**STANDARDS ACT, 2008
STANDARDS MATTERS**

In terms of the Standards Act, 2008 (Act No. 8 of 2008), the Board of the South African Bureau of Standards has acted in regard to standards in the manner set out in the Schedules to this notice.

A list of all existing South African national standards was published by Government Notice No. 1373 of 8 November 2002.

In the list of SANS standards below, the equivalent SABS numbers, where applicable, are given below the new SANS numbers for the sake of convenience. Standards that were published with the "SABS" prefix are listed as such.

SCHEDULE 1: ISSUE OF NEW STANDARDS

The standards mentioned have been issued in terms of section 16(3) of the Act.

Standard No. and year	Title, scope and purport
SANS 164-2-1:2014	<i>Plug and socket-outlet systems for household and similar purposes for use in South Africa Part 2-1: Partially dedicated system, 16 A 250 V a.c.</i> Covers the rating and dimensions of the SANS 164-2 16 A 250 V a.c. plug and socket-outlet system for household and similar purposes, partially dedicated system, for use in South Africa.
SANS 164-2-2:2014	<i>Plug and socket-outlet systems for household and similar purposes for use in South Africa Part 2-2: Fully dedicated system, 16 A 250 V a.c.</i> Covers the rating and dimensions of the SANS 164-2 16 A 250 V a.c. plug and socket-outlet system for household and similar purposes, fully dedicated system, for use in South Africa.
SANS 6405-2:2014/ ISO 6404-2:1993	<i>Earth-moving machinery – Symbols for operator controls and other displays Part 2: Specific symbols for machines, equipment and accessories.</i> Establishes symbols uniquely for use on operator controls and other displays on earth-moving machinery as defined in ISO 6165 (published in South Africa as an identical adoption under the designation SANS 261).
SANS 7870-4:2014/ ISO 7870-4:2011	<i>Control charts Part 4: Cumulative sum charts.</i> Provides statistical procedures for setting up cumulative sum (cusum) schemes for process and quality control using variables (measured) and attribute data. Describes general-purpose methods of decision-making using cumulative sum (cusum) techniques for monitoring, control and retrospective analysis.
SANS 54509:2014/ EN 14509:2013	<i>Self-supporting double skin metal faced insulating panels – Factory made products – Specifications.</i> Specifies requirements for factory made, self-supporting, double skin metal faced insulating sandwich panels, which are intended for discontinuous laying in roofs and walls.

SCHEDULE 2: AMENDMENT OF EXISTING STANDARDS

The standards mentioned have been amended in terms of section 16(3) of the Act. The number and date of a standard that has been superseded appear in brackets below the new number. In the case of an amendment issued in consolidated format, the edition number of the new (consolidated) edition appears in brackets below the number of the standard.

Standard No. and year	Title, scope and purport
SANS 967:2014 (Ed. 2.6)	<i>Unplasticized poly(vinyl chloride) (PVC-U) soil, waste and vent pipes and pipe fittings. Consolidated edition incorporating amendment No. 6.</i> Amended to update requirements for methylene chloride tests, to update referenced standards, and to update requirements for storage in the annex on notes to users of pvc-u pipes.
SANS 1291-1:2014 (Ed. 1.4)	<i>Flexible polyurethane foam sleeping mats and mattresses Part 1: Mats and mattresses having unsupported polymeric covers. Consolidated edition incorporating amendment No. 4.</i> Amended to update referenced standards, and to update material requirements.
SANS 1291-2:2014 (Ed. 2.4)	<i>Flexible polyurethane foam sleeping mats and mattresses Part 2: Foam mattresses for domestic and hotel use. Consolidated edition incorporating amendment No. 4.</i> Amended to update referenced standards, to update the table on mattress sizes (table 2), and to update requirements for fillings and quilting foams.
SANS 1307:2014 (Ed. 5.1)	<i>Domestic storage solar water heating systems. Consolidated edition incorporating amendment No. 1.</i> Amended to add the definition of "local supplier" and to renumber definitions accordingly, to add requirements for components in contact with hot potable water, to update referenced standards, to modify a requirement for galvanic action, to add new information on galvanic action and to renumber a subclause accordingly, to change requirements for frame and stand, and to correct cross references, and instruction booklet.
SANS 1515-2:2014 (SANS 1515-2:2006)	<i>Gas measuring equipment primarily for use in mines Part 2: Fixed, transportable, and vehicle-mounted flammable gas measuring and warning sensor heads, instruments and devices.</i> Covers requirements for the design, construction, safety and performance of fixed, transportable and vehicle-mounted flammable gas measuring instruments or devices for the routine detection and measurement of flammable gases in air by electrical and electronic means, and that are intended primarily for use in mines. Covers hand-held, portable, continuous duty and alarm only apparatus and spot-reading apparatus which are battery operated gas detectors of group 1. Does not cover the requirements for calibration kits.

Standard No. and year	Title, scope and purport
SANS 6405-2:2014/ ISO 6405-2:1993 (Ed. 1 and ISO amdts 1, 2)	<i>Earth-moving machinery – Symbols for operator controls and other displays Part 2: Specific symbols for machines, equipment and accessories. ISO amendment Nos 1, 2.</i> Amended to add symbols for excavators and backhoes.
SANS 6122:2014 (SANS 6122:2008)	<i>Structural timber – Characteristic values of strength-graded timber – Sampling, full-size testing and evaluation.</i> Provides requirements for sampling, testing and assessing the characteristic values of structural properties for specific grades and sizes of sawn timber, including finger-jointed timber and laminated timber.
SANS 15443-1:2014/ ISO/IEC TR 15443-1:2012 (SANS 15443-1:2006)	<i>Information technology – Security techniques – Security assurance framework Part 1: Introduction and concepts.</i> Defines terms and establishes an extensive and organized set of concepts and their relationships for understanding IT security assurance.
SANS 50198:2014/ EN 198:2008 (SANS 50198:1987)	<i>Sanitary appliances – Baths made from crosslinked cast acrylic sheets – Requirements and test methods.</i> Specifies requirements for baths for domestic purposes made from crosslinked cast acrylic sheet with the aim of ensuring that the product, when installed in accordance with the manufacturer's instructions, will provide satisfactory performance in use. Applies to all sizes and shapes of baths.
SANS 50545:2014/ EN 545:2010 (SANS 50545:2003)	<i>Ductile iron pipes, fittings, accessories and their joints for water pipelines – Requirements and test methods.</i> Specifies the requirements and associated test methods applicable to ductile iron pipes, fittings, accessories and their joints for the construction of pipelines outside buildings.
SANS 53138-1:2014/ EN 13138-1:2008 (SANS 53138-1:2007)	<i>Buoyant aids for swimming instruction Part 1: Safety requirements and test methods for buoyant aids to be worn.</i> Specifies safety requirements for the construction, performance, sizing and marking of swimming aids intended to assist users with movement through the water whilst learning to swim or whilst learning part of a swimming stroke.
SANS 60335-2-5:2014/ IEC 60335-2-5:2012 (SANS 60335-2-5:2009)	<i>Household and similar electrical appliances – Safety Part 2-5: Particular requirements for dishwashers.</i> Deals with the safety of electric dishwashers for household and similar purposes that are intended for washing and rinsing dishes, cutlery and other utensils, their rated voltage being not more than 250 V for single-phase appliances and 480 V for other appliances.
SANS 60335-2-7:2014/ IEC 60335-2-7:2012 (Ed. 5.1 and IEC corr. 1)	<i>Household and similar electrical appliances – Safety Part 2-7: Particular requirements for washing machines.</i> Deals with the safety of electric washing machines for household and similar use, that are intended for washing clothes and textiles, their rated voltage being not more than 250 V for single-phase appliances and 480 V for other appliances. <i>IEC corrigendum 1.</i> Corrected to update requirements in the clause on stability and mechanical hazards.
SANS 60884-1:2013/ IEC 60884-1:2013 (Ed. 2.2 and IEC corr.1)	<i>Plugs and socket-outlets for household and similar purposes Part 1: General requirements. IEC corrigendum No. 1.</i> Corrected to change the table on the relationship between the rating of accessories, the nominal cross-sectional areas of test conductors and the test currents for tests of temperature rise (table 20)
SANS 61439-3:201/ IEC 61439-3:2012 (Ed. 1 and IEC corr.1)	<i>Low-voltage switchgear and controlgear assemblies – Part 3: Distribution boards intended to be operated by ordinary persons (DBO). IEC corrigendum No. 1.</i> Corrected to replace wording in the clause on routine verification (clause 11), and to add a new subclause on dielectric properties to this clause.

Dr. Rob Davies, MP
Minister of Trade and Industry

SCHEDULE

COMPULSORY SPECIFICATION FOR MOTOR VEHICLES OF CATEGORY N1

1 Scope

1.1 This specification covers the requirements for motor vehicle models of category N1, not previously registered or licensed in South Africa, and motor vehicle models assembled from new bodies and used parts from earlier designs of motor vehicle models, designed or adapted for operation on a public road.

1.2 The requirements of this specification shall, in so far as the parts already incorporated are concerned, apply in respect of an incomplete motor vehicle model supplied for further manufacture by one manufacturer to another, and the entire specification shall apply to the vehicle after completion thereof by the last-mentioned manufacturer. In addition, the requirements shall apply to designs of bodies sold for the purposes of incorporating new or used parts of motor vehicle models previously homologated (or previously produced) by other manufacturers.

