Notice submission deadlines

Government Printing Works has over the last few months implemented rules for completing and submitting the electronic Adobe Forms when you, the customer, submit your notice request.

In line with these business rules, GPW has revised the notice submission deadlines for all gazettes. Please refer to the GPW website www.gpwonline.co.za to familiarise yourself with the new deadlines.

CANCELLATIONS

Don't forget!

Cancellation of notice submissions are accepted by GPW according to the deadlines stated in the table above.

Non-compliance to these deadlines will result in your request being failed. **Please pay special attention to the different deadlines for each gazette.**

Please note that any notices cancelled after the cancellation deadline will be published and charged at full cost.

Requests for cancellation must be sent by the original sender of the notice and must accompanied by the relevant notice reference number (N-) in the email body.

AMENDMENTS TO NOTICES

take note!

With effect **from 01 October**, GPW will not longer accept amendments to notices. The cancellation process will need to be followed and a new notice submitted thereafter for the next available publication date.

CUSTOMER INQUIRIES

Many of our customers request immediate feedback/confirmation of notice placement in the gazette from our Contact Centre once they have submitted their notice – While GPW deems it one of their highest priorities and responsibilities to provide customers with this requested feedback and the best service at all times, we are only able to do so once we have started processing your notice submission.

GPW has a **2-working day turnaround time for processing notices** received according to the business rules and deadline submissions.

Please keep this in mind when making inquiries about your notice submission at the Contact Centre.

PROOF OF PAYMENTS

GPW reminds you that all notice submissions **MUST** be submitted with an accompanying proof of payment (PoP) or purchase order (PO). If any PoP's or PO's are received without a notice submission, it will be failed and your notice will not be processed.

When submitting your notice request to submit.egazette@gpw.gov.za, please ensure that a purchase order (GPW Account customer) or proof of payment (non-GPW Account customer) is included with your notice submission. All documentation relating to the notice submission must be in a single email.

A reminder that documents must be attached separately in your email to GPW. (In other words, your email should have an Adobe Form plus proof of payment/purchase order – 2 separate attachments – where notice content is applicable, it should also be a 3rd separate attachment).

REMINDER OF THE GPW BUSINESS RULES

- Single notice, single email – with proof of payment or purchase order.
- All documents must be attached separately in your email to GPW.
- 1 notice = 1 form, i.e. each notice must be on a separate form
- Please submit your notice **ONLY ONCE**.
- Requests for information, quotations and inquiries must be sent to the Contact Centre **ONLY**.
- The notice information that you send us on the form is what we publish. Please do not put any instructions in the email body.

For purposes of reference, all Proclamations, Government Notices, General Notices and Board Notices published are included in the following table of contents which thus forms a weekly index. Let yourself be guided by the gazette numbers in the righthand column:

Alle Proklamasies, Goewermentskennisgewings, Algemene Kennisgewings en Raadskennisgewings gepubliseer, word vir verwysingsdoeleindes in die volgende Inhoudopgawe ingesluit wat dus weeklikse indeks voorstel. Laat u self deur die Koerantnommers in die regterhandse kolom lei:

GOVERNMENT PRINTING WORKS BUSINESS RULES

Government Printing Works has established rules for submitting notices in line with its electronic notice processing system, which requires the use of electronic Adobe Forms. Please ensure that you adhere to these guidelines when completing and submitting your notice submission.

1. No hand written notices will be accepted for processing, this includes Adobe forms which have been completed by hand.
2. Notices can only be submitted in Adobe electronic form format, to the email submission address submit.egazette@gpw.gov.za. All notice submissions not on Adobe electronic forms will be rejected.
3. When submitting your notice request, please ensure that a purchase order (GPW Account customer) or proof of payment (non-GPW Account customer) is included with your notice submission. All documentation relating to the notice submission must be in a single email and must be attached separately. (In other words, your email should have an Adobe Form plus proof of payment/purchase order as 2 separate attachments. Where notice content is applicable, it should also be a 3rd separate attachment).
4. Notices brought to GPW by "walk-in" customers on electronic media can only be submitted in Adobe electronic form format.
5. All "walk-in" customers with notices that are not on electronic Adobe forms will be routed to the Contact Centre where they will be assisted to complete the forms in the required format. Where a customer walks into GPW with a stack of hard copy notices delivered by a messenger on behalf of any organisation e.g. newspaper publisher, the messenger will be referred back to the sender as the submission does not adhere to the submission rules.
6. For National or Provincial gazette notices, the following applies:
 - 6.1 These notices must be accompanied by an electronic Z95 or Z95Prov Adobe form
 - 6.2 The notice content (body copy) MUST be a separate attachment.
7. The current cut-off of all Gazette's remains unchanged for all channels. (Refer to the GPW website for submission deadlines – www.gpwonline.co.za)
8. Incorrectly completed forms and notices submitted in the wrong format will be rejected to the customer to be corrected and resubmitted. Assistance will be available through the Contact Centre should help be required when completing the forms. (012-748 6200 or email info.egazette@gpw.gov.za)
9. All re-submissions will be subject to the standard cut-off times.
10. All submissions and re-submissions that miss the cut-off will be rejected to the customer to be submitted with a new publication date.
11. The electronic Adobe form will be taken as the primary source for the notice information to be published. Instructions that are on the email body or covering letter that contradicts the notice form content will not be considered.
12. Requests for Quotations (RFQs) should be received by the Contact Centre at least 24 hours before the submission deadline for that specific publication.

13. Any notices other than legal notices are subject to the approval of the Government Printer, who may refuse acceptance or further publication of any notice.

SCHEDULE 1

The INTERNATIONAL SYSTEM OF UNITS (SI)

The *Système International d'Unités* (known in English as the International System of Units), the SI, is a system of units, recommended by the International Committee of Weights and Measures (CIPM) and adopted by the General Conference on Weights and Measures (CGPM), which provides the internationally agreed reference in terms of which all other units are now defined.

The SI for use in the Republic is based on the 8th edition of the publication of the SI Brochure. The Supplement 2014: *Updates to the 8th edition (2006) of the SI Brochure* has been incorporated.

1. THE SI UNITS AND THEIR DECIMAL MULTIPLES AND SUBMULTIPLES

- (1) The SI units consist of –
 - (a) The base units; and
 - (b) The coherent derived units

Which together form the coherent system of SI units.

In addition the SI contains the decimal multiples and submultiples of SI units formed by using the SI prefixes.

- (2) The SI base units, their symbols, the quantities whose magnitudes are expressed in terms of these base units, definitions and rules in connection with their use are set out and defined in table 1 of this Schedule.
- (3) The coherent derived units in the SI expressed in terms of the base units, the quantities whose magnitudes are expressed in terms of these coherent derived units and definitions in connection with their use are set out and defined in table 2 of this Schedule.
- (4) The coherent derived units in the SI with special names and symbols, the quantities whose magnitudes are expressed in terms of other SI units and the base units and definitions in connection with their use are set out in Table 3 of this Schedule
- (5) SI coherent derived units whose names and symbols include SI coherent derived units which special names and symbols, the quantities whose magnitudes are expressed in terms of the base units, definitions and rules in connection with their use are set out in Table 4 of this Schedule.
- (6) The SI prefixes and their symbols for forming multiples or submultiples of SI units, their factors, definitions and rules in connection with their use are set out in Table 5 of this Schedule.
- (7) The SI units and SI prefixes are subject to any applicable rule in this Schedule.

TABLE 1

SI BASE UNITS

Base quantity		SI base unit	
Name	Symbol	Name	Symbol
length	<i>L, x, r, etc.</i>	metre	m
mass	<i>m</i>	kilogram	kg
time	<i>t</i>	second	s
electric current	<i>I, i</i>	ampere	A
thermodynamic temperature	<i>T</i>	kelvin	K
amount of substance	<i>n</i>	mole	mol
luminous intensity	<i>I_v</i>	candela	cd

DEFINITIONS:

- (a) The base unit of length: The metre is the length of the path travelled by light in vacuum during a time interval of $1/299\,792\,458$ of a second.
- (b) The base unit of mass: The kilogram is the unit of mass; it is equal to the mass of the international prototype of the kilogram.
- (c) The base unit of time: The second is the duration of $9\,192\,631\,770$ periods of the radiation corresponding to the transition between the two hyperfine levels of the ground state of the caesium 133 atom.
- (d) The base unit of electric current: The ampere is that constant current which, if maintained in two straight parallel conductors of infinite length, of negligible circular cross-section, and placed 1 m apart in vacuum, would produce between these conductors a force equal to 2×10^{-7} newton per metre of length.
- (e) The base unit of thermodynamic temperature: The kelvin, unit of thermodynamic temperature, is the fraction $1/273,16$ of the thermodynamic temperature of the triple point of water.
- (f) The base unit of amount of substance: The mole is the amount of substance of a system which contains as many elementary entities as there are atoms in 0,012 kilogram of carbon 12.
- (g) The base unit of luminous intensity: The candela is the luminous intensity, in a given direction, of a source that emits monochromatic radiation of frequency 540×10^{12} hertz and that has a radiant intensity in that direction of $1/683$ watt per steradian.

