INTERPRETATION, PURPOSE AND APPLICATION

Definitions

1. In these GPEMF Standards, unless the context indicates otherwise, a word defined in the National Environmental Management Act, 1998 (Act No.107 of 1998) or the Environmental Impact Assessment Regulations has the same meaning, and—

“competent authority” means the organ of state that would have been designated by section 24C of the Act, in respect of a listed activity or specified activity;

“days” means calendar days, excluding public holidays and the period of 15 December to 5 January;

“Environmental Impact Assessment Regulations” means the Regulations published in terms of section 24(5) of the Act;

“excluded activity” means an activity identified within this schedule that is excluded from the requirement to obtain an environmental authorisation as contemplated in Appendix 1;

“mitigation measure” refers to a set of actions undertaken as part of a commitment to reduce environmental impacts;

“proponent” refers to the person that intends to undertake an excluded activity and is also responsible for ensuring compliance with these GPEMF Standards;

“registered development” means a development that has been registered with the competent authority;

“the Act” means the National Environmental Management Act, 1998 (Act No. 107 of 1998) as amended;

“Zone 1” means the Urban Development Zone that is intended to streamline urban development activities in it and to promote development infill, densification and concentration of urban development within the urban development zones, as defined in the GPEMF. Furthermore, in context of these excluded activities, any reference to the Urban Edge should be regarded as Urban Development Zone and of which a geographical representation can be found in Appendix 3 and on the departmental website; and

“Zone 5” means the Industrial and Commercial Focus Zone that is intended to streamline non-polluting industrial and large scale commercial (warehouses etc.) activities in areas that are already used for such purposes and areas that are severely degraded but in close proximity to required infrastructure (such as old and even current mining areas), as defined in the GPEMF, of which a geographical representation can be found in Appendix 3 and on the departmental website.

Purpose of this GPEMF Standards

2. The purpose of these GPEMF Standards is to provide rules which must be complied with, ensuring –
- (a) governance of the GPEMF Standards;
 - (b) compliance to the principles contained in section 2 of the Act and duty of care, in terms of section 28(1) of the Act;
 - (c) sustainable development within Gauteng Province; and
 - (d) will negate the need to obtain an environmental authorisation in terms of the Act as provided for in section 24(2)(d) of the Act in relation to an excluded activity.

Application of this GPEMF Standards

3. (1) The provisions of these GPEMF Standards are applicable to activities excluded from acquiring an environmental authorisation as contemplated in Appendix 1 when undertaken within Zone 1 or Zone 5 of the Gauteng province as identified in terms of the adopted Gauteng Provincial Environmental Management Framework (2014).
- (2) The provisions of these GPEMF Standards are not applicable to an excluded activity—
- (a) if any part of the footprint of such excluded activity extends outside the boundary of the Zone 1 or Zone 5 for which the exclusion applies; or
 - (b) such excluded activity is directly related to prospecting, exploration, including primary processing, of a mineral or petroleum resource.

A requested Party is not obliged to provide information which is neither held by its authorities nor in the possession of or obtainable by persons who are within its territorial jurisdiction. The rights and safeguards secured to persons by the laws of the requested Party remain applicable. 6. Any request for information shall be formulated with the greatest detail possible in specifying in writing:

- (a) the identity of the person under examination or investigation;

ARTIKEL 4**UITRUIL VAN INLIGTING OP VERSOEK**

1. Die bevoegde owerheid van die versoekte Party moet op versoek van die versoekende Party inligting verskaf vir die doeleindes in Artikel 1 genoem. Sodanige inligting word uitgeruil sonder inagneming daarvan of die versoekte Party sodanige inligting vir sy eie belastingdoeleindes nodig het en of die gedrag wat ondersoek word ingevolge die reg van die versoekte Party 'n misdryf sou uitmaak indien dit in die gebied van die versoekte Party plaasgevind het. Die bevoegde owerheid van die versoekende Party mag 'n versoek om inligting ingevolge hierdie Artikel slegs rig wanneer hy nie in staat is om die verlangde inligting deur ander metodes binne sy eie gebied te bekom nie, uitgesonderd waar toevlug tot sodanige metodes tot buitensporige probleme aanleiding sou gee.

2. Indien die inligting in besit van die bevoegde owerheid van die versoekte Party nie voldoende is om hom in staat te stel om aan die versoek om inligting te voldoen nie, moet die versoekte Party die inligtingversamelmaatreëls wat hy tersaaklik ag om die aangevraagde inligting aan die versoekende Party te verskaf gebruik, al het die versoekte Party sodanige inligting nie vir sy eie belastingdoeleindes nodig nie.

3. Indien spesifiek deur die bevoegde owerheid van die versoekende Party daartoe versoek, moet die bevoegde owerheid van die versoekte Party ingevolge hierdie Artikel, in soverre dit ingevolge sy landsreg toelaatbaar is, inligting verskaf in die vorm van verklarings van getuies en gewaarmerkte afskrifte van oorspronklike rekords.

