DEPARTMENT OF FORESTRY, FISHERIES AND THE ENVIRONMENT

NO. 747

20 August 2021

**NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998
(ACT NO. 107 OF 1998)****PUBLICATION OF THE CONSOLIDATED ENVIRONMENTAL IMPLEMENTATION AND MANAGEMENT PLAN 2020/2024 FOR THE DEPARTMENT OF FORESTRY, FISHERIES AND THE ENVIRONMENT, IN TERMS OF SECTION 15(5) OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998**

I, Barbara Dallas Creecy, Minister of Forestry, Fisheries and the Environment, hereby publish the consolidated environmental implementation and management plan 2020/2024 for the Department of Forestry, Fisheries and the Environment, in terms of section 15(5) of the National Environmental Management Act, 1998 (Act No. 107 of 1998) for implementation as set out in the Schedule hereto.

The consolidated environmental implementation and management plan 2020/2024 for the Department of Forestry, Fisheries and the Environment can also be accessed at https://www.environment.gov.za/legislation/gazetted_notices.

A hard copy of the document can be viewed in the Department's library located at Environment House, 473 Steve Biko Road, corner Soutpansberg and Steve Biko Road, Arcadia, Pretoria. Alternatively it can be requested from Mr I Daly at Tel.: +27 12 399 9913, or through email: ldaly@environment.gov.za.

Climate change: the variation in the earth's global climate or in regional climate over time. It includes changes in the variability or in the average state of the atmosphere – or average weather – over timescales ranging from decades to millions of years. Anthropogenic climate change refers to climate change that is attributable directly or indirectly to human activities that alter the composition of the global atmosphere.

Constitution: means the Constitution of the Republic of South Africa, 1996.

Co-operative governance: In South Africa, government is constituted as national, provincial and local spheres of government which are distinctive, interdependent and interrelated. All spheres of government must observe and adhere to the principles in section 41 of the Constitution and must conduct their activities within the parameters that the Chapter provides.

Department: means the national Department of Forestry, Fisheries and the Environment.

Desertification: the degradation of land in arid, semi-arid, and dry sub-humid areas, resulting from various factors including climatic variations and human activities.

Environment: means the surroundings within which humans exist and that are made up of—

- (i) *the land, water and atmosphere of the earth;*
- (ii) *micro-organisms, plant and animal life;*
- (iii) *any part or combination of (i) and (ii) and the interrelationships among and between them; and*
- (iv) *the physical, chemical, aesthetic and cultural properties and conditions of the foregoing that influence human health and well-being.*

Environmental implementation plan: means a statutory instrument for promoting co-operative governance for environmental management among different spheres of government as envisaged in Chapter 3 of the NEMA.

Environmental management plan: means a statutory instrument for promoting co-operative governance for environmental management among different spheres of government as envisaged in Chapter 3 of the NEMA.

Evaluation: is a time-bound and periodic exercise that seeks to provide credible and useful information to answer specific questions to guide decision making by staff, managers and policy makers.

Governance: the systems of values, policies, and institutions by which society manages its economic, political, and social affairs through interactions within and among the state, civil society, and the private sector.

Indicator: a measure that helps to assess the extent of the success with which goals are being achieved.

Integrated environmental management: a code of practice to ensure that environmental considerations are fully integrated into the management of all activities, so as to achieve a desirable balance between conservation and development as envisaged in chapter 5 of the NEMA.

Minister: means the Minister of Forestry, Fisheries and the Environment.

Monitoring: involves collecting, analysing, and reporting data on inputs, activities, outputs, outcomes and impacts as well as external factors, in a way that supports effective management.

National department: means a department of State within the national sphere of government.

Organ of state: has the meaning assigned to it in section 239 of the Constitution of the Republic of South Africa.

Performance indicator: is a pre-determined signal that a specific point in a process has been reached or result achieved.

Persistent organic pollutants: chemical substances that are toxic, persist in the environment for long periods of time, and bio-accumulate as they move up through the food chain.

Stakeholders: people and/or organizations involved or interested in an area or an issue, for example, residents, councillors, business people, trade unions, government institutions.

Sustainable development: means the integration of social, economic and environmental factors into planning, implementation and decision-making so as to ensure that development serves present and future generations.

EXECUTIVE SUMMARY

The 6th government administration presented a shift towards the management and implementation of environmental legislation, projects and programs within the environmental sector. The strategic issues which are job creation, education, health, fighting crime and sustainable development are addressed in this 2020-2024 Environmental Implementation and Environmental Management Plan (EIMP) through programs, policies and legislation. The 2020-2024 EIMP is the Fourth Edition as per the requirements of the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA), Chapter 3. It incorporates commitments from several programs within the Department of Forestry, Fisheries and the Environment (DFFE) namely, Biodiversity and Conservation; Climate Change, Air Quality and Sustainable Development; Chemicals and Waste Management; Regulatory Compliance and Sector Monitoring; Environmental Programs; Oceans and Coasts; Forestry Management and Fisheries Management.

PART A

1 INTRODUCTION

The environment in South Africa is protected through various legislation breathed by the Constitution of the Republic of South Africa, 1996. The NEMA is an umbrella legislation and it enables various specific environmental management Acts (SEMA) to specifically address environmental challenges and also to enable the management of the environment. Chapter 3 of NEMA requires the DFFE along with other organs of state that exercise functions that may affect the environment and that perform functions involving the management of the environment to prepare environmental implementation plans (EIPs) and/or environmental management plans (EMPs). Every national department that is listed in both Schedule 1 and Schedule 2 may prepare a consolidated environmental implementation and management plan (EIMP). The DFFE, as both a Schedule 1 and Schedule 2 Department, has a responsibility to compile a plan for a 5-year period on activities, programs and plans that the DFFE foresees to implement in order to protect the environment on behalf of the citizens of South Africa as mandated by the Constitution of the Republic, 1996 as per section 24 stating that:

“Everyone has the right:

- (a) to an environment that is not harmful to their health or wellbeing; and
- (b) to have the environment protected, for the benefit of present and future generations, through reasonable legislative and other measures that—
 - (i) prevent pollution and ecological degradation;
 - (ii) promote conservation; and
 - (iii) secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development”.

Chapter 3 of NEMA outlines the procedures for cooperative governance in South Africa. For good environmental management, cooperative governance is critical in South Africa. EIPs and EMPs are used to monitor and report on activities that have an impact on the environment. Environmental governance refers to the process of decision-making involved in controlling and managing the environment and natural

resources. According to Mngoma et al (2011), the factors that constitute good environmental governance include the following:

- Governance should be responsible and accountable;
- Regulations should be enforced;
- Integrating mechanism and structures that facilitate participation should be established;
- There needs to be inter-ministerial and inter-departmental co-ordination;
- Institutional responsibilities for regulating environmental impacts;
- Promoting resource exploitation should be separate;
- People should have access to information; and
- There need to be institutional and community capacity building.

The principles of cooperative governance include fairness, accountability, transparency and responsibility (Boer, O'Beirne and Greyling 2003:3). Mngoma et al, further emphasises that it is through adherence to the combination of these principles that the true spirit of cooperative governance is realised. Notwithstanding that, the procedures for cooperative governance are not a panacea. Noting the latter, compliance with procedures for cooperative governance as outlined in Chapter 3 of NEMA is necessary, both across and between all spheres of government, if the tide of service delivery is to be maintained.

The First Edition EIMP was published under General Notice No. 354 in Government Gazette No. 23232 on 28 March 2002 for the then Department of Environmental Affairs and Tourism for a four year period (2002-2005). The Second Edition EIMP was published under General Notice No. 1138 in Government Gazette No. 31415 on the 15 September 2008 for the then Department of Environmental Affairs and Tourism for a four-year period (2008-2011) and the Third Edition EIMP was published under Government Notice No. 530 in Government Gazette No. 39998 on 19 May 2016 for the then Department of Environmental Affairs for a five year period (2015/2020). This therefore marks the Fourth Edition 2020/2024 EIMP since the NEMA came into effect in 1998 for the Department of Forestry, Fisheries and the Environment. The content of this plan is guided by sections 13 and 14 of NEMA and the Environmental Implementation Plans and Environmental Management Plans Guidelines.

In line with the NEMA requirements, the current DFFE EIMP outlines how the DFFE will –

- (a) coordinate and harmonise the environmental policies, plans, programmes and decisions of the DFFE in its exercise of functions that may affect the environment or powers and duties aimed at the achievement, promotion, and protection of a sustainable environment, and of provincial and local spheres of government, in order to –
 - (i) minimise the duplication of procedures and functions; and
 - (ii) promote consistency in the exercise of functions that may affect the environment;
- (b) give effect to the principle of cooperative government in Chapter 3 of the Constitution;
- (c) secure the protection of the environment across the country as a whole;
- (d) prevent unreasonable actions by provinces in respect of the environment that are prejudicial to the economic or health interests of other provinces or the country as a whole; and
- (e) enable the Minister to monitor the achievement, promotion, and protection of a sustainable environment.

2.1 METHODOLOGY OF EIMP PREPARATION

The development of the EIMP takes various stages and the content of this plan is guided by sections 13 and 14 of NEMA.

Section 13(1) of NEMA requires that every EIP must contain:

- (a) a description of policies, plans and programmes that may significantly affect the environment;
- (b) a description of the manner in which the relevant national department or province will ensure that the policies, plans and programmes referred to in paragraph (a) will comply with the principles set out in section 2 as well as any national norms and standards as envisaged under section 146(2)(b)(i) of the Constitution and set out by the Minister, or by any other Minister, which have as their objective the achievement, promotion, and protection of the environment;
- (c) a description of the manner in which the relevant national department or province will ensure that its functions are exercised so as to ensure compliance with relevant legislative provisions, including the principles set out in section 2, and any national norms and standards envisaged under section

146(2)(b)(i) of the Constitution and set out by the Minister, or by any other Minister, which have as their objective the achievement, promotion, and protection of the environment; and

- (d) recommendations for the promotion of the objectives and plans for the implementation of the procedures and regulations referred to in Chapter 5.

Section 14(1) of NEMA requires that every EMP must contain-

- (a) a description of the functions exercised by the relevant department in respect of the environment;
- (b) a description of environmental norms and standards, including norms and standards contemplated in section 146(2)(b)(i) of the Constitution, set or applied by the relevant department;
- (c) a description of the policies, plans and programmes of the relevant department that are designed to ensure compliance with its policies by other organs of state and persons;
- (d) a description of priorities regarding compliance with the relevant department's policies by other organs of state and persons;
- (e) a description of the extent of compliance with the relevant department's policies by other organs of state and persons;
- (f) a description of arrangements for co-operation with other national departments and spheres of government, including any existing or proposed memoranda of understanding entered into, or delegation or assignment of powers to other organs of state, with a bearing on environmental management; and
- (g) proposals for the promotion of the objectives and plans for the implementation of the procedures and regulations referred to in Chapter 5.

