No. R. 846**26 June 1998****STANDARDS ACT, 1993****PROPOSED AMENDMENT OF THE COMPULSORY SPECIFICATION FOR CATEGORY O₁ AND O₂ MOTOR VEHICLES**

It is hereby made known under section 22 (3) of the Standards Act, 1993 (Act No. 29 of 1993), that the Minister of Trade and Industry intends to amend the compulsory specification for category O₁ and O₂ motor vehicles published by Government Notice No. R. 3182 of 20 November 1992 as set out in the Schedule.

The purport of the amendment is to introduce homologation into the compulsory specification.

Any person who wishes to object to the intention of the Minister to declare this specification compulsory, shall lodge his objection in writing with the President, South African Bureau of Standards, Private Bag X191, Pretoria, 0001, on or before the date two (2) months after publication of this notice.

SCHEDULE**COMPULSORY SPECIFICATION FOR
CATEGORY O₁ AND O₂ VEHICLES****1 Scope**

1.1 This specification covers the requirements for new vehicles of category O₁ and O₂, including any category O₁ and O₂ vehicle not previously registered or licensed in South Africa, designed or adapted for operation on a public road.

1.2 The requirements of this specification apply, in so far as the parts already incorporated are concerned, in respect of an incomplete vehicle supplied for further manufacture by one manufacturer to another, and the entire specification shall apply to the vehicle after completion thereof by the last-mentioned manufacturer.

1.3 The specification shall not apply to experimental or prototype vehicles constructed or imported by the original manufacturers or importers for the purpose of testing, assessment or development, or to agricultural trailers not designed for use on public roads.

1.4 The relevant requirements of the specification that take effect on any specified date, shall not apply to vehicles manufactured or imported before that date.

1.5 Homologation shall comprise the confirmation by the South African Bureau of Standards (SABS) that the manufacturer has provided the SABS with the following specific evidence in respect of the commodity covered by this compulsory specification:

- a) a summary of evidence showing that all relevant tests have been conducted with successful results under appropriate controls in respect of the model or the type of the commodity;
- b) sufficient data to enable a relevant model or type and its components to be identified and related to (a) above;
- c) relevant samples for the conducting of whatever tests and inspections are considered appropriate by the SABS, to verify any or all of the evidence provided;
- d) details of the quality management system applied by the manufacturer;
- e) when relevant, documentation to advise subsequent manufacturers of incomplete commodities of their responsibilities; and
- f) agreement by the manufacturing source, to permit conformity of production audits to be carried out by the SABS or by the SABS' appointed agent at the relevant manufacturing, assembling and test facilities.

The SABS may issue such confirmation, on application, in respect of new models or types, provided that such confirmation may not be used for the purposes of advertising or to imply that all units of the commodity necessarily or consequently comply with all the requirements of this specification.

NOTE – Where an SABS standard is incorporated by reference into this specification, such incorporation relates to the basic requirements for the commodity as stated in the incorporated standard, but not to sampling procedures and other concepts and directives not material to the application of this specification.

2 Definitions

For the purposes of this specification, the following definitions apply:

2.1 axle unit: A unit that consists of two or more close-coupled and interconnected parallel axles: Provided that any adjacent parallel axles not more than 1,2 m apart shall be considered as an axle unit for the purpose of determining the rear overhang.

2.2 caravan: A trailer that provides mobile living accommodation and that has a gross vehicle mass not exceeding 1,8 t.

2.3 category O: Trailers

a) **category O₁**, single-axed trailers, other than semi-trailers, with a maximum weight not exceeding 0,75 t (metric); and

b) **category O₂** trailers with a maximum weight not exceeding 3,5 t (metric), other than trailers of category O₁.

2.4 equalizer: A device that is connected between the towing vehicle and a trailer, and that is designed to reduce the vertical load imposed on the ball coupling by the trailer and to transfer load to the front and rear axles of the vehicle combination. The device usually takes the form of a pair of downward curved springs, one on each side of the drawbar, that are tensioned upwards when coupled to the towing vehicle.

2.5 manufacturer: The person who manufactures, produces, assembles, alters, modifies, adapts or converts a new category O vehicle, and "manufacture" has a corresponding meaning.

2.6 model: The manufacturer's description for a series of vehicle designs that do not differ in respect of axle configuration, trailer configuration, coupling device, and braking system, or in respect of the vehicle category by which they are introduced to South Africa by a specific source.