4. Elke Party moet seker maak dat dit die bevoegdheid het, behoudens die bepalings van Artikel 1, om bekom en verskaf, deur sy bevoegde owerheid en op versoek:

- (a) inligting wat gehou word deur banke, ander finansiële instellings en enige persoon, ook benoemdes en trustees, wat in 'n agentskaps- of fidusiêre hoedanigheid optree;
- (b) (i) inligting betreffende die regs- en voordelige eienaarskap van maatskappye, vennootskappe, stigtings en ander persone, insluitende in die geval van kollektiewe beleggingskemas, inligting oor aandele, eenhede en ander belange;
- (ii) in die geval van trusts, inligting oor trustoprigters, trustees en begunstigdes.

5. Hierdie Ooreenkoms skep nie 'n verpligting vir 'n Party om inligting oor eienaarskap met betrekking tot openbaar verhandelde maatskappye of openbare kollektiewe beleggingskemas te bekom of te verskaf nie, tensy sodanige inligting bekom kan word sonder om tot buitensporige probleme aanleiding te gee.

6. Enige versoek om inligting moet so breedvoerig as moontlik geformuleer word deur die volgende skriftelik uiteen te sit:

- (a) die identiteit van die persoon wie se sake nagegaan of wat ondersoek word;
- (b) die tydperk waarvoor die inligting versoek word;

- (c) die aard van die inligting wat verlang word en die vorm waarin die versoekende Party verkies om die inligting te ontvang;
- (d) die belastingdoel waarvoor die inligting verlang word;
- (e) die redes waarom vermoed word dat die aangevraagde inligting voorsienbaar tersaaklik is vir die belastingadministrasie en -afdwinging van die versoekende Party ten opsigte van die persoon wat in subparagraaf (a) van hierdie paragraaf geïdentifiseer is;
- (f) gronde waarom vermoed word dat die aangevraagde inligting in die versoekte Party aanwesig is, of in besit of verkrygbaar is deur 'n persoon binne die jurisdiksie van die versoekte Party;
- (g) in soverre dit bekend is, die naam en adres van 'n persoon wat vermoedelik in besit is van die aangevraagde inligting of in staat is om sodanige inligting te bekom;
- (h) 'n verklaring dat die versoek in ooreenstemming is met die reg en administratiewe praktyke van die versoekende Party, dat indien die aangevraagde inligting binne die jurisdiksie van die versoekende Party was, die bevoegde owerheid van die versoekende Party in staat sou wees om die inligting te bekom ingevolge die reg van die versoekende Party of in die gewone loop van administratiewe praktyk en dat die versoek in ooreenstemming met hierdie Ooreenkoms is;
- (i) 'n verklaring dat die versoekende Party alle metodes in sy eie gebied tot sy beskikking nagevolg het om die inligting te bekom, uitgesonderd waar dit tot buitensporige probleme aanleiding sou gee.

7. Die bevoegde owerheid van die versoekte Party moet ontvangs van die versoek aan die bevoegde owerheid van die versoekende Party erken, en moet alles in sy vermoë doen om die verlangde inligting met die minste moontlike vertraging aan die versoekende Party te versend. Om 'n spoedige antwoord te verseker, moet die bevoegde owerheid van die versoekte Party:-

- (a) skriftelik ontvangs van 'n versoek erken aan die bevoegde owerheid van die versoekende Party, en moet hy die bevoegde owerheid van die versoekende Party binne 60 dae van ontvangs van die versoek in kennis stel van tekortkominge in die versoek, indien enige;
- (b) indien die bevoegde owerheid van die versoekte Party nie in staat was om die inligting binne 90 dae van ontvangs van die versoek te bekom en te verskaf nie, ook indien hy beletsels teëkom in die verskaffing van die inligting of weier om die inligting te verskaf, die versoekende Party onverwyld inlig en die redes vir sy onvermoë, die aard van die beletsels of die redes vir sy weiering verduidelik.

ARTIKEL 5**BELASTINGONDERSOEKE IN DIE BUITELAND**

1. Die versoekende Party kan, met redelike kennisgewing, versoek dat die versoekte Party verteenwoordigers van die bevoegde owerheid van die versoekende Party toelaat om die gebied van versoekte Party binne te gaan, in soverre dit ingevolge sy landsreg veroorloof is, om met individue onderhoude te voer en rekords na te gaan met die vooraf skriftelike toestemming van die betrokke individue of ander persone. Die bevoegde owerheid van die versoekende Party moet die bevoegde owerheid van versoekte Party in kennis stel van die tyd en plek van die voorgenome vergadering met die betrokke individue.

2. Die bevoegde owerheid van die versoekte Party kan, op versoek van die bevoegde owerheid van die versoekende Party, verteenwoordigers van laasgenoemde Party toelaat om 'n belastingondersoek in die gebied van die versoekte Party by te woon.