RULES:

- (1) The symbols for quantities are generally single letters of the Latin or Greek alphabets, printed in an italic font, and are *recommendations*.
- (2) The symbols for units are *mandatory*.

- (3) In addition to the thermodynamic temperature (symbol : T) expressed in kelvin, use is also made of Celsius temperature (symbol : t) which is defined by the quantity equation:

$$t = T - T_0.$$

The unit of Celsius temperature is the degree Celsius, symbol °C, which is by definition equal in magnitude to the kelvin. A difference or interval of temperature may be expressed in kelvins or in degrees Celsius. However the numerical value of a Celsius temperature expressed in degrees Celsius is related to the numerical value of the thermodynamic temperature expressed in kelvins by the relation

$$t/^{\circ}\text{C} = T/\text{K} - 273,15.$$

- (4) When the mole is used, the elementary entities must be specified and may be atoms, molecules, ions, electrons, other particles, or specified groups of such particles.

* A SI coherent derived unit is any unit given by an algebraic expression in the form of a reciprocal, or a product of powers (positive, negative or positive and negative) of base units, having a numerical factor equal only to the number 1. Derived units which have special names and symbols may themselves be used to express other derived units in a simpler way than in terms of base units.

The number of quantities in science is without limit, and it is not possible to provide a complete list of derived quantities and derived units. However, Table 2 lists some examples of derived quantities, and the corresponding coherent derived units expressed directly in terms of base units. Other derived units correctly expressed in terms of base units are also allowed.

DEFINITIONS and RULES:

- a) In the field of clinical chemistry this quantity is also called *substance concentration*.
- b) These are dimensionless quantities, or quantities of dimension one, and the symbol "1" for the unit (the number "one") is generally omitted in specifying the values of dimensionless quantities.

DEFINITIONS and RULES:

- (a) The SI prefixes may be used with any of the special names and symbols, but when this is done the resulting unit will no longer be coherent.
- (b) The radian and steradian are special names for the number one that may be used to convey information about the quantity concerned. In practice the symbols rad and sr are used where appropriate, but the symbol for the derived unit one is generally omitted in specifying the values of dimensionless quantities.
- (c) In photometry the name steradian and the symbol sr are usually retained in expressions for units.
- (d) The hertz is used only for periodic phenomena, and the becquerel is used only for stochastic processes in activity referred to a radionuclide.
- (e) The degree Celsius is the special name for the kelvin used to express Celsius temperatures. The degree Celsius and the kelvin are equal in size, so that the numerical value of a temperature difference or temperature interval is the same when expressed in either degrees Celsius or in kelvins.
- (f) Activity referred to a radionuclide is sometimes incorrectly called radioactivity.
- (g) On the use of the sievert: The quantity dose equivalent H is the product of the absorbed dose D of ionising radiation and the dimensionless factor Q (quality factor) defined as a function of linear energy transfer by the ICRU:

$$H = Q \cdot D$$

Thus, for a given radiation, the numerical value of H in joules per kilogram may differ from that of D in joules per kilogram depending on the value of Q .

In order to avoid any risk of confusion between the absorbed dose D and the dose equivalent H , the special names for the respective units should be used, that is, the name gray should be used instead of joules per kilogram for the unit of absorbed dose D and the name sievert instead of joules per kilogram for the unit of dose equivalent H .

DEFINITIONS and RULES:

- (a) In both Tables 3 and 4 the final column shows how the SI units concerned may be expressed in terms of SI base units. In this column factors such as m^0 , kg^0 , etc., which are all equal to 1, are not shown explicitly.
- (b) The values of several different quantities may be expressed using the same name and symbol for the SI unit. Thus for the quantity heat capacity as well as the quantity entropy, the SI unit is the joule per kelvin. Similarly for the base quantity electric current as well as the derived quantity magnetomotive force, the SI unit is the ampere. It is therefore important not to use the unit alone to specify the quantity. This applies not only to scientific and technical texts, but also, for example, to measuring instruments (i.e. an instrument read-out should indicate both the unit and the quantity measured).
- (c) A derived unit can often be expressed in different ways by combining base units with derived units having special names. Joule, for example, may formally be written newton metre, or kilogram metre squared per second squared.
- (d) In the field of ionising radiation, the SI unit of activity is designated the becquerel rather than the reciprocal second, and the SI units of absorbed dose and dose equivalent are designated the gray and the sievert, respectively, rather than the joule per kilogram. The special names becquerel, gray, and sievert were specifically introduced because of the dangers to human health that might arise from mistakes involving the units reciprocal second and joule per kilogram, in case the latter units were incorrectly taken to identify the different quantities involved.
- (e) Any unit formed in accordance with the provisions of subparagraph 1(1, 2 and 3) of this Regulation and not mentioned in Tables 2, 3 and 4 of this Schedule is also an SI derived unit.
- (f) In the symbols of derived units multiplication is denoted by a space e.g. N m, a point e.g. N.m or N'm and division by an oblique stroke or horizontal line or a negative power, e.g. m/s or M_S or $m.s^{-1}$; J/kg.K or $J.kg^{-1}.K^{-1}$
- (g) The letter "p" is not to be used in a symbol to denote division, e.g. r/min not rpm.
- (h) Where the magnitude of a quantity is used as the decimal sign in the numerical part of the expression and the digits are separated into groups of three digits on either side of the comma by means of spaces. The decimal separatrix always has at least one digit on each side,

e.g. 25 130,12 mm = 25,130 12 x 10^3 mm = 25,130 12 m;

0,51 g; 1,61 N

DEFINITIONS and RULES:

- The Republic of South Africa uses the Long scale numbering naming system. In international use, most English and Arabic speaking countries use the Short scale (including the UK as adopted in 1974) whilst European countries and countries in the rest of the world speaking French, Spanish, Portuguese (except Brazil), Dutch and German, use the Long scale. A small number of countries use both including Canada, Mauritius, Seychelles, Vanuatu, Namibia and Puerto Rico.
- The Financial world primarily uses the Short scale and for this reason it is included in Table 5. It is recommended that in Financial (English) use a billion be specified, e.g. R · 10⁻¹² or R · 10⁹ and that in the other official languages the correct Long scale factor in words be used for R · 10⁹ (e.g. in Afrikaans "miljard", Sepedi-Sesotho and Xitsonga "miliate", etc.).
- The Pan South African Language Board (PANSALB) has started a process to obtain the correct wording for the Long scale numbering system in the South African official languages. This will be updated in the revised Schedule of 2017.
- Prefix symbols are printed in roman (upright) type, as are unit symbols, regardless of the type used in the surrounding text, and are attached to unit symbols without a space between the prefix symbol and the unit symbol. With the exception of da (deca), h (hecto), and k (kilo), all multiple prefix symbols are capital (upper case) letters, and all submultiple prefix symbols are lower case letters. All prefix names are printed in lower case letters, except at the beginning of a sentence.
- The grouping formed by a prefix symbol attached to a unit symbol constitutes a new inseparable unit symbol (forming a multiple or submultiple of the unit concerned) that can be

raised to a positive or negative power and that can be combined with other unit symbols to form compound unit symbols.