The SABS reserves the right to decide on which variations or combinations of variations constitute a new model, and could also take cognizance of the classification system applied in the country of origin of the design.

2.7 public road: A road, street or thoroughfare, including the verges, or any other place, whether a thoroughfare or not, to which the public or sections of the public have the right of access and commonly use.

2.8 semi-trailer: A trailer with one axle or axle unit, that is designed to be coupled to a towing vehicle in such a manner that at least 15 % of the tare of the trailer is borne by the towing vehicle.

2.9 stabilizer: A device that is connected between the towing vehicle and the trailer, and that is designed to reduce or dampen any lateral (anti-snake) oscillations or vertical (anti-pitch) oscillations, or combinations thereof, of the vehicle combination. The device usually takes the form of a friction or hydraulic damping medium in either the horizontal or vertical plane, or a combination of both, and may be incorporated with an equalizer.

2.10 tent trailer: A trailer that has a gross vehicle mass not exceeding 1,8 t and that provides mobile living accommodation by means of a collapsible soft-topped tent that can be permanently attached to or can be removable from the trailer.

2.11 trailer: A vehicle that is not self-propelled and that is designed and adapted to be coupled behind a towing vehicle in such a manner that no substantial portion of its mass is borne by the towing vehicle.

1.3 Die spesifikasie geld nie vir eksperimentele voertuie of prototipes van voertuie wat deur die oorspronklike fabrikante of invoerders vir toetsing, beoordeling of ontwikkeling gebou of ingevoer is nie, of vir landbou-sleepwaens wat nie vir gebruik op openbare paaie ontwerp is nie.

1.4 Die toepaslike vereistes van die spesifikasie wat op 'n gespesifieerde datum in werking tree, geld nie ten opsigte van voertuie wat voor dié datum vervaardig of ingevoer is nie.

1.5 Homologasie behels die bevestiging deur die Suid-Afrikaanse Buro vir Standaarde (SABS) dat die fabrikant die volgende spesifieke bewyse ten opsigte van die kommoditeit wat deur hierdie verpligte spesifikasie gedek word aan die SABS gelewer het:

- a) 'n opsomming van bewyse dat alle toepaslike toetse ten opsigte van die model of die tipe kommoditeit onder behoorlike kontrole onder behoorlike kontrole met welslae uitgevoer is;
- b) voldoende gegewens om 'n toepaslike model of tipe en sy komponente te kan identifiseer en met (a) hierbo in verband te kan bring;
- c) gesikte monsters vir die uitvoer van watter toetse en ondersoeke die SABS ook al as toepaslik beskou ten einde enige bewys of al die bewyse wat gelewer is te verifieer;
- d) besonderhede van die kwaliteitbestuurstelsel wat die fabrikant toepas;
- e) indien toepaslik, dokumentasie om latere fabrikante van onvolledige kommoditeite oor hul verantwoordelikhede in te lig; en
- f) instemming deur die vervaardigingsbron om produksiekonformiteitsoudits deur die SABS of deur die SABS se aangestelde agent by die betrokke vervaardiging-, montere- en toetsfasiliteite toe te laat.

Die SABS kan sodanige bevestiging nie ten opsigte van nuwe modelle of tipes op aanvraag uitrek, met dien verstande dat sodanige bevestiging vir reklamedoeleindes gebruik mag word nie of om te impliseer dat alle eenhede van die kommoditeit noodwendig of bygevolg aan al die vereistes van hierdie spesifikasie voldoen nie.

OPM – In gevalle waar 'n SABS-standaard deur verwysing by hierdie spesifikasie ingelyf is, het sodanige inlywing betrekking op die basiese vereistes vir die kommoditeit wat in die ingelyfde standaard gestel word, maar nie op monternemingsprosedures en ander begrippe en riglyne wat nie by die toepassing van hierdie spesifikasie ter sake is nie.

1.4 The relevant requirements of this specification that take effect on any specified date, shall not apply to vehicles manufactured or imported before that date.

