Datum waarop aansoek ingedien is: 12 November 1990.

Belange en gebied ten opsigte waarvan aansoek gedoen word: Werknemers in diens in die—

1. Chemikalieënywerheid;
2. Springstof- en Verwante Produktenywerheid;
3. Rubber- en Rubberproduktenywerheid;
4. Plastieknywerheid;
5. Leernywerheid;
6. Tekstielnywerheid;
7. Glas- en Glaswarenywerheid;
8. vervaardiging van olie, gas, petroleum en neweprodukte daarvan uit steenkool;
9. Padpassasiersvervoerbedryf;
10. Voedsel-, Eetbare Neute- en Versnaperingsnywerheid;
11. Verversingsbedryf;
12. Goederevervoer- en Opbergingsbedryf;
13. Yster-, Staal-, Ingenieurs- en Matallurgiese nywerheid;

Vir die doeleindes hiervan word bogenoemde nywerhede en bedrywe soos volg omskryf:

1. "**Chemikalieënywerheid**" beteken sonder om die gewone betekenis van die uitdrukking enigerwys te beperk, die nywerheid waarin werkgewers en hul werknemers met mekaar geassosieer is vir die doel van die bereiding, vervaardiging, bottel, toedraai en/of verpakking van chemiese produkte of stowwe, mediese preparate vir dierlike of menslike gebruik, toiletpreparate, kosmetiese middels, parfuum of reukwater, antiseptika, reukweermiddels, insekdoders, ontsmettingsmiddels, bakpoeier en/of bestanddele daarvan, stysel, gela-tien, geursel- of kleurlessens vir voedingsmiddels, gekonsentreerde vrugtesap (sinteties of ander), vloeibare en droë kleurstowwe, wassoda, byvoer en tonikums vir diere, vlieëspuitstof, DDT-mengsels, wasmengsels, bytsoda, ammoniak, skuurpoeier en -pasta, skuurseep, verf, emalje, beskermende lae, distemper, lakvernis, vernis, politoer, verdunners, karbolineum, stopverf, smeerolie, meubelolie, terpentyn en -substitute, bas- of blaarioolie-ekstrak, lynnolie en -substitute, dip, leersmeersel, ink, kantoorlym, gom, remvloeistof vir hidrouliese motortransmissiestelsels, blousel, brandspiritus, bensien, seep, kerse, lym, asyn, pigment, chemiese houtverduursamingsmiddels, bloedplasma, vlapoeier en bleikmiddels.

2. "**Springstof- en Verwante Produktenywerheid**" beteken, sonder om die gewone betekenis van die uitdrukking enigerwys te beperk, die nywerheid betrokke by die vervaardiging van springdoppies, springdoppiebuisse, springstowwe, lonte, brandtou- en doppiepatroonknippe, kunsmis, karbiedskuurmiddels, sure, chemikalieë of chemiese verbindings, sianid- en sianogeenprodukte, reinigers, swamoders, industriële alkohol, koolstofftetrachloried, etileenoksied, natriumfluoried, formaldehied, asetileen, metanol, asetoon, propeennitriet, chloorkalk, natriumkarbonate, natriumkristalle, natriumhipochlorietoplossings, chloorparafienplastiseerders, suurstof, soda-as, mediese preparate, veebrandmerkvloeistowwe, veeartsenymiddels en chloor, en die raffinering en reiniging van olie, en dit omvat alle prosesse wat daarmee gepaard gaan.

3. "Rubber and Rubber Products Industry" means the industry in which employers and their employees are associated for the purpose of carrying on any one or more of the following activities:

- (a) The manufacture of—
 - (i) rubber;

SCHEDULE**NATIONAL MANPOWER COMMISSION****RECOMMENDATIONS ON A LABOUR RELATIONS AND MINIMUM WAGE SYSTEM FOR FARM WORKERS****1. INTRODUCTION**

1.1 In this document, the NMC's recommendations regarding the possible application of the Labour Relations Act and the Wage Act to agriculture are discussed.

1.2 Regarding the LRA, the National Manpower Commission (NMC) decided to first consider the principles underlying a labour relations system for farm workers, before considering whether the LRA should be made applicable. These principles are enunciated below.

PART A: LABOUR RELATIONS ACT**2. FAIR/UNFAIR LABOUR PRACTICES**

2.1 The NMC supports the principle of fairness and all members agreed that farm workers⁽¹⁾ should be treated fairly. Fairness does, however, cut both ways and there should also be fairness towards the employer. The NMC also agreed that the common law is not enough to ensure fairness, and therefore that measures in addition to the common law are required to ensure fairness.

2.2 Members were also in agreement that these measures should be compulsory, i.e. should be incorporated in the Act. Measures which are totally voluntary would not be enough and they should have "teeth".

2.3 The general feeling was that a very detailed definition of fair/ unfair labour practices in the Act would not be advisable because this is very rigid and inflexible.

2.4 Members agreed, however, that although there is a need for flexibility, there is also a great need for certainty and clarity. To address this need, a code should be drafted by the NMC on fair or unfair labour practices. The majority of NMC members felt that such a code should be applicable to all sectors. The SAAU, however, was of opinion that the decision as to the desirability of having a code applying to all sectors or only to agriculture should not be decided at this moment in time but should only be decided when there is certainty regarding the contents of such a code. The protagonists of a national code indicated that it does not make sense to have separate codes for different sectors because of the confusion it would create. The NMC decided that although it is necessary that the whole question regarding general and sectoral codes be settled, the settlement of this issue will not be a pre-condition as to the application of labour relations legislation to agriculture. In this regard the SAAU requested that it be noted that it could not agree to the inclusion of agriculture under the ambit of the LRA before the guidelines pertaining to labour practices are known to them.

2.4.1 The NMC felt that such codes should have legal effect ("teeth") and it should be possible and it should be possible to present this code as evidence in the Court. One group felt that the LRA should make provision for such codes. Another group was of the opinion that the Court will in any event take account of such a code even if it is not provided for in the Act.

2.5 Court decisions of the past and existing codes should serve as a guideline for drafting the code. The code should be negotiated by employer and employee organisations, or by a reconstituted NMC. The SAAU suggested that such codes could also be drafted in consultation between agriculture and the NMC or the Department of Manpower.

2.6 The NMC agreed that should the LRA be made applicable to agriculture, an extensive information programme should be launched to inform agriculture about the requirements of the Act. It is desirable that guidelines on fair and unfair labour practices should also be made available to parties.

2.7 In light of the NMC's decision on codes and the CLRA investigation in this regard, the question whether a separate code is required for agriculture, could only be decided once there is certainty regarding the contents of such a code. The code itself could be drafted once there is more clarity regarding the views of Government on labour legislation for farm workers.

2.8 The principle of self-governance is also very important and should be incorporated in the Act. Collective agreements outside industrial councils, e.g. local level agreements dealing with labour practices, codes of conduct, disciplinary and grievance procedures should thus be possible. Such collective agreements should be enforceable, e.g. by way of the definition of an unfair labour practice.

⁽¹⁾ Although the term "farm worker" or "worker" is used in this document, the intention is not that it should be a different concept from that of "employee" in the LRA.

2.9 The matter of reinstatement orders in the agricultural sector was worrying to some members (including the SAAU). The reason was that agriculture has very special circumstances in terms of accommodation being provided on the farm, the very personal relationship, the long distances involved, etc. The NMC noted, however, that with regard to a section 43-order (status quo-orders), an employer has an option whether he wants to physically reinstate an employee or whether he wants to pay remuneration in lieu of reinstatement. With regard to section 46 (9), which deals with final awards, the majority of the members of the NMC felt that the court should have total discretion in deciding whether a reinstatement should be done or whether money in lieu of reinstatement will be possible.

2.9.1 A minority viewpoint expressed by the SAAU, 3 NMC-members (members Nieuwoudt, Swart and Smith) and committee member Lyman with regard to reinstatement is that in the case of an unfair dismissal, the employer should always have the option or choice whether he wants to physically reinstate the dismissed worker or whether he wants to pay a fixed amount of compensation (a kind of built in penalty) in lieu of reinstatement. This should apply to all workers in regard to both section 43-status quo orders and section 46 (9) determinations. The principle should apply to all sectors.

3. THE PROCEDURES FOR RESOLVING DISPUTES

3.1 All members agreed that legislation for farm workers and their employers should make provision for procedures to resolve disputes.

3.2 All members agreed that parties to a dispute should be encouraged to discuss (as a first step) their dispute at the lowest possible level, ie at the source of the dispute and that the employer and employee should primarily be involved at this stage. All members agree that legislation to regulate this matter would not be advisable or practical. Procedures regarding grievance and disciplinary codes could for instance be agreed upon between the employer and his workers or trade union, and as part of such agreement, trade union involvement as a first step could be limited.

3.3 Some members (including the SAAU) felt very strongly that at the initial stage, there should be no outside interference, and that the farmer and his worker should directly discuss their differences. The worker should be able to call for the assistance of any other person on the farm, but not an outside person. There should be no trade union involvement at this very first step, because such involvement could reduce the chances of settling the dispute. The members supporting this view accepted that it would be impractical to incorporate a rigid requirement regarding the above matter in legislation, but felt that there should be some other way to encourage the parties to discuss their differences without outside interference. After having discussed their differences at plant level (eg on the farm), outside involvement, eg a trade union, employer organisation or advice office should be possible. The majority of the NMC felt that there should be no restriction on the worker or the employer getting outside assistance, even at the initial stage.

3.4 The outcome of the two approaches within the NMC is the same, ie that there should be no legislation to force the employer and employee to discuss their differences and to stop outside involvement, although the reasons for this outcome are different.

3.5 All members agree that if the dispute cannot be settled by discussions internally (whether this means trade union involvement or not), the dispute should go to either an Industrial Council with jurisdiction, a conciliation board, or if the parties agree, mediation or arbitration. These procedures will then be compulsory in order to attempt settling the dispute, before taking further action, eg a strike, lock-out or reference to the Industrial Court.

3.5.1 Mediation should be concluded within 30 days or such longer period as agreed upon by the parties. The meeting agreed that parties should be able to go directly to mediation or arbitration if they can agree thereon without first approaching a conciliation board.

3.5.2 An important aspect was that the conciliation system could only function effectively if more mechanisms were created to service employers and employees in outlying areas. More officials to preside over CB meetings in rural areas is thus of absolute importance. The SAAU and COFESA felt very strongly that this was a prerequisite for the LRA to be made applicable to agriculture, ie that the LRA could not be made applicable if there were not more conciliation board officials in outlying areas. Attention also need to be given to the introduction of permanent conciliation centres and the possibility of private conciliation centres.

3.6 Members agreed that the CB chairman should play a more facilitating role, i.e. he should facilitate agreement being reached. According to the Websters and Oxford Dictionaries he should thus make it "easier for the parties to reach agreement" or should "promote the reaching of an agreement". He should thus play a more active role to get parties to conciliate and he should also guide parties to conciliate. The meeting was agreed that the parties can agree to ask the CB chair person to play a mediating role and also make a non-binding recommendation (if both parties agree). This should apply to all workers and not only agricultural workers.

3.7 Regarding time limits the majority of the NMC, was agreed that the time limits of the existing LRA should be accepted and that special time limits for agriculture would be unrealistic. Because of the seasonal nature of agriculture, the SAAU and COFESA were of the opinion that with regard to an unfair labour practice dispute arising in the agricultural sector, this dispute should be referred to a conciliation board within 90 days and not within 180 days as contained in the 1991 Labour Relations Amendment Act.