1.3 This specification does not apply to

a) experimental or prototype vehicles constructed or imported for the purpose of testing, assessment or development, or

b) a motor vehicle model that was manufactured before 1965, that was not previously registered or licensed in South Africa, and that is so certified by a motor club approved by the relevant Minister, or

c) motor vehicles designed or adapted principally for the purposes of motor sport competition, and which are homologated under the rules of the International Federation of the Automobile (FIA) and for which such homologation documentation is lodged with the Regulatory Authority, or

d) motor vehicles for which Type Approval was granted under European Small (Low Volume) Series alternative according to article 8 of the Directive EC/70/156, provided:-

- i) that not more than 10 such vehicles are registered in South Africa each year, and
- ii) copies of all relevant approval and test documentation are lodged with the Regulatory Authority.

1.4 The relevant requirements of this specification shall take effect on the dates specified in schedule 1

1.5 Where a South African national standard, including an international standard or a UN ECE regulation adopted by South Africa as a national standard, is incorporated by reference into this specification, only the technical requirements/specification for the commodity and the tests to verify the compliance, apply.

2 Definitions

For the purposes of this specification, the following definitions apply:

2.1

airbag assembly

device that is installed to supplement safety belts and restraint systems in power-driven vehicles which, in the event of a severe impact affecting the vehicle, automatically deploys a flexible

structure intended to limit, by compression of the gas contained within it, the gravity of the contact of one or more parts of the body of an occupant of the vehicle with the interior of the passenger compartment

2.2

builder

person who builds a category N1 motor vehicle, and "build" has a corresponding meaning

2.3

category N1 motor vehicle, hereinafter referred to as a vehicle

motor vehicle that has a maximum mass not exceeding 3,5 t, that has at least four wheels (or, provided that the maximum mass exceeds 1 t, at least three wheels), and that is used for the carriage of goods

2.4

child restraint

arrangement of components which may comprise a combination of straps or flexible components with a securing buckle, adjusting devices, attachments, and, in some cases, a supplementary chair or an impact shield or both, capable of being anchored to a power-driven vehicle. It is so designed as to diminish the risk of injury to the wearer, in the event of a collision or of an abrupt deceleration of the vehicle, by limiting the mobility of the wearer's body

2.5

homologation

is a process of establishing the compliance of a model of motor vehicle and approval being granted by the regulatory authority, prior to it being introduced for sale.

2.6

importer

person who imports a category N1 motor vehicle, and "import" has a corresponding meaning

2.7

manufacturer

person who manufactures, produces, assembles, alters, modifies or converts a category N1 motor vehicle, and "manufacture" has a corresponding meaning

2.8

model

manufacturers' description for a series of vehicle designs that do not differ in respect of body shell, cab structure, profile, or the number of axles, by which they are introduced to South Africa, by a specific source.

The Regulatory Authority reserves the right to decide which variations or combinations of variations constitute a new model, and might also take cognisance of the classification system applied in the country of origin of the design

The following variations do not necessarily constitute a new model:

- a) a variant of the model in relation to trim or optional features for which compliance has been fully demonstrated;
- b) different engine and transmission combinations, including petrol and diesel engines, and manual and automatic transmissions;
- c) minor variations in profile, such as front air dams or rear spoilers;

- d) air management systems;
- e) a different number of doors;
- f) sleeper cabs on trucks;
- g) wheelbase variations;
- h) a cargo body or equipment fitted to a truck and that has no effect on compliance; and
- i) the number of driven axles.

If a vehicle is manufactured in a number of configurations, such as a sedan, a hatchback, or a station wagon, and a single or double cab, each of these may be regarded as a variant to the base model.

2.10 proof of compliance

the authentic evidence of compliance with any of the requirements of this compulsory specification from a source defined in "Source of Evidence" in Annexure A

2.11

registered manufacturer, importer or builder

any manufacturer, importer or builder required to be registered in terms of regulation 38 of the National Road Traffic Act 93/1996

2.12

regulatory authority

an organization appointed by the Minister of the Department of Trade and Industry to administer this compulsory specification on behalf of the South African Government.

2.13

worst case scenario

the variant of the model with the highest tare mass

3. General requirements

3.1 Requirements for lights and lighting equipment

3.1.1 Lights

Main and dipped-beam headlights, direction-indicator lights, stoplights, and front and rear position lights fitted to a vehicle shall comply with the relevant requirements given in SABS 1376-1:1983, *Lights for motor vehicles – Part 1: Incandescent lamps*, as published by Government Notice no. 563 of 29 July 1983, SABS 1376-2:1985, *Lights for motor vehicles - Part 2: Headlights*, as published by Government Notice no. 1263 of 14 June 1985, and SABS 1376-3:1985, *Lights for motor vehicles - Part 3: Secondary lights*, as published by Government Notice no. 2328 of 18 October 1985:

Provided that all other lights required or allowed to be fitted in terms of 3.1.2 are hereby excluded for the purposes of this subsection of this specification.

3.1.2 Lighting

Lighting shall be fitted to a vehicle and shall comply with the relevant requirements given in SABS 1046:1990, *Motor vehicle safety specification for lights and light-signalling devices installed on motor vehicles and trailers*, as published by Government Notice no. 1735 of 27 July 1990:

Provided that

- a) the requirements for the installation of retro-reflectors as given in 4.14, 4.16 and 4.17 of the said SABS 1046 may be met by the use and fitting of retro-reflectors that are defined in the relevant regulations of the National Road Traffic Act, 1996 (Act 93 of 1996), and, in addition, the requirements may also be met by the use and fitting of retro-reflectors that are integral portions of any other light lens assembly, and
- b) the specific requirements of the said SABS 1046 for
 - 1) dipped beam adjustment devices as set out in 4.2.6 and appendix 1, and
 - 2) end-outline marker lights as set out in 4.13, and
 - 3) rear fog lights as set out in 4.11,

shall be treated as **OPTIONAL** for the purposes of this compulsory specification:

Provided that, if any motor vehicle is fitted with such devices or lamps, they shall comply with the applicable requirements.

3.2 Requirements for rear-view mirrors and vision

3.2.1 Rear-view mirrors

Rear-view mirrors shall be fitted to a vehicle and shall comply with the relevant requirements given in SABS 1436:1989, *Motor vehicle safety specification for the rear-view mirrors of motor vehicles of categories M and N*, as published by Government Notice no. 2008 of 22 September 1989.

3.2.2 Windscreens, windows and partitions

3.2.2.1 Windscreens

3.2.2.1.1 A windscreen shall be fitted to a vehicle and shall be of safety glass that complies with the relevant requirements given in SABS 1191:1978, *High penetration-resistant laminated safety glass for vehicles*, as published by Government Notice no. 463 of 9 July 1982.

3.2.2.1.2 For the purposes of this specification, the marking requirements shall be as follows:

- a) the windscreen shall bear the glass manufacturer's registered trademark; and
- b) the glass fitted shall comply with an approved national standard, recognized by the Regulatory Authority, that will provide a method of identifying the glass type.

3.2.2.2 Windows and partitions

3.2.2.2.1 Glass partitions and glass windows fitted to a vehicle shall be of safety glass that complies with the relevant requirements given in the said SABS 1191 or in SABS 1193:1978, *Toughened safety glass for vehicles*, as published by Government Notice no. 463 of 9 July 1982.

3.2.2.2.2 For the purposes of this specification, the marking requirements shall be as follows:

- a) the glass shall bear the glass manufacturer's registered trademark; and
- b) the glass fitted shall comply with an approved national standard, recognized by the Regulatory Authority, that will provide a method of identifying the glass type.

3.2.3 Windscreen wipers

A vehicle shall be fitted with at least one windscreen wiper that is capable of operation by means other than manual, and the windscreen wiper blade, when in operation, shall wipe the outside of the windscreen directly in front of the driver, evenly and efficiently.

3.3 Requirements for brakes and braking equipment

3.3.1 Braking equipment shall be fitted to a vehicle and shall comply with the requirements in SABS ECE R13 *Uniform provisions concerning the approval of vehicles of categories M, N and O with regard to braking* to the level of ECE R13.08.

3.3.2 For vehicles fitted with anti-lock braking systems, the braking equipment shall, in terms of braking performance, at least comply with the braking performance requirements for N1 vehicles with non anti-lock braking systems fitted.

3.3.3 For the purposes of this specification, the following requirements of SABS ECE R13 are excluded:

- a) anti-lock specific brake test procedure and its requirements (paragraph 5 of annex 13 of SABS ECE R13).

3.3.4 For the purposes of this compulsory specification, annex 4, paragraph 2.3.6 of SABS ECE R13 is amended to read as follows:

To check compliance with the requirements specified in paragraph 5.2.1.2.4 of SABS ECE R13, a Type-O test shall be carried out with the engine disconnected at an initial test speed of 30 km/h. The mean fully developed deceleration on application of the control of the parking brake system and the deceleration immediately before the vehicle stops shall be not less than 1,5 m/s². The test shall be carried out with a laden vehicle. The force exerted on the braking control device shall not exceed the specified values.

3.4 Requirements for controls, steering mechanism and audible warning devices

3.4.1 Controls

3.4.1.1 General

All controls that are fitted to a vehicle, and that are required for the operation of the vehicle, shall be so located that the driver can reach and operate them when he is seated in the normal driving position:

Provided that in the case of vehicles of gross vehicle mass not exceeding 2 500 kg, the normal driving position shall be with the seat belt fastened.

3.4.1.2 Right-hand drive

A vehicle shall be of a right-hand drive configuration, except as allowed in terms of 3.4.1.3.

3.4.1.3 Central steering

A vehicle may have a central steering configuration.

3.4.2 Audible warning devices

A vehicle shall be fitted with one or more audible warning devices such that, when they are operated, a continuous sound is emitted at a level of at least 93 dB, determined in accordance with SABS 0169:1984, *Determining the performance of audible warning devices (hooters) after installation in a motor vehicle*, as published by Government Notice no. 966 of 11 May 1984.

