municipalities to translate their SDFs into their IDPs	Support to be provided to struggling municipalities in reviewing their SDFs and LUMS	Support to be provided to struggling municipalities in reviewing their SDFs and LUMS	Support to be provided to struggling municipalities in reviewing their SDFs and LUMS	Support to be provided to struggling municipalities in reviewing their SDFs and LUMS
SDFs do not have capital investment framework	Ensure inclusion of capital investment framework to all municipal SDFs	Ensure inclusion of capital investment framework to all municipal SDFs	Ensure inclusion of capital investment framework to all municipal SDFs	Ensure inclusion of capital investment framework to all municipal SDFs	Ensure inclusion of capital investment framework to all municipal SDFs

itions and instability in leadership positions affect the pace of sustainable audit improvements
local government, the challenges experienced and the high expectations of the public demand that key personnel at municipalities have
and capacity to fulfil their responsibilities and exercise their functions and powers
of the municipal regulations on minimum competency levels and the amendments to the Municipal Systems Act provide an
adequate competencies is as follows:

on in the audit outcomes, failures in service delivery, high demand for consultants and continuous support from provincial government
ent where the persons appointed in positions do not have the required competencies.

as is

erspending of capital budgets, the underspending of specific-purpose conditional grants had a negative impact on municipalities' service