The Labour Court system

3.9 The meeting agreed that disputes of right could go to a court if they are unresolved at the conciliation board or mediation stage. Apart from the existing Industrial Court, there was also a serious need for a "small claim" type of court, which shall be referred to as the Small Labour Court. Such a court should also be within the Industrial Court structure. A separate court for agriculture would be unrealistic.

3.10 The meeting was thus in agreement that provision should be made for Small Labour Courts. No appeal should be possible, and no professional (i.e. at a fee) representation allowed. The Small Labour Court should not be a court of record. It was acknowledged that these Courts would not be available in all areas, because presiding officers would not be available in outlying areas. The idea was also expressed that in cases where a small labour court is not available, the chairman of the CB could assist by playing a facilitating role in settling the dispute, eg by way of making non-binding recommendations. Attention should also be given to the role that officers of the peace could play in the regard.

3.11 The Small Labour Court should be in all the major towns, but they should have regional jurisdiction, eg a circulating court. The SAAU and COFESA were strongly of opinion that it should be a prerequisite that this court be available in outlying areas before the LRA can be made applicable to agriculture. The majority of the NMC decided to strongly urge Government to give high priority to the introduction of these courts. These members were not, however, prepared to view this as a prerequisite before the Act can be applied to agriculture.

3.12 Regarding the small labour court, the meeting felt that the complainant (applicant) should have a choice to go to the small labour court, where no professional representation will be allowed and no appeal would be possible, or to approach the Industrial Court where legal representation will be allowed and appeal would be possible. The meeting agreed that the small labour court should be very simple and quick. It would thus not be a court of record. The meeting also agreed that if the small labour court system is used, a codification of unfair labour practices will be necessary.

3.13 The principle of giving the applicant a choice to elect was important because the principles of having legal representation and of being able to appeal against an unfair judgement, are very important. This should not be taken away unilaterally and the choice should be up to the applicant whether he wants legal representation and the appeal possibility. If he wishes to have these then it should be possible for him to approach the Industrial Court and not the small labour court. Some members including the SAAU were not very satisfied with the principle of giving total freedom to elect a Court, because unions would according to them almost always approach the Industrial Court, and the Small Labour Court would not be utilised. The trade unions argued, however, that they do not have funds to approach the Industrial Court, and would prefer to use the small claims labour court. The SAAU and COFESA who were opposed to free election felt this issue could be resolved by requiring surety if the applicant party wishes to go to the Industrial Court and not the small labour court. The rest of the NMC were opposed to this proposal.

3.14 The meeting was agreed that costs should only be ordered in cases which are frivolous or spurious, and that the court should have the power to order surety for costs in special circumstances. The discretion of the Court should be along the same lines as in the common law, i.e. it should not debar access to the court. The SAAU and COFESA felt, however, that if a party wishes to go to the court against a recommendation of a CB chairperson, then the court should order surety for costs. This will not apply to the small labour court.

3.15 Regarding legal representation in the small labour court, the meeting agreed that any person with a legal qualification that would qualify him for entrance to the bar or side-bar should be excluded, except if that person is the owner of the farm or business (eg a one-man employer). In the latter case the worker should also have a right to legal representation.

3.16 The meeting agreed that the Small labour court should mainly deal with disputes of rights (i.e. unfair labour practice), although some felt it should have wider jurisdiction. The respondent should be able to petition the court that the dispute is too big or too involved and that it should be heard by the Industrial Court. One person felt that the Court should only have jurisdiction if both parties to the dispute so agree, otherwise the Industrial Court should have jurisdiction. In this instance it is interesting to note that in the proposals regarding Labour Courts in Chapter J of the CLRA the jurisdiction of the Labour Court (first division) and that of the small Labour Courts (second division) are determined by the type of remedies if may issue and the type of labour issues it may deal with. In terms of the draft CLRA small labour courts will deal with certain alleged unfair suspensions, alterations of terms and conditions of employment, and individual alleged unfair terminations of service.

3.17 COSATU felt that there should be some limit on the size of disputes dealt with by the Small Labour Court, eg only if less than 10 employees are involved. SAAU felt that if surety is required to approach the Industrial Court, this issue will settle itself, i.e. only if the case is big or involved will the applicant be prepared to put forward surety. Having said that, the NMC was of the opinion that the issues of size of disputes and surety as it pertains to labour courts should be addressed when the NMC moots the issue of labour courts as part of the CLRA investigation.

3.18 COSATU felt that the restructured NMC should be involved in the appointment of presiding officers of the Small Labour Court. There was no general support for this proposal. There was general support for the idea that some mechanism should be available for parties to complain about the competence of presiding officers and that there should be a procedure for the removal of incompetent officers. This proposal is in principle congruent with the proposals regarding Labour Courts in the draft CLRA whereby the Minister of Justice will have the power to remove the president, deputy president and labour judges on the grounds of misbehaviour and incapacity.

4. COLLECTIVE BARGAINING

4.1 The NMC recognized the right of all employees and employers to associate or not to associate. The principles underlying a system of collective bargaining, the duty to bargain and the recognition of trade unions, should thus also be applicable to the agricultural sector. The SAAU, however, emphasized that it could not on behalf of its members recognize trade unions. The SAAU also indicated that the acceptance of the above principles would not necessarily imply acceptance of the LRA as it now stands.

4.2 An important proviso with regard to this issue (in fact all issues regarding a labour relations system for agriculture) was that the recommendations of the NMC on a Consolidated Labour Relations Act may affect the views of the NMC.

5. STRIKES AND LOCK-OUTS

5.1 The meeting agreed that there should be some right to strike and lock-out in the agricultural sector, although the SAAU felt it should be subject to the restrictions (as stated below). It was also agreed that if compulsory arbitration were to be required under all circumstances, this would destroy collective bargaining and it would reduce the possibility of the employer negotiating deals with employees/unions, i.e. of more rather than less agreement between an employer and his employees.

5.2 The meeting took note, however, of the special circumstances in agriculture which meant that some periods of any year were extremely quiet and other characterised by intense activity. Employers will choose to lock-out in the quiet period, whereas the union will choose to strike in the peak period. A strike during the peak period could, however, wipe out total production for a full year or more and therefore also the farmer. A lock-out during slack periods could seriously prejudice the well-being of the farm worker and his family. It was important that this issue should be addressed.

5.3 The meeting also took note of the further characteristics of agriculture, ie if there is a strike or lock-out, the workers are still on the property. It will thus be very difficult to withhold some forms of remuneration in kind, eg in the form of accommodation, use of land, water and firewood. It is, however, very unlikely that other remuneration in kind will be paid in the strike situation. The same pressure that exists in urban areas on employees to end the strike (because they have no income to finance accommodation and food), does not necessarily exist in agriculture. Workers could thus conceivably continue with a strike for a very long period of time. In addition, it is practically impossible to get temporary labour in agriculture to do the work of striking workers, because of the geographic distances involved and because accommodation would not be available.

5.4 The meeting also took note of the fact that agriculture was also different from the rest of industry in respect of its production processes. Although many industries work with perishable products, agriculture is characterised by a biological process, ie produce can only be planted and harvested at certain times of the year and if not planted or harvested at that time, it could set back the biological process for a year or more. Live-stock must also be cared for on a daily basis and in some instances eg milking, it could have devastating effects if not done on a daily basis.

5.5 The meeting noted that many of the above factors could individually be found in other sectors of the economy. The agricultural sector was, however, probably unique in that it experienced all of these factors cumulatively. It was noted that not all of agriculture was affected to the same extent.

5.6 Various possibilities to regulate the right to strike⁽¹⁾ without making all disputes in this sector subject to compulsory arbitration, were discussed: It was agreed that the question of legal strikes are the most problematical, because the timing of the strike could have devastating effects, and the farmer being at great risk if he

⁽¹⁾ These remarks apply *mutatis mutandis* to lock-outs.

dismisses workers. Although an illegal strike could also have devastating effects, the position of the farmer in this instance would not be much different from what it is now, ie with the farmer not covered by the LRA. The most appropriate solution for strikes in agriculture, that was recommended by the NMC, was the following:

(a) No-strike agreements. Such agreements could specify that there should be no strikes during certain periods of the year, and instead that compulsory arbitration or other remedies agreed to by the parties concerned, will apply. These should be enabling legislation regarding such agreements. This needs to be done because common law agreements are not enforceable. If a legal strike takes place in contravention of the provisions of a common law agreement, there is in terms of section 79 of the LRA, no redress to the courts. COSATU, however, did not agree with the view that collective agreements are not enforceable by law. Therefore they feel that no changes in legislation in this regard are necessary. As they see it collective agreements are enforceable. The NMC agreed that these agreements should be concluded collectively, that is by the majority of the workers in the bargaining unit, for example a trade union (if a trade union is present), a worker organisation or a group of workers—thus excluding agreements with individual workers. It should be written agreements and it should be concluded for a certain limited time period (no longer than 12 months).

5.6.1 In addition to a no-strike agreement, the following possibilities were also advanced:

(b) Awarding costs under specified circumstances. The disadvantages of this approach were that courts do not easily award costs; that according to the courts, unions have no special (additional) liability for loss caused by their members; and that the order will not be effective because of impoverished unions.

(c) It should be possible to approach the court to ask for an order (interdict) that a strike or lock-out would be undesirable for a specified period of time because of special circumstances. These special circumstances could be the same as those proposed in the Draft Consolidated Labour Relations Act namely:

- Where the strike has caused or is liable to cause serious damage to the physical property of an employer or to endanger the health and safety of persons; or
- where the strike could reasonably be expected to lead to the destruction of an employer's business or the viability of such a business, unless the strike is functional to the collective bargaining process; or
- where the strike is conducted in a violent manner, or is accompanied by serious threats of violence.

The NMC was of the opinion that these interdicts should also apply with regard to legal strikes and lock-outs. The NMC felt that with regard to lock-outs, similar criteria should be investigated by the Technical Committee of the NMC.

Although it was generally agreed that the small labour courts should not be able to give interdicts, it was felt that methods should also be investigated by the NMC Technical Committee to make the courts more accessible to interdicts. A further alternative was that if the courts were to grant such an order, compulsory arbitration should apply.

6. LEGISLATION

6.1 The NMC discussed various ways in which the recommendations contained in this document could be incorporated in legislation.

6.2 Note was taken of the following disadvantages of a separate Act for farm workers:

(a) It would be difficult to maintain two separate Acts, with similar amendments having to be effected to both from time to time.

(b) Other sectors will also want separate Acts. This will result in more regulation and not less.

(c) Another disadvantage is that a totally new infra-structure must be created. This costs time and money.

(d) There will also be no clarity or certainty regarding labour relations. There will be no court judgments to give guidance, no lawyers, consultants or academics with knowledge about what can and cannot be done and even officials from the Department of Manpower will not be able to assist with advice.

(e) The whole separate dispensation will be regarded with much suspicion and there will be constant pressure for inclusion under the LRA.

6.3 The majority of the NMC supported inclusion under an amended LRA, with the amendments as indicated above. Mr Swart, however, indicated that this decision could only be taken once there is more certainty regarding procedures and systems. All members agreed that before the LRA is made applicable to agriculture there should be an extensive information campaign to inform agriculture about the requirements of the Act. A code on fair and unfair labour practices should also be developed. However, such an information campaign and code should not be prerequisites for the application of the Act to agriculture, although SAAU and COFESA felt that it should in fact be a prerequisite. Furthermore there need not necessarily be a special regime for agriculture as most of the changes indicated in this report could just as well apply to all sectors.