3.5 Requirements for door latches, hinges, entrances and exits

3.5.1 Door latches and hinges

Side doors fitted as a means of entrance or exit in a vehicle shall have door latches and hinges that comply with the relevant requirements given in SABS 1443:1987 *Motor vehicle safety specification for door latches and hinges*, as published by Government Notice no. 2227 of 9 October 1987:

Provided that section 3 in annex 1 of the said SABS 1443 is excluded for the purposes of this compulsory specification.

3.5.2 Entrances and exits

3.5.2.1 The means of entrance to and exit from a vehicle that is designed and constructed with a fixed hood and that has a tare exceeding 570 kg, shall be as follows:

- a) at least one ready means of entrance and exit on the left and right sides of the vehicle, each such means being equipped with a permanent device that is capable of being operated from both the inside and the outside of the vehicle for the purpose of opening and closing; or
- b) a means as specified in (a) above, provided on one side of the vehicle and, on the other side or at the back, an accessible means of escape, of size at least 450 mm x450 mm, that is readily removable from both the inside and the outside of the vehicle or is equipped with a permanent device for opening and closing as specified in (a) above:
- c) at least one ready means of entrance and exit at the back, if the vehicle has a separate passenger compartment that does not have entrances or exits and, if relevant, a ready means of escape as specified in (a) and (b) above or that does not afford passengers unobstructed access to the driving compartment.

3.5.2.2 The means of entrance and exit, and the means of escape shall be equipped with a door or other effective barrier, provided that the means of entrance and exit at the back of a motor vehicle need not be so equipped. Such door or other effective barrier shall be capable of being opened and closed from both the inside and the outside of the vehicle, provided that this provision shall not apply to the ready means of escape that has a barrier capable of being opened by being knocked out of its frame.

3.6 Requirements for seats, seat anchorages, restraining device anchorages, restraining devices (safety belts) and supplementary restraining devices (airbags)

3.6.1 Seats and seat anchorages

A vehicle shall be fitted with seats and seat anchorages that comply with the relevant requirements given in SABS 1429:1987, *Motor vehicle safety specification for strength of seats and of their anchorages*, as published by Government Notice no. 1878 of 4 September 1987.

3.6.2 Restraining device anchorages

All restraining devices that are fitted to a vehicle shall have restraining device anchorages that comply with the relevant requirements given in SABS 1430:1987, *Motor vehicle safety specification for anchorages for restraining devices in motor vehicles*, as published by Government Notice no. 1878 of 4 September 1987.

3.6.3 Restraining devices (safety belts)

3.6.3.1 The restraining devices (safety belts) that are fitted to a vehicle shall comply with the relevant requirements given in SABS 1080:1983, *Restraining devices (safety belts) for occupants of adult build in motor vehicles (Revised requirements)*, as published by Government Notice no. 264 of 17 February 1984.

3.6.3.2 The type and location of the restraining devices (safety belts) required to be fitted to a vehicle and the method of installation thereof shall comply with the relevant requirements given in SABS 0168:1983, *The installation of restraining devices (safety belts) in motor vehicles*, as published by Government Notice no. 265 of 17 February 1984.

3.6.4 Child restraints

In the case of any vehicle manufactured with child restraints installed, such child restraints shall comply with the compulsory specification for *Child- restraining devices for use in motor vehicles* as published by Government Notice no. 642 of 2 May 1997.

3.6.5 Supplementary restraining devices (airbags)

3.6.5.1 If a motor vehicle is fitted with an airbag assembly, it shall carry information to the effect that it is equipped with such an assembly.

3.6.5.1.1 In the case of a motor vehicle fitted with an airbag assembly intended to protect the driver, the information shall consist of the inscription "AIRBAG" located in the interior of the circumference of the steering wheel; this inscription shall be durably affixed and easily visible.

3.6.5.1.2 In the case of a motor vehicle fitted with a passenger airbag intended to protect the front seat occupants other than the driver, this information shall consist of a warning label. An example of a possible design of a pictogram is shown in figure 1.

3.6.5.2 A motor vehicle fitted with one or more passenger airbags shall carry information about the extreme hazard associated with the use of rearward-facing child restraints on seats equipped with airbag assemblies.

3.6.5.2.1 Every passenger seating position which is fitted with an airbag shall be provided with a warning label against the use of a rearward-facing child restraint in that seating position. The warning label, in the form of a pictogram which may include explanatory text, shall be durably affixed and located such that it is easily visible in front of a person about to install a rearward-facing child restraint on the seat in question. An example of a possible design of a pictogram is shown in figure 1. A permanent reference should be visible at all times, in case the warning is not visible when the door is closed. This requirement does not apply to those seats equipped with a device which automatically deactivates the airbag assembly when a rearward-facing child restraint is installed.

Colours

The pictogram should be red.

The seat, child restraint and contour line of the airbag should be black.

The word "AIRBAG" and the airbag should be white.

Figure 1 - Airbag warning label

3.7 Requirements for anti-theft devices

Anti-theft devices shall be fitted and shall comply with the relevant requirements of SABS 1248:1986, *Devices to prevent the unauthorized use of motor vehicles (anti-theft devices)*, as published by Government Notice no. 936 of 16 May 1986.

3.8 Requirements for warning triangles

In the case of any vehicle supplied with warning triangles as part of the vehicle equipment, such warning triangles shall comply with the requirements given in SABS 1329-1:1987, *Retro-reflective and fluorescent warning signs for road vehicles - Part 1: Triangles*, as published by Government Notice no.2227 of 9 October 1987.

4 Requirements for the control of environmental interference

4.1 Suppression of radio and television interference

A vehicle, its components and its accessories shall comply with the current applicable regulations relating to interference with communications, promulgated under the Telecommunications Act, 1996 (Act 103 of 1996).

4.2 Suppression of atmospheric pollution

4.2.1 The exhaust emission from the engine of a vehicle shall be such as to comply with the current applicable regulations promulgated under the Atmospheric Pollution Prevention Act, 1965 (Act 45 of 1965).

4.2.2 The gaseous and particulate emissions from the vehicle shall comply with the requirements of SABS ECE R83 *Uniform provisions concerning the approval of vehicles with regard to the emission of pollutants according to engine fuel requirements* to the level of UN ECE R83.02, except for the type V test (durability of pollution control devices), if homologated after 1 February 2005 but before 1 January 2006, thereafter new homologations shall comply with 4.2.3, or

4.2.3 The gaseous and particulate emissions from the vehicle shall comply with the requirements of SABS ECE R83 *Uniform provisions concerning the approval of vehicle with regard to the emissions of pollutants according to engine fuel requirements* to the level of ECE R83.04.

Important: For "Operative Dates, Exclusions and Exclusion Expiry Dates" for requirements in 4.2.2 and 4.2.3, see Schedule 1 attached.

4.2.4 Ongoing Conformity of Production

The Regulatory Authority reserves the right to require models of motor vehicles to be tested in accordance with a Type 1 test as defined in clause 5.3.1 of SABS ECE R83. One sample of each engine generation type may be taken, representing the worst case scenario of that particular model. Each model shall meet with the compliance limits given in 5.3.1.4.2.1 (unleaded petrol) or 5.3.1.4.3.1 (diesel), as per amendment 4 of ECE R83.

If the sample taken does not meet with the compliance limits given in 5.3.1.4.2.1 or 5.3.1.4.3.1), as applicable, then two further samples of the same model shall be subjected to the same test. The arithmetical mean of the results of the three samples taken shall determine compliance.

4.3 Suppression of noise emission - Vehicles in motion

With the exception of noise emission originating from audible warning devices, any noise emitted by a vehicle, determined in accordance with SABS 0205:1986, *The measurement of noise emitted by motor vehicles in motion*, as published by Government Notice no. 936 of 16 May 1986, shall not exceed 82 dB(A). To allow for any lack of precision in the measuring equipment, the highest sound level reading obtained shall be reduced by 1 dB(A).

5 Requirements concerning metrological data

5.1 Vehicle dimensions

The dimensions of a vehicle shall comply with the applicable requirements of the relevant regulations of the National Road Traffic Act, 1996 (Act 93 of 1996).

5.2 Information plates

5.2.1 Data plates

5.2.1.1 A vehicle shall have a metal data plate or plates affixed by rivets, or by welding, or by any other method that will achieve permanency of attachment during the life of the vehicle, in a conspicuous and readily accessible position on a part not subject to replacement.

5.2.1.2 As an alternative to the above, a data plate may be a self-adhesive tamperproof metal or plastics label that is not transferable from one vehicle to another, is clearly legible, and undergoes permanent and obvious damage on removal. The self-adhesive tamperproof label shall be resistant to engine oils, to engine coolants, to normal engine temperatures and to humidity. In addition, it shall have permanency characteristics similar to those of the plate(s) described in 5.2.1.1.

5.2.1.3 The data plate(s) shall be legibly and indelibly printed or stamped with the following details of the model type or of the vehicle, as applicable:

- a) the gross vehicle mass, in kilograms, for the model type, denoted and prefixed by the letters GVM/BVM;
- b) the gross combination mass, in kilograms, for the model type, denoted and prefixed by the letters GCM/BKM; and

c) the gross axle mass-load of each axle, or the gross axle unit mass-load of each axle unit, in kilograms, for the model type, denoted and prefixed by the letters GA/BA or GAU/BAE, as applicable.

5.2.2 Optional data plate

The abbreviations given in 5.2.1.3(a), 5.2.1.3(b) and 5.2.1.3(c) are not required if the information is supplied in the following order:

- a) gross vehicle mass;
- b) gross combination mass; and
- c) gross axle masses in the order front to rear.