3. Indien die versoek in paragraaf 2 bedoel toegestaan word, moet die bevoegde owerheid van die versoekte Party wat die ondersoek uitvoer, die bevoegde owerheid van die versoekende Party so gou moontlik in kennis stel van die tyd en plek van die ondersoek, die owerheid of persoon wat gemagtig is om die ondersoek uit te voer, en die prosedures en voorwaardes wat die versoekte Party vir die uitvoer van die ondersoek voorskryf. Alle besluite betreffende die uitvoer van die ondersoek word geneem deur die versoekte Party wat die ondersoek uitvoer.

ARTIKEL 6**MOONTLIKHEID VAN WEIERING VAN 'N VERSOEK**

1. Die bevoegde owerheid van die versoekte Party kan weier om bystand te verleen:

- (a) wanneer die versoek nie in ooreenstemming met hierdie Ooreenkoms gerig is nie;
- (b) wanneer die versoekende Party nie al die metodes in sy eie gebied tot sy beskikking nagevolg het om die inligting te bekom nie, uitgesonderd waar toegang tot sodanige metodes tot buitensporige probleme aanleiding sou gee; of
- (c) waar die openbaarmaking van die verlangde inligting strydig sou wees met die openbare beleid van die versoekte Party.

2. Hierdie Ooreenkoms lê nie 'n verpligting op 'n versoekte Party om items onderhewig aan regsprivilegie of enige handels-, sake-, nywerheids-, kommersiële of beroepsgeheim of handelsproses te verskaf nie, met dien verstande dat inligting wat in Artikel 4, paragraaf 4, beskryf word, nie bloot omrede daardie feit as so 'n geheim of handelsproses gehanteer word nie.

3. 'n Versoek om inligting mag nie geweier word op grond daarvan dat die belastingeis wat tot die versoek aanleiding gegee het, betwis word nie.

4. Daar word nie van die versoekte Party vereis om inligting te bekom en te verskaf wat, sou die verlangde inligting binne die jurisdiksie van die versoekende Party wees, die bevoegde owerheid van die versoekende Party nie ingevolge sy reg of in die gewone verloop van administratiewe praktyk sou kon bekom nie.

5. Die versoekte Party kan 'n versoek om inligting weier indien die inligting deur die versoekende Party versoek word om 'n bepaling van die belastingreg van die versoekende Party, of enige vereiste wat daarmee verband hou, toe te pas of af te dwing wat diskrimineer teen 'n burger of onderdaan van die versoekte Party vergeleke met 'n burger of onderdaan van die versoekende Party in dieselfde omstandighede.

ARTIKEL 7

VERTROULIKHEID

1. Alle inligting wat deur die bevoegde owerhede van die Partye verskaf en ontvang word, moet vertroulik gehou word.

2. Sodanige inligting moet slegs openbaar gemaak word aan persone of owerhede (ook howe en administratiewe liggame) wat gemoeid is met die doeleindes in Artikel 1 vermeld, en moet deur sodanige persone of owerhede vir slegs sodanige doeleindes gebruik word, insluitende die bepaling van enige appèl. Inligting mag, vir hierdie doeleindes, in openbare hofverrigtinge of in regterlike beslissings openbaar gemaak word.

3. Sodanige inligting mag nie sonder die uitdruklike skriftelike toestemming van die bevoegde owerheid van die versoekte Party vir enige ander doel as die doeleindes in Artikel 1 vermeld, gebruik word nie.

4. Inligting wat ingevolge hierdie Ooreenkoms aan 'n versoekende Party verskaf word, mag aan geen ander jurisdiksie openbaar gemaak word nie.

ARTIKEL 8

KOSTE

Tensy die bevoegde owerhede van die Partye anders ooreenkom, word die onregstreekse koste wat by die verskaffing van bystand aangegaan is, deur die versoekte Party gedra, en word die regstreekse koste wat by die verskaffing van bystand aangegaan is (ook die koste om eksterne adviseurs in verband met litigasie of andersins te bekom), deur die versoekende Party gedra. Die bevoegde owerhede moet van tyd tot tyd oorleg pleeg met betrekking tot hierdie Artikel, en in die besonder moet die bevoegde owerheid van die versoekte Party vooraf met die bevoegde owerheid van die versoekende Party oorleg pleeg indien die koste van die verskaffing van inligting met betrekking tot 'n spesifieke versoek na verwagting beduidend sal wees.

ARTIKEL 9**PROSEDURE VIR ONDERLINGE OOREENKOMS**

1. Waar probleme of twyfel tussen die Partye ontstaan betreffende die uitvoering of vertolking van hierdie Ooreenkoms, moet die bevoegde owerhede alles in die werk stel om die aangeleentheid deur onderlinge ooreenkoms te besleg.
2. Bykomend tot die ooreenkomste in paragraaf 1 bedoel, kan die bevoegde owerhede van die Partye onderling ooreenkom oor die prosedures wat ingevolge Artikel 4, 5 en 8 gebruik moet word.
3. Die bevoegde owerhede van die Partye kan regstreeks met mekaar kommunikeer vir doeleindes van die bereiking van 'n ooreenkoms ingevolge hierdie Artikel.
4. Die Partye moet, indien nodig, oor ander vorme van geskilbeslegting ooreenkom.