The DFFE 2020/2024 Environmental Implementation Plan and Environmental Management Plan (EIMP) was developed using the established guidelines for preparation of environmental implementation plans and environmental management plans (2013).

2.2 OVERVIEW OF DFFE

The DFFE's vision is to attain "a prosperous and equitable society living in harmony with our natural resources". This is achieved through (mission) provision of leadership in environmental management, conservation and protection towards sustainability for the benefit of South Africans and the global community.

Moreover, the DFFE operates under the following values:

Driven by our **Passion** as custodians and ambassadors of the environment we have to be **Proactive** and foster innovative thinking and solutions to environmental management premised on a **People-centric** approach that recognises the centrality of Batho Pele, for it is when we put our people first that we will serve with **Integrity**, an important ingredient in a high **Performance driven** organisation such as ours.

2.2.1 CONSTITUTIONAL AND LEGAL MANDATE

The mandate and core business of the DFFE is to realise sound environmental management that is underpinned by the Constitution and all other relevant legislation and policies applicable to government, including the Batho Pele White Paper. In pursuance of this mandate policies, legislation and Regulations have been enacted to give effect to the environmental rights of all South Africans as enshrined in section 24 of the Constitution, which provides that everyone has the right to (a) an environment that is not harmful to their health or well-being; and (b) have the environment protected, for the benefit of present and future generations, through reasonable legislative and other measures that:

- (a) prevent pollution and ecological degradation;
- (b) promote conservation; and
- (c) secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development.

In the context of this constitutional right, policies, legislation and Regulations have been enacted in the form of overarching and enabling integrated environmental management (IEM) legislation which further provides for subsidiary, issue specific legislation, called specific environmental management Acts (SEMAs), on

biodiversity and conservation resources; protected areas; oceans and coasts; climate change and air quality management; and chemicals and waste management. Below is the table showing the DFFE programmes.

Table 1: Showing the DFFE's programmes

No	Programme	Function
1	Biodiversity and Conservation	Ensure the regulation and management of all biodiversity, heritage and conservation matters in a manner that facilitates sustainable economic growth and development.
2	Climate change, Air Quality and Sustainable Development	Lead, promote, facilitate, inform, monitor and review the mainstreaming of environmental sustainability, low carbon and climate resilience and air quality in South Africa's transition to sustainable development
3	Chemicals and Waste Management	Manage and ensure that chemicals and waste management policies and legislation are implemented and enforced in compliance with chemicals and waste management authorisations, directives and agreements.
4	Regulatory Compliance and Sector Monitoring	Promote the development of an enabling legal regime and licensing authorisation system that will promote enforcement and compliance and ensure coordination of sector performance.
5	Environmental Programmes	Implement the expanded public works programme and green economy projects in the environmental sector.
6	Oceans and Coasts	Promote, manage and provide strategic leadership on oceans and coastal conservation.
7	Administration	Provide strategic leadership, management and support services to the DFFE
8	Forestry	Develop and facilitate the implementation of policies and targeted programme to ensure management of forests, sustainable use and protection of land and water as well as managing agricultural risks and disaster
9	Fisheries	Ensure the sustainability utilisation and orderly access to the marine living resources through improved management and regulation

In addition to the aforementioned programmes, there are four national public entities which report to DFFE and which have either legislated environmental responsibilities or delegated ones. These entities are hereunder listed and described.

South African National Biodiversity Institute (SANBI) – The SANBI is established in terms of section 10 of the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004) (NEM: BA) and, among other things, leads and coordinates research, and monitors and reports on the status of biodiversity

in South Africa. SANBI provides knowledge and information, gives planning and policy advice and pilot best-practice management models in partnership with stakeholders. SANBI also engages in ecosystem restoration and rehabilitation, leads the human capital development strategy of the sector and manages the national botanical gardens as 'windows' to South Africa's biodiversity for enjoyment and education.

South African National Parks (SANParks) – The SANParks was established by section 5 of the National Parks Act, 1976 (Act No. 57 of 1976) and continues to exist in terms of section 54 of the National Environmental Management: Protected Areas Act, 2003 (Act No. 57 of 2003) (NEM: PAA). SANParks manages a system of national parks which represents the indigenous fauna, flora, landscapes and associated cultural heritage of the country. Of all the 22 national parks, most have overnight tourist facilities, with an unrivalled variety of accommodation in arid, coastal, mountain and bushveld habitats.

South African Weather Services (SAWS) – The South African Weather Service (SAWS) is a public entity governed by a Board of Directors. The company became a public entity on 15 July 2001 in terms of section 2 of the South African Weather Service Act, 2001 (Act No. 8 of 2001). It is an authoritative voice for weather and climate forecasting in South Africa and as a member of the World Meteorological Organization (WMO) it complies with international meteorological standards. As an Aviation Meteorological Authority, SAWS is designated by the state to provide weather services to the aviation industry, marine and a range of other identified clients and to fulfil a range of international obligations of the government. The entity provides two distinct services, namely public good services that are funded by government, and paid-for commercial services.

iSimangaliso Wetland Park Authority – The iSimangaliso Wetland Park Authority is established in terms of section 9 of the World Heritage Convention Act, 1999 (Act No. 49 of 1999) to manage the iSimangaliso Wetland Park World Heritage Site in accordance with the requirements of the World Heritage Convention and the World Heritage Convention Act, 1999 (Act No. 49 of 1999).

2.2.1.1 ACTS OF PARLIAMENT

The National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA) provides for cooperative environmental governance by establishing principles for decision making on matters affecting the environment, institutions that will promote cooperative governance and procedures for co-ordinating environmental functions exercised by organs of state; and provides for certain aspects of the administration and enforcement of other environmental management laws.

Environment Conservation Act, 1989 (Act No. 73 of 1989) provides for the effective protection and controlled utilization of the environment and for matters incidental thereto. This Act has been largely repealed and replaced by the National Environmental Management Act, 1998 (Act No. 107 of 1998). There are however still a number of provisions which are still in operation.

BIODIVERSITY AND CONSERVATION

The World Heritage Convention Act, 1999 (Act No. 49 of 1999) (WHCA) provides for the incorporation of the World Heritage Convention into South African law, the enforcement and implementation of the World Heritage Convention in South Africa, the recognition and establishment of world heritage sites, the establishment of Authorities and the granting of additional powers to existing organs of state; the powers and duties of such Authorities, especially those safeguarding the integrity of world heritage sites; where appropriate the establishment of boards and executive staff components of the Authorities; integrated management plans in respect of world heritage sites; land matters in relation to world heritage sites; and financial, auditing and reporting controls over the Authorities.

The National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004) (NEM: BA) significantly reforms South Africa's laws regulating biodiversity. It provides for the management and conservation of South Africa's biodiversity within the framework of NEMA. It sets out the mechanisms for managing and conserving South Africa's biodiversity and its components; provide for the protection of species and ecosystems that warrant national protection; the sustainable use of indigenous biological resources; the fair and equitable sharing of benefits arising from bioprospecting involving indigenous biological resources; and the establishment and functions of the South African National Biodiversity Institute.

The National Environmental Management: Protected Areas Act, 2003 (Act No. 57 of 2003) (NEM: PAA) provides for the protection and conservation of ecologically viable areas representative of South Africa's biological diversity and its natural landscapes and seascapes. It further provides for the establishment of a national register of all national, provincial and local protected areas; for the management of those areas in accordance with national norms and standards; for intergovernmental co-operation and public consultation in matters concerning protected areas; for the continued existence, governance and functions of South African National Parks.

FISHERIES, OCEANS AND COASTAL ENVIRONMENTAL MANAGEMENT

The National Environmental Management: Integrated Coastal Management Act, 2008 (Act No. 24 of 2008) (NEM: ICMA) establishes a system of integrated coastal and estuarine management in the Republic, including norms, standards and policies, in order to promote the conservation of the coastal environment and to maintain the natural attributes of coastal landscapes and seascapes; ensures that development and the use of natural resources within the coastal zone is socially and economically justifiable and ecologically sustainable; defines the rights and duties in relation to coastal areas; determines the responsibilities of organs of state in relation to coastal areas; prohibits incineration at sea; controls dumping at sea, pollution in the coastal zone, inappropriate development of the coastal environment and other adverse effects on the coastal environment; and gives effect to South Africa's international obligations in relation to coastal matters.

The Sea Shores Act, 1935, (Act No. 21 of 1935) declares the President to be the owner of the sea-shore and the sea within South Africa's territorial water and provide for the granting of rights and alienation of portions thereof. This Act has been repealed by the National Environmental Management: Integrated Coastal Management Act, 2008 (Act No. 24 of 2008) to the extent that it has not been assigned to the provinces.

The Sea Birds and Seals Protection Act, 1973 (Act No. 46 of 1973) provides for the control over certain islands and rocks; for the protection, conservation, and the control of the capture and killing of sea birds and seals; and for the disposal of the products of sea birds and seals.

Sea Fishery Acts 1988 (Act No. 12 of 1988) provides for the conservation of the marine ecology and the orderly exploitation, utilization and protection of certain marine resources; for that purpose, to provide for the exercise of control over sea fishery; and to provide for matters connected therewith.

The Antarctic Treaties Act, 1996 (Act No. 60 of 1996) provides for the implementation of certain treaties relating to Antarctica. The treaty is primarily concerned with the regulation of activities in Antarctica, including territorial claims, research and strict environmental protection in general and the protection of certain identified species such as seals.

The Marine Living Resources Act, 1998 (Act No. 18 of 1998) (MLRA) provides for the conservation of the marine ecosystem, the long-term sustainable utilisation of marine living resources and the orderly access to exploitation, utilisation and protection of certain marine living resources; and for these purposes provide for the exercise of control over marine living resources in a fair and equitable manner to the benefit of all the citizens of South Africa.

Marine Spatial Planning Act, 2018 (Act No. 16 of 2018) provides a framework for marine spatial planning in South Africa; provides for the development of marine spatial plans; provides for institutional arrangements for the implementation of marine spatial plans and governance of the use of the ocean by multiple sectors; and provides for matters connected therewith.

11

The Prince Edward Islands Act, 1948 (Act No. 43 of 1948) provides for the confirmation of the annexation to the Union of South Africa of the Prince Edward Islands, and for the administration, government and control of the said islands.

AIR QUALITY MANAGEMENT

The National Environmental Management: Air Quality Act, 2004 (Act No.39 of 2004) (NEM: AQA) reforms the law regulating air quality in order to protect the environment by providing reasonable measures for the prevention of pollution and ecological degradation and for securing ecologically sustainable development while promoting justifiable economic and social development; to provide for national norms and

standards regulating air quality monitoring, management and control by all spheres of government; for specific air quality measures; and for matters incidental thereto.