5.2.3 Information on vehicle engine

The requirements for the vehicle engine number shall comply with the relevant regulations of the National Road Traffic Act, 1996 (Act 93 of 1996).

5.2.4 Vehicle identification number (VIN)

The vehicle identification number shall comply with the relevant requirements given in SABS ISO 3779:1983, *Road vehicles - Vehicle identification number (VIN) - Content and structure*, and SABS ISO 4030: 1983, *Road vehicles - Vehicle identification number (VIN) - Location and attachment*, as published by Government Notice no. 3160 of 20 November 1992. However, the requirements for marking the VIN, as given in clause 5 of the said SABS ISO 4030, shall, for the purpose of this specification, be taken to read as follows:

5 VIN attachment

5.1 The VIN shall be marked direct on any integral part of the vehicle; it may be either on the frame, or, for integral frame body units, on a part of the body not easily removed or replaced.

5.2 The VIN shall also be marked on the data plate.

5.3 Deleted.

5.4 The height of the roman letters and the arabic numerals of the VIN shall be as follows:

- at least 7 mm if marked in accordance with 5.1 (frame, body, etc.) on motor vehicles and trailers; and
- at least 3 mm if marked in accordance with 5.2 (data plate).

5.2.5 Visible identification

An identification code made up of all or part of the VIN shall be applied to the motor vehicle, such that it is readily visible to a person standing outside the vehicle, without the use of aids.

In cases where only part of the VIN is used, the code shall be sufficient to provide unique identification of any unit of a model, provided the model is known.

5.3 Measuring units

All gauges, indicators or instruments that are fitted to a motor vehicle and are calibrated in physical units shall be calibrated in units as prescribed by the current applicable regulations promulgated under the Measuring Units and National Measuring Standards Act, 1973 (Act 76 of 1973).

6 Requirements for vehicle equipment, components and systems

6.1 Speedometers

A vehicle that is capable of exceeding a speed of 25 km/h on a level road shall be equipped with speedometer equipment that complies with the relevant requirements given in SABS 1441 :1987, *Motor vehicle safety specification for speedometer equipment on motor vehicles*, as published by Government Notice no. 1878 of 4 September 1987.

6.2 Engine, exhaust system and transmission

6.2.1 Engine

The engine of a vehicle shall be so fitted with a cover that any part of the engine that constitutes a source of danger is out of normal reach of a person.

6.2.2 Exhaust system

The exhaust system of a vehicle shall comply with the relevant regulations of the National Road Traffic Act.

6.2.3 Transmission

A vehicle, the tare of which exceeds 570 kg, shall be equipped with a transmission that enables it to be controlled and driven in both a forward and a reverse direction.

6.2.4 Vehicle with an electric power train

A vehicle, with a maximum design speed exceeding 25 km/h, fitted with an electric power train, shall comply with the relevant requirements given in SANS 20100:2011, *Uniform provisions concerning the approval of vehicles with regards to specific requirements for the electric power train*.

6.3 Fuel system

6.3.1 Fuel filler cap

The orifice for filling a fuel tank on a vehicle shall be fitted with an effective cap that prevents incidental ingress of water or other foreign matter.

6.3.2 Fuel filler inlet

A vehicle equipped with a positive-ignition engine shall be fitted with a fuel inlet orifice so designed that it prevents the tank from being filled from a petrol pump delivery nozzle which has an external diameter of 23.6 mm or greater.

For the purpose of this subsection, category N1 vehicles which are also offered in the M2 configuration shall be considered to be of category M2.

6.4 Tyres

The tyres fitted to the wheels of a motor vehicle shall comply with the relevant requirements of the compulsory specification for *Pneumatic tyres for commercial vehicles and trailers* as published by Government Notice no. 1125 of 16 November 2001 and the National Road Traffic Act, 1996 (Act 93 of 1996).

6.5 Vehicle bodies

Vehicle bodies referred to in 1.2 shall be provided with sufficient instructions on the selection and assembly of components, such that the completed vehicle complies (or is capable of complying) with the requirements of this specification, when the instructions are followed.

7 Compliance requirements

7.1 Homologation

Each registered Manufacturer, Importer or Builder (MIB) shall have each model of motor vehicle from a specific source, covered by the scope of this compulsory specification, homologated by the regulatory authority in accordance with the requirements of Annexure A.

7.2 Rights of homologation approval

The rights of homologation approval, so granted for a vehicle model in 7.1, shall lie with the registered MIB that obtained such approval only. This may only be transferable, on request to, and be authorised by, the regulatory authority, to another registered MIB, after agreement in writing of the homologation approval holder.

8 Equivalent requirements

The requirements of any of the national requirements stated in the appropriate parts given in table 1 shall be deemed to have been met if compliance with the equivalent standards given in columns 5, 6, 7 or 8 of the same table, or to any of their later amendment levels is achieved.

Where an EEC Directive is quoted in column 5, and an amendment level is quoted in column 6, this shall mean that the Directive and its amendments up, and including the quoted level (in column 6), is the minimum level acceptable.

Annexure A

Administrative Process - Homologation of Models of Motor Vehicles of Category N1

1. The Applicant shall formally submit a request for homologation, for each model of motor vehicle intended to be manufactured or imported, in writing, to the Regulatory Authority providing information of his/her intention to homologate that model of vehicle.
2. The Regulatory Authority shall forward to the Applicant the relevant homologation application documents for each model, requested in 1 above. The application documents shall stipulate the information to be submitted to the Regulatory Authority, and these shall accompany the submitted application.
3. The Applicant shall complete the application and provide the necessary requested supporting documentation, and forward it to the Regulatory Authority. The appropriate fee for the homologation, as determined by the Minister by Notice in the Government Gazette, shall be paid to the Regulatory Authority.
4. Upon receipt of the completed application and the required documents, the Regulatory Authority shall review the documents for correctness, completeness, and authenticity. Incorrect documentation, or insufficient documentation, will be reported to the applicant, for his/her correction.
5. Once the application documentation is correct, the Regulatory Authority shall formally confirm to the Applicant the date and place for the sample vehicle to be inspected as part of the homologation process (if not already submitted).
6. At the homologation inspection, the Regulatory Authority shall inspect the sample vehicle and verify it against all mandatory requirements and the submitted evidence of conformity in the application documents, to these requirements.
7. Any non-compliances identified in 5 above, shall be resolved by the Applicant, to the satisfaction of the Regulatory Authority.
8. Once the homologation process establishes that the vehicle model complies with all the relevant mandatory requirements, the Regulatory Authority shall issue a formal Letter of Compliance (Homologation Approval Letter), to the applicant.
9. The original application documents, and copies of supporting evidence of compliance documents, as necessary, shall be taken, and maintained as Homologation Records, by the Regulatory Authority.

Source of evidence

The evidence of compliance to any of the requirements of any referred-to standard in this compulsory specification, which requires testing to establish compliance, and a test report issuing, will only be recognized by the Regulatory Authority, from the following sources:

- 1) A laboratory that is part of an international or regional mutual acceptance scheme, or
- 2) A laboratory that is accredited to ISO/IEC 17025 by SANAS or an ILAC affiliated accreditation body, or
- 3) The laboratory has been successfully assessed against the requirements of ISO/IEC 17025 to the satisfaction of the Regulatory Authority.

**NATIONAL REGULATOR FOR COMPULSORY SPECIFICATIONS ACT
(ACT 5 of 2008)**

**AMENDMENT TO THE COMPULSORY SPECIFICATION FOR MOTOR
VEHICLES OF CATEGORY M1**

I Dr. Rob Davies, Minister of Trade and Industry, hereby under Section 13 (1)(a) of the National Regulator for Compulsory Specifications Act, (Act 5 of 2008), withdraw the current Compulsory Specification for *Motor Vehicles of Category M1*, and replace it with the Compulsory Specification as set out in the attached schedule, with effect from the date two (2) months from publication of this notice.

Minister of Trade and Industry

SCHEDULE

COMPULSORY SPECIFICATION FOR MOTOR VEHICLES OF CATEGORY M1

1 Scope

1.1 This specification covers the requirements for motor vehicle models of category M1, not previously registered or licensed in South Africa, and motor vehicle models assembled from new bodies and used parts from earlier designs of motor vehicle models, designed or adapted for operation on a public road.

1.2 The requirements of this specification shall, in so far as the parts already incorporated are concerned, apply in respect of an incomplete motor vehicle model supplied for further manufacture by one manufacturer to another, and the entire specification shall apply to the vehicle after completion thereof by the last-mentioned manufacturer. In addition, the requirements shall apply to designs of bodies sold for the purposes of incorporating new or used parts of motor vehicle models previously homologated (or previously produced) by other manufacturers.

1.3 This specification does not apply to

- a) experimental or prototype vehicles constructed or imported for the purpose of testing, assessment or development, or
- b) a motor vehicle model that was manufactured before 1965, that was not previously registered or licensed in South Africa, and that is so certified by a motor club approved by the relevant Minister, or
- c) motor vehicles designed or adapted principally for the purposes of motor sport competition, and which are homologated under the rules of the International Federation of the Automobile (FIA) and for which such homologation documentation is lodged with the Regulatory Authority, or
- d) motor vehicles for which Type Approval was granted under European Small (Low Volume) Series alternative according to article 8 of the Directive EC/70/156, provided:-
 - i) that not more than 10 such vehicles are registered in South Africa each year, and
 - ii) copies of all relevant approval and test documentation are lodged with the Regulatory Authority.