ARTIKEL 10**INWERKINGTREDING**

Hierdie Ooreenkoms tree in werking 30 dae na ontvangs van skriftelike kennisgewing deur die laaste Party van afhandeling van alle regsformaliteite wat vir inwerkingtreding vereis word. Op die datum van inwerkingtreding is dit van toepassing:

- (a) op strafregtelike belastingaangeleenthede op daardie datum; en
- (b) op alle ander aangeleenthede wat op daardie datum in Artikel 1 gedek word, maar slegs ten opsigte van belasbare tydperke wat op of na daardie datum begin of, waar daar geen belasbare tydperk is nie, alle heffings op belasting wat op of na daardie datum ontstaan.

ARTIKEL 11**BEËINDIGING**

1. Hierdie Ooreenkoms bly van krag totdat dit deur enige van die Partye beëindig word.
2. Enige Party kan hierdie Ooreenkoms beëindig deur skriftelik kennis van beëindiging te gee. Sodanige beëindiging word van krag op die eerste dag van die maand ná verstryking van 'n tydperk van ses maande na die datum van ontvangs van kennis van beëindiging deur die ander Party. Alle versoeke wat tot op die effektiewe datum van beëindiging ontvang is, moet ooreenkomstig die bepalings van hierdie Ooreenkoms gehanteer word.
3. Indien die Ooreenkoms beëindig word, bly die Partye gebind deur die bepalings van Artikel 7 ten opsigte van enige inligting wat kragtens hierdie Ooreenkoms bekom is.

- 1.2 The Minister has in terms of section 12 of the National Water Act, 1998 (Act No.36 of 1998) ("the Act"), prescribed a system for classifying water resources by issuing Government Notice No. R. 810, published in *Government Gazette* No. 33541 dated 17 September 2010. In terms of section 16(1) of the Act, the Minister must, as soon as reasonably practicable after the class of all or part of a water resource has been determined, by Notice in the *Gazette*, determine the reserve for all or part of that water resource.
- 1.3 The Minister, in terms of section 16(3) of the Act, proposes, for the purpose of section 16(1) of the Act, the following Reserves for the catchments of Olifants-Doorn.

2. PROPOSED RESERVE DERMINATION AS REQUIRED IN TERMS OF SECTION 16(1) AND (2) OF THE NATIONAL WATER ACT, 1998

A selected list of Acronyms and definitions set out under item 1.

A summary of the quantity component for the Rivers which include the EWR and the BHN in terms of section 16(1) of the Act for the Olifants-Doorn catchments is set out in Table 2.1.

A summary of the quality component for the River at EWR sites in terms of section 16(1) of the Act for the Olifants-Doorn catchments is set out in Table 3.1-3.6.

A summary of the EWR based on the natural flow contribution of the catchments upstream Olifants River Estuary in terms of section 16(1) of the Act for the Olifants-Doorn catchments is set out in Table 4.1-4.3.

A summary of the groundwater contribution to the Reserve for Water Quantity & Quality in terms of section 16(1) of the Act for the Olifants-Doorn catchments is set out in Table 5.1-6.2.

The Reserve will apply from the date signed off as determined in terms of Section 16(1) of the Act , unless otherwise specified by the Minister.

1.2. Definitions

Baseflow is a sustained low flow in rivers during dry or fair weather conditions, but not necessarily all contributed by groundwater; includes contribution from delayed interflow and groundwater discharge.

EWR refers to the flow patterns (magnitude, timing and duration) and water quality needed to maintain a riverine ecosystem in a particular condition.

Recharge the addition of water to the zone of saturation, either by downward percolation of precipitation or surface water and/ or the lateral migration of groundwater from adjacent aquifers.

Reserve the quantity and quality of the water required to satisfy the basic human needs by securing a basic water supply and to protect the aquatic ecosystem in order to secure ecologically sustainable development and use of the relevant water resource.

2. SURFACE-WATER - QUANTITY COMPONENT FOR RIVERS

Proposed results for the Reserve determination and ecological categorisation for the Olifants-Doring River System, where the Reserve amounts are expressed as a percentage of the MAR for the respective catchments (cumulative) in terms of section (16)(1).

Downstream boundary:	Estuary mouth (31° 42.00'S; 18°11.34'E).
Upstream boundary:	Extent of tidal influence, i.e. the causeway at Lutzville - about 36 km from the mouth (31°33.80'S; 18°19.78'E).
Lateral boundaries:	5 m contour above Mean Sea Level (MSL) along each bank.