South African Weather Service Act, 2001 (Act No. 8 of 2001) establishes a juristic person to be known as the South African Weather Service; determines its objects, functions and method of work; prescribes the manner in which it is to be managed and governed; regulates its staff matters and financial affairs; and provide for matters connected therewith.

WASTE MANAGEMENT

The National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) (NEM: WA) reforms the law regulating waste management in order to protect health and the environment by providing reasonable measures for the prevention of pollution and ecological degradation and for securing ecologically sustainable development; provides for institutional arrangements and planning matters, provides for national norms and standards for regulating the management of waste by all spheres of government; specific waste management measures; licensing and control of waste management activities; remediation of contaminated land; the national waste information system and to furthermore provide for compliance and enforcement.

FORESTRY MANAGEMENT

The National Forests Act, 1998 (Act No. 84 of 1998) (NFA) promotes the sustainable management and development of forests for the benefit of all; creates the conditions necessary to restructure forestry in state forests; provide special measures for the protection of certain forests and trees; promote the sustainable use of forests for environmental, economic, educational, recreational, cultural, health and spiritual purposes; promote community forestry; and promote greater participation in all aspects of forestry and the forest products industry by persons disadvantaged by unfair discrimination.

The National Veld and Forest Fire Act, 1998 (Act No. 101 of 1998) (NVFFA) makes provisions for the prevention, combatting and management of veld, forest and mountain fires throughout the Republic of South Africa.

Management of State Forests Act, 1992 (Act No. 128 of 1992) provides for the management of and control over State forests by a company to be established; and for matters connected therewith.

2.2.2 LINKS TO GOVERNMENT PRIORITIES

This 4TH edition EIMP falls within the sixth government administration and priorities thereof. Below are the priorities of government as announced by the President of the Republic of South Africa and how DFFE will align itself in order to realize them.

Table 2: Showing government priorities and DFFE response/alignment to the priorities

PRIORITIES OF GOVERNMENT 2019-2024 MTSF PERIOD	DEPARTMENT RESPONSES: ALIGNMENT AND CONTRIBUTION TO PRIORITIES
Economic transformation and job creation	<ul style="list-style-type: none"> • Implementation of the Government's Expanded Public Works Programme (EPWP) for the Environment Sector. <i>The DFFE has projected that it will create 359 568 work opportunities through implementation of labour intensive environmental programmes by 2023/24. An estimated 233 719 of beneficiaries of this work opportunities during the MTSF period will be young people.</i> • Implementation of waste management programmes: <i>An estimated 700 new jobs will be created and 60 Small, Medium and Micro Enterprises (SMMEs) established in the waste management sector by 2023/24.</i> • Implementation of biodiversity economy initiatives and other Departmental programmes: <i>The DFFE facilitates implementation of the Biodiversity Economy initiatives and various other environment management programmes. The DFFE will continue to implement measures aimed at enhancing the environmental sector's contribution towards advancing social and economic transformation and participation of small business in the mainstream economy. Key interventions include the following:</i> <ul style="list-style-type: none"> ○ Training of 2000 entrepreneurs in the biodiversity sector. ○ Identifying and cultivating 2500 hectares of land for indigenous species. ○ Securing 2500 heads of game for previously disadvantaged individuals (PDI's) and communities. ○ Over 8000 SMMEs will be used/provided with business

Education and skills development

- opportunities as part of implementation of the DFFE's Expanded Public Works Programme (EPWP) environmental programmes.
 - 65% of the DFFE's budget for goods and services will be spend on affirmative procurement.
- Implementation of Government's Chemical and Waste Phakisa and the Ocean Economy Phakisa programmes.

- **Improved capacity for the environmental sector** (Implementation of DFFE internship and environment education programmes):
 - *The DFFE will recruit and give practical work experience to 300 young people who will participate in the internship programme during the MTSF period.*
 - *A further 500 students will be placed in Work Integrated Learning Programme (WIL) by 2024.*
 - *1000 teachers in various Provinces will receive training in different aspects of environmental management through the "Fundisa for Change" programme which is a partnership programme with the Department of Basic Education focusing on environmental learning and teacher education.*
- **Environmental management education and awareness:** Implementation of key environmental awareness interventions; inform society and change behaviours; over 20 environmental awareness campaigns will be undertaken with a focus on:
 - *Air Quality Management; Biodiversity Economy; Climate Change; Good Green Deeds (waste management)*
 - *An estimated 70 environmental events will be hosted over the MTSF period (Ministerial public participation events, conferences, celebration of key environment days etc.).*

A capable, ethical and developmental state

Implementation of Improved governance and oversight mechanisms: *The DFFE continues to implement, review and enhance good governance, oversight and accountability mechanisms for managing*

A better Africa and World

its operations and also in relation to the operations of all of the public entities of the DFFE.

Human resources management and development programmes: *Development and implementation of effective human resources management and development programmes for the DFFE to ensure recruitment, retention and a sustainable and adequate supply of the talent and skills to execute the constitutional mandate of protecting and conserving the environment (350 bursaries will be issued over the MTSF period).*

- **Lead and Influence an environmental management global agenda which advances South Africa and Africa's socio-economic development priorities:**
 - Manage and lead South Africa's participation and negotiations on climate change, sustainable development, chemicals and waste management, oceans and coastal management, biodiversity and conservation.
 - Pursue targeted and strategic global and regional engagements.

Human settlements and local government

- **Local Government Support Programme on Environmental Management:**
 - Effective implementation of planned Local Government support interventions to support municipalities in carrying out their environmental management mandate.
44 district municipalities will be assisted to incorporate environmental priorities in their integrated development plans (IDPs).
- **Waste management, air quality and Climate change:** Sound environmental management of hazardous waste streams to protect communities from being affected by dumped or badly managed waste. Implement effective air quality management interventions and ensure reduction of atmospheric emissions from major

polluters. Building and skilling a climate resilient society.

Below is the table showing alignment of the work of the DFFE with the five goals of Government for the next 9 years (2020-2028).

Table 3: Depicting Government goals and DFFE strategic objectives towards the goals

No.	Government Goals for the next 9 years	Outcome Goals/Strategic Objectives of the DFFE
1.	Eradication of Hunger, Poverty, Inequality and unemployment: That within the next 10 years we will have made progress in tackling poverty, inequality and unemployment. No person in South Africa will go hungry.	Improved socio-economic benefits to communities (employment creation, SMME development and support, skills development etc.).
2.	Economic growth: Our economy will grow at a much faster rate than our population.	Environmental economic contribution optimised.
3.	Youth employment: Two million more young people will be in employment.	Improved socio-economic benefits (Implementation of environmental programmes and providing employment and skill development opportunities specifically targeting young people, women and people with disabilities).
4.	Education: Our schools will have better educational outcomes and every 10 year old will be able to read for meaning.	Improved profile, support and enhanced capacity for the environmental sector.
5.	Fighting crime: Violent crime will be halved.	Improved compliance with environmental legislation.

2.3 SYSTEM OF GOVERNMENT IN SOUTH AFRICA

2.3.1 THE STRUCTURE OF GOVERNMENT

The Constitution of the Republic of South Africa, 1996 [section 40(1)] clearly states that government is constituted as national, provincial and local spheres which are distinctive, interdependent and interrelated. The "distinctive" element reflects that each sphere exists in its own right and is the final decision maker on a defined range of functions and is accountable for its decisions.

The Constitution further allocates legislative powers on either an exclusive (Schedule 5) or concurrent (Schedule 4) basis. In terms of Schedule 4 of the Constitution, the "environment" is a functional area of concurrent national and provincial legislative competence which means environmental legislation can be

made at both national and provincial level. The national and provincial executive authorities are responsible for the implementation of national legislation within the functional areas listed in Schedule 4, except where the Constitution or an Act of Parliament provides otherwise. On this basis, the national government is responsible, at a national level, for policy formulation, determining regulatory frameworks, including setting norms and standards, and overseeing the implementation of these functions. Although provinces are "distinctive", they exercise their powers and perform their functions within the regulatory framework set by the national government, which is also responsible for monitoring compliance with that framework and, if need be, intervene when constitutional or statutory obligations are not fulfilled. Through section 152 of the Constitution, municipalities also have a role in respect of environmental management, to ensure provision of services to communities in a sustainable manner as well as to promote a safe and healthy environment. Notwithstanding this, municipalities are likewise subject to both the national and provincial regulatory and supervisory powers. It is this relationship of regulation and supervision that defines how the three spheres are "interrelated" and how provinces and municipalities exercise their distinctive powers within national frameworks.

2.3.2 SOUTH AFRICAN INTERGOVERNMENTAL SYSTEM

The Constitution of the Republic of South Africa, 1996 explicitly provides for cooperative governance between the different line functions and spheres of government. Furthermore, the enactment of a law such as the Intergovernmental Relations Framework Act, 2005 (Act No. 13 of 2005) (IGRFA) and the inclusion of Chapters 3 and 8 of NEMA clearly indicates that cooperative governance in South Africa is statutorily driven. Chapter 3 of NEMA stipulates procedures for cooperative governance and chapter 8 of NEMA brings a new element to cooperative governance by making provision for conclusion of environmental management agreements with any person or community for the purpose of promoting compliance with the principles laid down in NEMA.

The object of intergovernmental relations is to manage relationships and potential tension between the respective spheres of government emanating from crosscutting functions and to get a coherent government that delivers services to the nation through these spheres of government. In other words, intergovernmental relations are not an end in themselves, but a means for marshalling the distinctive effort, capacity, leadership and resources of each sphere and directing these as effectively as possible towards the developmental and service delivery objectives of government as a whole.

The Constitution spells out, among others, the following principles that underpin the South African system of co-operative government and intergovernmental relations across all spheres of government:

- **Loyalty to the Republic as a whole:** This means that all spheres of government should be committed to preserving the indivisibility of the country, securing the well-being of the people and, to that end, must provide effective, transparent, accountable and coherent government for the Republic as a whole. This is the object of co-operative government.
- **Safeguarding of the distinctiveness of each sphere:** This entails respect of powers and functions of each sphere and understanding that each sphere must remain within its constitutional powers and when exercising those powers, a sphere of government must not do so in a manner that encroaches on the geographical, functional or institutional integrity of another sphere.
- **Realisation of co-operative government:** This means that all spheres of government must co-operate with one another in mutual trust and good faith by—
 - a) fostering friendly relations;
 - b) assisting and supporting one another;
 - c) informing one another of, and consulting one another on matters of common interest;
 - d) co-ordinating their actions and legislation with one another;
 - e) adhering to agreed procedures; and
 - f) avoiding legal proceedings against one another.