1.5 Homologation shall comprise the confirmation by the South African Bureau of Standards (SABS) that the manufacturer has provided the SABS with the following specific evidence in respect of the commodity covered by this compulsory specification:

- a) a summary of evidence showing that all relevant tests have been conducted with successful results under appropriate controls in respect of the model or the type of the commodity;
- b) sufficient data to enable a relevant model or type and its components to be identified and related to (a) above;
- c) relevant samples for the conducting of whatever tests and inspections are considered appropriate by the SABS, to verify any or all of the evidence provided;
- d) details of the quality management system applied by the manufacturer;
- e) when relevant, documentation to advise subsequent manufacturers of incomplete commodities of their responsibilities; and
- f) agreement by the manufacturing source, to permit conformity of production audits to be carried out by the SABS or by the SABS' appointed agent at the relevant manufacturing, assembling and test facilities.

The SABS may issue such confirmation, on application, in respect of new models or types, provided that such confirmation may not be used for the purposes of advertising or to imply that all units of the commodity necessarily or consequently comply with all the requirements of this specification.

NOTE – Where an SABS standard is incorporated by reference into this specification, such incorporation relates to the basic requirements for the commodity as stated in the incorporated standard, but not to sampling procedures and other concepts and directives not material to the application of this specification.

Hierby word kragtens artikel 22 (3) van die Wet op Standaarde, 1993 (Wet No. 29 van 1993), bekendgemaak dat die Minister van Handel en Nywerheid van voorneme is om die verpligte spesifikasie vir kategorie O₃- en O₄-voertuie gepubliseer by Goewermentskennisgewing No. R. 3181 van 20 November 1992 te wysig soos in die Bylae uiteengesit.

Die doel van die wysiging is om homologasie in die verpligte spesifikasie in te voeg.

Enige persoon wat beswaar wil maak teen die Minister se voorneme om hierdie spesifikasie verplig te verklaar, moet sy skriftelike beswaar voor of op die datum twee (2) maande na publikasie van hierdie kennisgewing indien by die President, Suid-Afrikaanse Buro vir Standaarde, Privaatsak X191, Pretoria, 0001.

Suid-Afrika

BYLAE**VERPLIGTE SPESIFIKASIE VIR
KATEGORIE O₃- EN O₄-VOERTUIE****1 Bestek**

1.1 Hierdie spesifikasie dek die vereistes vir nuwe voertuie van kategorie O₃- en O₄ wat ontwerp of aangepas is om goedere op 'n openbare pad te vervoer met inbegrip van 'n kategorie O₃- en O₄-voertuig wat nie voorheen in Suid-Afrika geregistreer is nie.

OPM — Nuwe kategorie O₃- en O₄-voertuie wat ontwerp en aangepas is vir die vervoer van passasiers, soos in die geval van 'n leunwabus, is ook onderworpe aan die toepaslike vereistes vir kategorie M₂- en M₃-motorvoertuie (busse).

1.2 Die vereistes van die spesifikasie geld, vir sover dit die dele betref wat reeds ingelyf is, vir 'n onvolledige voertuig wat vir verdere vervaardiging deur een fabrikant aan 'n ander gelewer word, en die spesifikasie geld in sy geheel vir die voertuig nadat dit deur die laasgenoemde fabrikant voltooi is.

1.3 Die spesifikasie geld nie vir eksperimentele sleepwaens of prototipes van sleepwaens wat vir toets-, beoordelings- of ontwikkelingsdoeleindes deur die oorspronklike fabrikante of invoerders gebou of ingevoer word of vir militêre sleepwaens met geskut- of missielstelsels of vir landbousleepwaens wat nie op openbare paaie gebruik word nie.

1.4 Die toepaslike vereistes van die spesifikasie wat op 'n gespesifieerde datum in werking tree, geld nie vir voertuie wat voor dié datum vervaardig of ingevoer is nie.

1.5 Homologasie behels bevestiging deur die Suid-Afrikaanse Buro vir Standaarde (SABS) dat die fabrikant die volgende spesifieke bewyse ten opsigte van die kommoditeit wat deur hierdie verpligte spesifikasie gedek word aan die SABS gelewer het:

- a) 'n opsomming van bewyse dat alle toepaslike toetse ten opsigte van die model of die tipe kommoditeit onder behoorlike kontrole met welstae uitgevoer is;
- b) voldoende gegewens om 'n toepaslike model of tipe en sy komponente te kan identifiseer en met (a) hierbo in verband te kan bring;
- c) geskikte monsters vir die uitvoer van watter toetse en ondersoeke die SABS ook al as toepaslik beskou ten einde enige van of al die gelewerde bewyse te verifieer;
- d) besonderhede van die kwaliteitsbestuurstelsel wat die fabrikant toepas;
- e) indien toepaslik, dokumentasie om latere fabrikante van onvolledige kommoditeite oor hulle verantwoordelikhede in te lig; en
- f) instemming deur die vervaardigingsbron dat die SABS of 'n agent wat deur die SABS aangestel is produksiekonformiteit by die betrokke vervaardigings-, monteer- en toetsfasiliteite mag oudit.