Examples: $2,3 \text{ cm}^3 = 2,3 (\text{cm})^3 = 2,3 (10^{-2} \text{ m})^3 = 2,3 \times 10^{-6} \text{ m}^3$

$$1 \text{ cm}^{-1} = 1 (\text{cm})^{-1} = 1 (10^{-2} \text{ m})^{-1} = 10^2 \text{ m}^{-1} = 100 \text{ m}^{-1}$$

$$1 \text{ V/cm} = (1 \text{ V})/(10^{-2} \text{ m}) = 10^2 \text{ V/m} = 100 \text{ V/m}$$

$$5000 \mu\text{s}^{-1} = 5000 (\mu\text{s})^{-1} = 5000 (10^{-6} \text{ s})^{-1} = 5 \times 10^9 \text{ s}^{-1}$$

- (f) Similarly prefix names are also inseparable from the unit names to which they are attached. Thus, for example, millimetre, micropascal, and meganewton are single words.
- (g) Compound prefix symbols, that is, prefix symbols formed by the juxtaposition of two or more prefix symbols, are not permitted. This rule also applies to compound prefix names.
- (h) Prefix symbols can neither stand-alone nor be attached to the number 1, the symbol for the unit one. Similarly, prefix names cannot be attached to the name of the unit one, that is, to the word "one."
- (i) Prefix names and symbols are used with a number of non-SI units (see Schedule 2), but they are never used with the units of time: minute, min; hour, h; day, d. However astronomers use milliarcsecond, which they denote mas, and microarcsecond, μas , which they use as units for measuring very small angles.
- (j) These SI prefixes refer strictly to powers of 10. They should not be used to indicate powers of 2 (for example, one kilobit represents 1000 bits and not 1024 bits).
- (k) The IEC has adopted prefixes for binary powers in the international standard IEC 60027-2: 2005, third edition, Letter symbols to be used in electrical technology – Part 2: Telecommunications and electronics. The names and symbols for the prefixes corresponding to 2¹⁰, 2²⁰, 2³⁰, 2⁴⁰, 2⁵⁰, and 2⁶⁰ are, respectively: kibi, Ki; mebi, Mi; gibi, Gi; tebi, Ti; pebi, Pi; and exbi, Ei. Thus, for example, one kibibyte would be written: 1 KiB = 2¹⁰ B = 1024 B, where B denotes a byte. Although these prefixes are not part of the SI, they should be used in the field of information technology to avoid the incorrect usage of the SI prefixes.

Examples of the use of prefixes:

pm (picometre)
 mmol (millimole)
 G (gigaohm)
 THz (terahertz)
 nm (nanometre),
 but not m μm (millimicrometre)

The number of lead atoms in the sample is $N(\text{Pb}) = 5 \times 10^6$, but not $N(\text{Pb}) = 5 \text{ M}$, where M is intended to be the prefix mega standing on its own.

SCHEDULE 2**UNITS OUTSIDE THE SI APPROVED FOR USE**

It is recognised that some non-SI units still appear in the scientific, technical and commercial literature, and will continue to be used for many years. Some non-SI units are of historical importance in the established literature. For this reason, and in accordance with 1 (1) in this Regulation, the following may be used in the Republic, taking into account that:

“the inclusion of non-SI units in this text does not imply that the use of non-SI units is to be encouraged. For the reasons already stated SI units are generally to be preferred. It is also desirable to avoid combining non-SI units with units of the SI; in particular, the combination of non-SI units with the SI to form compound units should be restricted to special cases in order not to compromise the advantages of the SI”

- (1) Units for use in addition to the SI units, the quantities whose magnitudes are expressed in terms of these units, their symbols and values, and rules in connection with their use are set out in Table 6 of this Schedule.
- (2) Units for use in addition to the SI units in specialised fields whose values are obtained experimentally, the quantities whose magnitudes are expressed in terms of these units, their symbols and values, and rules in connection with their use are set out in Table 7 of this Schedule.
- (3) Units for use in addition to the SI for a limited time, the quantities whose magnitudes are expressed in terms of these units, their symbols and values, and rules in connection with their use are set out in Table 8 of this Schedule.
- (4) Units for use in addition to the SI units associated with the CGS and the CGS-Gaussian System of Units, the quantities whose magnitudes are expressed in terms of these units, their symbols and values, and rules in connection with their use are set out in Table 9 of this Schedule.

volume	litre ^(f)	L, l	1 L = 1 l = 1 dm ³ = 10 ³ cm ³ = 10 ⁻³ m ³
mass	tonne ^(g)	t	1 t = 10 ³ kg

DEFINITIONS and RULES:

(a) The symbol of this unit is included in [Resolution 7](#) of the 9th CGPM (1948).

(b) ISO 80 000 recommends that the degree be divided decimally rather than using the minute and the

second. For navigation and surveying, however, the minute has the advantage that one minute of latitude on the surface of the Earth corresponds (approximately) to one nautical mile.

- (c) The gon (or grad, where grad is an alternative name for the gon) is an alternative unit of plane angle to the degree, defined as $(\pi/200)$ rad. Thus there are 100 gon in a right angle. The potential value of the gon in navigation is that because the distance from the pole to the equator of the Earth is approximately 10 000 km, 1 km on the surface of the Earth subtends an angle of one centigon at the centre of the Earth. However the gon is rarely used.
- (d) For applications in astronomy, small angles are measured in arcseconds (i.e. seconds of plane angle), denoted as or ", milliarcseconds, microarcseconds, and picoarcseconds, denoted mas, μ as, and pas, respectively, where arcsecond is an alternative name for second of plane angle.
- (e) The unit hectare, and its symbol ha, were adopted by the CIPM in 1879 (PV, 1879, 41). The hectare is used to express land area.
- (f) The litre, and the symbol lower-case l, were adopted by the CIPM in 1879 (PV, 1879, 41). The alternative symbol, capital L, was adopted by the 16th CGPM (1979, Resolution 6) in order to avoid the risk of confusion between the letter l (el) and the numeral 1 (one).
- (g) The tonne, and its symbol t, were adopted by the CIPM in 1879 (PV, 1879, 41). In English speaking countries this unit is usually called "metric ton".

time	a.u. of time	\hbar/E_h	2,418 884 326 505 (16) $\times 10^{-17}$ s

DEFINITIONS and RULES:

- (a) The values in SI units of all units in this table, except the astronomical unit, are taken from the 2002 CODATA set of recommended values of the fundamental physical constants, P.J. Mohr and B.N. Taylor, *Rev. Mod. Phys.*, 2005, **77**, 1-107. The standard uncertainty in the last two digits is given in parenthesis (see [section 5.3.5](#)).
- (b) The electronvolt is the kinetic energy acquired by an electron in passing through a potential difference of one volt in vacuum. The electronvolt is often combined with the SI prefixes.
- (c) The dalton (Da) and the unified atomic mass unit (u) are alternative names (and symbols) for the same unit, equal to 1/12 times the mass of a free carbon 12 atom, at rest and in its ground state. The dalton is often combined with SI prefixes, for example to express the masses of large molecules in kilodaltons, kDa, or megadaltons, MDa, or to express the values of small mass differences of atoms or molecules in nanodaltons, nDa, or even picodaltons, pDa.
- (d) The astronomical unit is approximately equal to the mean Earth-Sun distance. It is the radius of an unperturbed circular Newtonian orbit about the Sun of a particle having infinitesimal mass, moving with a mean motion of 0,017 202 098 95 radians per day (known as the Gaussian constant). The value given for the astronomical unit is quoted from the IERS Conventions 2003 (D.D. McCarthy and G. Petit eds., *IERS Technical Note 32*, Frankfurt am Main: Verlag des Bundesamts für Kartographie und Geodäsie, 2004, 12). The value of the astronomical unit in metres comes from the [JPL ephemerides DE403](#) (Standish E.M., Report of the IAU WGAS Sub-Group on Numerical Standards, *Highlights of Astronomy*, Appenzeller ed., Dordrecht: Kluwer Academic Publishers, 1995, 180-184).

logarithmic ratio quantities	neper ^(g,i)	Np	[see footnote (j) regarding the numerical value of the neper, the bel and the decibel]
	bel ^(h,i)	B	
	decibel ^(h,i)	dB	

DEFINITIONS and RULES:

- (a) The bar and its symbol are included in Resolution 7 of the 9th CGPM (1948). Since 1982 one bar has been used as the standard pressure for tabulating all thermodynamic data. Prior to 1982 the standard pressure used to be the standard atmosphere, equal to 1,013 25 bar, or 101 325 Pa.
- (b) The millimetre of mercury is a legal unit for the measurement of blood pressure in some countries.
- (c) The ångström is widely used by x-ray crystallographers and structural chemists because all chemical bonds lie in the range 1 to 3 ångströms. However it has no official sanction from the CIPM or the CGPM.
- (d) The nautical mile is a special unit employed for marine and aerial navigation to express distance. The conventional value given here was adopted by the First International Extraordinary Hydrographic Conference, Monaco 1929, under the name "International nautical mile". As yet there is no internationally agreed symbol, but the symbols M, NM, Nm, and nmi are all used; in the table the symbol M is used. The unit was originally chosen, and continues to be used, because one nautical mile on the surface of the Earth subtends approximately one minute of angle at the centre of the Earth, which is convenient when latitude and longitude are measured in degrees and minutes of angle.
- (e) The barn is a unit of area employed to express cross sections in nuclear physics.
- (f) The knot is defined as one nautical mile per hour. There is no internationally agreed symbol, but the symbol kn is commonly used.
- (g) The statement $L_A = n \text{ Np}$ (where n is a number) is interpreted to mean that $\ln(A_2/A_1) = n$. Thus when $L_A = 1 \text{ Np}$, $A_2/A_1 = e$. The symbol A is used here to denote the amplitude of a sinusoidal signal, and L_A is then called the neperian logarithmic amplitude ratio, or the neperian amplitude level difference.
- (h) The statement $L_X = m \text{ dB} = (m/10) \text{ B}$ (where m is a number) is interpreted to mean that $\lg(X/X_0) = m/10$. Thus when $L_X = 1 \text{ B}$, $X/X_0 = 10$, and when $L_X = 1 \text{ dB}$, $X/X_0 = 10^{1/10}$. If X denotes a mean square signal or power-like quantity, L_X is called a power level referred to X_0 .
- (i) In using these units it is important that the nature of the quantity be specified, and that any reference value used be specified. These units are not SI units, but they have been accepted by the CIPM for use with the SI.
- (j) The numerical values of the neper, bel, and decibel (and hence the relation of the bel and the decibel to the neper) are rarely required. They depend on the way in which the logarithmic quantities are defined.