2.3.3 MANAGEMENT OF INTERGOVERNMENTAL RELATIONS IN THE ENVIRONMENT SECTOR

Intergovernmental systems depend on well-coordinated policy, planning, budgeting, implementation and reporting. This is necessary both within spheres and between spheres as well as across the sectors. Over the past years, this cooperation in the environmental sector has been driven statutorily primarily through procedures for cooperative governance provided for in NEMA Chapter 3, environmental management tools that ensure IEM stipulated in Chapter 5 of NEMA and environmental management co-operation agreements provided for in Chapter 8 of NEMA. As a result, to address the challenges of co-operative government, the three spheres of government have over the past years –

- (a) Developed intergovernmental forums at national and provincial level dealing with issues of alignment, integration and coherence;

- (b) Developed systems and processes in terms of which national, provincial and local governments pursue their common objectives; and
- (c) Engaged in joint work and common projects to give effect to common objectives.

For the purpose of this document, the focus is on the EIPs and EMPs as a mechanism for cooperative governance required in terms of Chapter 3 of NEMA. The EIP describes policies, plans and programmes of a national or provincial department that performs functions that may impact on the environment and how such departments' plans will comply with the NEMA principles and national environmental norms and standards. The EMP on the other hand, describes functions of a national department involving the management of the environment and policies and laws, as well as efforts taken by the DFFE to ensure compliance by other departments, with such environmental policies and laws.

The purpose of EIPs and EMPs as provided in section 12 of NEMA is to: –

- (a) co-ordinate and harmonise the environmental policies, plans, programmes and decisions of the various national departments that exercise functions that may affect the environment or are entrusted with powers and duties aimed at the achievement, promotion, and protection of a sustainable environment, and of provincial and local spheres of government, in order to:
 - (i) minimise the duplication of procedures and functions; and
 - (ii) promote consistency in the exercise of functions that may affect the environment;
- (b) give effect to the principle of co-operative government in Chapter 3 of the Constitution;
- (c) secure the protection of the environment across the country as a whole;
- (d) prevent unreasonable actions by provinces in respect of the environment that are prejudicial to the economic or health interests of other provinces or the country as a whole; and
- (e) enable the Minister to monitor the achievement, promotion, and protection of a sustainable environment.

2.3.3.1 CHALLENGES OF COORDINATING PROCEDURES FOR CO-OPERATIVE GOVERNMENT

EIPs and EMPs tools by themselves do not and cannot constitute co-operative government; it is the systems and processes they produce and how they are implemented in the spheres and across the spheres as well as sectors of government that make co-operative government work. Currently, non-compliance with the

requirements for the preparation and implementation of EIPs and EMPs are among the notable challenges to be addressed for the system to work properly. Some of the challenges noted during the First, Second and Third editions of EIPs and EMPs were the following:

(a) Clarity in operational concepts

For consistent practices and sound decision-making processes all players in the intergovernmental relations system must work from the same ground rules; there must be clarity on the content of EIPs and EMPs and core concepts such as coordination, integration, consultation and alignment. Currently, these concepts are used interchangeably and loosely or are poorly understood.

(b) Integrated service delivery

Following on integrated strategic planning comes integrated service delivery, a seamless web of services that cuts across jurisdictional boundaries. Conversely, uncoordinated strategic planning and unilateral delivery actions by departments contribute to fragmented service delivery. Fragmented and duplicated planning may result in mismatching between programme design and community needs and opportunities.

(c) Integrated and coordinated involvement of local government

Good governance requires that the national government and the provinces execute their regulatory function over municipalities in an integrated and coordinated manner. Several national departments exercise regulatory responsibilities that impact on municipalities and there is a requirement that each provincial government must ensure that municipalities comply with and adhere to relevant EIPs and EMPs as well as to NEMA principles. If each of the national and provincial departments works with an own understanding of the role and place of local government and its own regulatory powers, the risk is that there are as many concepts of local government as there are departments. The cumulative effect of these different concepts amounts to a burden on local government. In particular, the disjunction between financial budgeting and sectoral planning must be bridged. What is required is a "whole of government" approach to local government.

(d) Effective processes and procedure for settlement of intergovernmental disputes

Over the past years it became clear that provincial departments are more willing to comply with procedures for cooperative government provided in Chapter 3 of NEMA than national departments. Enforcement of compliance with Chapter 3 of NEMA on national departments is likely to cause inter-departmental conflict.

The Constitution obliges spheres of government and organs of state within spheres to avoid litigating against one another. This duty is mandatory as section 41(3) of the Constitution requires that every organ of state "must make every reasonable effort to settle the dispute by means of mechanisms and procedures provided for that purpose, and must exhaust all other remedies before it approaches a court to resolve the dispute". The courts may enforce this duty by referring a dispute back to the parties if the requirements of section 41(3) of the Constitution have not been met.

PART B

ENVIRONMENTAL IMPLEMENTATION PLAN

Introduction

This EIP:

- Describes policies, plans and programmes of the DFFE that may significantly affect the environment;
- Describes the manner in which the DFFE will ensure that these policies, plans and programmes will comply with the principles set out in section 2 of NEMA as well as any national norms and standards as envisaged under section 146(2)(b)(i) of the Constitution and set out by the Minister, or by any other Minister, which have as their objective the achievement, promotion, and protection of the environment;
- also provides a description of the manner in which the DFFE will ensure that its functions are exercised so as to ensure compliance with relevant legislative provisions, including the principles set out in section 2 of NEMA, and any national norms and standards envisaged under section 146(2)(b)(i) of the Constitution and set out by the Minister, or by any other Minister, which have as their objective the achievement, promotion, and protection of the environment;
- Provides recommendations for the promotion of the objectives and plans for the implementation of the procedures and regulations referred to in Chapter 5 of NEMA which will not be dealt with in this part, but dealt with in Part C: Environmental Management Plan.

3.1 POLICIES, PLANS AND PROGRAMMES OF THE DFFE THAT MAY SIGNIFICANTLY AFFECT THE ENVIRONMENT

Table 4: Policies, plans and programmes of the DFFE with significant impact to the environment

Name of programme, policy or plan	Status (i.e. is it in process of development or adopted or being implemented?)	What is the policy, plan or programme about?	Scope of policy, plan or programme that affects the environment?	What degree of control does the DFFE have on the impact?	Name of implementing organ of state
Environment Sector Research, Development and Evidence Framework	Implemented since 2012	To facilitate a process that will help to generate knowledge and ensure an understanding of the current trends, risks and opportunities as a way of improving environmental sector decision making and evidence based policy making.	National	Low	DFFE
Working for/ on Programmes (Water, Wetlands, Forests, Ecosystem, Coast, Land, Fire, Waste)	Implemented since 2005	Working for Programmes addresses departmental mandate on ensuring benefit from environmental assets, which presents an opportunity to contribute significantly to job creation, social inclusion and the low carbon green economy.	National	High	DFFE
"Driving Force for Change" pilot youth support initiative	2020	To provide the support to enable the youth to becoming that "Driving Force for Change" and develop and lead environmental initiatives that puts us on the path of a low carbon and	National	Low	DFFE

Youth Environmental Services (YES) Programme	Implemented	climate resilient development pathway. The YES entails the involvement of unemployed young people in activities which provide environmental service that benefits the community whilst they are also provided with opportunities for personal development, accredited training and exit opportunities.	National	Medium	DFE
		This project intends to equip the graduates and matriculates with the skills and experience needed to access jobs in the biodiversity sector.	National	Medium	SANBI/DFE
Green Sebenza Jobs Fund partnership project	Implemented	The Eco-Furniture Programme project aims to capitalise on the latent value of the invasive alien species and value-added products by manufacturing products in line with government needs while maximising job creation and skills transfer opportunities.	National	Low	Economic Development Department And DFE
Bioprospecting Economy	Implemented	Fair access and equitable sharing of benefits arising from bioprospecting involving indigenous biological resources promoted. Biological resources sustainably utilized and regulated.	National	High	DFE
Biodiversity Economy	Implemented	The Wildlife Economy in South Africa is centred on the sustainable utilisation of indigenous biological resources including biodiversity-derived products for trade and bioprospecting, the hunting industry, agriculture and agro processing of indigenous crops and vegetables and livestock breeds and indigenous	National	High	DFE

People and Parks Programme	Implemented	marine resources and fisheries. Wildlife Economy focus areas are centred on the socio-economic benefits of eco-tourism, co-managed conservation areas and ancillary services to protected areas.	National	Medium	DFFE
		The overall aim of the People and Parks Programme is to address issues at the interface between conservation and communities, in particular, the realization of tangible benefits by communities who were previously displaced to pave way for the establishment of protected areas.			
Intergovernmental Platform on Biodiversity and Ecosystem Services (IPBES)	Implemented	To provide policy relevant scientific knowledge to inform decision making.	National	High	National, Provincial and municipality
Transfrontier Conservation Areas	Implemented	The establishment and development of Transfrontier Conservation Areas as a vehicle for conservation and sustainable use of biological and cultural resources has the objective of facilitating and promoting regional peace, co-operation and socio-economic development. It taps on the notion that nature knows no boundaries.	National	High	DFFE
Non-Motorized Transport (NMT) - South Africa	Implemented	NMT enhances/complements existing public transport systems by providing secure access to public transport through walking or cycling.	National	Low	Sector Departments
Green Fund	Implemented	To support the transition to a low carbon, resource efficient and climate resilient development path delivering	National	High	DFFE

<p>National Framework for Air Quality Management in the Republic of South Africa</p>	<p>Implemented (2013)</p>	<p>high impact economic, environmental and social benefits.</p> <p>The purpose of the National Framework, as stated in paragraph 1.1, is to achieve the objectives of the NEM: AQA, and as such the National Framework provides a medium to long term plan of the practical implementation of the NEM: AQA. The framework must provide mechanisms, systems and procedures to promote holistic and integrated air quality management through pollution prevention, minimization at source, and through impact management with respect to the receiving environment from local scale to international issues.</p>	<p>National, provincial and local</p>	<p>High</p>	<p>DFPE, provincial departments and municipalities</p>
<p>Air Quality Management Plans</p>	<p>Implemented</p>	<p>These plans, amongst others, seek to implement the Republic's obligations in respect of international agreements [Section 16(1)(a)(vii) of NEM: AQA].</p>	<p>National and provincial</p>	<p>High</p>	<p>DFPE, provincial departments</p>
<p>National Waste Management Strategy (NWMS)</p>	<p>Implemented</p>	<p>The NWMS is a legislative requirement of the NEM: WA. The overall purpose of the NWMS is to give effect to the objects of the NEM: WA, which are to protect health, well-being and the environment through sound waste management and application of the waste management hierarchy. The strategy provides a plan to give practical effect to the NEM: WA, and as such it seeks to</p>	<p>National</p>	<p>Medium</p>	<p>DFPE, provincial departments and municipalities</p>