Die SABS kan sodanige bevestiging ten opsigte van nuwe modelle of tipes op aanvraag uitrek, met dien verstande dat sodanige bevestiging nie vir reklamedoeleindes gebruik mag word nie of om te impliseer dat alle eenhede van die kommoditeit noodwendig of bygevolg aan al die vereistes van hierdie spesifikasie voldoen nie.

OPM — In gevalle waar 'n SABS-standaard deur verwysing by hierdie spesifikasie ingelyf is, het sodanige inlywing betrekking op die basiese vereistes vir die kommoditeit wat in die ingelyfde standaard gestel word, maar nie op monsternemingsprosedures en ander begrippe en riglyne wat nie by die toepassing van hierdie spesifikasie ter sake is nie.

2 Woordbepaling

Die volgende woordbepalings geld vir die doel van hierdie spesifikasie:

2.1 fabrikant: Die persoon wat 'n kategorie O-voertuig vervaardig, produseer, monteer, verander, modifiseer, aanpas ofombou, en "vervaardig" het 'n ooreenstemmende betekenis.

2.2 kategorie O: Sleepwaens

- a) **kategorie O₃-sleepwaens** met 'n maksimum massa van meer as 3,5 t (metriek ton) maar hoogstens 10 t (metriek ton); en
- b) **kategorie O₄-sleepwaens** met 'n maksimum massa van meer as 10 t (metriek ton).

2.3 leunwabus: 'n Kategorie O-leunwa, wat bedoel is om deur 'n kategorie N-voorspanmotor getrek te word en wat ontwerp of gewysig is om in kombinasie daarmee 'n bestuurder en meer as agt passasiers te vervoer. (Kyk ook 3.3.)

2.4 model: Die fabrikant se beskrywing van 'n reeks voertuigontwerpe wat nie verskil ten opsigte van die askonfigurasie, sleepwakonfigurasie, koppeltoestel en remstelsel of ten opsigte van die voertuig-kategorie waaronder hulle deur 'n spesifieke bron in Suid-Afrika in omloop gebring word nie.

Die SABS behou hom die reg voor om te besluit watter variasies of kombinasies van variasies 'n nuwe model uitmaak en kan ook kennis neem van die klassifikasiestelsel wat toegepas word in die land waarin die ontwerp sy oorsprong het..

2.5 openbare pad: 'n Pad, straat of deurgang, met inbegrip van die kantstroke, of enige ander plek, hetsy 'n deurgang al dan nie, waartoe die publiek toegangsreg het en wat hulle algemeen gebruik.

**APPLICATION FOR A STATUTORY MEASURE ON WINTER CEREAL IN
TERMS OF THE MARKETING OF AGRICULTURAL PRODUCTS ACT, 1996
(ACT NO 47 OF 1996)**

1. STATUTORY MEASURE – LEVIES

The statutory measure that is requested to be established, is that the Minister –

1.1 in terms of section 15 of the Act, by notice in the Government Gazette, direct that a levy amounting to R4,00 (exclusive of VAT) per metric ton winter cereal (wheat, durum wheat, barley and oats) sold by the producer thereof, shall be payable by the buyer thereof to the Winter Cereal Research Trust not later than the 15th day of the month following the month in which the winter cereal were sold and the levy shall be imposed on all winter cereal sold, including winter cereal imported in which case the importer of such winter cereal will be deemed to be the producer thereof; and

1.2 in terms of section 15 of the Act, by notice in the Government Gazette, direct that a levy amounting to 50c (exclusive of VAT) per metric ton winter cereal (wheat, durum wheat, barley and oats) sold by the producer thereof, shall be payable by the buyer thereof to the Winter Cereal General Trust not later than the 15th day of the month following the month in which winter cereal were sold, including winter cereal imported in which case the importer of such winter cereal will be deemed to be the producer thereof.