1.4 The relevant requirements of this specification shall take effect on the dates as specified in Schedule 1.

1.5 Except for the requirements of 3.7, which shall not be omitted or replaced, certain special category M1 motor vehicles designed or adapted for use as

- a) mobile living accommodation (motor caravans),
- b) ambulances and patient-transfer vehicles,
- c) prisoner-conveyance vehicles,
- d) hearses,
- e) security and anti-riot vehicles,
- f) recreation vehicles derived from vehicles other than category M1 vehicles, and

g) open sided passenger vehicles derived from vehicles other than category M1 vehicles

may, alternatively, comply with the specific requirements of the relevant compulsory specification for another category of motor vehicle.

1.6 Vehicles that are sold with a category M2 seating configuration and with a category M1 seating configuration as an alternative, need not comply with the steering frontal impact requirements of 3.5.2.

1.7 Where a South African national standard, including an international standard or a UN ECE regulation adopted by South Africa as a national standard, is incorporated by reference into this specification, only the technical requirements/specification for the commodity and the tests to verify the compliance apply.

2 Definitions

For the purposes of this specification, the following definitions apply:

2.1

airbag assembly

device that is installed to supplement safety belts and restraint systems in power-driven vehicles which, in the event of a severe impact affecting the vehicle, automatically deploys a flexible structure intended to limit, by compression of the gas contained within it, the gravity of the contact of one or more parts of the body of an occupant of the vehicle with the interior of the passenger compartment

2.2

builder

person who builds a category M1 motor vehicle, and "build" has a corresponding meaning

2.3

category M1 motor vehicle, hereinafter referred to as a vehicle

motor vehicle that is used for the carriage of passengers, that has at least four wheels, and that has seating accommodation for not more than eight passengers in addition to the driver of the vehicle.

2.4

category M2 motor vehicle, hereinafter referred to as a vehicle

motor vehicle that is used for the carriage of passengers, that has at least four wheels, and that has seating accommodation for more than eight passengers in addition to the driver of the vehicle, and that has a maximum mass not exceeding 5 t

2.5

child restraint

arrangement of components which may comprise a combination of straps or flexible components with a securing buckle, adjusting devices, attachments, and, in some cases, a supplementary chair or an impact shield or both, capable of being anchored to a power-driven vehicle. It is so designed as to diminish the risk of injury to the wearer, in the event of a collision or of an abrupt deceleration of the vehicle, by limiting the mobility of the wearer's body

2.6

folding tip-up type seat

is a seat fitted to the side of a bench row of seats that can be tipped-up to allow passage to a further row of seats.

2.7

homologation

is a process of establishing the compliance of a model of motor vehicle and approval being granted by the regulatory authority, prior to it being introduced for sale.

2.9**importer**

person who imports a category M1 motor vehicle, and "import" has a corresponding meaning

2.10**manufacturer**

person who manufactures, produces, assembles, alters, modifies or converts a category M1 motor vehicle, and "manufacture" has a corresponding meaning

2.11 registered manufacturer, importer or builder (MIB)

any manufacturer, importer or builder required to be registered in terms of regulation 38 of the National Road Traffic Act 93/1996

2.12**model**

manufacturer's description for a series of vehicle designs that do not differ in respect of body shell, cab structure, profile, or the number of axles, by which they are introduced to South Africa, by a specific source

The Regulatory Authority reserves the right to decide which variations or combinations of variations constitute a new model, and might also take cognisance of the classification system applied in the country of origin of the design

The following variations do not necessarily constitute a new model:

- a) a variant of the model in relation to trim or optional features for which compliance has been fully demonstrated;
- b) different engine and transmission combinations, including petrol and diesel engines, and manual and automatic transmissions;
- c) minor variations in profile, such as front air dams or rear spoilers;
- d) air management systems;
- e) a different number of doors;
- f) sleeper cabs on trucks;
- g) wheelbase variations;
- h) a cargo body or equipment fitted to a truck and that has no effect on compliance; and
- i) the number of driven axles.

If a vehicle is manufactured in a number of configurations, such as a sedan, a hatchback, or a station wagon, and a single or double cab, each of these may be regarded as a variant to the base model.

2.13**passenger airbag**

airbag assembly intended to protect the occupants of seats other than the driver's in the event of a collision

2.14

proof of compliance

the authentic evidence of compliance with any of the requirements of this compulsory specification from a source defined in "Source of Evidence" in Annexure A.

2.15**public road**

road, street or thoroughfare, including the verges, or any other place, whether a thoroughfare or not, to which the public or sections of the public have the right of access and that they commonly use

2.16**rearward facing**

facing in the direction opposite to the normal direction of travel of the vehicle

2.17**regulatory authority**

an organization appointed by the Minister of the Department of Trade and Industry to administer this compulsory specification on behalf of the South African Government

3 General requirements**3.1 Requirements for lights and lighting equipment****3.1.1 Lights**

Main and dipped-beam headlights, direction-indicator lights, stoplights, and front and rear position lights fitted to a vehicle shall comply with the relevant requirements given in SABS 1376-1:1983, *Lights for motor vehicles – Part 1: Incandescent lamps*, as published by Government Notice no. 563 of 29 July 1983, SABS 1376-2:1985, *Lights for motor vehicles - Part 2: Headlights*, as published by Government Notice no. 1263 of 14 June 1985, and SABS 1376-3:1985, *Lights for motor vehicles - Part 3: Secondary lights*, as published by Government Notice no. 2328 of 18 October 1985:

Provided that all other lights required or allowed to be fitted in terms of 3.1.2 are hereby excluded for the purposes of this subsection of this specification.

3.1.2 Lighting

Lighting shall be fitted to a vehicle and shall comply with the relevant requirements given in SABS 1046:1990, *Motor vehicle safety specification for lights and light-signalling devices installed on motor vehicles and trailers*, as published by Government Notice no. 1735 of 27 July 1990:

Provided that

- a) the requirements for the installation of retro-reflectors as given in 4.14, 4.16 and 4.17 of the said SABS 1046 may be met by the use and fitting of retro-reflectors that are defined in the relevant regulations of the National Road Traffic Act, 1996 (Act 93 of 1996), and, in addition, the requirements may also be met by the use and fitting of retro-reflectors that are integral portions of any other light lens assembly, and
- b) the specific requirements of the said SABS 1046 for
 - 1) dipped beam adjustment devices as set out in 4.2.6 and appendix 1, and
 - 2) rear fog lights as set out in 4.11,

shall be treated as **OPTIONAL** for the purposes of this compulsory specification:

Provided that, if any motor vehicle is fitted with such devices or lamps, they shall comply with the applicable requirements.

3.2 Requirements for rear-view mirrors and vision

3.2.1 Rear-view mirrors

Rear-view mirrors shall be fitted to a vehicle and shall comply with the relevant requirements given in SABS 1436:1989, *Motor vehicle safety specification for the rear-view mirrors of motor vehicles of categories M and N*, as published by Government Notice no. 2008 of 22 September 1989.

3.2.2 Windscreens, windows and partitions

3.2.2.1 Windscreens

3.2.2.1.1 A windscreen shall be fitted to a vehicle and shall be of safety glass that complies with the relevant requirements given in SABS 1191:1978, *High penetration-resistant laminated safety glass for vehicles*, as published by Government Notice no. 463 of 9 July 1982.

3.2.2.1.2 For the purposes of this specification, the marking requirements shall be as follows:

- a) the windscreen shall bear the glass manufacturer's registered trademark; and
- b) the glass fitted shall comply with an approved national standard, recognized by the Regulatory Authority, that will provide a method of identifying the glass type.

3.2.2.2 Windows and partitions

3.2.2.2.1 Glass partitions and glass windows fitted to a vehicle shall be of safety glass that complies with the relevant requirements given in the said SABS 1191 or in SABS 1193:1978, *Toughened safety glass for vehicles*, as published by Government Notice no. 463 of 9 July 1982.

3.2.2.2.2 For the purposes of this specification, the marking requirements shall be as follows:

- a) the glass shall bear the glass manufacturer's registered trademark; and
- b) the glass fitted shall comply with an approved national standard, recognized by the Regulatory Authority, that will provide a method of identifying the glass type.

3.2.3 Windscreen wipers

A vehicle shall be fitted with at least one windscreen wiper that is capable of operation by means other than manual, and the windscreen wiper blade, when in operation, shall wipe the outside of the windscreen directly in front of the driver, evenly and efficiently.

3.3 Requirements for brakes and braking equipment

3.3.1 Braking equipment shall be fitted to a vehicle and shall comply with the requirements in SABS ECE R13 *Uniform provisions concerning the approval of vehicles of categories M, N and O with regard to braking* to the level of ECE R13.08.

3.3.2 For vehicles fitted with anti-lock braking systems, the braking equipment shall, in terms of braking performance, at least comply with the braking performance requirements for M1 vehicles with non anti-lock braking systems fitted.

3.3.3 For the purposes of this specification, the following requirements of SABS ECE R13 are excluded:

- a) anti-lock specific brake test procedure and its requirements (paragraph 5 of annex 13 of SABS ECE R13), and.

3.3.4 For the purposes of this compulsory specification, annex 4, paragraph 2.3.6 of SABS ECE R13 is amended to read as follows:

To check compliance with the requirements specified in paragraph 5.2.1.2.4 of SABS ECE R13, a Type-O test shall be carried out with the engine disconnected at an initial test speed of 30 km/h. The mean fully developed deceleration on application of the control of the parking brake system and the deceleration immediately before the vehicle stops shall be not less than 1,5 m/s². The test shall be carried out with a laden vehicle. The force exerted on the braking control device shall not exceed the specified values.