QUANTIFICATION OF ESTUARINE ECOLOGICAL RESERVE

RECOMMENDED ECOLOGICAL FLOW REQUIREMENT

The Olifants Estuary has been targeted as a Desired Protected Area (DWAf, 2004). According to the guidelines for assigning a recommended REC the estuary, therefore needs to be in a Category A or the Best Attainable State (BAS). However, with large dam developments already existing in the catchment (e.g. Clanwilliam Dam) it will be difficult to improve the Olifants Estuary to a Category of A. It is therefore recommended that the Olifants Estuary be improved to the minimum REC for a 'Highly Important estuary', namely a **Category B. Scenario 2**, i.e. the Present inflow scenario plus the Ecological Water Requirement releases of the River (MAR = $800.3 \times 10^6 \text{ m}^3$) is selected as the recommended Ecological Flow Requirement Scenario for the Olifants Estuary. The flow distributions are summarised below:

ECOLOGICAL SPECIFICATIONS

Ecological Specifications are clear and measurable specifications of ecological attributes (in the case of estuaries - hydrodynamics, sediment dynamics, water quality and different biotic components) that define a specific ecological reserve category, in the case of the Olifants Estuary for a **Category B**. Thresholds of potential concern (TPC) are defined as measurable end points related to specific abiotic or biotic indicators that if reached (or when modelling predicts that such points will be reached) prompts management action.

Table 4.3. The ecological specifications and associated TPCs

COMPONENT	ECOLOGICAL SPECIFICATION/	THRESHOLD OF POTENTIAL CONCERN
Birds	Retain the species richness, abundance and diversity of the bird community, representative of resident and migrant waders, wading birds and water fowl as under the Present State, except for that there would be an higher abundance of water fowl (increasing by about 10% from Present State numbers)	<p>1.1 Community composition or bird numbers deviates by more than 50% of average seasonal baseline counts for two consecutive summer or winter seasons, focusing on waders, wading birds, terns & water fowl (summer and winter), and specifically red data species which are supported by the system (e.g. Pelican, Oyster catchers, Chestnut banded plover)</p> <p>1.2 In the case of water fowl densities decline by 20% of average seasonal baseline counts for two consecutive summer or winter seasons</p>
Fish	Retain the following fish assemblages in the estuary: estuarine species (35%), partially estuarine dependent species (50-60%), obligate estuarine dependent (e.g. white steenbras) (>1%) and indigenous freshwater species (>1%). Exotic freshwater species (<0.5%)	<p>2.1 Level of estuarine species drop below 30% of total abundance</p> <p>2.2 Levels of obligate estuarine dependent species drop below 1% of total abundance</p> <p>2.3 Levels of partially estuarine dependent species drop below 50% or above 60% of total abundance</p> <p>2.4 Levels of exotic freshwater species above 0.5% (e.g. Mozambique tilapia out-competing resident species)</p> <p>2.5 Benthic dwellers species drop below 2% of total abundance in estuary above 18 km from the mouth</p>
	Maintain recruitment of adult and juvenile fish at Reference Condition levels. This requires maintaining sufficient flow for freshwater plume (temperature, salinity and oliphactory gradient) entering the sea. This implies that there should be a significant number of 0 -1 year old fish and no missing year classes.	2.6 There are a missing year class within a species

COMPONENT	ECOLOGICAL SPECIFICATION/	THRESHOLD OF POTENTIAL CONCERN
Invertebrates	Retain Present State species richness and mix (low species abundance, high dominance). However, under the present state one or two species are always present at high densities compared to others (e.g. <i>Pseudodiaptomus hessei</i> & <i>Ceratonereis keiskama</i>). For a B Category the higher densities need to be more variable in abundance during the year.	3.1 Species richness is greater than 30 for zooplankton and macroinvertebrates respectively (50% increase)
	Indicator species such as <i>Capitella capitata</i> , should not dominate benthic species at any site	3.2 <i>Capitella capitata</i> exceeds 50% abundance of benthic species at any site
	<i>Calianassa</i> and <i>Upogebia</i> distribution patterns as under Present State	3.3 Abundance levels or areas of distribution decreases by more than 50% (mainly lower sandy reaches)
Macrophytes	Maintain the present distribution (summer 2004) and abundance of the different plant community types (<i>Zostera capensis</i> (48 ha), intertidal salt marsh (92 ha), supratidal salt marsh (143 ha), floodplain salt marsh (797 ha), reeds and sedges (60 ha))	4.1 Greater than 20% change in the area covered by different plant community types
	Reduce the areas covered by water weeds in the upper reaches by 50% compared to the Present State (summer 2004). Therefore area covered by invasive waterweeds (<i>Azolla filiculoides</i>), nuisance filamentous algae (e.g. <i>Enteromorpha</i> , <i>Ulva</i> , <i>Cladophora</i>) and pondweed (<i>Potamogeton pectinatus</i>) should be 30 ha (half of channel)	4.2 Upper 15 km of estuary with greater than 50% of estuary water channel covered by invasive waterweeds (<i>Azolla filiculoides</i>), nuisance filamentous algae (e.g. <i>Enteromorpha</i> , <i>Ulva</i> , <i>Cladophora</i>) and pondweed (<i>Potamogeton pectinatus</i>).
	Control the spread of invasive aliens in the riparian zone (e.g. <i>Sesbania punicea</i> and <i>Eucalyptus</i> spp.).	4.3 Greater than 20 % increase in area covered by invasive plants.
	Maintain reed and sedge areas (60 ha) and brackish salt marsh (~10 ha) as for the Present State (summer 2004) (by preventing salinity of 20 ppt to move further upstream than 8.5 km and remain there for greater than 3 months).	4.4 Dieback of reeds and brackish salt marsh at 8.5 km and further upstream from the mouth.
	Prevent an increase in bareground in the floodplain salt marsh by maintaining groundwater salinity at <70 ppt and depth to the water table at < 1.5 m	4.5 Greater than 20% increase in bare ground in salt marsh.