2. INFORMATION REQUIRED BY SECTION 10 OF THE ACT

2.1 The particulars as required by section 10 of the Act to be included in a request for the establishment of a statutory measure, are as follows:

2.2 The statutory measure that are requested, would relate to wheat, durum wheat, barley and oats.

2.3 The categories of directly affected groups which would probably be effected by the establishment of the proposed statutory measure, are those groups of persons who are party to the production, purchasing, storage, marketing and processing of winter cereal as well as to the consumption of winter cereal products in the Republic of South Africa.

Letters of support for the proposed statutory measures on winter cereal, by the different categories of directly affected and other groups in the winter cereal industry, as was represented on the Wheat Forum, were received.

2.4 The proposed statutory measure should apply to the whole of the Republic of South Africa, in order to have a uniform system of levies without the discrimination that would exist on requiring levies in certain areas and not in others.

2.5 According to the applicant, the establishment of the statutory measure applied for, will further the objectives of the Act as stipulated in section 2(2) thereof. Such establishment will also not contravene section 2(3) of the Act.

The manner in which the objectives referred to in section 2(2) of the Act will be furthered (namely the increasing of market access for all market participants, the promotion of the efficiency of the marketing of agricultural products, the optimisation of export earnings from agricultural products and the enhancement of the viability of the agricultural sector), are summarised below:

2.5.1 Levy to finance the winter cereal information function

The maintenance of macro industry information is regarded as critical for strategic planning by the winter cereal industry as well as the directly affected groups individually.

In order for the market to operate effectively, the industry regards the supplying of generic market information to all role players on a continuous basis, as essential.

The winter cereal industry supports the conclusion that generic market information be obtained by means of statutory measures in terms of the Act and has established the South African Grains Information Services (SAGIS) as the official vehicle to achieve this. SAGIS also operates as official information service for the maize, sorghum and oilseeds industries. A statutory levy is required to ensure that the winter cereal industry also shares in the envisaged gathering and dissemination of information.

Proper and accurate winter cereal market information obtainable on a continuous and timeous manner, will not only increase market access for all participants, but will also promote efficiency in the marketing of winter cereal and winter cereal products. Winter cereal marketing will furthermore enhance the viability of the winter cereal industry in particular and the agricultural sector at large.

Market information will also enhance food security, as the information on national stock levels of winter cereal will be available for the market to function properly. The Wheat Forum is of the opinion that this measure will create a better market environment for the winter cereal industry which will in the long term lead to the creation of job opportunities through the growth of the industry.

Winter cereal and winter cereal products are annually exported to neighbouring countries and in record crop years significant volumes are also exported overseas. To achieve optimisation of export earnings, reliable information is essential.

2.5.2 Levy to support research on wheat

The agricultural sector is expected to ensure food security, strengthen the economy and promote social wealth by providing job opportunities in rural areas. This aim can be reconciled with

the provisions of section 2(3) of the Act. In order to achieve these aims the agriculture sector is dependent on continued research.

According to experts in the field of research, the performance of the South African agricultural sector despite the lack of high-potential arable land, could to a great extent be attributed to the development and application of agricultural research results. The complex interaction between changing behavioral patterns of crops and external factors affecting them, such as disease and pests, often impacts negatively on production and quality, thus creating an urgent demand for new technology in order to keep the agricultural sector profitable. Account should also continually be taken of consumer preferences within the market.

As regards research on winter cereal, specific infrastructure has been created over time in respect of research, among others at the following institutions: Small Grain Institute (ARC), Sensako, Plant Protection Research Institute (ARC) and universities. It is essential that the above infrastructure created by contributions from the Winter Cereal Research and Development Fund be retained and maintained to the benefit of the winter cereal industry.

The development of new cultivars with improved quality characteristics constitutes an important part of the research undertaken by researchers and breeders. The continuous development of new cultivars is indispensable to the sustained production of winter cereal.

For the optimisation of export earnings it is essential that products produced in the RSA conform to international quality requirements. It is also necessary for researchers and breeders to ensure that the locally produced winter cereal are fully competitive with products on the international markets.

2.6 Research levy: Traditionally, the amounts appropriated to researchers for a specific calendar year are based on the amount collected in the preceding season by means of levies to strengthen the relevant fund. A portion of the interest earnings in the previous financial year is also used for the relevant year's appropriations if necessary. This was to ensure that sufficient money would be kept in reserve in the event of a crop failure where the income from levies might not be sufficient to maintain continuous projects (as well as possible new ones).

In view of the need for continued research in all sectors of the industry, it is envisaged that the most appropriate mechanism for continued funding would be by way of levies.