6.4 The SAAU was, however, not fully convinced of the need for a formal labour relations dispensation at present. With the existing protection of the Basic Conditions of Employment Act to agriculture and the great many uncertainties regarding the above amendments and the Consolidated Labour Relations Act, the SAAU could not support the immediate application of the LRA to agriculture. In this regard the SAAU reiterated concerns which led to certain amendments in the rest of the report. However, these concerns of the SAAU should not be seen as being in contradiction with the rest of the report.

The full viewpoint of the SAAU is as follows:

"The peacefulness in respect of labour relations on farms is a particular feature of farm labour. It is significant that during the 1980s, which were characterised by riots and labour unrest, there were very few cases of labour unrest in the rural areas and virtually none of the farms. This state of affairs must be attributed to the good and very personal relationship between employers and employees on farms.

Despite accusations flung at the agricultural sector about the alleged exploitation of workers, 1,3 million workers still make a living in agriculture and, except for a few isolated regions, agriculture is not experiencing a shortage of workers. Together with the dependents of these workers, almost six million people in South Africa make a living in agriculture and, except for a few isolated regions, agriculture is not experiencing a shortage of workers.

Farmers have a justified fear that this special relationship between the farmer and his worker will be disturbed if the Labour Relations Act is applied to agriculture and trade unions obtain an official, legal status on farms. The agricultural sector prefers that labour matters in agriculture be regulated by good management practices rather than by legislation.

It was with concern that the agricultural sector took note of the serious unrest in other sectors that are linked under a legal system and of the irresponsible behaviour of some trade unions.

Against this background the congress of the SA Agricultural Union in October 1990 made the following decisions:

The Congress accepts the viewpoint that legislation in itself cannot promote good relations between employers and employees but that good relations are the result of sound manpower management practices on farms.

The Congress also decided that any possible extension of labour laws to include agriculture has to be investigated thoroughly and considered carefully to ensure that it will not disturb the good labour relations already found on farms.

The viewpoint of the SAAU that a formal (legal) labour relations system should not be applied to agriculture should not be interpreted as a denial of the worker's basic rights by the agricultural sector. For example, the agricultural sector accepts—

- that an employer and an employee have equal claim to protection against unfair labour practices;
- that in principle any worker has the right to collective bargaining; and
- the principle of freedom of association and non-association.

The agricultural sector is also of the opinion that with the envisaged extension of the Basic Conditions of Employment Act to agriculture, the agricultural worker's basic rights will be protected further. With the protection granted by the application of common-law regulations, the SAAU is of the opinion that the rights of the farm worker will be protected sufficiently and that a formal labour relations system in the agricultural sector is not necessary at this stage.

However, the viewpoint of the agricultural sector was not accepted by the Farmworker's Committee and the agricultural sector consequently stipulated that, before a formal labour relations system can be extended to include agriculture, clarity should first be obtained on matters such as strikes and lock-outs, procedures to settle disputes, unfair labour practices and the jurisdiction of industrial councils.

If such a system is introduced for agriculture, the particular characteristics of the agricultural sector should be taken into careful consideration. For example, strikes in critical stages of the farming cycle should be prohibited, there should be a special dispute settlement mechanism and procedure for agriculture in which the emphasis should fall particularly on the settlement of disputes directly between the farmer and his workers, easily accessible and inexpensive special small labour courts should be introduced on a decentralised basis, and unfair labour practices which will also protect the farmer's interest, etc.

A final decision on the acceptance or not of a formal labour relations system for the agricultural sector should only be made once the details of the procedures and systems concerned are known and can be studied."

PART B: THE WAGE ACT**1. CONCEPTUAL APPROACH**

1.1 During discussions of the Farmworkers' Committee regarding the possible application of the Wage Act to the agricultural sector, various arguments or motivations for and against the inclusion of farm workers under the ambit of this Act were advanced. These motivations can broadly be classified into three categories:

- the full inclusion of farm workers under the ambit of the Wage Act;
- the maintenance of the *status quo*;
- reconsideration of the Act within 24 months.

These three categories are elaborated upon hereunder. During NMC deliberations the last approach was replaced by one stating that the application of the Act should be postponed for 24 months.

2. MOTIVATIONS FOR THE FULL INCLUSION OF FARM WORKERS UNDER THE WAGE ACT

(a) Farm workers are to a greater or lesser extent being treated unfairly by their employers in respect of their wages and other conditions of employment when taking into account the existing differences in conditions of employment and wages between these workers and workers in other sectors of the economy. This phenomenon is aggravated by the fact that there is a large supply of farm workers and these workers are generally unskilled and illiterate, thus weakening their bargaining position in the labour market.

(b) Regarding the rate of inflation it is argued that the major determinant of this phenomenon is government macro-economic policy, in particular monetary and exchange rate policy. There is no question that the Wage Act is an unimportant concern for the inflation conscious, relative to government economic policy. To the extent that the application of this Act to the agricultural sector would influence the rate of inflation marginally in the first year of increased minimum wages, this can be fully justified since wages paid in agriculture in some sectors and regions presently are very low. Where minimum wages are required, it would contribute to the increase of the total welfare of the agricultural community.

(c) On the question of unemployment it is mentioned that extremely high increases in minimum wages will obviously lead to a significant increase in unemployment, while a very low increase is likely to lead to a totally negligible increase. It would be the responsibility of the Wage Board to set a minimum wage at a level where it would increase wages at the lower end of the scale, while keeping in mind that extreme increases would lead to unemployment. It can be mentioned that the 1988 Agricultural Survey indicated that remuneration in agriculture constituted only 17% of total expenditure. Moderate and essential increases in wages are unlikely to affect the profitability of the agricultural business significantly.

(d) The application of the WA to agriculture does not mean that payment in kind would automatically be done away with. The Wage Board can make provision for an independent assessment of the value of payment in kind in order to protect both farmer and farm worker.

(e) Minimum wages in the agricultural sector will not necessarily increase urbanisation in the RSA. Between 1987 and 1988 employment in agriculture dropped by 9,5%. The rate of urbanisation is only likely to increase if unemployment in this sector increases accordingly. Increased wages would also have an opposite effect namely that skilled and "good" employees, who have been leaving agriculture for better paid jobs in urban industries because of low wages and lack of opportunities for promotion in agriculture, may now be enticed to stay and contribute to an increase in productivity in this sector.

(f) It is necessary to have wage regulating legislation in agriculture due to the fact that it is unlikely that the bulk of farm labour will be unionised and will therefore not be participating in collective bargaining. In this instance wage regulating legislation is an effective way of assuring the application of minimum wages in agriculture.

(g) The fact that there are certain regional, sectoral or any other differences in agriculture, should not preclude agriculture from being placed under the ambit of the Wage Act. The reason for this is that all other sectors that are already included under the Act also show differences from one another as well as variations in the sectors themselves. Furthermore, agriculture has survived decades of marketing boards and other interferences from the State, through which standard prices were set for specific products. Regional and sectoral differences have not led to this system collapsing and the present review of marketing boards is based on totally different grounds.

(h) It is the responsibility of the Wage Board to take all factors which are relevant in the setting of minimum wages into account. One of them is the possible effect of climatic conditions on the "ability to pay". Various other industries are also affected by changing conditions: The textile industry, an important economic indicator, have periods of expansion and serious down-turns; in the building industry climatic conditions play an important role. The Wage Board should be able to deal with specific conditions in agriculture by instituting appropriate mechanisms such as in other sectors.

3. MOTIVATIONS FOR THE MAINTENANCE OF THE STATUS QUO

(a) The introduction of a minimum wage and periodic increases of it in agriculture would exert upward pressure on the *rate of inflation*. Keeping in mind the relative share of agriculture in the economy, a minimum wage applying to agriculture would have a negative rollover effect on inflation in society as a whole.

(b) Wage regulations in terms of the Wage Act are usually determined on an operational basis. However there is great diversity in the profitability and consequently, solvency of farmers. This solvency does not only differ on a regional and sectoral base but also between individual farming enterprises within the same operational branch or region. Climatic and soil conditions also differ greatly from farm to farm. It is practically impossible to accommodate these differences in agriculture. There are also a number of very small entrepreneurs in agriculture which further complicates the application of the Wage Act to agriculture.

(c) In contrast to most other sectors in the economy, the same employees on most farms have to perform different tasks with different levels of skill and expertise. The question is then on the basis of which task should the minimum wage be determined.

(d) The possibility exists that the minimum wage set by the Wage Board might become the actual or maximum wage. It can serve as a signal to farmers who are paying more than the minimum wage, that they can pay less. In this way, minimum wages can depress the possibility of higher wages.

(e) The inclusion of farm workers under the Basic Conditions of Employment Act (BCEA) as well as under the LRA (with or without proposed amendments) will provide the parties with the necessary machinery to determine their own bargaining and employment arrangements without unnecessary third party intervention. It is argued that employers and labour should be entitled to negotiate wages within the confines of the market place and not be restricted by laid down limitations.

(f) The supply and demand of employees must be a factor in the determination of wages to obtain maximum employment. Agriculture is one of the largest work providers in the country. The implementation of the Wage Act in agriculture could thus disturb supply and demand to such an extent that it could increase unemployment in the RSA. If wages, as one cost factor, become too expensive, farmers can use alternative possibilities to avoid high wage costs. Mechanisation with consequently higher unemployment is one alternative.

(g) The application of the WA to agriculture would be undesirable at this stage because of the adverse economic conditions and the existing high levels of unemployment in the RSA. As regards adverse economic conditions, the Department of Agricultural Development indicated that about 30 per cent of the country's white farmers are at the brink of insolvency, and further that the total farm debt amounts to more than R14 billion at present.

(h) It is practically impossible for the WA to regulate payment in kind, especially in agriculture where the extent and quality of *in natura* remuneration varies considerably and is extremely difficult to determine due to continuous improvement. The implementation of the WA will lead to the cessation of existing practices such as free transport, housing, water supply, grazing rights, etc which in turn will negatively impact on employee welfare and employee-employer relations on the farms.

(i) There are certain negative effects as regards the application/administration of the WA and minimum wage levels to agriculture. In this instance, the enforcement of wage determinations would call for an extended corps of inspectors in agriculture, and there would be problems in obtaining reliable data in determining the ability to pay of employers and arriving at the value of remuneration in kind.

(j) Although wage determinations at the moment are in some instances not unrealistic in terms of affordability, inclusion under the Wage Act would be like signing a blank cheque. There is no guarantee that the present policy will continue or that the composition of the Wage Board will not be altered drastically.

4. ADDITIONAL VIEWS BY SOME COMMITTEE MEMBERS ON THE RECONSIDERATION OF THE WAGE ACT WITHIN 24 MONTHS AND WAGE GUIDELINES IN THE INTERIM

4.1 Some members of the committee indicated during committee deliberations that in their view the time was not ripe to make the Wage Act applicable to agriculture. This might however change in the future and therefore a final decision regarding this aspect should not be taken now. Some of the reasons for this view are the following although all the reasons are not necessarily endorsed by everyone:

(a) Three important labour Acts will most probably be made applicable to agriculture in the near future and the application of a fourth (especially such a controversial act as the Wage Act) could damage the successful implementation of the other Acts.