3.4 Requirements for interior fittings, controls, steering mechanism and audible warning devices

3.4.1 Interior fittings

No fittings shall be installed inside the passenger compartment of a vehicle unless they comply with the relevant requirements given in SABS 1047:1984, *Motor vehicle safety standard specification for interior fittings (passenger cars)*, as published by Government Notice no. 149 of 1 February 1985, except that the minimum radius of curvature requirements for forward interior parts as required in terms of section 5.1 and 5.2 shall not apply in respect of vehicles fitted with both drivers and passenger airbag systems.

3.4.2 Controls

3.4.2.1 General

All controls that are fitted to a vehicle, and that are required for the operation of the vehicle, shall be so located that the driver can reach and operate them when he is seated in the normal driving position, with the seat belt fastened.

3.4.2.2 Right-hand drive

A vehicle shall be of a right-hand drive configuration, except as allowed in terms of 3.4.2.3.

3.4.2.3 Central steering

A vehicle may have a central steering configuration.

3.4.3 Audible warning devices

A vehicle shall be fitted with one or more audible warning devices such that, when they are operated, a continuous sound is emitted at a level of at least 93 dB, determined in accordance with SABS 0169:1984, *Determining the performance of audible warning devices (hooters) after installation in a motor vehicle*, as published by Government Notice no. 966 of 11 May 1984.

3.5 Requirements for the steering mechanism system

3.5.1 Energy absorption capacity of the steering control

The energy absorption capacity of the steering control shall comply with the relevant requirements given in SABS 1440:1987, *Motor vehicle safety specification for the steering mechanism of motor*

vehicles (Category M1 only): Behaviour on impact, as published by Government Notice no. 2227 of 9 October 1987.

3.5.2 Frontal impact characteristics

The frontal impact characteristics of the vehicle and its steering mechanism shall comply with the relevant requirements given in the said SABS 1440.

3.6 Requirements for door latches, hinges, entrances and exits

3.6.1 Door latches and hinges

Side doors fitted as a means of entrance or exit in a vehicle shall have door latches and hinges that comply with the relevant requirements given in SABS 1443:1987 *Motor vehicle safety specification for door latches and hinges*, as published by Government Notice no.2227 of 9 October 1987:

Provided that section 3 in annex 1 of the said SABS 1443 is excluded for the purposes of this compulsory specification.

3.6.2 Entrances and exits

The means of entrance to and exit from a vehicle that is designed and constructed with a fixed hood and that has a tare exceeding 570 kg, shall be as follows:

- a) at least one ready means of entrance and exit on the left and right sides of the vehicle, each such means being equipped with a permanent device that is capable of being operated from both the inside and the outside of the vehicle for the purpose of opening and closing; or
- b) a means as specified in (a) above, provided on one side of the vehicle and, on the other side or at the back, an accessible means of escape, of size at least 450 mm x450 mm, that is readily removable from both the inside and the outside of the vehicle or is equipped with a permanent device for opening and closing as specified in (a) above:

Provided that, in the case of a vehicle designed and constructed as an ambulance or for the conveyance of prisoners, such means need be provided in the driver's compartment only.

3.7 Requirements for seats, seat anchorages, restraining device anchorages, restraining devices (safety belts) and supplementary restraining devices (airbags)

3.7.1 Seats and seat anchorages

A vehicle shall be fitted with seats and seat anchorages that comply with the relevant requirements given in SABS 1429:1987, *Motor vehicle safety specification for strength of seats and of their anchorages*, as published by Government Notice no. 1878 of 4 September 1987.

3.7.2 Restraining device anchorages

Excluding seating positions that have seats of the folding tip-up type, rearward-facing or sideways-facing type, and seating positions in the rear rows of seats on simple single box type construction vehicles that contain at least three rows of seats,

- a) all seating positions on a vehicle that requires to have restraining devices fitted, shall have restraining device anchorages that comply with the relevant requirements given in SABS 1430:1987, *Motor vehicle safety specification for anchorages for restraining devices in motor vehicles*, as published by Government Notice no. 1878 of 4 September 1987, and

- b) all other seating positions on a vehicle shall have at least two lower restraining device anchorages installed, which shall comply with the relevant requirements given in (a) above:

Provided that for rear outboard seating positions (except where no upper anchorages can be installed, for example, in a convertible type vehicle or in a vehicle with a removable roof or in an open sided passenger vehicle), two lower restraining device anchorages and one upper restraining device anchorage shall be fitted.

3.7.3 Restraining devices (safety belts)

3.7.3.1 The restraining devices (safety belts) that are fitted to a vehicle shall comply with the relevant requirements given in SABS 1080:1983, *Restraining devices (safety belts) for occupants of adult build in motor vehicles (Revised requirements)*, as published by Government Notice no. 264 of 17 February 1984.

3.7.3.2 The type and location of the restraining devices (safety belts) required to be fitted to a vehicle and the method of installation thereof shall comply with the relevant requirements given in SABS 0168:1983, *The installation of restraining devices (safety belts) in motor vehicles*, as published by Government Notice no. 265 of 17 February 1984, except that the same exclusions for seating positions shall apply as in 3.7.2.

3.7.4 Child restraints

In the case of any vehicle manufactured with child restraints installed, such child restraints shall comply with the compulsory specification for *Child- restraining devices for use in motor vehicles* as published by Government Notice no. 642 of 2 May 1997.

3.7.5 Supplementary restraining devices (airbags)

3.7.5.1 If a motor vehicle is fitted with an airbag assembly, it shall carry information to the effect that it is equipped with such an assembly.

3.7.5.1.1 In the case of a motor vehicle fitted with an airbag assembly intended to protect the driver, the information shall consist of the inscription "AIRBAG" located in the interior of the circumference of the steering wheel; this inscription shall be durably affixed and easily visible.

3.7.5.1.2 In the case of a motor vehicle fitted with a passenger airbag intended to protect the front seat occupants other than the driver, this information shall consist of a warning label. An example of a possible design of a pictogram is shown in figure 1.

3.7.5.2 A motor vehicle fitted with one or more passenger airbags shall carry information about the extreme hazard associated with the use of rearward-facing child restraints on seats equipped with airbag assemblies.

3.7.5.2.1 Every passenger seating position which is fitted with an airbag shall be provided with a warning label against the use of a rearward-facing child restraint in that seating position. The warning label, in the form of a pictogram which may include explanatory text, shall be durably affixed and located such that it is easily visible in front of a person about to install a rearward-facing child restraint on the seat in question. An example of a possible design of a pictogram is shown in figure 1. A permanent reference should be visible at all times, in case the warning is not visible when the door is closed. This requirement does not apply to those seats equipped with a device which automatically deactivates the airbag assembly when a rearward-facing child restraint is installed.

3.8 Requirements for anti-theft devices

Anti-theft devices shall be fitted and shall comply with the relevant requirements of SABS 1248:1986, *Devices to prevent the unauthorized use of motor vehicles (anti-theft devices)*, as published by Government Notice no. 936 of 16 May 1986.

3.9 Requirements for head restraints

Head restraints, if forming an integral part of the seat back or if installed on any forward-facing seat of a vehicle, shall comply with the relevant requirements given in SABS 1269:1986, *Motor vehicle safety specification for head restraints (passenger cars)*, as published by Government Notice no. 936 of 16 May 1986.

3.10 Requirements for warning triangles

In the case of any vehicle supplied with warning triangles as part of the vehicle equipment, such warning triangles shall comply with the requirements given in SABS 1329-1:1987, *Retro-reflective and fluorescent warning signs for road vehicles - Part 1: Triangles*, as published by Government Notice no. 2227 of 9 October 1987.

4 Requirements for the control of environmental interference

4.1 Suppression of radio and television interference

A vehicle, its components and its accessories shall comply with the current applicable regulations relating to interference with communications, promulgated under the Telecommunications Act, 1996 (Act 103 of 1996).

4.2 Suppression of atmospheric pollution

4.2.1 The exhaust emission from the engine of a vehicle shall be such as to comply with the current applicable regulations promulgated under the Atmospheric Pollution Prevention Act, 1965 (Act 45 of 1965).

4.2.2 The gaseous and particulate emissions from the vehicle shall comply with the requirements of SABS ECE R83 *Uniform provisions concerning the approval of vehicles with regard to the emission of pollutants according to engine fuel requirements* to the level of ECE R83.02, except for the type V test (durability of pollution control devices), if homologated after 1 February 2005 but before 1 January 2006, thereafter new homologations shall comply with 4.2.3, or

4.2.3 The gaseous and particulate emissions from the vehicle shall comply with the requirements of SABS ECE R83 *Uniform provisions concerning the approval of vehicle with regard to the emissions of pollutants according to engine fuel requirements* to the level of ECE R83.04.

Important: For "Operative Dates, Exclusions and Exclusion Expiry Dates" for requirements in 4.2.2 and 4.2.3, see Schedule 1 attached.

4.2.4 Ongoing Conformity of Production

The Regulatory Authority reserves the right to require models of motor vehicles to be tested in accordance with a Type 1 test as defined in clause 5.3.1 of SABS ECE R83. One sample of each engine generation type may be taken, representing the worst case scenario of that particular model. Each model shall meet with the compliance limits given in 5.3.1.4.2.1 (unleaded petrol) or 5.3.1.4.3.1 (diesel), as per amendment 4 of ECE R83.

If the sample taken does not meet with the compliance limits given in 5.3.1.4.2.1 or 5.3.1.4.3.1, as applicable, then two further samples of the same model shall be subjected to the same test. The arithmetical mean of the results of the three samples taken shall determine compliance.

4.3 Vehicle Fuel Economy and Carbon Dioxide Emission Labelling

4.3.1 Every petrol and diesel powered vehicle shall have applied to the inside of its windscreen a fuel consumption label.