COMPONENT	ECOLOGICAL SPECIFICATION/	THRESHOLD OF POTENTIAL CONCERN
Microalgae	Maintain a low phytoplankton biomass with a small REI (i.e. 10 ppt to river +1 ppt) zone	5.1 Phytoplankton biomass exceeds 15 µg/l chlorophyll a in summer and 10 ug/l chlorophyll a in winter 5.2 Blue-green algae exceeds 10% of phytoplankton cell counts
	Maintain microalgal group diversity as measured under Present State (2004)	5.3 Flagellates cease to be the dominant group and diatoms become less diverse (<10 taxa per site)
	Maintain intertidal and subtidal microphytobenthic biomass as measured under Present State (2004).	5.4 Benthic microphytobenthic biomass exceeds 40 mg/m ² chlorophyll a
	Maintain a low frequency of dinoflagellates	5.5 The frequency of dinoflagellates exceeds 5% of the total phytoplankton counts
Water quality	Salinity intrusion should not to cause exceedence of TPCs for fish, invertebrates, macrophytes and microalgae (see above)	6.1 Salinity greater than 20 ppt for greater than 3 months at 7 km upstream from the mouth (brackish saltmarsh, reeds and sedges & invertebrates)
		6.2 Salinity of groundwater increases to 50 ppt and depth to water table to 1 m. (flood plain salt marsh)
		6.3 Total dissolved solids (measure of 'salinity') of river inflow exceeds 3500 mg/l (phytoplankton)
		6.4 Salinity in estuary exceeds 35 ppt (prevent hyper- salinity) (for phytoplankton)
	6.5 Salinity greater than 10 ppt occurs above 16 km upstream of the mouth (for fish)	
System variables (Temperature, pH, turbidity, dissolved oxygen, suspended solids and turbidity) not to cause exceedence of TPCs for biota (see above)	6.6 River inflow: Summer temp < 20°C pH < 6.5 'Turbid' river inflow (to be determined) Dissolved oxygen < 4 mg/l	
	6.7 Secchi disc reading above 8 km from the mouth is greater than 1 m (used as a proxy for turbidity concentrations in estuary)	
	6.8 pH > 8.5 or < 6.5 in river inflow or in estuary	
	6.9 Water column DO drops below 4 mg/l (1 m above bottom except in deep holes) (need to investigate DO level at night in dense macrophyte beds)	

COMPONENT	ECOLOGICAL SPECIFICATION/	THRESHOLD OF POTENTIAL CONCERN
	<p>Inorganic nutrient concentrations not to cause exceedance of TPCs for macrophytes and microalgae (see above).</p>	<p>6.10 When average river inflow is less than 5 m³/s and average DIN concentrations exceed 100 µg/l in river inflow and average DIN concentrations in the upper reaches of the estuary (above 16 km from mouth) exceed 100 µg/l.</p> <p>6.11 During high flow season (flows > 20 m³/s) average DIN concentrations exceed 500 µg/l in river inflow and average DIN concentrations in the upper reaches of the estuary (above 16 km from mouth) exceed 500 µg/l</p> <p>6.12 Average DRP concentrations exceed 100 µg/l in river inflow and average DRP concentrations in the upper reaches of the estuary (above 16 km from mouth) exceed 100 µg/l.</p>
	<p>Presence of toxic substances not to cause exceedance of TPCs for biota (see above).</p>	<p>6.13 For pesticides/herbicides baseline studies still need to be undertaken before TPCs can be set (special concern in upper reaches with extensive agricultural activities along banks of estuary)</p>
<p>Hydrodynamics</p>	<p>Maintain a flow regime to create the required habitat for birds, fish, macrophytes, microalgae and water quality</p>	<p>7.1 River inflow distribution patterns differ by more than 5% from that of Scenario 2 (i.e. recommended flow scenario for the Olifants)</p> <p>7.2 River inflow decreases to below 1.5 m³/s at any time</p> <p>7.3 River inflow below 2 m³/s persists for longer than 4 months</p>
<p>Sediment dynamics</p>	<p>Flood regime to maintain the sediment distribution patterns and aquatic habitat (instream physical habitat) so as not to exceed TPCs for biota (see above)</p>	<p>8.1 River inflow distribution patterns (flood components) differ by more than 10% (in terms of magnitude, timing and variability) from that of the Present State (2004)</p> <p>8.2 Suspended sediment concentration from river inflow deviates by more than 10% of the sediment load discharge relationship to be determine as part of baseline studies (Present State 2004)</p>