<p>ensure that responsibility for waste management is properly apportioned.</p>																															
<p>This Ocean Policy seeks to balance sustainable development and protection of the ocean environment for societal benefit. The policy recognizes that a robust and sustainable society and economy depends on services that marine ecosystems provide. The sustainable use of ocean resources requires an understanding of the marine development opportunities, the protection of biodiversity, maintenance of ocean ecosystem integrity and the avoidance of significant long term harmful impacts on the ocean environment. The policy also takes into account the National Planning Commission's request for an appraisal of the maritime sector in light of its geopolitical positioning, a consideration of the contribution our ocean could make to employment and regional trade and the necessity for a holistic response to climate change adaptation as required by the South African National Climate Change Response White Paper.</p>	<p>Implemented</p>	<p>White Paper on the National Environmental Management of the Ocean (2014)</p>	<p>National</p>	<p>High</p>	<p>Coastal provinces, coastal municipalities, coastal practitioners and decision-makers (as well as professionals working in non-government organisations and other organisations and institutions that have a bearing on coastal management)</p>																										
<p>Operation Phakisa is one of the mechanisms put in place to implement the National Development Plan. The ultimate goal is to boost economic growth and create jobs.</p>	<p>Implemented</p>	<p>Operation Phakisa</p>	<p>National</p>	<p>High</p>	<p>Cross-sector programme with various stakeholders</p>																										

Operation Phakisa is a cross-sector programme where various stakeholders engage to implement initiatives and concrete actions to address constraints to delivery in a prioritised focused area for public accountability and transparency. The programme have several hubs including

- Oceans economy Lab
- Health Lab
- Education Lab
- Mining Lab
- Biodiversity Economy Lab
- Agriculture, Land Reform and Rural Development Lab
- Chemical and Waste Economy Lab

National Biodiversity Framework (2009) (NBF)

Implemented

The purpose of the NBF is to provide a framework for co-ordination and alignment of the efforts of the many organisations and individuals involved in conserving and managing South Africa's biodiversity, in support of sustainable development.

The NBF is a requirement of the NEM: BA and it aims to:

- Focus attention on the most urgent strategies and actions required for conserving and managing South Africa's biodiversity; and
- Point to roles and responsibilities of key stakeholders, including key

National

High

Organs of state whose core business includes biodiversity conservation; organs of state whose core business is not biodiversity conservation but whose policies, programmes and decisions impact directly and substantially on how biodiversity is managed; government-led programmes (NGOs wishing to make a contribution to biodiversity conservation in South Africa; private sector, particularly those production sectors whose activities contribute to the major

pressures on South Africa's biodiversity, such as loss of natural habitat, over-abstraction of freshwater resources, and over-harvesting of marine resources)

DFPE and provincial departments

organs of state whose mandates impact directly on biodiversity conservation and management

National, provincial and local

The White Paper presents the South African Government's vision for an effective climate change response and the long-term, just transition to a climate-resilient and lower-carbon economy and society. South Africa's response to climate change has two objectives:

- Effectively manage inevitable climate change impacts through interventions that build and sustain South Africa's social, economic and environmental resilience and emergency response capacity.
- Make a fair contribution to the global effort to stabilise greenhouse gas (GHG) concentrations in the atmosphere at a level that avoids dangerous anthropogenic interference with the climate system within a timeframe that enables economic, social and environmental development to proceed in a sustainable manner.

National Climate Change Response White Paper (2011)

Implemented

3.2 MANNER IN WHICH DFFE WILL ENSURE THAT POLICIES, PLANS AND PROGRAMMES COMPLY WITH THE NEMA PRINCIPLES

Table 5: Manner in which policies, plans and programmes will comply with NEMA principles

Name of programme	List of relevant regulations, norms and standards, policies, plans and programmes	Description of how the DFFE will ensure that development and/or implementation of policies, plans and programmes comply with environmental management principles for sustainable development outlined in section 2 of NEMA, and with any regulations, national norms and standards set by departments with a mandate for environmental management	Is there any consultative forum established? (If so give name of the structure)
Biodiversity and Conservation	NATIONAL ENVIRONMENTAL MANAGEMENT BIODIVERSITY ACT, 2004 (NEM: BA)	The DFFE will use guidelines and existing intergovernmental forums for further guidance; enter into partnerships [including the signing of Memoranda of Understanding (MoUs) and agreements with partners]; consider other norms and standards for alignment; undertake focused public events, celebration of calendar days and awareness raising; develop mechanisms for monitoring and reporting for the biodiversity sector; develop the financing model for the biodiversity sector; and undertake compliance monitoring activities.	Yes. Working Group, I: Biodiversity and Conservation; Working Group II: Air Quality Working Group IV: Compliance and Enforcement; Working Group V: Environmental Impact Management and Water Affairs; Working Group VI: Environmental Sector Jobs; Working Group VIII: Oceans & Coasts; Working Group X: IGCCC Climate Change; Working Group XI: Advisory Committee on Environmental Policy and Law Reform</p>

The above list of norms, regulations, policies, standards is not exhaustive. Please visit <https://www.environment.gov.za/legislation/gazetted> notices and <http://www.gpwonline.co.za> website for further information.

3.3 METHODOLOGY OF ENSURING FUNCTIONS ARE COMPLIANT WITH RELEVANT LEGISLATIVE PROVISIONS, INCLUDING NEMA PRINCIPLES, AND ANY NORMS AND STANDARDS

This section of the EIMP describes in the table form, the manner in which the DFFE will ensure that its functions are compliant with relevant legislative provisions, including with NEMA principles and norms and standards. Therefore, methodologies highlighted in this sections include selected committees, memoranda of understanding (MoU), and programmes used by the DFFE.

Table 6: Methodology used to ensure compliance with relevant legislation

(a) Identification of institutional mechanism for coordination in place (i.e. is it a committee, procedures, MoU, etc)	Does the institutional mechanism have a limited lifespan? If so, what is its lifespan?	Description of the purpose of the mechanism	(b) What is the capacity (in terms of people and budget) of the DFFE to coordinate
			Human resources Budget
Working Group I: Biodiversity and Conservation	No	The overall objective of the working group is to support Mintech (Technical Implementation Forum) to achieve an effective governance framework and ensure that it is maintained and implemented in a manner that ensures that the unacceptable past, current and future impacts on the quality of the environment are minimized, mitigated or managed in line with government policy, legislation, goals and strategies.	Staff component Annual allocation
Working Group II: Air Quality	No		Staff component Annual allocation
Working Group III: Planning and Coordination	No		Staff component Annual allocation
Working Group IV: Compliance and Enforcement	No		Staff component Annual allocation
Working Group V: Environmental Impact Management & Water Affairs	No		Staff component Annual allocation

Working Group VI: Environmental Sector Jobs	No		Staff component	Annual allocation
Working Group VII: Oceans & Coasts	No		Staff component	Annual allocation
Working Group IX: Chemical and Waste Management	No		Staff component	Annual allocation
Working Group X: IGCCC Climate Change	No		Staff component	Annual allocation
Working Group XI: Advisory Committee on Environmental Policy And Law Reform	No		Staff component	Annual allocation
Working Group XII: Communication	No		Staff component	Annual allocation
Subcommittee on Environmental Implementation and Environmental Management Plans	No		Staff component	Annual allocation
Local Government Task Team (LGTT)	No		Staff component	Annual allocation

The EIP/EMP sub-committee reports to Working Group III: Planning and Coordination and gives effect to procedures for cooperative governance outlined in Chapter 3 of NEMA.

The Local Government Task team is established to achieve the following objectives:

- Identify opportunities for streamlining and integrating DFFE's local government initiatives.
- Clarify DFFE's mandate for local government programmes.
- Identify gaps in co-operation with local government sector.

		<ul style="list-style-type: none"> Promote consistency in approach to consultation with provinces on local government programmes. Promote synergy between local government initiatives within DFFE and other national and provincial departments. Maximize DFFE's relations with the South African Local Government Association (SALGA), SANBI, South African Cities Network (SACN) and Cooperative Governance and Traditional Affairs (COGTA) as representative organs of local government. 				
Environmental Educators Forum	No	It is a platform for sharing environmental practices and information and reporting to Working Group III	Staff component	Annual allocation		
National Environmental Sector Skills Planning Forum	No	The Forum is a streamlined, responsive national gathering of individuals from government agencies and partners that are actively involved in catalysing and supporting nationally relevant environmental skills development initiatives.	Staff component	Annual allocation		
Air Quality Multi-Stakeholder Reference Group (MSRG)	No	The MSRG was established to pursue the intention to improve the situation at identified highly polluted priority areas. Towards this intention, the MSRG serves as a consultation and reporting forum for the declaration of these highly polluted priority areas and also for the development of air quality management plans.	Staff component	Annual allocation		
Implementation Task Teams (ITTs) for Highveld, Vaal, and Waterberg Priority Areas	No	The ITTs are established at municipal district level and are established by the MSRG as implementers of air quality management plans.	District Air Quality Officers	Annual Allocations		
Working for programmes	No	Working for programmes are initiatives by the DFFE implemented through Environmental Protection and Infrastructure Programmes (EPIP) under the auspices of EPWP. The initiatives are proactive preventative measures that recognizes that inadequate waste, water, fire, and coastal services may lead to health hazards and environmental degradation. The programmes seek	Staff component	Annual Allocations		

Environmental Sector Conflict Management Focal Point Forum	No	to ensure that both social and ecological sustainability is achieved through implementation of sustainable waste, water, fire and coastal management practices.	Staff component	Annual Allocations
	Yes		SANBI staff	SANBI Allocations
Environmental Programmes MoUs (e.g. Working for Wetlands, EMP)		To coordinate the dispute resolution		
		To identify and to outline the parties to the agreement, the conditions of the agreement, the project specifications and expected deliverables as well as lifespan of the agreement.		
National Committee on Climate Change (NCCC)	No	NCCC is the official national platform for continuous broad stakeholder engagement on climate change.	Staff component	Annual Allocations
Intergovernmental Committee on Climate Change (IGCCC) (WG 10)	No	IGCCC was established in 2008 to foster information exchange, consultation, agreement and support among the spheres of government on climate change. The IGCCC enables a high level exchange of information on key topics. As a high level platform, it brings together representatives from national departments: DFFE, DMRE, DoE, DoHS, DWS, International Relations and Cooperation, DTIC, DoT, National Treasury, DALRRD, DSI, and Social Development, as well as from provincial environmental departments and SALGA.	Staff component	Annual Allocations

PART C

ENVIRONMENTAL MANAGEMENT PLAN

Introduction

DFFE is a listed Schedule 2 department and therefore must prepare an EMP. This section (Part C) thus deals with DFFE EMP and addresses the following:

- A description of the functions exercised by the DFFE in respect of the environment;
- A description of environmental norms and standards, including norms and standards contemplated in section 146(2)(i) of the constitution set or applied by DFFE;
- Description of the policies, plans and programmes of DFFE that are designed to ensure compliance with its policies by other organs of state and persons;
- Description of priorities regarding compliance with DFFE policies by other organs of state and persons;
- Description of the extent of compliance with DFFE policies by other organs of state;
- Arrangements for cooperation with other national departments and spheres of government; and
- Proposals for the promotion of the objectives and plans for the implementation of the procedures and Regulations referred to in Chapter 5 of NEMA.