(b) Minimum wages in agriculture could possibly lead to unemployment in agriculture because of a lot of surplus labour being employed and fears about unrealistic future minimum wage increases. South Africa is already experiencing particularly high unemployment due to financial and other sanctions, economic adjustment programmes, political uncertainty and budget allocations to eliminate social backlogs. To cause even more unemployment now will result in more social unrest and instability, which will undermine a successful transition to a democratic South Africa.

(c) The financial plight of most farmers at the moment is particularly serious. Agriculture is also going through an adjustment process and this is partly the reason for the financial difficulties.

4.2 Until such time as conditions have improved, even a recommendation by the NMC to include agriculture fully under the Wage Act will damage the successful implementation and acceptance of the other Acts in agriculture.

4.3 At the NMC meeting of 16 April 1991, the approach above was amended to read that the Wage Act should be extended to agriculture, but its application postponed for 24 months.

5. RECOMMENDATIONS OF THE NMC

5.1 Based on the discussion above regarding the handling of the Wage Act in relation to agriculture, the NMC put forward the following three proposals:

(a) COSATU, NACTU and members Liebenberg and Le Roux were in favour of the *inclusion* of agriculture under the Wage Act together with changes to the composition of the Wage Board: The Wage Act in its current form, should be made applicable to agriculture, and the Wage Board should become a tri-partite body with members from the State, trade unions and employers. This approach will necessitate changes to the composition of the Wage Board.

(b) NMC members Landman, Roodt, Smith, R. Botha, Pienaar and Committee members Bosch, Budlender, Meyer and Bailey supported in principle the extension of the Wage Act to agriculture, but with the provisos that the application of the Wage Act in agriculture be delayed for 24 months and that wage guide-lines be compiled for agriculture in the interim. Such guide-lines should not be compulsory.

(c) The SAAU, COFESA and Committee member lyman were in favour of the maintenance of the *status quo*. It was argued that the application of the Unemployment Insurance Act (UIA), Basic Conditions of Employment Act (BCEA) and the Labour Relations Act (LRA) to agriculture in the near future obviates the need for the WA in agriculture.

5.2 The NMC decided to include as part of its report, the original majority recommendation of the Committee to the NMC, even though it was not supported by the NMC:

"The implementation of the Wage Act in agriculture should be reconsidered by the NMC in 24 months' time. In the interim, the Wage Board should make recommendations regarding acceptable minimum wages in various sectors and regions in agriculture, taking into account financial conditions and fringe benefits. Such recommendations will not have the force of law, but will serve to orientate the farming community towards the idea of minimum wages, without causing a huge upheaval. Committee members Bosch, Bailey, Budlender, Barker, Meyer and Nieuwoudt indicated their support for this proposal.".

NASIONALE MANNEKRAKGOMMISSIE

AANBEVELINGS OOR 'N ARBEIDSVERHOUDINGE- EN MINIMUMLOONSTELSEL VIR PLAASWERKERS

1. INLEIDING

1.1 In hierdie dokument word die NMK se aanbevelings oor die moontlike toepassing van die Wet op Arbeidsverhoudinge (WAV) en die Loonwet op die landbou bespreek.

1.2 Wat die WAV betref, het die Nasionale Mannekragkommissie (NMK) besluit om eers die beginsels onderliggend aan 'n arbeidsverhoudingstelsel vir plaaswerkers te oorweeg voordat hy dit sou oorweeg of die WAV van toepassing gemaak moet word. Hierdie beginsels word hieronder uiteengesit.

DEEL A: WET OP ARBEIDSVERHOUDINGE

2. BILLIKE/ONBILLIKE ARBEIDSPRAKTYKE

2.1 Die NMK steun die beginsel van billikhed en alle lede het saamgestem dat plaaswerkers⁽¹⁾ billik behandel moet word. Billikhed geld egter vir albei kante, en daar moet ook billikhed teenoor die werkewer wees. Die NMK het ook saamgestem dat die gemenerg nie toereikend is om billikhed te verseker nie en dat daar gevoldiglik maatreëls bo en behalwe die gemenerg nodig is om billikhed te verseker.

⁽¹⁾ Hoewel die term "plaaswerker" of "werker" in hierdie dokument gebruik word, is dit nie die bedoeling dat dit 'n ander konsep as dié van "werkneem" in die WAV moet wees nie.

2.2 Lede was dit ook eens dat hierdie maatreëls verpligtend moet wees, d.w.s. dat dit in die Wet opgeneem moet word. Maatreëls wat geheel en al vrywillig is, sal nie genoeg wees nie en dit moet "tande" hê.

2.3 Die algemene gevoel was dat 'n uitvoerige omskrywing van billike/onbillike arbeidspraktyke in die Wet nie raadsaam is nie, aangesien dit baie streng en onbuigsaam is.

2.4 Lede het egter saamgestem dat, alhoewel daar 'n groot behoefté aan soepelheid is, daar ook 'n groot behoefté aan sekerheid en duidelikheid is. Met die oog hierop moet die NMK 'n kode opstel oor billike en onbillike arbeidspraktyke. Die meeste NMK-lede het gevoel dat so 'n kode op alle sektore van toepassing moet wees. Die SALU was egter van mening dat 'n beslissing oor die wenslikheid van 'n kode wat vir alle sektore of net vir die landbou geld, nie in hierdie stadium geneem moet word nie maar eers wanneer daar sekerheid is oor die inhoud van sodanige kode. Die voorstanders van 'n nasionale kode het aangedui dat dit geen sin het om afsonderlike kodes vir verskillende sektore te hê nie, vanweë die verwarring wat dit sal skep. Die NMK het besluit dat, hoewel dit nodig is dat die hele kwessie rondom algemene en sektorale kodes opgelos moet word, die oplossing van hierdie aangeleentheid nie 'n voorvereiste vir die toepassing van die wetgewing oor arbeidsverhoudinge op die landbou sal wees nie. Die SALU het in hierdie verband gevra dat daar aangeteken word dat hy nie tot die insluiting van die landbou onder die WAV kan instem alvorens die riglyne rakende arbeidspraktyke aan hom bekend is nie.

2.4.1 Die NMK het gevoel dat sulke kodes regskrag ("tande") moet hê en dat dit moontlik moet wees om hierdie kodes as getuienis in die hof voor te lê. Een groep het gevoel dat die WAV vir sulke kodes voorsiening moet maak. 'n Ander groep was van mening dat die hof so 'n kode in elk geval in berekening sal bring selfs al maak die Wet nie daarvoor voorsiening nie.

2.5 Vorige hofbeslissings en bestaande kodes moet as riglyn dien vir die opstel van die kode. Die kode moet beding word deur werkgewer- en werknemersorganisasies of 'n hersaamgestelde NMK. Die SALU het aan die hand gedoen dat sulke kodes ook in samewerking met die landbou en die NMK of die Departement van Mannekrag opgestel kan word.

2.6 Die NMK het ooreengekom dat indien die WAV op die landbou van toepassing gemaak word, daar 'n uitgebreide inligtingsprogram van stapel gestuur moet word om die landbou oor die vereistes van die Wet in te lig. Dit is wenslik dat riglyne oor billike en onbillike arbeidspraktyke ook aan die partye beskikbaar gestel word.

2.7 In die lig van die NMK se besluit oor kodes en die GWAV-ondersoek in hierdie verband kan die vraag of 'n afsonderlike kode vir die landbou nodig is, beantwoord word eers wanneer daar sekerheid is oor die inhoud van so 'n kode. Die kode self kan opgestel word sodra daar meer duidelikheid is oor die Regering se standpunte oor arbeidswetgewing vir plaaswerkers.

2.8 Die beginsel van selfbestuur is ook baie belangrik en moet in die Wet opgeneem word. Kollektiewe ooreenkomsdeals buite nywerheidsrade, bv. ooreenkomsdeals op plaaslike vlak wat met arbeidspraktyke, gedragkodes en dissiplinäre en grieweprosedures handel, moet dus moontlik wees. Sulke kollektiewe ooreenkomsdeals moet afdwingbaar wees, bv. deur middel van die omskrywing van 'n onbillike arbeidspraktyk.

2.9 Die kwessie van herstel in diens-bevele in die landbou-sektor was vir sommige lede (insluitende die SALU) 'n bron van kommer. Die rede hiervoor is dat die landbou baie besondere omstandighede het betreffende akkommodasie wat op die plaas verskaf word, die baie persoonlike verhouding, die lang afstande wat betrokke is, ens. Die NMK het egter opgemerk dat 'n werkgewer met verwysing na 'n artikel 43-bevel (status quo-bevel) 'n opsie het of hy 'n werknemer fisies in sy pos wil herstel of besoldiging wil betaal in plaas van her-indiensstelling. Met betrekking tot artikel 46 (9), wat met finale vasstellings handel, het die meerderheid van die lede van die NMK gevoel dat die hof algehele diskresie moet hê by die besluit of 'n her-indiensstelling gedoen moet word en of betaling in plaas van her-indiensstelling moontlik sal wees.

2.9.1 'n Minderheidstandpunt wat deur die SALU, drie lede van die NMK (die lede Nieuwoudt, Swart en Smith) en Komiteelid Lyman met betrekking tot herstelling uitgespreek is, is dat die werkgewer in die geval van 'n onbillike ontslag *altyd* die opsie of keuse moet hê of hy die ontslaande werker fisies in sy pos wil herstel of 'n vaste bedrag ter vergoeding ('n soort ingeboude boete) in plaas van her-indiensstelling wil betaal. Dit behoort vir alle werkers te geld met betrekking tot sowel artikel 43-status quo-bevele as artikel 46 (9)-vasstellings. Die beginsel behoort vir alle sektore te geld.

3. DIE PROSEDURE VIR DIE BESLEGTING VAN GESKILLE

3.1 Alle lede het saamgestem dat wetgewing vir plaaswerkers en hulle werkgewers voorsiening moet maak vir prosedures om geskille te besleg.

3.2 Alle lede het saamgestem dat die partye by 'n geskil aangemoedig moet word om (as eerste stap) hulle geskil op die laags moontlike vlak te bespreek, d.w.s. by die kern van die geskil, en dat primêr die werkgewer en die werknemer in hierdie stadium betrokke moet wees. Alle lede was dit eens dat wetgewing om hierdie aangeleentheid te reguleer, nie raadsaam of prakties sal wees nie. Die werkgewer en sy werkers of hulle vakvereniging kan byvoorbeeld ooreenkomm oor procedures met betrekking tot grieve- en dissiplinêre kodes, en as deel van so 'n ooreenkoms kan die betrokkenheid van die vakvereniging as eerste stap beperk word.

3.3 Sommige lede (insluitende die SALU) het sterk gevoel dat daar in die aanvangstadium van 'n geskil geen inmenging van buite behoort te wees nie en dat die boer en sy werker hulle verskille direk moet bespreek. Die werker moet in staat wees om die hulp van enige ander persoon op die plaas in te roep, maar nie van 'n buitestaander nie. Die vakvereniging moet nie by hierdie eerste stap betrokke wees nie, aangesien sodanige betrokkenheid die kans vir die beslegting van die geskil kan verminder. Die lede wat hierdie siening gesteun het, het aanvaar dat dit onprakties sal wees om 'n onbuigsame vereiste rakende bogenoemde aangeleentheid in wetgewing in te sluit, maar het gevoel dat daar 'n ander manier moet wees om partye aan te moedig om hulle verskille sonder inmenging van buite te bespreek. Nadat hulle hulle verskille op grondvlak bespreek het (bv. op die plaas), moet betrokkenheid van buite, bv. 'n vakvereniging, werkgewersorganisasie of advieskantoor, beskikbaar wees. Die meerderheid van die NMK het gevoel dat daar geen beperking op die werker of die werkgewer moet wees om hulp van buite te kry nie, selfs nie in die aanvangstadium nie.