COMPONENT	ECOLOGICAL SPECIFICATION/	THRESHOLD OF POTENTIAL CONCERN
	Changes in sediment grain size distribution patterns not to cause exceedance of TPCs in benthic invertebrates (see above).	<p>8.3 The median bed sediment diameter deviates by more than a factor of two from levels to be determined as part of baseline studies (Present State).</p> <p>8.4 Sand/mud distribution in middle reaches (8-20 km) change by more than 20% from Present State (2004)</p> <p>8.5 Changes in the channel bathymetry in the upper reaches (above 20 km upstream of the mouth) change by more than 20% from Present State (2004)</p> <p>8.6 Changes in tidal amplitude below the Lutzville causeway of more than 20% from Present State (2004)</p>

5. GROUNDWATER - QUANTITY COMPONENT

Groundwater recharge is an important component of hydrogeological characterisation as it has a major influence on groundwater quantity (especially if aquifer transmissivity and storage is favourable) and groundwater quality. Across the Olifants-Doom WMA groundwater recharge ranges from 0 mm/a to 245 mm/a. The highest groundwater recharge occurs in the Upper Olifants sub-area, especially in the Winterhoek mountain area. Significant recharge also occurs in the Koue Bokkeveld, eastern Doring, and eastern Sandveld sub-areas. For the remaining areas groundwater recharge is quite limited.

The basic human needs Reserve provides for the essential needs of individuals served by the water resource in question and includes water for drinking, food preparation and for personal hygiene. A life-line amount of 25 litres per person per day was used. A summary of the groundwater quantity aspects in terms of BHN and EWR per quaternary is provided in Table 4.1.

6. GROUNDWATER - QUALITY COMPONENT

The ambient groundwater quality was compared to the Class 1 recommended value (SANS 241:2006). The lowest or more conservative value of the two is selected. In instances where the ambient value is selected, it is increased by 10 per cent. In instances where the ambient quality, of geological origin exceeds the recommended value, the ambient water quality is used. These poor water quality areas will become exclusion zones in determining the Basic Human Needs Reserve Requirement. The groundwater quality must comply with the target water quality ranges as shown in Table 5.1. Table 5.2 shows a summary of the results for the quality aspects at quaternary level in terms of the BHN. Table 5.3 illustrates the groundwater quality class and parameters of concern for each quaternary catchment.

NOTE:

- Class 0** This is ideal water quality, suitable for lifetime use, with no adverse health effects on the user. This class is essentially the same as the target water quality range in the 2nd edition of the *South African Water Quality Guidelines for Domestic Use* (DWAf, 1996).
- Class I** Water in this class is safe for lifetime use, but falls short of the ideal water quality in that there may be instances of adverse health effects, but these are usually mild, and overt health effects are almost sub-clinical and difficult to demonstrate. Water in Class I does not cause health effects under normal circumstances. Aesthetic effects may, however, be apparent.
- Class II** Water in this class is defined as that where adverse health effects are unusual for limited short-term use. Adverse health effects may become more common particularly with prolonged use over many years, or with lifetime use. This class represents water suitable for short-term or emergency use only, but not necessarily suitable for continuous use over a lifetime.
- Class III** This water has constituents in a concentration range where serious health effects might be anticipated, particularly in infants or elderly people with short-term use, and even more so with longer term use. The water in this class is not suitable for use as drinking water without adequate treatment to shift the water into a lower and safer class.

SCHEDULE

REPUBLIC OF SOUTH AFRICA

THE RESTITUTION OF LAND RIGHT AMENDMENT BILL

(P J Mnguni MP)

PARLIAMENT OF THE REPUBLIC OF SOUTH AFRICA**NOTICE OF INTENT TO INTRODUCE PRIVATE MEMBER'S BILL AND INVITATION
FOR PUBLIC COMMENT ON DRAFT RESTITUTION OF LAND RIGHT RIGHTS
AMENDMENT BILL**

Mr P.J. Mnguni, MP acting in accordance with section 73(2) of the Constitution of the Republic of South Africa, 1996 ("the Constitution"), intends to introduce the Restitution of Land Rights Amendment Bill, 2017 in Parliament during the second quarter of 2017. An explanatory summary of the Bill is hereby published in accordance with Rule 276(1)(c) of the Rules of the National Assembly (9th Edition).

Section 2(1) of the Restitution of Land Rights Act, 1994 (Act No. 22 of 1994) ("the Act") *inter alia* provides that a claim for the restitution of rights in land must be lodged by no later than 31 December 1998. Due to a number of challenges experienced in the application of the restitution programme, and in order to align it to the broad goals of the National Development Plan: Vision 2030 (2012), this programme was evaluated. The evaluation indicated that certain deserving persons and communities dispossessed of rights in land as a result of past racially discriminatory laws and practices did not participate in the process. The following categories were identified as being excluded by the restitution laws and programme, i.e. those who could not lodge claims by the cut-off date of 31 December 1998, and those dispossessed through betterment planning schemes and not allowed to lodge their claims by the Commission on Restitution of Land Rights (CRLR).

The evaluation further indicated that the research methodology that informed the restitution process was to large extent inadequate; that the window period that was provided to lodge claims was too short and that the communication campaign to inform citizens about the requirement to lodge claims did not reach every corner of the country.