Due to the variation in the wheat crop from year to year and the fact that the results of research undertaken locally are also applied when processing imported winter cereal, the Wheat Forum decided that all

winter cereal changing hands in the RSA should form the basis for collection of the levy. To eliminate the possible duplication of the levy where winter cereal change hands more than once before being processed, the Wheat Forum decided that the levy should be payable at the first point of sale of winter cereal produced locally or imported.

Due to the logistics involved in collecting levies directly from more than 6000 producers, it was decided that the buyers of winter cereal at the first point of sale should be responsible to pay the levy to the Winter Cereal Research Trust. The buyers should be authorised to recover any amount paid or payable by them in respect of such levy by deducting it from the amount payable when purchasing winter cereal.

Based on envisaged annual research grants of about R10 million, the Wheat Forum decided to keep the current levy of R4/ton (VAT excluded) unchanged.

- 2.7 Information levy:** Due to the variation in the wheat crop from year to year and the fact that information regarding imports and exports forms an integrated part of the information needed, the Wheat Forum decided that all winter cereal changing hands in the RSA should form the basis for collection of the levy. As in the case of the levy to support research, it is necessary to eliminate the duplication of the levy where winter cereal change hands more than once before being processed. The Wheat Forum, therefore, decided that the levy should be payable at the first point of sale of winter cereal produced locally or imported.

Due to the logistics involved in collecting the levy directly from more than 6 000 winter cereal producers, it was decided that the buyers of winter cereal at the first point of sale should be responsible to pay the levy to the Winter Cereal General Trust. The buyers should be authorised to recover any amount paid or payable by them in respect of such levy by deducting it from the amount payable when purchasing winter cereal.

Based on the winter cereal industry's share of the budget of SAGIS and the budget of the Winter Cereal General Trust, the Wheat Forum decided that the current levy for this purpose be kept unchanged on 50c/ton (VAT excluded) at this stage.

- 2.8** The current statutory measure with regard to levies to support research and to finance the information function, expires on 31 October 1998. The applicant suggested that the statutory measure requested be implemented not later than 1 November 1998. Research projects normally stretch over longer periods than one or two years and it is of the utmost importance that the financing for the full duration of the projects is secured. It is therefore necessary not to restrict the duration of the statutory measure to a shorter period. As far as the information function is concerned, it is necessary to keep data on a continuous basis to be used for statistical analysis. The statutory measure will be subject to the provisions of section 9 of the Act, namely the evaluation thereof by the National Agricultural Marketing Council every two years.

Depending on climatic conditions, harvesting operations to collect the new season's crop will change hands before 1 November 1998. To treat all participants on an equal basis as far as the levies are concerned, it will be necessary to make the statutory measures applicable as from 1 October 1998. This arrangement will not cause a situation where levies are being duplicated on certain products as the products sold by producers during October 1998 will not be processed during the same month as the processors keep the products in storage for at least a month to improve their processing quality.

- 2.9 The administrators of the Winter Cereal General Trust and the Winter Cereal Research Trust will be responsible for the collection and administration functions associated with the information and research levies, respectively.

The object of the Winter Cereal General Trust (which will assume responsibility for the information levy) is to further the winter cereal industry in the RSA by supporting market and production orientated research with regard to winter cereal, the broadening of the market for SA produced winter cereal, the collection, processing and distribution of market information on winter cereal and the winter cereal industry in the RSA and the administration of the Wheat Forum.

The above trust has ten trustees, representing commercial producers, emerging farmers, grain handlers, processors, consumers, labour and the Minister of Agriculture.

The object of the Winter Cereal Research Trust (which will assume responsibility for the research levy) is to undertake and/or support research with regard to winter cereal in the RSA in the interest of the winter cereal industry in the RSA.

The above trust has eight trustees, representing commercial producers, emerging farmers, processors, consumers and the Minister of Agriculture.

- 2.10 The Administration of the trusts will organise inspections and the enforcement of the statutory measure requested, and an application has been submitted by the Wheat Forum for the designation and authorisation of a person as an inspector to perform the functions referred to in the Act. The Administration on the trusts could either appoint personnel for this purpose, or contract independent persons to inspect and enforce the proposed measure. A registration data-base of persons dealing in the course of trade with winter cereal will be maintained by way of statutory registration by SAGIS and will be used to identify those on whom the statutory measure is applicable.