3.4 Die gevolg van die twee benaderinge binne die NMK is dieselfde, naamlik dat daar geen wetgewing behoort te wees wat die werkgewer en die werknemer dwing om hulle verskille te te bespreek en om betrokkenheid van buite te verhoed nie, hoewel die redes vir hierdie gevolge verskillend is.

3.5 Alle lede het saamgestem dat as die geskil nie deur interne bespreking besleg kan word nie (ongeag of dit betrokkenheid van die vakvereniging impliseer al dan nie), die geskil na 'n nywerheidsraad metregsbevoegdheid, 'n versoeningsraad, of, as die partye ooreenkomm, bemiddeling of arbitrasie verwys moet word. Hierdie procedures sal dan verpligtend wees om te probeer om die geskil te besleg voordat daar tot verdere optrede oorgegaan word, bv. 'n staking, uitsluiting of verwysing na die Nywerheidshof.

3.5.1 Bemiddeling moet binne 30 dae of sodanige langer tydperk as waaroor die partye ooreenkomm, afgehandel word. Die vergadering het saamgestem dat dit vir partye moontlik moet wees om direk oor te gaan tot bemiddeling of arbitrasie as hulle daaroor kan ooreenkomm, sonder om eers 'n versoeningsraad te nader.

3.5.2 'n Belangrike aspek was dat die versoeningstelsel doeltreffend kan funksioneer slegs as daar meer meganismes geskep word om werkgewers en werknemers in afgeleë gebiede te bedien. Dit is dus absolut noodsaaklik dat daar meer beampes moet wees om voor te sit by versoeningsraadvergaderings in plattelandse gebiede. Die SALU en KOFESA het sterk gevoel dat dit 'n voorvereiste vir die toepassing van die WAV op die landbou is, d.w.s. dat die WAV nie van toepassing gemaak kan word as daar nie meer versoeningsraadbeampes in afgeleë gebiede is nie. Daar moet ook aandag gegee word aan die instelling van permanente versoeningsentra en die moontlikheid van private versoeningsentra.

3.6 Lede was dit eens dat die voorzitter van 'n versoeningsraad 'n meer fasiliterende rol moet speel, d.w.s. hy moet die bereiking van 'n ooreenkoms faciliteer. Volgens die Webster- en Oxford-woordeboeke moet hy dit dus "easier for the parties to reach agreement" maak of hy moet "promote the reaching of an agreement". Hy moet dus 'n aktiewe rol speel om partye sover te kry om hulle te versoen en hy moet ook partye tot versoening lei. Die vergadering was dit eens dat die partye ooreen kan kom om die voorzitter van die versoeningsraad te vra om 'n bemiddelingsrol te speel en om ook 'n nie-bindende aanbeveling te maak (as albei partye daartoe instem). Dit moet vir alle werkers geld en nie slegs vir landbouwerkers nie.

3.7 Met betrekking tot tydsbeperkings was die meerderheid van die NMK van mening dat die tydsbeperkings van die bestaande WAV aanvaar moet word en dat spesiale tydsbeperkings vir die landbou onrealisties sal wees. As gevolg van die seisoensaard van die landbou was die SALU en KOFESA van mening dat 'n geskil oor 'n onbillike arbeidspraktyk wat in die landbou ontstaan, binne 90 dae na 'n versoeningsraad verwys moet word en nie binne 180 dae soos in die 1991-Wysigingswet op Arbeidsverhoudinge bepaal word nie.

Die Arbeidshofstelsel

3.9 Die vergadering het saamgestem dat regtegeskille na 'n hof kan gaan as dit onopgelos bly in die versoeningsraad- of bemiddelingstadium. Daar is, buiten die Nywerheidsraad, 'n dringende behoefte aan 'n soort "hof vir klein eise", wat die Klein Arbeidshof genoem word. So 'n hof kan ook binne die struktuur van die Nywerheidshof val. 'n Afsonderlike hof vir die landbou is onrealisties.

3.10 Die vergadering was dit dus eens dat daar voorsiening gemaak moet word vir Klein Arbeidshoewe. Daar moet geen reg van appèl wees nie en geen professionele verteenwoordiging (m.a.w. teen fook) moet toegelaat word nie. Die Klein Arbeidshof moet nie 'n oorkondehof wees nie. Daar is toegegee dat hierdie howe nie in alle gebiede beskikbaar sal wees nie, aangesien voorsittende beampies nie in afgeleë gebiede beskikbaar is nie. Die idee is ook uitgespreek dat die voorstander van die versoeningsraad, in gevalle waar daar nie 'n Klein Arbeidshof beskikbaar is nie, kan help deur 'n faciliterende rol te speel in die beslegting van die geskil, bv. deur nie-bindende aanbevelings te maak. Daar moet ook aandag gegee word aan die rol wat vredesbeampies in dié verband kan speel.

3.11 Daar moet Klein Arbeidshoewe in al die groot dorpe wees, maar hulle moet streekregsbevoegdheid hê, byvoorbeeld 'n rondgaande hof. Die SALU en KOFESA was sterk van mening dat dit 'n voorvereiste moet wees dat hierdie hof in afgeleë gebiede beskikbaar is voordat die WAV op die landbou van toepassing gemaak kan word. Die meerderheid van die NMK het besluit om die Regering sterk aan te spoor om hoë prioriteit aan die instelling van hierdie howe te verleen. Hierdie lede was egter nie bereid om dit as 'n voorvereiste te sien voordat die Wet op die landbou van toepassing gemaak kan word nie.

3.12 Die vergadering het, met betrekking tot die Klein Arbeidshof, gevoel dat die klaer (applikant) 'n keuse moet hê om na die Klein Arbeidshof te gaan, waar geen professionele verteenwoordiging toegelaat sal word en geen appèl moontlik sal wees nie, of om die Nywerheidsraad te nader, waar regsverteenvoording toelaatbaar is en appèl moontlik is. Die vergadering het ooreengekom dat die Klein Arbeidshof baie eenvoudig en vinnig behoort te wees. Dit sal dus nie 'n oorkondehof wees nie. Die vergadering het ook ooreengekom dat as die Klein Arbeidshofstelsel gebruik word, 'n kodifikasie van onbillike arbeidspraktyke nodig sal wees.

3.13 Die beginsel om aan die applikant 'n keuse te gee, is belangrik omdat die beginsel van regsverteenvoording en die vermoë om teen 'n onbillike uitspraak te appelleer, baie belangrik is. Dit moet nie eensydig weggenem word nie en die keuse moet aan die applikant oorgelaat word of hy regsverteenvoording en die moontlikheid van appèl verlang. As hy dit verlang, moet dit vir hom moontlik wees om die Nywerheidshof te nader en nie die Klein Arbeidshof nie. Sommige lede, insluitende die SALU, was nie baie tevreden met die beginsel van altevrede met die beginsel van algehele vryheid om 'n hof te kies nie, omdat vakverenigings na hulle mening feitlik sonder uitsondering die Nywerheidshof sal nader en die Klein Arbeidshof dan nie benut sal word nie. Die vakverenigings het egter aangevoer dat hulle nie geld het om die Nywerheidshof te nader nie en dat hulle sal verkies om die Klein Arbeidshof te gebruik. Die SALU en KOFESA, wat gekant was teen vrye keuse, het gevoel dat hierdie aangeleentheid opgelos kan word deur sekerheidstelling te vereis as die applikantparty na die Nywerheidshof wil gaan en nie na die Klein Arbeidshof nie. Die res van die NMK was teen hierdie voorstel gekant.

3.14 Die vergadering was dit eens dat koste slegs in beuselagtige en onegte gevalle beveel kan word en dat die hof die bevoegdheid moet hê om in spesiale omstandighede sekerheidstelling vir koste te beveel. Die hof se diskresie moet volgens dieselfde beginsel as die gemenerg wees, d.w.s. dit moet nie toegang tot die hof belet nie. Die SALU en COFESA het egter gevoel dat as 'n party teen die aanbeveling van 'n versoeningsraadvorsitter hof toe wil gaan, die hof sekerheidstelling vir koste moet beveel. Dit geld nie vir die Klein Arbeidshof nie.

3.15 Met betrekking tot regsverteenvoording in die Klein Arbeidshof het die vergadering ooreengekom dat 'n persoon met 'n regskwalifikasie wat hom laat kwalifiseer vir die balie of sybalie, uitgesluit moet word, behalwe as daardie persoon die eienaar van die plaas of besigheid is (d.w.s. 'n eenpersoonwergewer). In laasgenoemde geval moet die werker ook 'n reg op regsverteenvoording hê.

3.16 Die vergadering het ooreengekom dat die Klein Arbeidshof hoofsaaklik aandag moet gee aan regtigeskille (d.w.s. onbillike arbeidspraktyke), hoewel sommige gevoel het dat dit 'n wyer regsbevoegdheid moet hê. Die respondent moet in staat wees om die hof te versoek dat die geskil te groot of te ingewikkeld is en dat dit deur die Nywerheidshof verhoor moet word. Een persoon het gevoel dat die hofregsbevoegdheid moet hê slegs as albei die partye by die geskil daartoe instem, anders moet die Nywerheidshofregsbevoegdheid hê. Dit is interessant om in hierdie geval op te merk dat by die voorstelle rakende Arbeidshoewe in Hoofstuk J van die GWAV dieregsbevoegdheid van die Arbeidshof (eerste afdeling) en dié van die Klein Arbeidshof (tweede afdeling) bepaal word deur die tipes regsmiddel wat die hof mag uitreik en die tipes arbeidsaangeleentheid waarmee hy mag handel. Kragtens die konsep-GWAV sal Klein Arbeidshoewe handel met sekere beweerde onbillike skorsings, wysigings van die diensvoorraades individuele beweerde onbillike diensbeëindigings.

3.17 COSATU het gevoel dat daar 'n beperking moet wees op die omvang van geskille waarmee die Klein Arbeidshof handel, bv. slegs as minder as 10 werkemers betrokke is. Die SALU het gevoel dat as borgstelling nodig is om die Nywerheidshof te nader, hierdie aangeleentheid homself sal oplos, d.w.s. slegs as die saak groot of ingewikkeld is, sal die applikant bereid wees om borgstelling te lewer. Die NMK is van mening dat die kwessies van omvang van geskille en borgstelling met betrekking tot arbeidshoewe aandag moet geniet wanneer die NMK die kwessie van arbeidshoewe as deel van die GWAV-ondersoek bespreek.

3.18 COSATU het gevoel dat die herstruktureerde NMK betrokke moet wees by die aanstelling van voorzittende beampies van die Klein Arbeidshof. Daar was geen algemene steun vir hierdie voorstel nie. Daar was algemene steun vir die idee dat daar 'n soort meganisme beskikbaar moet wees vir partye om te kla oor die bevoegdheid van voorsittende beampies en dat daar 'n prosedure vir die afsetting van onbekwame beampies moet wees. Hierdie voorstel stem in beginsel ooreen met die voorstelle met betrekking tot arbeidshowe in die konsep-GWAV waarvolgens die Minister van Justisie die bevoegdheid sal hê om die president, die adjunk-president en arbeidsregters af te sit op grond van wangedrag en onbevoegdheid.