4.3.2 The label shall be self adhesive and removable and of a type suitable for application to the windscreen.

4.3.3 The Label shall be placed in the bottom corner of the windscreen.

4.3.4 The fuel consumption label shall contain the following statements and information.

- The words "FUEL CONSUMPTION" or "FUEL ECONOMY" as a heading
- The vehicle make, model or description.
- The fuel consumption and carbon dioxide emissions values as determined by SANS 20101: 2006 recorded in litres per 100km and grams per km respectively.

FUEL CONSUMPTION	
MORRIS MINOR 1200	
Comparative fuel consumption	
6.8	litres per 100km
Comparative CO ₂ emissions	
159	grams per km
<small> ■ Carbon dioxide (CO₂) is the main greenhouse gas responsible for global warming ■ Actual fuel consumption and CO₂ emissions depend on factors such as traffic conditions, vehicle condition and how you drive </small>	

Example of Fuel Consumption Label for petrol and diesel vehicles

4.3.5 Where a common label is utilised covering different engine, body styles or transmissions the fuel consumption and carbon dioxide figures quoted shall be those as applicable to the worst case combination.

4.3.6 As an alternative to sections 4.3.1, 4.3.2 and 4.3.3 above, an internally mounted label visible through the windscreen of the vehicle and suitable for removal and inclusion in the owner's manual may be displayed.

4.4 Suppression of noise emission - Vehicles in motion

With the exception of noise emission originating from audible warning devices, any noise emitted by a vehicle, determined in accordance with SABS 0205:1986, *The measurement of noise emitted by motor vehicles in motion*, as published by Government Notice no. 936 of 16 May 1986, shall not exceed 82 dB(A). To allow for any lack of precision in the measuring equipment, the highest sound level reading obtained shall be reduced by 1 dB(A).

5 Requirements concerning metrological data

5.1 Vehicle dimensions

The dimensions of a vehicle shall comply with the applicable requirements of the relevant regulations of the National Road Traffic Act, 1996 (Act 93 of 1996).

5.2 Information plates

5.2.1 Data plates

5.2.1.1 A vehicle shall have a metal data plate or plates affixed by rivets, or by welding, or by any other method that will achieve permanency of attachment during the life of the vehicle, in a conspicuous and readily accessible position on a part not subject to replacement.

5.2.1.2 As an alternative to the above, a data plate may be a self-adhesive tamperproof metal or plastics label that is not transferable from one vehicle to another, is clearly legible, and undergoes permanent and obvious damage on removal. The self-adhesive tamperproof label shall be resistant to engine oils, to engine coolants, to normal engine temperatures and to humidity. In addition, it shall have permanency characteristics similar to those of the plate(s) described in 5.2.1.1.

5.2.1.3 The data plate(s) shall be legibly and indelibly printed or stamped with the following details of the model type or of the vehicle, as applicable:

a) the gross vehicle mass, in kilograms, for the model type, denoted and prefixed by the letters GVM/BVM;

b) the gross combination mass, in kilograms, for the model type, denoted and prefixed by the letters GCM/BKM; and

c) the gross axle mass-load of each axle, or the gross axle unit mass-load of each axle unit, in kilograms, for the model type, denoted and prefixed by the letters GA/BA or GAU/BAE, as applicable.

5.2.2 Optional data plate

The abbreviations given in 5.2.1.3(a), 5.2.1.3(b) and 5.2.1.3(c) are not required if the information is supplied in the following order:

a) gross vehicle mass;

b) gross combination mass; and

c) gross axle masses in the order front to rear.

5.2.3 Information on vehicle engine

The requirements for the vehicle engine number shall comply with the relevant regulations of the National Road Traffic Act, 1996 (Act 93 of 1996).

5.2.4 Vehicle identification number (VIN)

The vehicle identification number shall comply with the relevant requirements given in SABS ISO 3779:1983, *Road vehicles - Vehicle identification number (VIN) - Content and structure*, and SABS ISO 4030: 1983, *Road vehicles - Vehicle identification number (VIN) - Location and attachment*, as published by Government Notice no. 3160 of 20 November 1992. However, the requirements for marking the VIN, as given in clause 5 of the said SABS ISO 4030, shall, for the purpose of this specification, be taken to read as follows:

5 VIN attachment

5.1 The VIN shall be marked direct on any integral part of the vehicle; it may be either on the frame, or, for integral frame body units, on a part of the body not easily removed or replaced.

5.2 The VIN shall also be marked on the data plate.

5.3 Deleted.

5.4 The height of the roman letters and the arabic numerals of the VIN shall be as follows:

- at least 7 mm if marked in accordance with 5.1 (frame, body, etc.) on motor vehicles and trailers; and
- at least 3 mm if marked in accordance with 5.2 (data plate).

5.2.5 Visible identification

An identification code made up of all or part of the VIN shall be applied to the motor vehicle, such that it is readily visible to a person standing outside the vehicle, without the use of aids.

In cases where only part of the VIN is used, the code shall be sufficient to provide unique identification of any unit of a model, provided the model is known.

5.3 Measuring units

All gauges, indicators or instruments that are fitted to a motor vehicle and are calibrated in physical units shall be calibrated in units as prescribed by the current applicable regulations promulgated under the Measuring Units and National Measuring Standards Act, 1973 (Act 76 of 1973).

6 Requirements for vehicle equipment, components and systems

6.1 Speedometers

A vehicle that is capable of exceeding a speed of 25 km/h on a level road shall be equipped with speedometer equipment that complies with the relevant requirements given in SABS 1441 :1987, *Motor vehicle safety specification for speedometer equipment on motor vehicles*, as published by Government Notice no. 1878 of 4 September 1987.

6.2 Engine, exhaust system and transmission

6.2.1 Engine

The engine of a vehicle shall be so fitted with a cover that any part of the engine that constitutes a source of danger is out of normal reach of a person.

6.2.2 Exhaust system

The exhaust system of a vehicle shall comply with the relevant regulations of the National Road Traffic Act.

6.2.3 Transmission

A vehicle, the tare of which exceeds 570 kg, shall be equipped with a transmission that enables it to be controlled and driven in both a forward and a reverse direction.

6.2.4 Vehicle with an electric power train

A vehicle, with a maximum design speed exceeding 25 km/h, fitted with an electric power train, shall comply with the relevant requirements given in SANS 20100:2011, *Uniform provisions concerning the approval of vehicles with regards to specific requirements for the electric power train*.

6.3 Fuel system

6.3.1 Fuel filler cap

The orifice for filling a fuel tank on a vehicle shall be fitted with an effective cap that prevents incidental ingress of water or other foreign matter.

6.3.2 Fuel filler inlet

A vehicle equipped with a positive-ignition engine shall be fitted with a fuel inlet orifice so designed that it prevents the tank from being filled from a petrol pump delivery nozzle which has an external diameter of 23.6 mm or greater.

For the purpose of this subsection, category M1 vehicles which are also offered in the M2 configuration shall be considered to be of category M2.

6.4 Tyres

The tyres fitted to the wheels of a motor vehicle shall comply with the relevant requirements of the compulsory specification for *Pneumatic tyres for passenger cars and their trailers* as published by Government Notice no. 1125 of 16 November 2001.

6.5 Vehicle bodies

Vehicle bodies referred to in 1.2 shall be provided with sufficient instructions on the selection and assembly of components, such that the completed vehicle complies (or is capable of complying) with the requirements of this specification, when the instructions are followed.

7 Homologation requirements

7.1 Homologation

Each registered Manufacturer, Importer or Builder (MIB) shall have each model of motor vehicle from a specific source, covered by the scope of this compulsory specification, homologated by the regulatory authority in accordance with the requirements of Annexure "A".

7.2 Rights of homologation approval

The rights of homologation approval, so granted for a vehicle model in 7.1, shall lie with the registered MIB that obtained such approval only. This may only be transferable, on request to, and be authorised by, the regulatory authority, to another registered MIB, after agreement in writing of the homologation approval holder.

8 Equivalent requirements

The requirements of any of the national requirements stated in the appropriate parts given in table 1 shall be deemed to have been met if compliance with the equivalent standards given in columns 5, 6, 7 or 8 of the same table, or to any of their later amendment levels is achieved.

Where an EEC Directive is quoted in column 5, and an amendment level is quoted in column 6, this shall mean that the Directive and its' amendments up to, and including the quoted level (in column 6), is the minimum level acceptable.

Annexure A

Administrative Process - Homologation of Models of Motor Vehicles of Category M1

1. The Applicant shall formally submit a request for homologation, for each model of motor vehicle intended to be manufactured or imported, in writing, to the Regulatory Authority providing information of his/her intention to homologate that model of vehicle.
2. The Regulatory Authority shall forward to the Applicant the relevant homologation application documents for each model, requested in 1 above. The application documents shall stipulate the information to be submitted to the Regulatory Authority, and these shall accompany the submitted application.
3. The Applicant shall complete the application and provide the necessary requested supporting documentation, and forward it to the Regulatory Authority. The appropriate fee for the homologation, as determined by the Minister by Notice in the Government Gazette, shall be paid to the Regulatory Authority.
4. Upon receipt of the completed application and the required documents, the Regulatory Authority shall review the documents for correctness, completeness, and authenticity. Incorrect documentation, or insufficient documentation, will be reported to the applicant, for his/her correction.
5. Once the application documentation is correct, the Regulatory Authority shall formally confirm to the Applicant the date and place for the sample vehicle to be inspected as part of the homologation process (if not already submitted).
6. At the homologation inspection, the Regulatory Authority shall inspect the sample vehicle and verify it against all mandatory requirements and the submitted evidence of conformity in the application documents, to these requirements.
7. Any non-compliances identified in 5 above, shall be resolved by the Applicant, to the satisfaction of the Regulatory Authority.
8. Once the homologation process establishes that the vehicle model complies with all the relevant mandatory requirements, the Regulatory Authority shall issue a formal Letter of Compliance (Homologation Approval Letter), to the applicant.
9. The original application documents, and copies of supporting evidence of compliance documents, as necessary, shall be taken, and maintained as Homologation Records, by the Regulatory Authority.