DEFINITIONS and RULES:

- (a) This unit and its symbol were included in Resolution 7 of the 9th CGPM (1948).
- (b) The gal is a special unit of acceleration employed in geodesy and geophysics to express acceleration due to gravity.
- (c) These units are part of the so-called "electromagnetic" three-dimensional CGS system based on unrationalised quantity equations, and must be compared with care to the corresponding unit of the International System which is based on rationalized equations involving four dimensions and four quantities for electromagnetic theory. The magnetic flux, Φ , and the magnetic flux density, B , are defined by similar equations in the CGS system and the SI, so that the corresponding units can be related as in the table. However, the unrationalised magnetic field, H (unrationalised) = $4\pi \times H$ (rationalised). The equivalence symbol \triangleq is used to indicate that when H (unrationalised) = 1 Oe, H (rationalised) = $(10^3/4\pi)$ A m⁻¹.

NO. 814

08 JULY 2016

**NOTICE IN TERMS OF THE MEASUREMENT UNITS AND MEASUREMENT
STANDARDS ACT OF 2006****(ACT NO. 18 OF 2006)**

1. By virtue of the powers vested in me in terms of section 7 of the Measurement Units and Measurement Standards Act, 2006 (Act No. 18 of 2006), I, Dr Rob Davies, Minister of Trade and Industry, hereby –

- (a) amend Government Notice No. 36486 of 31 May 2013 with the schedule of National Measurement Standards (NMS) as set out in the attached schedule, **with effect from the date of publication.**

Dr. Rob Davies, MP

Minister of Trade and Industry

Date:9/5/16

SCHEDULE**NATIONAL MEASUREMENT STANDARDS****1 DIMENSIONAL**

a) Length

Realised through the stabilisation on hyper-fine absorption lines of iodine, using a Helium-neon laser, No. 1008.

b) Angle

Realised through error separation using a Moore index table, No 8-1440-43, a polygon and a flatness interferometer, No. 6500-0593-01.

c) Form: Flatness

Realised by using a flatness interferometer, No. 6500-0593-01 and three optical flats to fulfil the definition of using a perfect flat geometrical element, for which the deviation away from the "perfect" geometric element is measured, traceable to the National Measurement Standard for length or angle.

d) Form: Roundness

Realised by using a high accurate roundness machine, No. K510/21 E-568 and a glass hemisphere to fulfil the definition of using a perfect round geometrical element, for which the deviation away from the "perfect" geometric element is measured, traceable to the National Measurement Standard for length or angle.

2 MASS

DEPARTMENT OF TRADE AND INDUSTRY
NOTICE 397 OF 2016

INTERNATIONAL TRADE ADMINISTRATION COMMISSION OF
SOUTH AFRICA

**SUNSET REVIEW OF THE ANTI-DUMPING DUTIES ON POLYETHYLENE
TEREPHTHALATE (PET) ORIGINATING IN OR IMPORTED FROM CHINESE
TAIPEI, THE REPUBLIC OF KOREA (SOUTH KOREA) AND INDIA: FINAL
DETERMINATION**

In accordance with the provisions in the Anti-Dumping Regulations (ADR), any definitive anti-dumping duty shall be terminated on a date not later than five years from the date of imposition, unless the authorities determine, in a review initiated before that date on their own initiative or upon a duly substantiated request made by or on behalf of the domestic industry, that the expiry of the duty would likely lead to the continuation and/or recurrence of dumping and injury.

On 19 June 2015, the International Trade Administration Commission of South Africa (the Commission) notified the SACU industry through notice No. 588 in the *Government Gazette* No. 38877, that unless a substantiated request is made by it indicating that the expiry of the anti-dumping duties against imports of PET originating in or imported from Chinese Taipei, South Korea and India would likely lead to the continuation or recurrence of dumping and injury, the anti-dumping duties on the subject product originating in or imported from Chinese Taipei, South Korea and India will expire on 03 March 2016.

The sunset review investigation was initiated pursuant to Notice No. 44 of 2016 in Government Gazette No. 39636, published on 29 January 2016. Initiation letters to interested parties were sent on 02 February 2016. The due date for responses was 14 March 2016.

No properly documented responses were received from any interested party.

After considering all the information submitted by the Applicant, the Commission issued essential facts letters indicating that it was considering making a final determination that the expiry of the anti-dumping duties on PET originating in or imported from Chinese Taipei, South Korea and India would likely lead to the continuation or recurrence of dumping and the recurrence of injury.

Comments to the “essential facts” letters were received from the Embassy of Chinese Taipei, Far Eastern New Century Corporation, Reliance Industries Limited and Lotte Chemical.

After considering all the comments received from interested parties to the Commission’s essential facts letters, the Commission made a final determination that the expiry of the anti-dumping duties on PET originating in or imported from Chinese Taipei, South Korea and India would likely lead to the continuation or recurrence of dumping and the recurrence of injury.

The Commission, therefore, recommended to the Minister of Trade and Industry that the anti-dumping duties on PET originating in or imported from Chinese Taipei, South Korea and India be maintained.

The Minister approved the Commission’s recommendation. The Commission’s detailed reasons for its decision are set out in Commission’s Report No. 529 (Final determination report).

Enquiries may be directed to the investigating officers Mr Emmanuel Manamela at telephone number +27 12 394 3632 or Mr Busman Makakola at telephone number +27 12 394 3380.

The permit may be issued for a shorter period as requested by the applicant, or as decided upon by ITAC.

7. If an applicant intends to apply for a subsequent permit for which the period of validity should commence on the day after the expiry date of the previous permit issued, this must be clearly indicated in a new application. The application must be submitted to ITAC at least fourteen (14) working days prior to the expiry date of the previous permit as permits cannot be issued with retrospective effect.
8. Rebate permits may not be transferred in any manner by the holder thereof to any other person, or be used for the benefit of any person or entity, not named in the permit.
9. Any request for an amendment to a rebate permit must be forwarded to ITAC for consideration. Amendments will only be considered in the following instances:
 - a) Error by ITAC on permit;
 - b) Error by applicant regarding the product description or tariff subheading. This will only be processed if the request is accompanied by a confirmation from SARS in this regard.
10. Should any party misplace a permit, the applicant should submit an affidavit on a company letterhead endorsed by a Commissioner of Oath, stating that the permit was lost and the circumstances surrounding the loss of such permit. ITAC may, on the facts furnished, exercise its discretion to issue a new permit that replaces the lost permit. Should the lost permit be found the applicant must return such permit to ITAC.
11. Extension of the period (one calendar year or less, as provided for in paragraph 6) from which the permit is valid may be granted. Extensions will only be granted where the relevant permit has not expired, and in the view of ITAC, good cause warrants extension of such permit. Such discretion shall lie solely with ITAC. Extensions will only be permitted for a period up to 3 months and the party applying for the extension must submit a letter and supporting documents to ITAC, furnishing reasons and good cause for the extension.
12. Rebate permits issued will be subject to the following conditions and reciprocities:
 - 12.1 There should be an intention by the applicant(s) to manufacture school shirts as described in the rebate provision to such an extent that there is a visible permanent change in the fabrics, and a change in tariff heading; as such, the rebate provision is exclusively applicable to manufacturers of school shirts with in-house CMT operators.
 - 12.2 The applicant(s) must be able to prove that they have sufficient manufacturing capacity to process the volume of fabric internally for which it has applied for. If deemed necessary, ITAC will physically inspect the equipment and manufacturing process prior to the issue of a rebate permit.
 - 12.3 The applicant must provide a formal letter on the applicant's business letter head confirming that the applicant complies with labour laws, regulations and agreements gazetted by the Minister of Labour.
 - 12.4 An applicant must, together with the application, submit proof of registration and a Certificate of Compliance obtainable from the National

Bargaining Council for the Clothing Manufacturing Industry. ITAC may consult with the South African Clothing and Textiles Worker's Union (SACTWU) regarding compliance.