4. KOLLEKTIEWE BEDINGING

4.1 Die NMK het alle werknemers en werkgewers se reg om te assosieer of nie te assosieer nie, erken. Die beginsels onderliggend aan 'n kollektiewe bedingstelsel, die verpligting om te beding en die erkenning van vakverenigings moet dus ook op die landbousektor van toepassing wees. Die SALU het egter beklemtoon dat hy nie namens sy lede vakverenigings kan erken nie. Die SALU het ook aangedui dat die aanvaarding van bovenoemde beginsels nie noodwendig die aanvaarding van die WAV soos dit nou daar uitsien, impliseer nie.

4.2 'n Belangrike voorbehoudsbepaling met betrekking tot hierdie aangeleentheid (trouens, alle aangeleentheid rakende 'n arbeidsverhoudingestelsel vir die landbou) was dat die aanbevelings van die NMK oor 'n Gekonsolideerde Wet op Arbeidsverhoudinge die sienings van die NMK kan beïnvloed.

5. STAKINGS EN UITSLUITINGS

5.1 Die vergadering het saamgestem dat daar een of ander reg om te staak of uit te sluit in die landbousektor moet bestaan, alhoewel die SALU gevoel het dat dit onderhewig aan beperkings moet wees (soos hieronder gestel). Daar is ook saamgestem dat, indien verpligte arbitrasie onder alle omstandighede vereis sou word, dit kollektiewe bedinging sal vernietig, en dat dit die moontlikheid sal verminder dat die werkewer ooreenkoms met werknemers of vakverenigings sal beding, m.a.w. daar sal minder eerder as meer ooreenkoms tussen 'n werkewer en sy werknemer gesluit word.

5.2 Die vergadering het egter kennis geneem van die spesiale omstandighede in die landbou, wat beteken dat sommige tye van enige jaar besonder stil is en ander deur intense aktiwiteit gekenmerk word. Werkewers sal verkieks om in die stil tydperk uit te sluit, terwyl die vakvereniging sou verkieks om in die spitsystyd te staak. 'n Staking gedurende die spitsystyd kan egter die totale produksie vir 'n volle jaar of meer uitwis, en wat die boer se ondergang sal beteken. 'n Uitsluiting gedurende slap periodes kan die welsyn van die plaaswerker en sy gesin ernstig benadeel. Dit is belangrik dat hierdie saak aandag moet geniet.

5.3 Die vergadering het ook kennis geneem van die verdere kenmerke van die landbou, naamlik dat wanneer daar 'n staking of 'n uitsluiting is, die arbeiders steeds op die eiendom is. Dit sal dus baie moeilik wees om sommige vorms van besoldiging in natura, bv. in die vorm van akkommodasie of die gebruik van grond, water en vuurmaakhout, te weerhou. Dit is egter hoogs onwaarskynlik dat ander besoldiging in natura in die staking-situasie betaal sal word. Dieselfde druk wat in stedelike gebiede op werknemers bestaan om die staking te beëindig (omdat hulle geen inkomste het om akkommodasie en kos te finansier nie), bestaan nie noodwendig in die landbou nie. Dit is dus denkbaar dat werkers 'n staking vir 'n baie lang tydperk kan voortsit. Voorts is dit prakties gesproke onmoontlik om in die landbou tydelike werkers te kry om die werk van stakende werkers te verrig, as gevolg van die geografiese afstande betrokke en omdat akkommodasie nie beskikbaar sal wees nie.

5.4 Die vergadering het ook kennis geneem van die feit dat die landbou ook verskil van die res van die nywerheid met betrekking tot sy produksieprosesse. Alhoewel baie nywerhede met bederfbare produkte werk, word die landbou gekenmerk deur 'n biologiese proses, naamlik dat produkte slegs op sekere tye van die jaar geplant en geoest kan word, en indien dit nie op daardie tyd geplant of geoest word nie, dit die biologiese proses vir 'n jaar of meer kan vertraag. Lewende hawe moet ook op 'n daagliks basis versorg word, en in sommige gevalle, bv. melk, kan dit verwoestende gevolge hê indien dit nie op 'n daagliks basis gedoen word nie.

5.5 Die vergadering het opgemerk dat baie van bostaande faktore individueel voorkom in ander sektore van die ekonomie. Die landbousektor is egter waarskynlik uniek daarin dat hy al hierdie faktore kumulatief ondervind. Daar is opgemerk dat die landboubedryf as geheel nie in dieselfde mate daardeur geraak word nie.

5.6 Verskeie moontlikhede om die reg om te staak⁽¹⁾ te reël sonder om alle geskille in hierdie sektor aan verpligte arbitrasie onderworpe te maak, is bespreek: Daar is ooreengekom dat die kwessie van wettige stakings die mees problematiese is, omdat die tydsberekening van die staking verwoestende gevolge kan hê en die boer 'n groot risiko loop indien hy werkers ontslaan. Alhoewel 'n onwettige staking ook verwoestende gevolge kan hê, sou die posisie van die boer in hierdie geval nie veel verskil van wat dit tans is nie, naamlik dat die boer nie deur die WAV gedek word nie. Die geskikste oplossing vir stakings in die landbou, wat deur die NMK aanbeveel is, is die volgende:

(a) Geenstaking-ooreenkoms. Sulke ooreenkoms kan bepaal dat daar geen stakings gedurende sekere tye van die jaar mag wees nie, en dat verpligte arbitrasie of ander regsmiddels waarop die partye ooreengekom het, in die plek daarvan toegepas moet word. Daar moet magtigende wetgewing wees met betrekking tot sulke

⁽¹⁾ Hierdie opmerkings is *mutatus mutandis* op uitsluitings van toepassing.

ooreenkomste. Dit moet gedoen word aangesien gemeenregtelike ooreenkomste nie afdwingbaar is nie. Indien 'n wettige staking plaasvind in stryd met die bepalings van 'n gemeenregtelike ooreenkoms, is daar ingevolge artikel 79 van die WAV geen moontlikheid van beroep op die howe nie. COSATU het egter nie saamgestem met die standpunt dat kollektiewe ooreenkomste nie regtens afdwingbaar is nie. Derhalwe voel hulle dat geen veranderings in wetgewing in hierdie verband nodig is nie. Soos hulle die saak sien, is kollektiewe ooreenkomste afdwingbaar. Die NMK het saamgestem dat hierdie ooreenkomste kollektief aangegaan moet word, dit wil sê deur die meerderheid van die werkers in die bedingingseenheid, byvoorbeeld 'n vakvereniging (indien 'n vakvereniging teenwoordig is), 'n werkersorganisasie of 'n groep werkers—om sodoende ooreenkomste met individuele werkers uit te sluit. Dit moet skriftelike ooreenkomste wees, en moet vir 'n sekere beperkte tydperk aangegaan word (nie langer as 12 maande nie).

5.6.1 Aanvullend tot 'n geenstaking-ooreenkoms is die volgende moontlikhede ook geopper:

(b) Die toestaan van koste onder spesifieke omstandighede. Die nadele van hierdie benadering is dat howe nie maklik koste toestaan nie; dat, volgens die howe, vakverenigings geen spesiale (addisionele) aanspreeklikheid het vir verlies wat deur hulle lede veroorsaak is nie; en dat die bevel nie doeltreffend sal wees nie as gevolg van behoewende vakverenigings.

(c) Dit moet moontlik wees om die hof te nader om te vra vir 'n bevel (interdik) dat 'n staking of uitsluiting ongewens sal wees vir 'n spesifieke tydperk as gevolg van spesiale omstandighede. Hierdie spesiale omstandighede kan dieselfde wees as dié wat in die Konsep-Gekonsolideerde Wet op Arbeidsverhoudinge voorgestel word, naamlik—

- Waar die staking ernstige skade aan die fisiese eiendom van 'n werkewer veroorsaak het of kan veroorsaak, of die gesondheid en veiligheid van persone in gevaar stel of kan stel; of
- waar daar redelikerwys verwag kan word dat die staking kan lei tot die vernietiging van 'n werkewer se besigheid of die lewensvatbaarheid van so 'n besigheid, tensy die staking funksioneel tot die kollektiewe bedingsproses is; of
- waar die staking op 'n gewelddadige wyse geskied, of gepaard gaan met ernstige dreigemente van geweld.

Die NMK was van mening dat hierdie interdikte ook van toepassing moet wees met betrekking tot wettige stakings en uitsluitings. Die NMK het gevoel dat, met betrekking tot uitsluitings, soortgelyke kriteria deur die Tegniese Komitee van die NMK ondersoek moet word.

Alhoewel daar oor die algemeen saamgestem is dat die klein arbeidshowe nie in staat moet wees om interdikte te gee nie, is daar gevoel dat metodes ook deur die NMK se Tegniese Komitee ondersoek moet word ten einde die howe meer toeganklik te maak wat interdikte betref. 'n Verdere alternatief was dat, indien die howe so 'n bevel sou toestaan, verpligte arbitrasie van toepassing moet wees.

6. WETGEWING

6.1 Die NMK het verskeie wyses bespreek waarop die aanbevelings wat in hierdie dokument vervat is, in wetgewing beliggaam kan word.

6.2 Kennis is geneem van die volgende nadele van 'n afsonderlike wet vir plaaswerkers:

(a) Dit sal moeilik wees om twee afsonderlike wette te handhaaf, met soortgelyke wysigings wat van tyd tot tyd aan albei aangebring moet word.

(b) Ander sektore sal ook afsonderlike wette wil hê. Dit sal meer regulering tot gevolg hê, en nie minder nie.

(c) Nog 'n nadeel is dat 'n totaal nuwe infrastrukturale geskep sal moet word. Dit neem tyd en kos geld.

(d) Daar sal ook geen helderheid of sekerheid ten opsigte van arbeidsverhoudinge wees nie. Daar sal geen hofuitsprake wees om leiding te gee nie, geen regspraktisyns, konsultante of akademici met kennis van wat gedoen kan word en wat nie gedoen kan word nie, en selfs beampies van die Departement van Mannekrag sal nie advies kan verleen nie.

(e) Die hele afsonderlike bedeling sal met baie agterdog bejeën word en daar sal aanhoudende druk wees vir insluiting onder die WAV.

6.3 Die meerderheid van die NMK het insluiting onder 'n gewysigde WAV voorgestaan, met die wysigings soos hierbo aangedui. Mnr. Swart het egter aangedui dat so 'n besluit geneem kan word slegs as daar meer sekerheid is aangaande procedures en stelsels. Alle lede was dit eens dat, voordat die WAV op die landbou van toepassing gemaak word, daar 'n uitgebreide inligtingsveldtog moet wees ten einde die landbou in te lig oor die

vereistes van die Wet. 'n Kode oor billike en onbillike arbeidspraktyke moet ook ontwikkel word. So 'n inligtingsveldtog en kode moet egter nie voorvereistes wees vir die toepassing van die Wet op die landbou nie, alhoewel die SALU en KOEFESA gevoel het dat dit wel 'n voorvereiste moet wees. Verder hoef daar nie noodwendig 'n spesiale stelsel vir die landou te wees nie, aangesien die meeste van die veranderings wat in hierdie verslag aangedui word, net sowel op ander sektore van toepassing kan wees.