4.1 DESCRIPTION OF THE FUNCTIONS EXERCISED BY THE DFFE IN RESPECT OF THE ENVIRONMENT

The table below indicates the departmental programmes that are carried out in order to manage the environment.

Table 7: Department's functions

No	Programme	Function
1	Biodiversity and Conservation	Ensure the regulation and management of all biodiversity, heritage and conservation matters in a manner that facilitates sustainable economic growth and development.
2	Climate change, Air Quality and Sustainable Development	Lead, promote, facilitate, inform, monitor and review the mainstreaming of environmental sustainability, low carbon and climate resilience and air quality in South Africa's transition to sustainable development.
3	Chemicals and Waste Management	Manage and ensure that chemicals and waste management policies and legislation are implemented and enforced in compliance with chemicals and waste management authorisations, directives and agreements.
4	Regulatory Compliance and Sector Monitoring	Promote the development of an enabling legal regime and licensing authorisation system that will promote enforcement and compliance and ensure coordination of sector performance.
5	Environmental Programmes	Implement the expanded public works programme and green economy projects in the environmental sector.
6	Oceans and Coasts	Promote, manage and provide strategic leadership on oceans and coastal conservation.
7	Administration	Provide strategic leadership, management and support services to the DFFE
8	Forestry	Develop and facilitate the implementation of policies and targeted programme to ensure management of forests, sustainable use and

protection of land and water as well as managing agricultural risks and disaster

9 Fisheries

Ensure the sustainability utilisation and orderly access to the marine living resources through improved management and regulation

4.2 DESCRIPTION OF ENVIRONMENTAL NORMS AND STANDARDS, INCLUDING NORMS AND STANDARDS CONTEMPLATED IN SECTION 146(2)(I) OF THE CONSTITUTION SET OR APPLIED BY DFFE

This section describes environmental norms and standards, set or applied nationally by DFFE. For ease of reference, these norms and standards are arranged according to the following categories: biodiversity and conservation; climate change, air quality and sustainable development; chemicals and waste management; regulatory compliance and sector monitoring. As was highlighted in the EIP (Part B), there are no oceans and coast norms and standards as yet.

Table 8: Environmental norms and standards

NORMS AND STANDARDS	DESCRIPTION OF NORMS AND STANDARDS
BIODIVERSITY AND CONSERVATION	
NEM: BA Norms and Standards for Biodiversity Management Plans for Ecosystems, 2014	The purpose of the norms and standards for biodiversity management plans for ecosystems (BMP-Es) is to guide the development of BMP-Es, providing a consistent approach across the country, while being sufficiently flexible to accommodate the variability of ecosystems and their management requirements.
NEM: BA Norms and Standards for Biodiversity Management Plans for Species, 2009	The purpose of these norms and standards is to provide a national approach and minimum standards for the development of biodiversity management plans for species.
NEM: BA National Norms and Standards for the Management of	The purpose of these norms and standards is to ensure that elephants are managed in a way that ensures the long term survival of elephants within the ecosystem in which they occur or may occur in future; does not disrupt

Elephants in South Africa, 2008	the ecological integrity of the ecosystems in which elephants occur; enables the achievement of specific management objectives of protected areas, registered game farms, private or communal land; ensure the sustainable use of hair, skin, meat and ivory products; is ethical and humane; and recognises their sentient nature, highly organised social structure and ability to communicate
NEM: BA Norms and Standards for the Marking of Rhinoceros and Rhinoceros Horn, and for the Hunting of Rhinoceros for Trophy Hunting Purposes, 2018	These standards provide for the marking of live rhinoceros and any rhinoceros horn; management of hunting rhinoceros; collection of samples for DNA profiling. The provisions of these standards are read in conjunction with the provisions of the Threatened or Protected Species Regulations, 2007, published in Government Notice No. R.152 in Gazette No. 29657 of 23 February 2007
NEM: PAA Norms and Standards for the Management of Protected areas in South Africa, 2016	<p>The purpose of these norms and standards is:</p> <ul style="list-style-type: none"> • to ensure the South Africa's protected areas fulfil the purpose for which they were declared as set out in section 17 of the Act; • to ensure that human induced disturbance within or originating outside of protected areas is avoided, and where such cannot be achieved is minimised and the impacts remedied; • to provide a goal for protected area management authorities to strive for in managing their protected areas; • to ensure protected areas are managed efficiently and effectively.
Norms and Standards for the Inclusion of Private Nature Reserves in the Register of Protected Areas of South Africa, 2017	<p>The purpose of these norms and standards is to-</p> <ul style="list-style-type: none"> o verify the existence of private nature reserves in practices, not only in name; o provide for the recognition of the private nature reserves as bona fide protected areas in terms of the Act; o secure the continued integrity of private nature reserves as natural areas supporting South Africa's biological diversity and its landscapes through their management; and o ensure that only verified private nature reserves are included into the National Protected Areas Register and into the Protected Areas Database.
CLIMATE CHANGE AND AIR QUALITY	
NEM: AQA National Ambient Air Quality standards, 2009	These standards define the quality of air that is not harmful to human health and the environment. They are used as yardstick to measure the efficiency of air quality interventions.
NEM: AQA National Ambient Air Standard for Particulate Matter	

with Aerodynamic Diameter less than 2.5 Micron Metres (PM_{2.5}), 2012	
Declaration of a Small Boiler as a Controlled Emitter and Establishment of Emission Standards, 1 November 2013	These standards provide for the control of emission of combustion pollutants from the boilers, by establishment of emission standards.
List of Activities which result in Atmospheric Emission which have or may have a significant Detrimental Effect on the Environment, Including Health, Social Conditions, or Cultural Heritage, 22 November 2013	Provides a list of significant pollution sources in the country (that need to be licensed through atmospheric emission licenses). Furthermore, this notice establishes emission standards for pollutants that have to be controlled to meet ambient air quality standards.
Declaration of a Small-Scale Char and Small-Scale Charcoal Plants as Controlled Emitter and Establishment of Emission Standards, 2015	These standards establish acceptable emission levels from the small-scale char and small-scale charcoal plants.
Declaration of Temporary Asphalt Plants as a Controlled Emitter and Establishment of Emission Standards, 28 March 2014	These standards establish acceptable emission levels from the temporary asphalt plants.
CHEMICALS AND WASTE MANAGEMENT	
NEM: WA National Standards for the Scrapping or Recovery of Motor Vehicles, 2013	The standards aim at controlling the scrapping or recovery of motor vehicles at a facility that falls within the threshold as described in the standards in order to prevent or minimize potential negative impacts on the bio-physical and socio-economic environment.
NEM: WA National Standards for the Extraction, Flaring or Recovery of Landfill Gas, 2013	The standards aim at controlling the extraction, flaring or recovery of landfill gas at facilities as described in the standards in order to prevent or minimize potential negative impacts on the bio-physical and socio-economic environment.
NEM: WA National Norms and Standards for the Storage of Waste, 2013	The purpose of these norms and standards is to provide a uniform national approach relating to the management of waste storage facilities; ensure best practice in the management of waste storage facilities; and provide minimum standards for the design and operation of new and existing waste storage facilities.

NEM: WA National Domestic Waste Collection Standards, 2011	It is recognized that the South Africa is a developing country and the purpose of setting standards is to ensure a service to all while complying with health and safety regulations without unnecessarily changing current creative collection processes as long as they function well and deliver a service of acceptable standard to all households. These standards are therefore applicable to all domestic waste collection services throughout the country.
NEM: WA Norms and Standards for the Remediation of Contaminated Land and Soil Quality in the Republic of South Africa, 2014	The purpose of these norms and standards is to provide a uniform national approach to determine the contamination status of an investigation area; limit uncertainties about the most appropriate criteria and method to apply in the assessment of contaminated land; and provide minimum standards for assessing necessary environmental protection measures for remediation activities.
NEM: WA National Norms and Standards for Disposal of Waste to Landfill, 2013	These Norms and Standards determine the requirements for the disposal of waste to landfill as contemplated in regulation 8(1)(b) and (c) of the Waste Classification and Management Regulations, 2013.
National Norms and Standards for the Sorting, Shredding, Grinding, Crushing, Screening or Baling of General Waste, 2017	The purpose of these Norms and Standards is to provide a uniform national approach relating to the management of waste facilities that sort, shred, grind, crush, screen, chip or bale general waste.
National Norms and Standards for the Assessment of Waste for Landfill Disposal, 2013	These Norms and Standards prescribe the requirements for the assessment of waste prior to disposal to landfill in terms of regulation 8(1)(a) of the Waste Classification and Management Regulations, 2013.
REGULATORY COMPLIANCE AND SECTOR MONITORING	
NEMA Adoption of the Gauteng Provincial Environmental Management Framework Standard and Exclusion of Associated Activities from the Requirement to Obtain an Environmental Authorisation in terms of Section 24(2)(d) and 24(10)(1) read with Section 24(10)(d) of the National Environmental Management Act, 1998, for the Implementation of the Gauteng Provincial Environmental Management Framework	<p>The purpose of the Standard is to provide rules which must be complied with, ensuring-</p> <ul style="list-style-type: none"> • compliance to the principles contained in section 2 of the NEMA and the duty of care in terms of section 28(1) of the NEMA; • sustainable development within Gauteng Province; and • compliance to management measures, based on which activities are excluded from the requirement to obtain an environmental authorisation.

4.3 DESCRIPTION OF THE POLICIES, PLANS AND PROGRAMMES OF DFFE THAT ARE DESIGNED TO ENSURE COMPLIANCE WITH ITS POLICIES BY OTHER ORGANS OF STATE AND PERSONS

In pursuance of its mandate, DFFE has policies, plans and programmes that in their nature need to be coordinated nationally as various spheres of government and sector departments have a role to play. This section therefore outlines these instruments as well as how it will ensure compliance by other organs of state. These policies, plans and programmes are illustrated in the table below.