- 12.5 The applicant must provide ITAC with its current SARS electronic access PIN, in order to enable ITAC to verify full tax compliance status.
- 12.6 The applicant must submit a SARS letter of approval for registration as a rebate user in terms of Schedule 3 to import and use the material under the provisions of rebate item 311.40/5513.21/01.06. This letter must reflect the physical address that the applicant is currently operating from.
- 12.7 The applicant must submit a letter of consent agreeing to transparency of information in that the following information may be shared with industry stakeholders [i.e. Texfed, Sustainable Cotton Cluster, Apparel Manufacturers Association of South Africa (AMSA) Southern African Clothing and Textile Workers' Union (SACTWU) etc.]:
 - 12.7.1 Name of applicant;
 - 12.7.2 Contact details of applicant;
 - 12.7.3 Technical description of fabric (i.e. weave type, width, weight, thread count, yarn density and finish);
 - 12.7.4 Volume applied for;
 - 12.7.5 Units of school shirts to be manufactured from imported subject fabric.
- 12.8 Applicants must approach the Textile Federation (Texfed) and known local manufacturers, for confirmation of the local availability of the fabrics to be imported under rebate. This must be accompanied by a sample of the fabric to be imported, which must also be attached to the application to ITAC.
- 12.9 Applications must be accompanied by proof of engagements with local fabric dyeing and finishing mills regarding the incorporation of a value addition project for greige fabric with a view to maximise beneficiation within the entire value chain.
- 12.10 ITAC will request Texfed, local manufacturers and/or any other relevant institution to respond within 14 working days on the applicant's import requirement. Should the local manufacturers of school shirting fabrics not be able to supply the quantity requested, the applicant(s) need to obtain a confirmation letter from the manufacturer stating that they are not able to supply. The original letter needs to be submitted with the application form.
- 12.11 If the manufacturer unreasonably refuses to provide such a confirmation letter, ITAC will write a letter to the manufacturer informing it of the application and requesting it to confirm its production and production capacity. The manufacturer will then be allowed 7 days to respond to this letter. Should the manufacturer respond within the 7 day period, the information provided will be taken into account during the decision making process.

- 12.12 Should, after receipt of the manufacturer's response, or in the absence of such response, information be available that reflects that the manufacturer is reasonably unable to supply the quality and quantity of fabrics required, ITAC will be able to issue a permit without, or despite, the required letter of confirmation by the manufacturer.
- 12.13 As a rebate provision is considered for the purpose of providing relief to domestic producers that may be experiencing injurious import pressures, support will be tied to conditions related to economic performance over time and may be reviewed after a specified period.
- 12.14 The applicant must commit, inter alia, to the creation of employment and provide in each permit application the number of jobs it expects to create annually as a result of the rebate provision. The applicant must submit to ITAC an annual report on its job creation performance.
- 12.15 Applicants are required to keep verifiable records of school shirts manufactured under rebate and sold by type, size and volume of each category.
13. ITAC reserves the right to conduct an audit on the usage (meters/kg of fabric imported under rebate against units of school shirts produced) of the rebate facility by rebate holders.

Non-compliance to the conditions of the permits:

14. If a *prima facie* case is established that any condition of this permit is not complied with, the consignment in terms of which the rebate permit was used can be seized by ITAC and the rebate permit will be temporarily suspended while ITAC conducts an investigation. If it is established that non-compliance took place, appropriate steps will be taken. These steps will be taken in terms of the International Trade Administration Act and the Customs and Excise Act, and can include, criminal charges, withdrawal of the permit or permits concerned and/or the rejection of future applications for permits.

2. Principles underlying CPD

- (1) *The Council* is responsible for regulating the practice of engineering in South Africa. This is in terms of the Engineering Professions Act No. 46 of 2000 (“the Act”). Section 13(k) of the Act empowers *the Council* to determine, in consultation with *voluntary associations* (as defined in the Act) and registered persons, requirements for continuing professional development and training. *The Council* is enjoined by the Government in terms of the Act to serve and protect the safety and health of the public by establishing and maintaining minimum standards of practice, knowledge and skills of registered engineering persons in the country as well as to establish and maintain standards of professional ethics among them.
- (2) Registered persons are required by their Code of Conduct to practice strictly within their area of competence and to maintain and enhance this competence. They therefore have the responsibility to keep abreast of the developments and knowledge in their areas of expertise in order to maintain their competence. In addition to maintaining their own competence, they should strive to contribute to the advancement of the body of knowledge with which they practice, and to the profession in general.
- (3) The competencies needed to function effectively as a professional engineer (in all engineering categories): whether in business, education (universities), professional practice (consulting), the public sector (including public and municipal entities) or any other environment, continue to evolve, change and expand at a rapid rate. Professional engineers face increased expectations to display professional knowledge and skills in this ever-changing environment. Accordingly, maintaining and continuously developing professional competence are critical to meet expectations.
- (4) Whilst the foundation and basis of professional registration with *The Council* is the technical competency of the registered persons, it is equally important for registered persons to develop and maintain their non-technical competencies (general skills), such as ethical behaviour, leadership and management skills, etc. as these are also regarded as relevant CPD activities.
- (5) Registered persons are expected to ensure that, in their conformance to *The Council’s* CPD requirements, the CPD activities undertaken by them must be relevant and must contribute to the development and maintenance of specific professional competence required by the registered persons’ current and possible future roles.

- (6) CPD compliance in *the Council* is tied to the renewal of registration. Section 22(1) of the Act imposes a duty on a registered person to apply for the renewal of his/her registration with *the Council* "at least three months prior to the prescribed expiry date of his/her registration". Subsection (2) of this section confers the power on *the Council* to determine conditions for renewal of registration.
- (7) The discretion provided for in the Act for *the Council* to "determine, after consultation with the voluntary associations and registered persons, conditions relating to and the nature and extent of continuing education and training" triggered *the Council* decision to use of Continuing Professional Development (CPD) as a mechanism to determine renewal of registration. *The Council's* objective is to maintain a culture of CPD for the South African engineering profession.
- (8) The international agreements concluded between *the Council* and other international engineering bodies i.e. Engineers Mobility Forum & Engineering Technologists Mobility Forum have as a requirement for the recognition of *the Council's* assessment process and continued registration of individuals, the maintenance of competence through a system of continuing professional development. South African registered professionals would therefore need to undertake CPD activities in order to maintain their international registration.
- (9) Whilst *the Council* is to monitor and enforce compliance by registered persons with the CPD requirements, it is also intent on ensuring that CPD activities are, objectively viewed and assessed, accessible and affordable to registered persons. In addition, it is *the Council's* duty to ensure that the content of the engineering activities that the members use for purposes of compliance *the Council's* CPD requirements, is of a sufficiently high standard. In this regard, and in line with best practice, *the Council* is to play an active (as opposed to arms-length) and leading role in the area of CPD administration going forward.

3. Definition of CPD in context

- (1) CPD is defined as the systematic maintenance, improvement and broadening of knowledge and skills, and the development of personal qualities necessary for the execution of professional and technical duties throughout a person's engineering career. It is learning and development that takes place after completion of the university studies and by means of which engineers maintain and develop the competencies to continue to perform their role competently.
- (2) CPD's development pillars are as follows:
 - (a) Professional knowledge;
 - (b) Professional skills;
 - (c) Professional values, ethics and attitudes; and
 - (d) Professional competence.
- (3) It is the duty of every registered person to strike a balance of the above-stated four development pillars in complying with *the Council's* CPD regime/ policy. In monitoring compliance to CPD, *the Council* is to specifically pay attention to the requisite balance in this regard.
- (4) It should be noted that CPD is not limited to education, practical experience and training only. It also extends to learning and development activities such as coaching and mentoring, networking, observation, feedback and reflection as well as other means by which competence can be achieved.
- (5) This Policy Framework (rules) are given full effect by *the Council's* CPD policy. That policy has also been revised so as to ensure full alignment between it and this Framework(rules).