6.4 Die SALU was egter nie ten volle oortuig van die behoefte aan 'n formele arbeidsverhoudinge-bedeling in hierdie stadium nie. Met die bestaande beskerming van die Wet op Basiese Diensvoorraad vir die landbou en die groot aantal onsekerhede ten opsigte van die bogenoemde wysigings en die Gekonsolideerde Wet op Arbeidsverhoudinge, kon die SALU nie die onmiddellike toepassing van die WAV op die landbou steun nie. In hierdie verband het die SALU besorgdhede herhaal wat gelei het tot sekere wysigings in die res van die verslag. Hierdie besware van die SALU moet egter nie gesien word as in stryd met die res van die verslag nie.

Die volle standpunte van die SALU is soos volg:

"Die rustigheid ten opsigte van die arbeidsverhoudinge wat op plase ondervind word is 'n besondere kenmerk van plaasarbeid. Dit is opmerklik dat gedurende die tagtigerjare wat gekenmerk was deur onluste en arbeidsonrus, daar baie min gevalle van arbeidsonrus op die platteland voorgekom het en feitlik geen onrus op plase nie. Hiedie toedrag van sake moet toegeskryf word aan die goeie en baie persoonlike verhouding wat daar tussen werkgewers en werknemers op plase bestaan."

Ten spyte daarvan dat beskuldigings na die landbou geslinger word oor beweerde uitbuiting van werkers, vind 1,3 miljoen werkers steeds 'n heenkome in die landbou en, behalwe vir enkele geïsoleerde streke, ondervind landbou nie 'n tekort aan werkers nie. Saam met die werkers se afhanglikes vind bykans ses miljoen mense in die RSA 'n heenkome op plase.

'n Geregverdig vrees bestaan by boere dat hierdie besondere verhouding tussen die boer en sy werker versteur sal word indien die Wet op Arbeidsverhoudinge op die landbou toegepas word en vakbonde 'n amptelike, wettige status op plase verkry. Die landbou verkies dat arbeidsake in die landbou deur goeie bestuurspraktyke eerder as deur Wetgewing gereël word.

Die landbou het met kommer kennis geneem van die ernstige onrus in ander sektore wat ingeskakel is onder 'n wetlike bestel en van die onverantwoordelike optrede van sommige vakbonde.

Teen dié agtergrond het die SA Landbou-unie se Kongres in Oktober 1990 die volgende besluit geneem:

Die Kongres aanvaar die standpunt dat Wetgewing op sigself nie goeie verhoudinge tussen werkewer en werknemer kan bevorder nie maar dat goeie verhoudinge die resultaat van gesonde mannekragbestuurspraktyke op plase is.

Die kongres het verder besluit dat enige moontlike uitbreiding van arbiedswette na die landbou baie deeglik ondersoek en versigtig oorweeg moet word om te verseker dat die goeie arbeidsverhoudinge wat reeds op plase bestaan nie daardeur vertroebel sal word nie.

Die SALU se standpunt dat 'n formele (wetlike) arbeidsverhoudingebestel nie op die landbou van toepassing gemaak moet word nie, moet nie vertolk word as sou die landbou 'n werker se basiese regte misken nie. So aanvaar die landbou byvoorbeeld—

- dat 'n werkewer en 'n werknemer gelykwaardige aansprake op beskerming teen onbillike arbeidspraktyke het;
- dat enige werker in beginsel die reg tot kollektiewe bedinging het; en
- die beginsel van vryheid van assosiasie en van nie-assosiasie.

Die landbou is verder van oordeel dat met die beoogde uitbreiding van die Wet op Basiese Diensvoorraad na die landbou, die landbouwerker se basiese regte verder beskerm sal word. Tesame met die beskerming wat die toepassing van gemenerg reëls aan die landbouwerker verleen, meen die SALU dat die regte van die plaaswerker voldoende beskerm word en dat 'n formele arbeidsverhoudingsbestel nie in hierdie stadium in die landbou nie nodig is nie.

Die standpunt van die landbou is egter nie deur die Komitee aanvaar nie en die landbou het gevolglik die voorwaarde gestel dat voordat 'n formele arbeidsverhoudingebestel na die landbou uitgebrei kan word daar eers duidelikheid verkry moet word oor sake soos stakings en uitsluitings; procedures om geskille te besleg; onbillike arbeidspraktyke; en die juridiksie van nywerheidsrade.

Indien so 'n bestel wel vir die landbou ingestel word, moet die besondere kenmerke van die landbou deeglik in ag geneem word. Stakings in kritieke stadia van die boerderysiklus moet byvoorbeeld verbied word; daar moet 'n aangepaste geskilbeslegtingsmeganisme en -prosedure wees waarin die klem veral moet val op die beslegting direk tussen die boer en sy werkers; die instelling van maklik toeganklike en goedkoop spesiale klein arbiedshewe op 'n gedesentraliseerde grondslag en onbillike arbeidspraktyke wat ook die boer se belang sal beskerm, ens.

'n Besluit oor die aanvaarding al dan nie van 'n formele arbeidsverhoudingebestel deur die georganiseerde landbou sal eers finaal geneem kan word nadat die besonderhede van die betrokke procedures en stelsels bekend is en bestudeer kan word."

DEEL B: DIE LOONWET

1. KONSEPSUELE BENADERING

1.1 Gedurende besprekings van die Plaaswerkersonkomitee met betrekking tot die moontlike toepassing van die Loonwet op die landbousektor is verskeie argumente of motiverings vir en teen die insluiting van plaaswerkers onder die Wet aangevoer. Hierdie motiverings kan breedweg in drie kategorieë ingedeel word:

- die volle insluiting van plaasarbeiders onder die Loonwet;
- die handhawing van die *status quo*;
- heroorweging van die Wet binne 24 maande.

Hierdie drie kategorieë word hieronder bespreek. Gedurende NMK-beraadslagings is laasgenoemde benadering vervang deur een wat verklaar dat die toepassing van die Wet vir 24 maande uitgestel moet word.

2. MOTIVERING VIR DIE VOLLE INSLUITING VAN PLAASWERKERS ONDER DIE LOONWET

(a) Plaaswerkers word in 'n mindere of meerder mate deur hulle werkgewers onbillik behandel met betrekking tot hulle lone en ander diensvoorraad, wanneer die bestaande verskille in diensvoorraad en lone tussen hierdie werkers en werkers in ander sektore van die ekonomie in ag geneem word. Hierdie verskynsel word vererger deur die feit dat daar 'n groot aanbod van plaaswerkers is, en dat hierdie werkers oor die algemeen ongeskoold en ongeletterd is, wat hulle bedingsposisie in die arbeidsmark verswak.

(b) Met betrekking tot die inflasiekoers word daar aangevoer dat die belangrikste bepalende faktor van hierdie verskynsel die Regering se makro-ekonomiese beleid is, in die besonder monetêre en wisselkoersbeleid. Daar bestaan geen twyfel dat die Loonwet, in vergelyking met ekonomiese beleid, 'n onbelangrike saak vir inflasiebewuste persone is nie. In soverre die toepassing van hierdie Wet op die landbousektor die inflasiekoers binne die eerste jaar van verhoogde minimumlone marginaal sal beïnvloed, kan dit ten volle geregverdig word, aangesien lone in die landbou in sekere sektore en streke tans baie laag is. Waar minimumlone vereis word, sal dit bydra tot die verhoging van die totale welvaart van die landbougemeenskap.

(c) Met betrekking tot die kwessie van werkloosheid word genoem dat besonder hoë verhogings in minimumlone klaarblyklik sal lei tot 'n beduidende toename in werkloosheid, terwyl 'n baie lae verhoging waarskynlik tot 'n heeltemal onbeduidende toename sal lei. Dit sal die verantwoordelikheid van die Loonraad wees om 'n minimumloon vas te stel op 'nvlak waar dit lone op die onderste punt van die skaal verhoog, terwyl in gedagte gehou word dat besonder hoë verhogings sal lei tot werkloosheid. Daar kan genoem word dat die 1988-Landbou-opname aangedui het dat besoldiging in die landbou slegs 17% van die totale besteding uitmaak. Dit is onwaarskynlik dat matige en noodsaaklike verhogings in lone die winsgewendheid van die landboubedryf beduidend sal beïnvloed.

(d) Die toepassing van die Loonwet op die landbou beteken nie dat daar outomatis met besoldiging in natura weggedoen sal word nie. Die Loonraad kan voorsiening maak vir 'n onafhanklike beraming van die waarde van betaling in natura ten einde sowel die boer as die plaaswerker te beskerm.

(e) Minimumlone in die landbousektor sal nie noodwendig tot 'n toename in verstedeliking in die RSA lei nie. Tussen 1987 en 1988 het indiensneming in die landbou met 9,5% gedaal. Die tempo van verstedeliking sal geneig wees om te styg slegs indien werkloosheid in hierdie sektor dienooreenkomsdig toeneem. Verhoogde lone sal ook 'n teenoorgestelde uitwerking hê, naamlik dat geskoolde en "goeie" werknekmers, wat die landbou verlaat vir beter besoldigde betrekings in stedelike nywerhede as gevolg van lae lone en gebrek aan bevorderingsmoontlikhede in die landbou, nou moontlik beweg sal word om aan te bly en by te dra tot 'n verhoging in produktiwiteit in hierdie sektor.

(f) Dit is nodig om loonreëlende wetgewing in die landbou te hê as gevolg van die feit dat dit onwaarskynlik is dat die meerderheid plaaswerkers in vakbonde georganiseer sal word en derhalwe nie aan kollektiewe bedeling sal deelneem nie. In hierdie oopsig is loonreëlende wetgewing 'n doeltreffende manier om te verseker dat minimumlone in die landbou toegepas sal word.

(g) Die feit dat daar sekere streek-, sektorale of enige ander verskille in die landbou bestaan, moet nie die landbou daarvan uitsluit om onder die Loonwet geplaas te word nie. Die rede hiervoor is dat alle ander sektore wat reeds onder die Wet ingesluit is, ook verskille tussen mekaar vertoon, asook variasies in die sektore self. Verder het die landbou dekades van bemarkingsrade en ander inmenging deur die Staat oorleef, waardeur standaardprysse vir seker produkte vasgestel is. Streek- en sektorale verskille het nie daartoe geleid dat hierdie stelsel ineengestort het nie, en die huidige hersiening van bemarkingsrade is op heeltemal ander gronde gebaseer.

(h) Dit is die verantwoordelikheid van die Loonraad om alle tersaaklike faktore by die vasstelling van minimumlone in ag te neem. Een van hierdie faktore is die moontlike invloed van klimaatstoestande op die "vermoë om te betaal". Verskeie ander nywerhede word ook deur veranderende omstandighede geraak: Die tekstielnywerheid, 'n belangrike ekonomiese aanwyser, beleef periodes van uitbreiding en ernstige afswaai; in die bounywerheid speel klimaatstoestande 'n belangrike rol. Die Loonraad moet in staat wees om met spesifieke toestande in die landbou te handel, deur die instelling van toepalike mechanismes soos in ander sektore.

3. MOTIVERING VIR DIE HANDHAWING VAN DIE STATUS QUO

(a) Die instelling van 'n minimumloon en periodieke verhogings daarvan in die landbou sal opwaartse druk op die *inflasiekoers* uitoefen. Wanneer die relatiewe aandeel van die landbou in die ekonomie in gedagte gehou word, sal 'n minimumloon wat op die landbou van toepassing is, 'n negatiewe oordrag-effek op inflasie in die samelewing as geheel hê.