Table 9: Compliance with DFFE's policies

Plan or policy	What is the policy about?	How will the DFFE ensure compliance to the policy, plan or programme by other organs of state	List of affected organs of state	What are the responsibilities of the affected organs of state?	Resources to ensure compliance	Lifespan of the policy, plan, or programme
National Implementation Plan for the Stockholm	In line with the requirements of the Convention and realizing the need to take the necessary measure to prevent the harmful impacts of persistent organic pollutants (POPs), South Africa has developed its National Implementation plan (NIP) with the	National Committee for Chemicals Management (NCCM) and Multi Stakeholder Committee for Chemicals Management (MCCM)	DFFE, DWS, DALRRD, DoL, DoH, DTIC, ITAC, SARS, DSI, SAMSA	DoH role in chemicals management is to protect human health by ensuring a sustainable, safe and healthy environment for South Africans and the protection of public health and the environment by providing adequate regulatory tools and comprehensive environmental health services. The Department administers the National Health Act, 2003 (Act No. 61 of 2003), the Hazardous Substances Act,	Budget allocations and staff	Ongoing

4.4 DESCRIPTION OF PRIORITIES REGARDING COMPLIANCE WITH DFFE POLICIES BY OTHER ORGANS OF STATE AND PERSONS

This section of the EMP provides a description of priorities regarding compliance with DFFE policies by other organs of state. Below is a table describing the priorities regarding compliance with DFFE policies by other organs of state.

Table 10: Priorities regarding compliance with DFFE policies by other organs of state and persons

Priority/ Problem Statement	Key departmental response to be introduced by DFFE to ensure compliance	Description of measures to be introduced by DFFE to ensure compliance by organs of the state	Name of affected organ(s) of state
South Africa is committed to a transition towards a low carbon and climate resilient society. The adoption of the National Climate Change Policy in 2011, as well as the recent ratification of the Paris agreement are critical steps towards improving the country's ranking amongst the world's biggest greenhouse gas emitters.	<p>Climate change coordination, development and implementation of climate response regulatory framework and plans:</p> <ul style="list-style-type: none"> • Support the establishment of the Presidential Climate Change Commission • Finalisation of the Climate Change Bill • Finalise the National Climate Change Adaptation Strategy and support provinces and municipalities with development and implementation of climate adaptation plans 	<p>Climate change regulatory framework and tools developed and implemented</p> <p>National Climate Change Act implemented:</p> <ul style="list-style-type: none"> • Adaption systems • Mitigation systems 	Provinces, municipalities and national departments
Although in most parts of the country the air quality is relatively good, there are priority/ specific areas where air quality improvements have not been realized fast enough. In South Africa, air pollution continues to be a problem, and the levels of SO ₂ , PM, and O ₃ , are a cause for concern. Exposure to air pollution results in numerous respiratory health problems in people and the effects are more pronounced among the elderly, young and also	<p>Establishment of regulatory framework for air quality management: In order to ensure the progressive realisation of everyone's right to air that is not harmful to health and well-being it is imperative that there is progressive reduction in atmospheric pollutants to levels that result in full compliance with ambient air quality standards. Measures taken to improve air quality:</p> <ul style="list-style-type: none"> • Declaration of hotspots as priority areas, development and 	<p>National Atmospheric Emission Inventory System (NAEIS) Reporting</p> <ul style="list-style-type: none"> • South African Air Quality Information System (SAAQIS) • Inter-Ministerial Committee established • Priority Area Working Group established (communities, NGOs and industry) • 2nd generation Vaal Triangle Airshed Priority Area (VTAPA) air quality 	Provinces, municipalities and national departments

Priority/ Problem Statement	Key departmental response to be introduced by DFFE to ensure compliance	Description of measures to be introduced by DFFE to ensure compliance by organs of the state	Name of affected organ(s) of state
<p>more evident in people with existing respiratory health conditions. The main pollution sources are industrial and mining related emissions, domestic fuel burning, burning of waste and vehicle emissions. A persistent concern is the level of pollution from domestic fuel burning and the associated health effects. Low income households and informal settlements are dependent on domestic fuels, such as coal, paraffin and wood used for cooking and heating.</p> <p>Exposure to unsafe ambient pollutant concentrations and associated health effects:</p> <p>Poor air quality is harming people's health in some areas (i.e. respiratory diseases).</p> <p>Air quality in low dense income settlements remains a concern.</p> <p>The DFFE implements the National Waste Management Strategy which is aimed at minimizing the amount of waste generated and going to landfill sites to unlock economic opportunities.</p>	<p>implementation of air quality management plans to concentrate efforts to reduce air pollution.</p> <ul style="list-style-type: none"> Regulation of industrial emissions using both section 21 and section 23 Notices of the NEM: AQA. 	<p>management plan (AQMP) approved and implemented</p> <ul style="list-style-type: none"> 2nd generation Highveld Priority Area (HPA) AQMP approved and implemented 	Provinces, municipalities and national departments

Priority/ Problem Statement	Key departmental response to be introduced by DFFE to ensure compliance	Description of measures to be introduced by DFFE to ensure compliance by organs of the state	Name of affected organ(s) of state
<p>This is done to promote a recycling economy ethos through various recycling and waste beneficiation initiatives. These initiatives need to be expanded and grown on a larger commercial scale to offer more value to beneficiaries and enterprise support programmes to the informal sector. Even though waste collection services have improved significantly in recent years, there are still areas in the country where access to these services need to be improved. Data collection, reporting on waste volumes and management of increasing waste volumes has proved problematic. There is also an urgent need to address the licensing status of landfill sites and where licenses are in place, compliance to license conditions must be enforced.</p>	<p>recycling (increased percentage of households with basic waste collection).</p> <p>Providing support to municipalities in licensing of unlicensed waste landfill sites or closing of unlicensed sites in other areas.</p> <p>Development of policy and legislative mechanisms and implementation of these instruments need to be enhanced.</p> <p>Extended Producer Responsibility (EPR): Implementation of plans and measures for prioritized waste streams (Paper & packaging, E-Waste Lighting and Waste tyres) Waste tyres, diversion of 30% (51 078 of 170 266) of waste.</p>	<p>Industrial Waste, Municipal Waste and Product design & Waste Minimization)</p> <p>Extended Producer Responsibility (EPR) in terms of section 18 of NEMWA for 3 prioritized waste streams implemented to achieve:</p> <ul style="list-style-type: none"> • Notice on Extended Producer Responsibilities measures and programme gazetted. • Paper & packaging waste diversion of 64% (2 519 tonnes of 3 877 tonnes) of waste • E-waste diversion of 21% (77 000 of 360 000) of waste 	

Priority/ Problem Statement	Key departmental response to be introduced by DFFE to ensure compliance	Description of measures to be introduced by DFFE to ensure compliance by organs of the state	Name of affected organ(s) of state
<p>The DFFE and other key sector partners have over the years implemented successful programmes (Working for Land & Working for Forests) for the restoration and rehabilitation of degraded ecosystems. However, land degradation and soil erosion still remain a serious challenge, undermining the productive potential of the land. Degradation continues to threaten the local resource base upon which rural communal livelihoods depend.</p> <p>Over 70% of South African land surface has been intensely affected by a variety of soil erosion.</p> <p>Over 0.7 million ha of land is degraded and left bare by soil erosion (sheet and gully erosion).</p> <p>It is estimated that almost 9,000 plant species have been introduced to South Africa so far. Of these, about 161 species are deemed invasive, covering ten percent of the country</p>	<p>Sustainable Land use management: Ensure greater alignment of sustainability criteria in all levels of integrated and spatial planning as well as in project formulation.</p> <p>Restoration and rehabilitation of degraded ecosystems: The hectares of land rehabilitated will be increased each year to contribute to ecosystem resilience.</p>	<ul style="list-style-type: none"> Lighting waste diversion of 10% (27 181 tonnes of 271 810) of waste <p>National Forests Act, 1998 (NFA) Amendment Bill approved Regulations developed. National REDD+ Strategy approved</p>	<p>Provinces, municipalities and national departments</p>

Priority/ Problem Statement	Key departmental responses to be introduced by DFFE to ensure compliance	Description of measures to be introduced by DFFE to ensure compliance by organs of the state	Name of affected organ(s) of state
<p>The country has over the years implemented a strategy on expanding its conservation estate towards levels which will ensure adequate protection of biodiversity. A land area equating to a minimum of 0.5% of South Africa's total land area is added to the protected area network annually. However, the current protected area network is still inadequate for sustaining biodiversity and ecological processes. This is largely due to the fact that only 22% of terrestrial ecosystem types is well protected and 36% completely unprotected.</p> <p>Due to the multifaceted value in South Africa's biodiversity, many plants and animals are subjected to exploitation. A total of 192 plants species are known to be threatened by direct use or are harvested at levels that are not sustainable. The natural resources (fauna and flora) are being exploited in an unsustainable manner, threatening the functioning of ecosystems that may undermine social and economic development. It is estimated that at least 10 million hectares of land in South Africa has been invaded by invasive alien plant species with an estimated water use of 3, 303million m³ per annum.</p>	<p>Expansion of the conservation estate: Land protection and conservation by gradually increasing the percentage of land mass under conservation in each year from a current baseline of 12.96 % to 15.7% (19 175 164 / 121,909,000 ha) by the year 2024.</p> <p>To preserve biodiversity and protected ecosystem and species. The number of species under formal protection should increase and the proportion of species threatened with extinction should decline.</p> <p>Equitable sharing of benefits: Implementation of policies and interventions aimed at promoting equitable sharing of benefits derived from biodiversity.</p> <p>Biodiversity Economy: Increase the contribution of the biodiversity sector to economic growth and development.</p>	<p>15.7% (19 175 164 / 121,909,000 ha) in total under conservation for 2023/2024, 0.5% of land under conservation added</p> <p>National Joint Wetlands Management Policy developed NBF approved</p>	Provinces, municipalities and national departments

Priority Problem Statement	Key departmental response to be introduced by DFFE to ensure compliance	Description of measures to be introduced by DFFE to ensure compliance by organs of the state	Name of affected organ(s) of state
<p>The key drivers of biodiversity loss include unsustainable use, illegal harvesting and unequitable sharing of benefits.</p> <p>The DFFE implements the "Working for Wetlands Programme" in partnership with the DWS and the DALRRD which is aimed at ensuring the rehabilitation and protection of wetlands. In South Africa the "outright loss of wetlands is estimated to be more than 50% of the original wetland area. 65% of wetland types have been identified as threatened, 48% are critically endangered, 12% are endangered and five percent are vulnerable. Floodplain wetlands have the highest proportion of critically endangered ecosystems.</p> <p>An estimated 50% of our wetlands have been destroyed or converted to other land uses (serve as filtration systems and regulators of water flow). South Africa's coastline and ocean are largely in a good environmental state. There are however, a number of concerns in these sub-sectors of the environment which require intervention. These challenges include</p>	<p>The formal protection, restoration and rehabilitation of wetlands: Need to be strengthened through improvements in land use planning, land and development management policies as well as operational and regulatory means at various scales. More than 165 wetlands will be rehabilitated per annum and management plans developed for all Ramsar sites.</p>	<p>2500 hectares of land for indigenous species cultivated</p>	<p>Provinces, municipalities and national departments</p>
<p>Protected ecosystems and species: Develop and implement effective strategies for the management of the oceans' environment. Increasing total area of the Exclusive Economic Zone which is declared as new offshore protected area and developing marine</p>	<p>Final research report on possible additional 5% of oceans and coastal area protection compiled</p>	<p>Provinces, municipalities and national departments</p>	