Source of evidence

The evidence of compliance to any of the requirements of any referred-to standard in this compulsory specification, which requires testing to establish compliance, and a test report issuing, will only be recognized by the Regulatory Authority, from the following sources:

- 1) A laboratory that is part of an international or regional mutual acceptance scheme, or
- 2) A laboratory that is accredited to ISO/IEC 17025 by SANAS or an ILAC affiliated accreditation body, or
- 3) The laboratory has been successfully assessed against the requirements of ISO/IEC 17025 to the satisfaction of the Regulatory Authority.

National Agricultural
Marketing Council

Promoting market access for South African agriculture

NEW APPLICATION FOR STATUTORY MEASURES (REGISTRATION, RECORDS AND RETURNS) RELATING TO MAIZE PRODUCTS AND WHEATEN PRODUCTS, IN TERMS OF THE MARKETING OF AGRICULTURAL PRODUCTS ACT, ACT NO 47 OF 1996

□□□□

INVITATION TO DIRECTLY AFFECTED GROUPS IN THE GRAIN INDUSTRY TO FORWARD COMMENTS REGARDING THE REQUEST FROM THE MAIZE AND WHEAT FORUMS

The National Agricultural Marketing Council (NAMC) received a new request from the Maize and the Wheat Forums, on behalf of directly affected groups in the grain industry, for the introduction and promulgation of statutory measures, namely registration and the keeping of information and submitting monthly returns in respect of maize products and wheaten products manufactured, processed, imported and/or exported.

There is currently no reliable information available in South Africa regarding the manufacture, processing, import and export of maize products and wheaten products. No statutory measures exist in respect of such information. The relevant industry associations, which have collected and disseminated information regarding such products in the past, have terminated these functions due to actions by the Competitions Commission against those associations and their members.

Information on the manufacture, processing, import and export of maize products and wheaten products is crucial for the effective operation of the maize and wheat markets and for market participants to be able to plan properly. The supply of generic market information to all role-players, on a continuous basis, is therefore essential. The maintenance of macro industry information is regarded as critical for strategic planning by the maize and wheat industries, as well as for individual directly affected groups.

For the above reasons the Maize Forum and the Wheat Forum have decided to make a joint application for statutory measures in order to obtain the minimum required information regarding the products in question. The purpose and aim of the statutory measures are to provide for the registration of the relevant parties and for the gathering and dissemination of proper market information to the benefit of the maize and wheat industries at large.

The proposal entails that the South African Grain Information Service (SAGIS) will be responsible for the registration, as well as the collection, dissemination and distribution of the information associated with the statutory measures that are requested. SAGIS has been established as an objective and reliable provider of information, both nationally and internationally.

The two Forums agreed to propose that all manufacturers, importers and exporters of maize products and wheaten products should register with SAGIS. Furthermore that each manufacturer, importer and exporter of maize products and wheaten products, excluding

such manufacturers, importers and exporters that are not registered VAT vendors, shall keep complete records for each calendar month in respect of maize products and wheaten products that are manufactured, imported or exported by them for own use or for commercial purposes. This shall include any person who acts in the capacity of the aforementioned persons.

The term "maize product" means the following products derived from maize:

Maize Chop
Maize Grits
Maize Rice
Samp
Sifted Maize Meal
Special Maize Meal
Super Maize Meal and
Unsifted Maize Meal

The term "wheaten product" means the following products derived from wheat:

Brown Pan Baked Bread (400g/600g/700g/other)
White Pan Baked Bread (400g/600g/700g/other)
Whole Wheat Pan Baked Bread (400g/600g/700g/other)
Other Pan Baked Bread
Wheat Bran
Wheat Meal
Brown Bread Flour
Cake Flour
Other Bread Flour
Self-Raising Flour and
White Bread Flour

The statutory measures, if approved by the Minister of Agriculture, Forestry and Fisheries, will come into operation on the date of publication for a period of four years.

Directly affected groups in the grain industry are kindly requested to submit any comments regarding the proposed statutory measures to the NAMC in writing (fax 012 341 1811/ 012 341 1911 or e-mail to lizettem@namc.co.za) before or on 19 September 2014, to enable the Council to formulate its recommendation to the Minister in this regard.

Date Submitted: 14 December 1998

The reasons the Regional Land Claims Commissioner believes that the properties should be excluded in terms of section 11 (4) of the Act is that:

- (a) The claimed does not extend to the properties listed in the attached schedule; and/or
- (b) The Community did not have rights in land (as defined in the Act) on the properties listed in the above-mentioned schedule

NOTICE 761 OF 2014

The Minister of Trade and Industry hereby invites nominations for members to serve on the Special Economic Zones Advisory Board.

The Special Economic Zones Act No. 16 of 2014 was assented to by the State President on the 19th of May 2014.

In terms of Sec 7 of the Act, a Special Economic Zones Advisory Board has been established.

Qualifications of Advisory Board Members

The Minister seeks candidates of sound moral character who have extensive experience in industry, having reached senior positions within their organizations and who have earned the respect of their peers. The Minister seeks strongly independent candidates who are mindful of both their duties to the Board and their duties to the development of our country. In addition, the following qualifications are required.

A honours degree (A Master's degree and higher will be an added advantage) in Business/Financial Management, Project Management, Engineering, Development studies, Corporate Law and Corporate Finance;

Membership of the professional body overseeing their area of expertise;

Prior experience as a member of the Board of a large and complex organization;

Senior management experience reflecting 15 to 20 years' track record of performance in their chosen industry;

Over 15 years' knowledge, experience and expertise relevant to Special Economic Zones including:

- Expertise and experience in property management, urban planning, business performance and sustainability management and in the fields of project finance, financial management, human resources

management, project and risk management, corporate governance, international trade and marketing, corporate and labour law and environmental management.

- Ideally candidates should also possess experience in change management, facilities and asset management, institutional turnaround, deal structuring and business strategy implementation in either manufacturing or services sectors;
- Knowledge of government policy, specifically industrial policy (IPAP, NIPF, NES, NDP);
- Understanding of legal and regulatory compliance issues in the Public Sector.

Such candidates will be capable of providing strategic leadership and specialist knowledge to the Board coupled with a strong desire to serve the developmental interests of our country.

Roles and responsibilities of the Member are to contribute to the strategic functioning of the Advisory Board, which has been mandated to:

- i. Advise the Minister on policy and strategy in order to promote, develop, operate and manage Special Economic Zones;
- ii. Monitor the implementation of the Special Economic Zones policy and Strategy, reporting to the Minister on an annual basis on the implementation of such policy and strategy;
- iii. Consider applications for the designation of Special Economic Zones and recommend to the Minister whether or not to approve the applications and grant a Special Economic Zone licence to the applicants;
- iv. Consider applications for an operator permit and recommend to the Minister whether or not to approve the applications;
- v. Consider applications for the transfer of an operator permit and recommend to the Minister whether or not to approve such application with or without any conditions;
- vi. Liaise with a Special Economic Zone entity Board and an operator on the

- implementation of the Special Economic Zone strategic plans;
- vii. Report in the prescribed manner to the Minister on progress relating to the development of Special Economic Zones;
 - viii. Advise the Minister on minimum norms and standards required for the provision of a one stop shop and physical infrastructure in a Special Economic Zone;
 - ix. Monitor the progress on the implementation of one stop shops and make recommendations on the possible interventions;
 - x. Advise the Minister on initiatives to market Special Economic Zones;
 - xi. Assess and review the success of Special Economic Zones in achieving its purposes in line with the programme strategic objectives;
 - xii. Monitor and review the performance of Special Economic Zones and make recommendations on reducing sustainability risks and improving the competitiveness of each Special Economic Zone;
 - xiii. Conduct investigations on any matter arising out of the application of the SEZ Act; and
 - xiv. Perform such other functions consistent with the objectives of the Act as determined by the Minister.

The terms of office of the Advisory Board member is for a period of 5 years from the date of appointment. Members may be eligible for reappointment.

Expenditure, remuneration and allowances paid to members of Advisory Board will be determined by relevant public sector remuneration policies.

The following person's application will not be considered:

- i. rehabilitated insolvents;
- ii. persons who have been declared by a High Court with jurisdiction to be mentally ill;
- iii. persons who have been convicted of an offence in the Republic or elsewhere, other than an offence committed prior to 27 April 1994 associated with a political objective, and sentenced to imprisonment without the option of a fine or, in the case of fraud or any other offence involving dishonesty, to a fine or imprisonment or both a fine and imprisonment;

- iv. persons who have at any time been removed from an office of trust on account of breach of fiduciary duties; or
- v. persons who are otherwise disqualified in terms of section 69 of the Companies Act, 2008 (Act No.71 of 2008).

Nomination and application procedure: Nominations and applications must be accompanied by • A detailed Curriculum Vitae (CV) accompanied by the shares and other financial interest form, and the Register of interest information sheet obtainable from the enquiries person • A written motivation to explain nominees' suitability for appointment • A signed letter of acceptance from the candidate • A written disclosure of business interests and membership in other boards.

Note: Short-listed candidates will be subjected to necessary security clearance • Preference will be given to candidates whose appointment will enhance gender and geographical representation • Correspondence will be limited to short-listed candidates only • No email or facsimile applications will be accepted • Strict compliance with the nomination requirements and selection procedure will be adhered to.