(b) Loonvasstellings ingevolge die Loonwet word gewoonlik op 'n bedryfsbasis vasgestel. Daar is egter groot verskille in die winsgewendheid en gevolglik ook die solvensie van boere. Hierdie solvensie verskil nie slegs op 'n streek- en sektorale basis nie, maar ook tussen individuele boerdery-ondernehemings binne dieselfde operasionele tak of streek. Klimaats- en grondtoestande verskil ook grootliks van plaas tot plaas. Dit is prakties onmoontlik om hierdie verskille in die landbou te akkommodeer. Daar is ook 'n aantal baie klein entrepreneurs in die landbou, wat die toepassing van die Loonwet op die landbou verder bemoeilik.

(c) In teenstelling met die meeste ander sektore in die ekonomie moet dieselfde werknemers op die meeste phase verskillende take met verskillende vlakke van vaardigheid en kundigheid verrig. Die vraag is dan op grond van watter taak die minimumloon vasgestel moet word.

(d) Die moontlikheid bestaan dat die minimumloon wat deur die Loonraad vasgestel word, die werklike of maksimumloon kan word. Dit kan dien as 'n teken aan boere wat meer as die minimumloon betaal, dat hulle minder kan betaal. Op hierdie wyse kan minimumlone die moontlikheid van hoër lone onderdruk.

(e) Die insluiting van plaaswerkers onder die Wet op Basiese Diensvoorraarde (WBD), asook onder die WAV (met of sonder voorgestelde wysigings), sal die partye voorsien van die nodige masjinerie om hulle eie beddings- en diensreëlings te bepaal sonder onnodige inmenging deur derde partye. Daar word aangevoer dat werkgewers en werkers daarop geregtig moet wees om lone te beding binne die perke van die mark, en nie deur neergelegde beperkings aan bande gelê moet word nie.

(f) Die aanbod van en vraag na werknemers moet 'n faktor wees by die bepaling van lone ten einde maksimum indiensneming te verkry. Die landbou is een van die grootste werkverskaffers in die land. Die toepassing van die Loonwet op die landbou kan dus vraag en aanbod in so 'n mate versteur dat dit werkloosheid in die RSA kan verhoog. Indien lone, as een kostefaktor, te duur word, kan boere alternatiewe moontlikhede aanwend om hoë loonkoste te vermy. Meganisasie met gevolglike hoër werkloosheid is een alternatief.

(g) Die toepassing van die Loonwet op die landbou is in hierdie stadium ongewens as gevolg van die ongunstige ekonomiese toestande en die bestaande hoë werkloosheidvlakte in die RSA. Wat die ongunstige ekonomiese omstandighede betref, het die Departement van Landbou-ontwikkeling aangedui dat ongeveer 30 persent van die land se Blanke boere op die rand van bankrotskap verkeer, en verder dat die totale boerdery-skuld tans meer as R14 biljoen bedra.

(h) Dit is prakties onmoontlik vir die Loonwet om besoldiging in natura te reël, veral in die landbou, waar die omvang en gehalte van in natura-besoldiging aansienlik wissel en besonder moeilik is om te bepaal as gevolg van deurlopende verbetering. Die implementering van die Loonwet sal lei tot die staking van bestaande praktyke soos gratis vervoer, behuising, watervoorsiening, weidingsregte, ens., wat weer die welsyn van die werknemer en werknemer-werkgewer-verhoudinge negatief sal beïnvloed.

(i) Daar is sekere negtiewe gevolge wat betrek die toepassing/administrasie van die Loonwet en minimumloonvlakte op die landbou. In hierdie verband sal die afdwinging van loonvasstellings 'n uitgebreide korps van inspekteurs in die landbou vereis, en daar sal probleme wees met die verkryging van betroubare data by die bepaling van die betaalvermoë van werkgewers en om die waarde van die besoldiging in natura vas te stel.

(j) Alhoewel loonvasstellings tans in sommige gevalle nie onrealisties is in terme van bekostigbaarheid nie, sal insluiting onder die Loonwet gelykstaande wees met die ondertekening van 'n blanko tjek. Daar is geen waarborg dat die huidige beleid voortgesit sal word nie of dat die samestelling van die Loonraad nie drasties verander sal word nie.

4. AANVULLENDE STANDPUNTE VAN SOMMIGE KOMITEELEDE OOR DIE HEROORWEGING VAN DIE LOONWET BINNE 24 MAANDE EN LOONRIGLYNE IN DIE TUSSENTYD

4.1 Sommige lede van die Komitee het gedurende beraadslagings aangedui dat, na hulle mening, die tyd nie ryk is om die Loonwet op die landbou van toepassing te maak nie. Dit kan egter in die toekoms verander, en derhalwe moet 'n finale besluit in hierdie verband nie nou geneem word nie. Sommige van die redes vir hierdie standpunt is die volgende, alhoewel al die redes nie noodwendig deur almal onderskryf word nie:

(a) Drie belangrike arbeidswette sal heel waarskynlik in die nabye toekoms op die landbou van toepassing gemaak word, en 'n vierde (veral so 'n omstrede wet soos die Loonwet) kan die suksesvolle implementering van die ander wette benadeel.

(b) Minimumlone in die landbou kan moontlik lei tot werkloosheid in die landbou as gevolg van 'n groot hoeveelheid surplusarbeid wat in diens is en vrese met betrekking tot onrealistiese toekomstige loonverhogings. Suid-Afrika ondervind reeds besonder hoë werkloosheid as gevolg van finansiële en ander sanksies, ekonomiese aanpassingsprogramme, politieke onsekerheid en begrotingstoewysings ten einde sosiale agterstande uit te wis. Om nou selfs meer werkloosheid te veroorsaak, sal groter sosiale onrus en onbestendigheid tot gevolg hê, wat 'n suksesvolle oorgang tot 'n demokratiese Suid-Afrika sal ondermy.

(c) Die finansiële posisie van die meeste boere is tans besonder ernstig. Die landbou gaan ook deur 'n aanpassingsproses en dit is deels die rede vir die finansiële probleme.

4.2 Tot tyd en wyl omstandighede verbeter het, sal selfs 'n aanbeveling deur die NMK om die landbou ten volle onder die Loonwet in te sluit, die suksesvolle implementering en aanvaarding van die ander wette in die landbou benadeel.

4.3 By die NMK-vergadering van 16 April 1991 in die benadering hierbo gewysig om te lui dat die Loonwet na die landbou uitgebrei moet word, maar die toepassing daarvan vir 24 maande uitgestel moet word.

5. AANBEVELINGS VAN DIE NMK

5.1 Gebaseer op die bespreking hierbo rakende die hantering van die Loonwet met betrekking tot die landbou, het die NMK die volgende drie voorstelle voorgelê:

(a) COSATU, NACTU en lede Liebenberg en Le Roux was ten gunste van die *insluiting* van die landbou onder die Loonwet, tesame met veranderings aan die samestelling van die Loonraad: Die Loonwet in sy huidige vorm moet van toepassing gemaak word op die landbou, en die Loonraad moet 'n drieledige liggaam word met lede verteenwoordigend van die Staat, vakverenigings en werkgewers. Hierdie benadering sal veranderinge aan die samestelling van die Loonraad noodsaak.

(b) NMK-lede Landman, Roodt, Smith, R. Botha, Pienaar en Komiteelede Bosch, Budlender, Meyer en Bailey het in beginsel die uitbreiding van die Loonwet na die landbou ondersteun, maar met die voorbehoud dat die toepassing van die Loonwet op die landbou vir 24 maande vertraag word en dat loonriglyne vir die landbou intussen opgestel moet word. Sodanige riglyne moet nie verpligtend wees nie.

(c) Die SALU, KOFESA en Komiteelid Iyman, was ten gunste van die handhawing van die *status quo*. Daar is aangevoer dat die toepassing van die Werkloosheidversekeringswet (WVW), die Wet op Basiese Diensvoorraardes (WBD) en die Wet op Arbeidsverhoudinge (WAV) op die landbou in die nabye toekoms die behoeftes aan die Loonwet in die landbou uitskakel.

5.2 Die NMK het besluit om die oorspronklike meerderheidaanbeveling van die Komitee aan die NMK as deel van sy verslag in te sluit, selfs al is dit nie deur die NMK gesteun nie:

"Die implementering van die Loonwet in die landbou moet weer deur die NMK in oorweging geneem word binne 24 maande. In die tussentyd moet die Loonraad met inagneming van finansiële toestande en byvoordelige aanbevelings maak ten opsigte van aanvaarbare minimumlone vir die verskillende sektore en streke in die landbou. Sodanige aanbevelings sal nie regskrag hê nie, maar sal die boerderygemeenskap oriënteer ten opsigte van 'n minimumloonidee sonder om groot omwenteling te veroorsaak. Hierdie voorstel is ondersteun deur komiteelede Bosch, Bailey, Budlender, Barker, Meyer en Nieuwoudt."

NOTICE 473 OF 1991**DEPARTMENT OF MANPOWER****LABOUR RELATIONS ACT, 1956****APPLICATION FOR VARIATION OF SCOPE OF

(a) dat die basiese netto vloerpryse vir losmaatlewerings vir die 1991-oes vir graansorghum van die onderskeie klasse en grade in kolom 1 van die Tabel vermeld onderskeidelik is soos in kolom 2 van die Tabel vermeld;

(b) dat vloerprysgraansorghum in sakke aan die Raad gelewer mag word slegs indien dit in nuwe of goeie tweedehandse metriek graansakke (soos deur die Raad omskryf) verpak is, insluitende propileen-sakke wat aan die neergelegde spesifikasies voldoen en die addisionele vergoeding aan produsente vir graansorghum in gemelde sakke gelewer, op R1,74 per sak bepaal is;

(c) dat voormalde netto leweringspryse van toepassing is op graansorghum van die onderskeie klasse en grade soos omskryf in die regulasies met betrekking tot die gradering van graansorghum, soos gepubliseer in Staatskoerant No. 10665, Goewermentskennisgewing No. R. 596 van 20 Maart 1987, soos gewysig;

(d) dat die tydperk waartydens produsente graansorghum onder genoemde prys aan die Raad se agente mag lewer, vanaf 1 Mei tot 31 Julie 1991 sal strek;

(e) that the total levies on grain sorghum at present amounts to R25 per metric ton and is made up as follows:

• Levy: promulgated by Government Notice No. R595 of 20 March 1987, as amended by Government Notice No. R. 3025 of 28 December 1990.....	R5,00 per ton
• Special levy: promulgated by Government Notice No. R. 595 of 20 March 1987, as amended by Government Notice No. R. 3025 of 28 December 1990..	R19,95 per ton
• General levy: promulgated by Government Notice No. R. 2547 of 5 December 1986.....	0,05 per ton
<i>Total</i>	R25,00;

(f) that a rebate of R5 per ton will be payable on all new season grain sorghum sold directly by producers up to 31 January 1992 (i.e. without the intercession of the Board) to traders in the RSA who are registered with the Grain Sorghum Board;

(g) that further information and specific directions and requirements regarding the payment of levies and the lodging of rebate claims are obtainable from the Board's offices in Pretoria [Tel. (012) 323-1696/9].