It is estimated that at least 3.5 million individuals were forcibly removed from their land as a result of racially discriminatory laws and practices implemented after 19 June 1913, especially between

1960 and 1982. It has been argued that this figure excludes dispossessions that were caused by betterment planning and homeland consolidation. When dispossessions that took place as a result of betterment and homeland consolidations (which also included dispossessions of rights in land held by white people) during the same period are taken into account the figure could be closer to 7.5 million, whilst less than 80 000 claims for restitution were lodged with the CRLR before the cut-off date of 31 December 1998. These figures do not take into account the fact that some of the dispossessions of rights in land, particularly in urban areas, did not involve the physical removal of people.

The Restitution of Land Rights Amendment Act, 2014 (Act No. 15 of 2014) (“the Amendment Act”) had sought to reopen the lodgement of land claims for the period of five years ending on 30 June 2019. However, on 28 July 2016 the Constitutional Court (*Land Access Movement of South Africa and Others v Chairperson of the National Council of Provinces and Others [2016] ZACC 22*) declared that the National Council of Provinces’ public participation process was unreasonable and therefore constitutionally invalid. The Constitutional Court held that a failure by one of the Houses of Parliament to comply with a constitutional obligation amounts to failure by Parliament as a whole. The Constitutional Court, therefore, held that Parliament failed to satisfy its obligation to facilitate public involvement in accordance with section 72(1)(a) of the Constitution when it passed the Amendment Act and therefore declared the Amendment Act invalid in its entirety.

The Restitution of Land Rights Amendment Bill, 2017 (“the Bill”), again proposes certain amendments to the Act so as to extend the date for lodging a claim for restitution to 30 June 2021; to criminalise the lodgement of a fraudulent claim; to further regulate the appointment, tenure of office, remuneration and the terms and conditions of service of judges of the Land Claims Court; and to further amend certain provisions which are aimed at promoting the effective implementation of the Act.

What follows is a list of some of the other matters that the Bill seeks to deal with:

- the amendment of certain definitions so as to allow new claims to be lodged. These new claims will however not be processed until the claims lodged before 31 December 1998 have been finalised.

- the publication of details of a claim in media that is circulating nationally and in media that is circulated in the province in which the affected land is situated.
- the Land Claims Commission (“the Commission”) must ensure that claims lodged by 31 December 1998 are finalised first before new claims are processed. The Commission will further be required to establish a register where particulars of claims must be inserted, which register will be open to the public.
- a consequential amendment to section 12(5) of the Act as a result of extending the period for lodging a claim.
- a requirement that the Commissioner certifies in writing that all claims lodged no later than 31 December 1998 have been finalised and publishes in the *Government Gazette* a date from when new claims will be processed.
- an amendment to create two additional offences in respect of a person who:
 - (a) obstructs, unduly influences, misleads or engages in any conduct which is designed to prevent, compromise or obstruct any claimant from pursuing his or her rights provided for in the Act; and
 - (b) lodges a claim with the sole intention of defrauding the state.
- an amendment to section 22 of the Act to provide for the appointment of an acting judge of the Land Claims Court (“the Court”) when a vacancy arises or for any other sufficient reason, by the Minister of Justice and Constitutional Development (“the Minister”) after consultation with the President of the Court, for such term as the Minister may determine.
- currently the remuneration of judges of the Court is regulated by section 26 of the Act. This section is being deleted, as all judges of the Court must be a judge of the High Court of South Africa whose conditions of service are regulated by the Judges’ Remuneration and Conditions of Employment Act, 2001.

- a proposal that sections 23, 26 and 26A of the Act be repealed, as the matters dealt with in these sections are now being dealt with by the proposed amendments to section 22 of the Act.
- a further proposal that sections 38B, 38D, and 42D of the Act be amended by substitution for the date “31 December 1998” of the date “30 June 2021”. These substitutions are a direct consequence of the amendment of the cut-off date for lodging a claim for restitution in section 2(1)(e) of the Act.
- a proposal that section 42D of the Act be amended to extend the Minister’s powers of delegation.

The Bill will be available on the website of the African National Congress (<http://www.anc.org.za/>) once it has been certified by the Chief Parliamentary Legal Adviser or a parliamentary legal advisor designated by him or her as required by Rule 279(4) of the Rules of the National Assembly (9th Edition). WARNING!!!

To all suppliers and potential suppliers of goods to the Government Printing Works

The Government Printing Works would like to warn members of the public against an organised syndicate(s) scamming unsuspecting members of the public and claiming to act on behalf of the Government Printing Works.

One of the ways in which the syndicate operates is by requesting quotations for various goods and services on a quotation form with the logo of the Government Printing Works. Once the official order is placed the syndicate requesting upfront payment before delivery will take place. Once the upfront payment is done the syndicate do not deliver the goods and service provider then expect payment from Government Printing Works.

Government Printing Works condemns such illegal activities and encourages service providers to confirm the legitimacy of purchase orders with GPW SCM, prior to processing and delivery of goods.

To confirm the legitimacy of purchase orders, please contact:
