## GOEWERMENTSKENNISGEWINGS

### DEPARTMENT OF TRADE AND INDUSTRY

No. 943

13 August 2004

#### STANDARDS ACT, 1993 STANDARDS MATTERS

In terms of the Standards Act, 1993 (Act No. 29 of 1993), the Council of the South African Bureau of Standards has acted in regard to standards in the manner set out in the Schedules to this notice.

All South African standards that were previously published by the South African Bureau of Standards with the prefix "SABS" have been redesignated as South African National Standards and are now published by Standards South Africa (a division of SABS) with the prefix "SANS".

A list of all existing South African National standards was published by Government Notice No. 1373 of 8 November 2002.

In the list of SANS standards below, the equivalent SABS numbers, where applicable, are given below the new SANS numbers for the sake of convenience. Standards that were published with the "SABS" prefix are listed as such.

#### SCHEDULE 1: ISSUE OF NEW STANDARDS

The standards mentioned have been issued in terms of section 16(3) of the Act.

Standard No. and year	Title, scope and purport
SANS 105-E05:2004/ ISO 105-E05:1989	<i>Textiles – Tests for colour fastness – Part E05: Colour fastness to spotting: Acid.</i> Specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of dilute solutions of organic and mineral acids.
SANS 105-E06:2004/ ISO 105-E06:1989	<i>Textiles – Tests for colour fastness – Part E06: Colour fastness to spotting: Alkali.</i> Specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to the action of dilute alkaline solutions.
SANS 105-E07:2004/ ISO 105-E07:1989	<i>Textiles – Tests for colour fastness – Part E07: Colour fastness to spotting: Water.</i> Specifies a method for determining the resistance of the colour of textiles of all kinds and in all forms to spotting by water.
SANS 107:2004	<i>White metal designated WM 72.</i> Covers a grade of white metal designated WM 72, according to its average tin content.
SANS 108:2004	<i>White metal designated WM 80.</i> Covers a grade of white metal designated WM 80, according to its average tin content.
SANS 109:2004	<i>White metal designated WM 84.</i> Covers a grade of white metal designated WM 84, according to its average tin content.
SANS 294:2004	<i>Construction procurement processes, methods and procedures.</i> Describes processes, methods and procedures for the establishment within an organization of a procurement system that is fair, equitable, transparent, competitive and cost-effective.
SANS 1877:2004	<i>A standard land-cover classification scheme for remote-sensing applications in South Africa.</i> Presents a standard hierarchical framework for the classification of remotely sensed data, designed to suit the South African environment. The framework is based on known land-cover feature types that can be derived from high-resolution remotely sensed data.
SANS 6270-1:2004/ ISO 6270-1:1998	<i>Paints and varnishes – Determination of resistance to humidity – Part 1: Continuous condensation.</i> Specifies a method for determining the resistance of paint films, paint systems and related products to conditions of high humidity in accordance with the requirements of coating or product specifications. The method is applicable to coatings both on porous substrates such as wood, plaster plasterboard and on non-porous substrates such as metal. It provides an indication of the performance likely to be obtained under severe conditions of exposure where continuous condensation occurs on the surface. The procedure may reveal failures of the coating (including blistering, staining, softening, wrinkling and embrittlement) and deterioration of the substrate.
SANS 19112:2004/ ISO 19112:2003	<i>Geographic information – Spatial referencing by geographic identifiers.</i> Defines the conceptual schema for spatial references based on geographic identifiers. It establishes a general model for spatial referencing using geographic identifiers, defines the components of a spatial reference system and defines the essential components of a gazetteer. It enables producers of data to define spatial reference systems using geographic identifiers and assists users in understanding the special references used in datasets. It enables gazetteers to be constructed in a consistent manner and supports the development of other standards in the field of geographic information. It is applicable to geographic data, and its principles may be extended to other forms of geographic data such as maps, charts and other forms of textual documents. Spatial referencing by coordinates is not addressed in this standard, however, a mechanism for recording complimentary coordinate references is included.
SANS 20111:2004/ ECE R111:2001	<i>Uniform provisions concerning the approval of tank vehicles of categories N and O with regard to rollover stability.</i> Applies to the rollover stability of tank vehicles of category N2, N3, O3 and O4 intended for the carriage of dangerous goods as defined in the ADR agreements.
SANS 60794-4:2004/ IEC 60794-4:2003	<i>Optical fibre cables – Part 4: Sectional specification – Aerial optical cables along electrical power lines.</i> Specifies the electrical, mechanical and optical requirements and test methods for aerial optical cables including OPGW (optical ground wire), OPPC (optical phase conductor), MASS (metallic aerial self-supported cable), ADSS (all-dielectric self-supporting cable) and OPAC (optical attached cable).

Standard No. and year	Title, scope and purport
SANS 61930:2004/ IEC/TR 61930:1998	<i>Fibre optic graphical symbology.</i> Specifies uniform graphical symbols used in IEC publications that deal with fibre optics and various fibre optic elements and devices.
SANS 61931:2004/ IEC/TR 61931:1998	<i>Fibre optic – Terminology.</i> Provides terminology for the various fibre optic elements, devices and systems.

## SCHEDULE 2: AMENDMENT OF EXISTING STANDARDS

The standards mentioned have been amended in terms of section 16(3) of the Act. The number and date of a standard that has been superseded appear in brackets below the new number.