4. Application of these Rules to Registered Persons

- (1) These rules must be read and applied in conjunction with ECSA's CPD policy as amended.
- (2) These rules apply in respect of all persons registered in all categories of registration as embodied in section 18 of the Act. The rules also apply to voluntary associations recognised by *the Council* (to an extent that they play a role in *the Council's* CPD regime).
- (3) These rules also apply in respect of registered persons who are practicing abroad, subject to the following conditions:
 - (a) Registered persons who are registered with other engineering statutory councils that are either signatories to the International Engineering Alliance Accords and Agreements; or who are registered with statutory or related professional bodies with which *the Council* has concluded reciprocity agreements or Memoranda of Understanding (MoU) as well as those that are registered/ affiliated with professional bodies linked to the International Engineering Alliance or such professional bodies with which *the Council* has concluded reciprocity agreements or Memoranda of Understanding (MoU) shall, upon formal written notification of *the Council*, be recognised for *the Council's* CPD purposes.
 - (b) In respect of persons registered with engineering statutory councils that are signatories to the International Engineering Alliance Accords and Agreements or those with which *the Council* has concluded reciprocity agreements or Memoranda of Understanding (MoU), such persons may opt to comply either with *the Council's* CPD policy requirements, or that of the other statutory council.
 - (c) Should registered persons opt to comply with the CPD policy of the engineering statutory councils that are signatories to the International Engineering Alliance accords and Agreements or those with which *the Council* has concluded reciprocity agreements or Memoranda of Understanding (MoU), then such compliance will be deemed to be compliance with the *Council* CPD policy requirements for the year in question. There will not be a need to also comply with *the Council's* CPD requirements for that year.
 - (d) Registered persons who elect this option (i.e. compliance with the CPD policy of the engineering statutory councils that are signatories to the International Engineering Alliance accords and Agreements or those with which *the Council* has concluded reciprocity agreements or Memoranda of Understanding (MoU)); are required to inform ECSA of this fact on an annual basis in writing and declare compliance with the other professional body's CPD policy. Documentary proof of CPD activities undertaken abroad must be submitted to *the Council* for evaluation against the requirements of these rules and *the Policy*.
 - (e) Once a registered person has opted as to which CPD policy they are to comply with, then that member will not be allowed to do so partially and wish to also partly comply with *the Council's* CPD policy in the same year. Opting for the CPD regime of a statutory council or professional body in any given year shall be required to be complete and not partial.
 - (f) In the absence of full compliance by any registered person with rule 3(2) of these Rules, then registered persons registered abroad shall be expected to fully comply with *the Council's* CPD policy framework.

5. Objectives and Benefits of the CPD system

- (1) *The Council's* CPD regime is predicated on the continuous monitoring of conformance by registered persons with the four pillars referred to in rule 2(2) in ensuring that its duty as espoused by section 14 of the Act is carried out.
- (2) Registered persons have a duty to, in their compliance with *the Council's* CPD requirements, ensure a balance between the four CPD development pillars stated above.

- (3) CPD is introduced for all registered persons in order to:
- (a) Protect the public and the environment against unsound engineering practices;
 - (b) Engender and strengthen public trust in the engineering profession;
 - (c) Ensure, through the creation of a culture of CPD, that all registered persons maintain their competence throughout their period of registration;
 - (d) Develop a commitment (positive attitude) to lifelong learning (and maintain and developing professional competence);
 - (e) Link satisfactory CPD standing to the requirements for renewal of registration;
 - (f) Take responsibility for undertaking relevant CPD activities to remain competent in their roles;
 - (g) Take responsibility for recording their CPD activities to demonstrate that they have undertaken relevant and appropriate learning activities; and
 - (h) Provide high quality service to clients, employers and other stakeholders;
- (4) The following are the benefits of the CPD system on registered persons:
- (a) The capacity of engineers to develop their technical and professional knowledge is enhanced and improved;
 - (b) Engineering professionals continuously fulfil their responsibilities or duties competently;
 - (c) Career prospects and career progression with current employers or future employers are enhanced; and
 - (d) Public trust in their ability to carry out their functions competently is enhanced.

6. **The role of *the Council* in the administration of CPD**

- (1) Empowered by section 13(k) of the Act, the determination of the CPD requirements shall be the responsibility of *the Council*.
- (2) With effect from the effective date *the Council* shall:
- (a) Become the sole authority in the determination of the requirements to be met by registered persons for purposes of compliance with *the Council's* CPD policy framework;
 - (b) Become the sole accrediting institution for all CPD-related activities. All CPD service providers shall be accredited solely by ECSA with effect from the effective date;
 - (c) Develop and publish on its website a list of all accredited CPD service providers;
 - (d) Delegate to voluntary associations (that have signed a recognition Accord with *the Council*), the authority to provide CPD activities to their members (using *the Council* -accredited CPD service providers).

7. ***The Council's* CPD Requirements**

- (1) The attainment of CPD may be achieved by registered persons in three ways, namely:
- (a) An input-based (developmental) approach: This approach establishes a minimum set of learning activities by means of which registered persons can develop and maintain competence.
 - (b) An output-based approach: This approach requires registered persons to demonstrate, in the form of outcomes, that they develop and maintain professional competence.
 - (c) A hybrid approach: This approach is a combination of the elements of the input-based and output-based approaches. It sets down the amount of learning which is required and setting requirements for demonstrating the outcomes that have been achieved.

8. Exemptions from the CPD Policy Framework

- (1) The following registered persons are exempted from the CPD policy:
 - (a) **Registered persons that have reached the age of seventy (70) years and no longer practice engineering.**
 - (b) **Registered persons that hold non-engineering management roles in their respective areas of employment.**
 - (c) **Registered persons that have retired completely and no longer carries out any activities associated with the designation of a Professional Engineer in all the categories prescribed by the Act.**
 - (d) **Registered persons that take extended leave from engineering work for whatever reason;** and
 - (e) **Registered persons that take extended breaks due to unemployment, illness or incapacitation.**
- (2) The above exemptions are not automatic. Formal application by a registered person to *ECSA*, accompanied by supporting documentation as well as a sworn statement/affidavit outlining the circumstances and reasons for their application, is required. *The Council* shall then communicate its decision to the registered person concerned.
- (3) Exemption from the CPD policy in terms of Rule 8 does not affect the registration status of a registered person being exempted. Every registered person's duties and responsibilities as a registered person shall persist notwithstanding the exemption. Registered persons to whom exemption is granted are required to confirm their professional registration status on an annual basis with *the Council*.
- (4) The following grounds shall not be deemed adequate by *the Council* for partial or full exemption of the application of the CPD policy:
 - (a) Partial retirement by any registered person;
 - (b) Registered persons undertaking engineering work on a part-time basis; and
 - (c) Practicing engineering abroad/ outside South Africa.
- (5) Registered persons that are exempted from CPD requirements are encouraged to keep up to date and remain relevant in terms of their professional interests, roles and the industries in which they operated prior to exemption.
- (6) The exemption of any registered person from CPD shall remain in place until the circumstances for which the exemption was granted are no longer applicable. The onus is on the member to formally (in writing) notify *the Council* when the circumstances around the granting of the exemption are no longer applicable.
- (7) Should an exempted registered person resume engineering work or related activities after a significant period during which such activities were not performed, *the Council* may require such a person to undertake additional relevant CPD or to provide a plan which sets out in detail how the registered person will update their knowledge and ensure they can perform their responsibilities competently and with due care.
- (8) Should an exempted registered person resume engineering work or related activities without *the Council* being formally notified, then such would amount to misconduct, and such person shall be referred to *the Council's* Investigation Committee for appropriate action.

9. The CPD Cycle and Measurement

- (1) Subject to an initial phasing-in period referred to under transitional provisions in rule, the CPD system shall function in a cycle of three years irrespective of the CPD option a registered person elects (namely: the input-based option, the output based option and the hybrid option (combining both input and out-based options)).
- (2) The three-year cycle of each registered person commences on the anniversary of the date on which such registered person became registered by *the Council*, which date appears on the person's certificate of registration issued by *the Council*, and which date also constitutes the *expiry date*, as defined in these rules, when such person is required to apply for renewal of his or her registration. The date on which a person has been registered is also obtainable from *the Council's* Website www.ecsa.co.za.
- (3) Where a person is registered in more than one professional category, the date applicable to the category in which such person first registered will be recorded as the date on which such person's cycle commences, and which date also constituted the *expiry date*, as defined in these rules.
- (4) During each cycle of three years every registered person must accumulate a minimum of 25 credits in order to qualify for renewal of his/her registration.
- (5) The determining criteria shall be linked to the CPD option elected by a registered person.
 - (a) In respect of the input-based option: the amount of hours spent by a registered person in continuing professional development activities is a determining factor. In this regard:
 - ▲ A registered person will be credited with one credit per 10 hours of attendance.
 - ▲ A full day activity will be regarded as being for 10 hours and a half-day activity will be regarded as 5 hours and hence a half a credit.
 - ▲ Members opting for the input-based approach are required to accumulate/ attain no less than 4 credits (40 hours) annually from the date of professional registration with ECSA;
 - ▲ The hours and activities must be capable of verification by ECSA.
 - (b) In respect of the output-based option: A weighting of one credit for every 300 hours per year for engineering related activity is awarded for this category. A maximum of two credits for 600 hours per year may be earned in respect of this activity.

There are four (4) steps that a registered member opting for the output-based option must follow and satisfy. These are:

- ▲ **Planning**: A registered person needs to identify the learning needs/gaps relative to their work to the roles the members are undertaking. This is important so as to ensure that a member has undertaken CPD interventions that are relevant to the roles/work that the registered person does;
 - ▲ **Learning action/ intervention** – a registered person should identify learning activities to meet competency requirements that need to be developed or maintained;
 - ▲ **Evaluation** - a registered person should be able to evaluate the impact, notably: the effectiveness of learning activities undertaken and whether the objectives identified in the planning step/phase have been met; whether competency has been achieved (developed or maintained) and whether any further action / learning activities are still required; and
 - ▲ **Declaration** - a registered person should annually ensure that an output-based measurement approach has been followed and therefore that the competency requirements for members' specific roles have been developed and maintained for the year under review.
- (c) In respect of the output-based option: Where registered persons alternate between approaches (input and output based) over the three-year period, the overall evaluation as to whether members meet the requirements of this policy will be done on the output based approach.

- (d) In any given CPD cycle, a registered person has a choice of which approach they are to adopt in meeting *the Council's* CPD requirements. Once an approach is chosen by a registered persons, then that approach will have to be maintained for the duration of the cycle.
- (e) Every registered person must ensure that the CPD activities that they embark are verifiable or capable of verification. Non-verifiable activities will result in non-recordal thereof by *the Council* for CPD purposes.
- (f) Additional credits which have been accumulated during any particular year may be carried over to subsequent years of the three-year cycle, provided that no more than the maximum permissible credits for the particular activity may be carried over.

(6) In summary: CPD credits must be obtained as per the table below:

Categories	Activities	Maximum Credits pa	Hours
Category 1	Input-based (Developmental) Approach	4 credits	40 hours (10hrs/credit)
Category 2	Output-based approach	2 credits 1 credit	600 hours (300 hrs./credit) 50 hours (50hrs/credit)
Category 3	Hybrid Approach	Same as Cat 2	(Same as Cat 2)

10. Recording of CPD Activities

- (1) Unless exempted by *the Council* in terms of these rules, registered persons are responsible for documenting the relevant professional development activities which they have undertaken. This is in addition to each registered person's responsibility for planning and undertaking activities that maintain and develop their professional competence.
- (2) Members are required to demonstrate participation in a relevant CPD activity by keeping record of their CPD activities in the following manner:
- Either manually on form ECPD1 and by either emailing it or sending it by courier to *the Council*. Posting of CPD activities is not permitted; or
 - Electronically, in a password protected private domain for each registered person, via *the Council's* website www.ecsa.co.za.
- (3) Registered persons may record individual CPD activities on a continuous basis as they occur during each annual cycle, provided that all CPD activities undertaken during each annual cycle must be recorded no later than 30 days after the completion of each annual cycle.
- (4) When recording CPD activities under this rule, any person who is registered in more than one professional category must inform *the Council* which category of registration is the most appropriate to his or her area of practice, in which case *the Council* evaluates the appropriateness of the CPD activities so recorded in the context of the registration category preferred by such registered person.

- (5) Every registered person must retain documentary evidence of all CPD activities undertaken during each three-year cycle, and be able to present such evidence when requested by *the Council* to do so. Examples of such supporting documentation are:
- (a) Certificates of attendance;
 - (b) Attendance registers;
 - (c) Minutes of meetings;
 - (d) Examination results;
 - (e) Published papers;
 - (f) Independent assessments of a learning activity performed; etc.

11. Auditing of recorded CPD activities

- (1) *The Council* shall undertake a monitoring process to ensure –
- (a) That CPD undertaken is relevant and appropriate to the current and future role of the registered person; and
 - (b) That appropriate records and supporting documentation are kept.
- (2) In order to assess whether members meet the requirements of this policy, monitoring shall take the form of an annual verification of the CPD of a randomly selected sample of all registered persons (whether they have selected the input- or output-based measurement options).
- (3) *The Council* may conduct random audits as it deems necessary and practicable, but notionally as indicated from time to time in its *Policy*, of the CPD records of all registered persons who are required to undertake CPD in terms of these rules.
- (4) The onus rests on the registered persons to provide evidence to demonstrate that competence was developed or maintained.
- (5) In the event that a registered person is selected for audit, such registered person must send, within four weeks of receiving notification to this effect, whatever information ECSA may seek for purposes of the audit.
- (6) If a *voluntary association* or an *accredited educational institution* provided a CPD activity, written verification from such recognised *voluntary association* or *accredited educational institution* will be recognised as sufficient evidence of attendance.

1. INTRODUCTION

- 1.1 The Engineering Council of South Africa (“Council”) as a statutory council, is governed by its enabling legislation: the Engineering Profession Act No 46 of 2000 (“The Act”).
- 1.2 Section 13(k) of the Act enjoins Council to determine, after consultation with the voluntary associations and registered persons, conditions relating to and the nature and extent of continuing education and training.
- 1.3 The legislative injunction above notwithstanding, Council, in line with best practice, regularly reviews, updates and enhances its processes, procedures and governance instruments for purposes of remaining relevant, promoting efficiencies, its effectiveness, integrity, elimination of duplication and wastage of resources as well as, in pursuit of collaboration and cooperation, consolidate expertise towards fully executing its legislative mandate of regulating the engineering profession. It is on this basis that Council has taken a decision to review its Continuing Professional Development Policy Framework/ regime, which is currently embodied in two policy instruments, namely **Rules: Continuing Professional Development and Renewal of Registration: Board Notice 16 of 2014** (“The Rules”) as well as the Policy on Continuing Professional Development.
- 1.4 For purposes of this Notice, the ECSA internal policy on continuing professional development, although also revised, is not part of this process.

2. THE OBJECTIVES UNDERLYING THE REVIEW AND AMENDMENT OF THE RULES

- 2.1 The Engineering Council of South Africa, like all well-run statutory councils in South Africa, and as enjoined by the National Department of Public Works, operates within a multiplicity of legislative, governance and performance monitoring frameworks, notably: the Council-approved strategic plan and the Annual Performance Plan (APP). It is through these that ECSA’s performance output as a statutory council is monitored and measured.
- 2.2 The content of Council’s current Annual Performance Plan (APP) contains strategic objectives that call for the review of the manner with which ECSA manages CPD, including its registration renewal processes. In this regard, Strategic Objective 1.5 of the Strategy document commits ECSA to ensure that registered persons successfully renew their registration through fair, credible, transparent and accessible processes. Supporting this Strategic Objective is the following objective statement: “Proactive registration renewal system and process workflows- CPD”
- 2.3 The current ECSA Continuing Professional Development Policy Framework/ regime inextricably links renewal of registration with the continuing professional development standing of each registered person. Phrased differently, renewal of registration is dependent/ conditional upon a registered person being fully compliant with ECSA’s continuing professional development requirements for renewal to be effected. The Council’s Strategic Objective stated above underscores this fact.
- 2.4 A number of factors have led to ECSA’s decision to review and strengthen its Continuing Professional Development Policy Framework/ regime. They are as follows:
 - 2.4.1 At the beginning of 2015, and as part of its continuous review and improvement of its value proposition to the engineering profession and the effective execution of its legislative mandate, ECSA embarked on a national public consultation roadshow in respect of its New Registration System (the NRS). Those nation-wide public consultation roadshows presented ECSA stakeholders, especially registered engineering professionals, unregistered engineers aspiring to registers with ECSA, employers of engineering professionals and those aspiring to register with ECSA, members of the different engineering profession voluntary associations, engineering academics as well as engineering students, with an opportunity to, in addition to commenting on the NRS, also provide constructive feedback to ECSA on the effectiveness of its role as a statutory body, including its continued relevance and value to

the profession, and also communicated their expectations on ECSA in its regulation of the Engineering profession going forward.

- 2.4.2 One of the issues that was sharply raised in these roadshows, was ECSA's continuing professional development regime. To be precise, ECSA received the following feedback:
 - 2.4.2.1 Compliance by registered persons with ECSA's continuing professional development is largely incapable of full compliance on the part of the registered persons based on cost and accessibility;
 - 2.4.2.2 The ECSA electronic CPD system is not user-friendly and difficult to use in uploading CPD activities; and
 - 2.4.2.3 ECSA's overall role in the administration of CPD was peripheral as opposed to being central.
 - 2.4.2.4 In direct response to this feedback, ECSA took a decision to restructure its CPD regime so as to deal with the challenges raised during the stakeholder engagements and consultations. In this regard: ECSA is currently in the process of developing a new CPD system; ECSA is intent on playing a more central role in the administration of CPD; stricter measures towards full CPD compliance by registered persons is being introduced; take any steps it considers necessary for the protection of the public in their dealings with registered persons for the maintenance of the integrity, and ensure access by registered persons to CPD products irrespective of where they are located in South Africa. .
 - 2.4.2.5 A need for ECSA's future approach to stricter adherence to CPD requirements by registered persons is also informed by the fact that the competencies needed to function effectively as professional engineers (in any category): whether in business, education (universities), professional practice (consulting engineering), the public sector (all three spheres of Government including public and municipal entities) or any other environment, continue to change and expand at a rapid rate. Engineering work has evolved and cannot be said not to have been affected by ICT and related advances globally. In this regard, professional engineers (in all legislative categories) face increased expectations to display up-to-date, latest professional knowledge and skills.
 - 2.4.2.6 Accordingly, ECSA, through CPD, is intent at ensuring that all those that are registered by Council, are fully-conformant with continuing professional development.
- 2.5 In summary: a need to review and amend the Continuing Professional Development Policy Framework is overdue, and necessary due to:
 - 2.5.1 A need to update the framework and align it to the current ECSA legislative injunction, strategy, vision and APP;
 - 2.5.2 To reposition ECSA as a central and key role-player in the administration of CPD;
 - 2.5.3 To refine, strengthen and crystallise ECSA's CPD administration and management;
 - 2.5.4 To be responsive to stakeholder expectations and feedback on the state of the ECSA CPD regime/ system; and
 - 2.5.5 To introduce clear role-delineation between ECSA and the recognised voluntary associations on the administration of the CPD policy framework.
- 2.6 Based on the revised/ amended ECSA Continuing Professional Development Policy Framework (the rules):
 - 2.6.1 Continuing Professional Development is going to be subjected to more rigorous and stricter oversight by ECSA;
 - 2.6.2 CPD service providers are to be subject to more rigorous course content accreditation by ECSA; and
 - 2.6.3 Continuing Professional Development courses and related interventions are to become more accessible and affordable to registered persons.

3. BODIES/ PARTIES TO BE CONSULTED

Council is to consult with the following bodies and/ or stakeholders regarding review and amendment of these rules:

- 3.1 Council and Council EXCO;
- 3.2 The Presidents Forum;
- 3.3 The VA Committee;
- 3.4 All recognised VAs; and
- 3.5 Registered Persons.

4. FINANCIAL IMPLICATIONS

Council has set aside a budget for Continuing Professional Development Policy Framework review project, to cover costs such as the drafting and publication of these rules through the Government Gazette, consultative public hearings and other public participation initiatives.

5. RULE BY RULE EXPLANATION OF THE REVISED RULES

5.1 The current framework (i.e. Board Notice 16 of 2014) contains twelve (12) rules. The revised 2016 framework (rules) contain eighteen (18) rules. In the current rules, some provisions have been removed, and new ones introduced, done in pursuit of strengthening ECSA's CPD legislative mandate, in ensuring that concerns previously raised by registered persons are addressed and also informed by comparative benchmark work undertaken prior to revising these rules, as well as best practice.

5.2 A summary of what is contained in the revised/ amended recognition framework are briefly as follows:

5.2.1 Rule 1-Definitions: This is the Definitions section which remains largely unchanged. A few new additions have been inserted to this rule.

5.2.2 Rule 2- Principles underlying CPD: This paragraph deals with the importance of CPD in the engineering profession.

It further outlines the considerations that led to ECSA's decision to review the CPD policy framework) (i.e. these rule as well as the CPD policy).

This rule further seeks to anchor ECSA's CPD regime/ system on compliance with the legislative injunction to take the measures to protect the safety of the public and well as the environment against unsound engineering practices.

5.2.3 Rule 3- Definition of CPD in context: This rule not only defines the CPD requirements in the context of its legislative mandate, but also seeks to ensure that there is uniform and a shared understanding of what CPD means in ECSA's context.

5.2.4 Rule 4: Application of these Rules to Registered Persons: This rule seeks to outline the stakeholders expected to comply with this Rule.

It further links this Framework (rule) with ECSA's CPD policy (as amended).

5.2.5 Rule 5- Objectives and Benefits of the CPD system: This rule deals with the objectives of the CPD system in ECSA, as well as the benefits to be derived by CPD-compliant registered persons.

- 5.2.6 Rule 6- The role of the Council in the administration of CPD: This rule deals with the role of Council, especially what its powers are in respect of the CPD administration.

In this rule, Council withdraws the delegated authority validate or accredit CPD service providers from the voluntary associations. Going forward, the CPD validation/ accreditation function reverts to ECSA, to in-house

CPD training and the coordination thereof remains delegated to voluntary associations in terms of this rule.

- 5.2.7 Rule 7- The Council's CPD Requirements: This rule deals with the different types of CPD categories which registered person may use in complying with ECSA's CPD requirements.

This rule introduces new terminology. However, these types are not a departure from the three categories in terms of the current(pre-amendment) rules.

The rule seeks to give registered person different options (which suit or is aligned to the working environment they are in) to use in complying with ECSA's CPD requirements.

- 5.2.8 Rule 8- Exemptions from the CPD Policy Framework: This rule deals with the circumstances under which a registered person may be exempted from compliance with the rules.as well as what those that seek exemption from CPD requirements should do.

- 5.2.9 Rule 9- The CPD Cycle and Measurement: This rule changes the CPD cycle from five (5) years to three years.

It further outlines what is expected of the registered persons in order to comply with ECSA's CPD requirements.

- 5.2.10 Rule 10: Recording of CPD Activities: This rule seeks to assist registered person in how they should go about submitting or recording their CPD points and hours spent on undertaking CPD.

- 5.2.11 Rule 11- Auditing of recorded CPD activities: This deals with audits to be undertaken by ECSA in pursuit of ensuring full compliance by registered persons with the CPD requirements.

- 5.2.12 Rule 12- Application for Renewal and Assessment against CPD requirements: This rule seeks to link CPD compliance with the renewal of registration by registered persons.

- 5.2.13 Rule 13- Non-Compliance with these rules: This rule deals with the steps to be taken should a registered person not be able to meet their CPD obligations at the different stages outlined in the rules.

- 5.2.14 Rule 14- Right to appeal: This rule reaffirms the registered person's right to appeal ECSA's decision not to renew their registration based their non-compliance with the ECSA CPD requirements.

- 5.2.15 Rule 15- Approval of providers of CPD activities: This rule seeks to delineate the different roles between ECSA and the recognised voluntary associations.

- 5.2.16 Rule 16: Approval of CPD Activities: This rule outlines the factors to be taken into account by ECSA in validating/ accrediting CPD activities submitted to it by CPD service providers.

- 5.2.17 Rule 17: Amendment of the rules: This rule outlines the steps to be taken by ECSA in amending these rules.
- 5.2.18 Rule 18: Transitional Provisions: This rule outlines the processes to be followed by registered persons and voluntary associations in order to become compliant with these Rules once they become of force or effect (operational).

6. CONCLUSION

- 6.1 Section 13(k) enjoins Council to consult with the recognised VAs and registered persons in determining the CPD requirements. This consultative process is intended to comply with the Act.
- 6.2 As enjoined by section 36 of the Act, ECSA hereby calls for comments to the changes to be made to its Rules: Continuing Professional Development and Renewal of Registration: Board Notice 16 of 2014.
- 6.3 This explanatory memorandum seeks to solicit comments and input from interested parties and stakeholders regarding the revised CPD policy framework. Interested parties and stakeholders are therefore hereby called upon to read this document as well as the attached annexures thereto, and comment thereon.
- 6.4 The consultation process is not limited to the publication of this document and its annexures. Parallel to soliciting and receiving comments and inputs on this document and its annexures, there will be a series of other consultative initiatives.