Priority/ Problem Statement	Key departmental response to be introduced by DFFE to ensure compliance	Description of measures to be introduced by DFFE to ensure compliance by organs of the state	Name of affected organ(s) of state
<p>higher pollution levels around coastal metropolitan areas. The impact of pollution and reduced fresh water flow through estuaries (together with extractive pressure), leading to deteriorating environmental health and the risk of oil spillages in the coastline, coastal waters and islands. The exploitation of marine resources continues to expand in ways that are not always predictable.</p> <p>Some sand-mining or sand-winning, takes place along South Africa's coastline, with much of the existing activity being undertaken illegally, making it difficult to estimate its value.</p> <p>The severity of wastewater pollution in the marine environment has continued to grow.</p> <p>The overexploitation of natural resources from the ocean and the coastal zone.</p> <p>Unplanned and uncontrolled coastal development continue to pose severe threats.</p>	<p>protected areas management plans for effective management of declared areas.</p>		

4.5 DESCRIPTION OF THE EXTENT OF COMPLIANCE WITH DFFE POLICIES BY OTHER ORGANS OF STATE

This section of the plan provides a description of the challenges of complying with selected DFFE policies against the expected state of compliance with policy. Furthermore, an indication of the challenges of complying with the preparation and submission of EIPs and EMPs by organs of state listed in Schedules 1 and 2 of NEMA is provided.

Table 11: Extent of compliance with DFFE policies by other organs of the state

Policy	Extent of compliance with policy		
	Description of expected state of compliance	Organ of State expected to comply	What are the compliance challenges?
White Paper on Environmental Management Policy for South Africa, 1998	<p>Use of environmental policy by all spheres of government. The policy intends to achieve a bold paradigm shift in government policy that introduced an integrated and coordinated management regime that:</p> <ul style="list-style-type: none"> addresses the total environment and all human activities impacting on it, and will ensure that all aspects of environmental governance including norms, standards, legislation, administration and enforcement are dealt with uniformly across departments and in all spheres of government 	All spheres of government and their entities	Non-aligned and uncoordinated government policies.
National Policy for the Provision of Basic Refuse Removal Services to Indigent Households, 2011	The purpose of the National Policy for the Provision of Basic Refuse Removal Services to Indigent Households is to ensure that poor (indigent) households have access to at least basic (essential) refuse removal services from the concerned	Provinces and municipalities	South African municipalities face a number of challenges with respect to delivering an effective and sustainable waste service to all households, including insufficient budget, skilled capacity, lack of appropriate equipment

	<p>municipality. Meeting this purpose requires aligning the National Policy for the Provision of Basic Refuse Removal Services to Indigent Households with already existing key relevant legislation, indigent policies for different municipalities, financial management systems, while being mindful of the need to ensure that there is uniformity when dealing with various cases of the indigent households.</p> <p>Oceans policies seek to improve sectoral management of the ocean sector and planning and management across sectors for accumulated and aggregated impacts. Thus the expected compliance is alignment of policies and interventions.</p>		<p>and poor access to service areas. These challenges are exacerbated by growing urban populations who need access to municipal services and migration from rural to urban areas. South Africa's rapidly growing economy is also expected to see increasing volumes of waste being generated.</p>
<p>White Paper on the National Environmental Management of the Ocean, 2014</p>		<p>All spheres of Government</p>	<p>Lack of alignment of policies and interventions</p>
<p>White Paper on National Climate Change Response, 2011</p>	<p>The expected state of compliance with this White Paper will be the achievement of Government's vision for an effective climate change response and the long-term, just transition to a climate-resilient and lower-carbon economy and society. South Africa's response to climate change has two objectives:</p> <ul style="list-style-type: none"> • Effectively manage inevitable climate change impacts through interventions that build and sustain South Africa's social, economic and environmental resilience and emergency response capacity. • Make a fair contribution to the global effort to stabilise greenhouse gas (GHG) concentrations in the atmosphere at a level that avoids dangerous anthropogenic interference with the climate system within a timeframe that enables economic, social and environmental development to proceed in a sustainable manner. 	<p>All spheres of Government</p>	<p>Challenges are around business buy-in on mitigation aspects.</p>

<p>White Paper for Sustainable Coastal Development in South Africa, 2000</p>	<p>Organs of state are therefore expected to align their interventions.</p> <p>Historically activities that are undertaken in the ocean and coastal environments have been regulated by individual departments and other organs of state. However, this is done with regard to their respective economic mandates and does not always adequately consider the mandate of conservation and protection or a holistic approach to the management of pressures. A coordinated approach will facilitate efficiencies; and cost saving in sectors cooperating to support each other's efforts to expand existing sectors and explore new sectors. Amongst others, South Africa's ocean policy therefore takes cognisance of the responsibilities in the marine area under its national jurisdiction to ensure co-ordination and harmonisation of policies, legislation and actions relating to the environment at an intergovernmental level.</p>	<p>DFFE and coastal provinces</p>	<p>Continuing limited coordination and harmonisation of planning, implementation and reporting by coastal provinces.</p>
<p>National Strategy for Sustainable Development, 2011</p> <p>National Development Plan Chapter 5</p>	<p>"South Africa aspires to be a sustainable, economically prosperous and self-reliant nation state that safeguards its democracy by meeting the fundamental human needs of its people, by managing its limited ecological resources responsibly for current and future generations, and by advancing efficient and effective integrated planning and governance through national, regional and global collaboration". In order to achieve this, there are a set of interventions, indicators that should be incorporated in plans, and institutional arrangements where relevant organs of state (including non-state parties) participate. There are also feedback and reporting mechanisms on progress with the indicators.</p>	<p>All spheres of government and public entities</p>	<p>Lack of integration of the national strategy into organs of state's plans. Thus limiting reporting and participation in the national structures as well as interventions undertaken.</p>

<p>White Paper on Marine Fisheries Policy, 1997</p>	<p>The objective of the Marine Fisheries Policy is to improve the overall contribution from the fishing industry to the long-term vision of a democratic South Africa (as stated in the Macro-Economic Strategy presented by the Department of Finance) which is</p> <ul style="list-style-type: none"> • a competitive, fast-growing economy which creates sufficient jobs for all work-seekers • a redistribution of income and opportunities in favour of the poor • a society in which sound health, education and other services are available to all • an environment in which homes are secure and places of work are productive. <p>The paper sets out the main policy principles that the Government of South Africa will endeavour to implement through its marine fisheries management institutions in order to achieve this overall policy objective.</p>	<p>All spheres of government and public entities</p>	<p>The exploitation of the living marine resources of South Africa.</p>
<p>White Paper on Sustainable Forest Development in South Africa: the Policy of Government of National Unity, 1997</p>	<p>The overall goal of Government is to promote a thriving forest sector, utilised to the lasting and sustained benefit of the total community, and developed and managed to protect and to improve the environment.</p> <p>The broad aim of the White Paper policy is to weld together the three strains of conservation forestry, commercial forestry and community forestry.</p>	<p>All spheres of government and public entities, communities</p>	<p>Challenges of sustainable relationships between people and forest resources.</p>

Table 12 below represents compliance by organs of the state with the EIPs and EMPs for the period 2015-2020 (please note the table uses the old departmental names because the work in the table dates back before reconfiguration of governments departments occurred).

Table 12: EIP and EMP compliance of previous years by other organs of state

4.6 ARRANGEMENTS FOR COOPERATION WITH OTHER NATIONAL DEPARTMENTS AND SPHERES OF GOVERNMENT

This section provides an overview of institutional arrangements including structures, procedures and agreements implemented by DFFE to facilitate co-ordination and co-operation with national, provincial and local government departments and environmental stakeholders. Furthermore, the section outlines co-operative arrangements that are co-ordinated by other sectors in which DFFE participates. Co-operative arrangements provided in this section are categorized into internal (i.e. DFFE co-ordinated) and external (i.e. other sectors' co-ordinated) arrangements.

Table 13: Internal cooperation arrangements

Name of co-operation mechanism (including identification of whether it is a committee, MoU, etc.)	Description of the purpose of the co-operation mechanism	Does the co-operation mechanism have a limited lifespan? If so what is that lifespan?	Who are the parties, role-players, etc. to the co-operation mechanism?	Are the parties, role-players committed to the mechanism?
Oceans Economy Coordinating Committee	The purpose of the Committee is to coordinate the implementation of the Oceans Economy Plan	No	National departments (DFFE Chairs)	Yes
Mintech	The purpose of the Mintech (intergovernmental technical structure) is to maintain and implement effective intergovernmental relations that ensure the environmental sector responds to government priorities, goals and sustainable development agenda. The roles of this intergovernmental technical structure are to:	No	Director-General of DFFE (as Chairperson); Head of Departments (HoDs) responsible for environmental mandate from provinces or their alternates; SALGA; Director General or	Yes

Name of co-operation mechanism (including identification of whether it is a committee, MoU, etc)	Description of the purpose of the co-operation mechanism	Does the co-operation mechanism have a limited lifespan? If so what is that lifespan?	Who are the parties, role-players, etc. to the co-operation mechanism?	Are the parties, role-players committed to the mechanism?
	<ul style="list-style-type: none"> advise the intergovernmental forum (Minimecs) on matters affecting the environment sector; refer crosscutting issues including legislation and high-level policy issues to the relevant working group; assist working groups in formulating priorities and work plans aligned to government priorities; develop and identify policy, legislation and strategy to protect the environmental sector; coordinate and secure mutual support amongst all the stakeholders in fast-tracking service delivery and improvement of the sector; monitor and report, on an on-going basis, on the implementation of the environmental sector priorities; and identify and resolve emerging bottlenecks which impact on the implementation of the sector's policy and legislation. 		representatives of DoHS; DWS; DMRE; DALRRD; DSI; DFFE; DDGs and CDs, CEOs or representatives of environmental agencies; and municipal managers of metropolitan municipalities	
<p>11 Working Groups, namely:</p> <ul style="list-style-type: none"> Working Group I: Biodiversity & Conservation Working Group II: Air Quality 	<p>The overall objective of the working group is to support Mintech (Technical Implementation Forum) to achieve an effective governance framework and ensure that is maintained and implemented in a manner that ensures that the unacceptable past, current and future impacts on the quality of the environment are minimized, mitigated or managed in line with government policy, legislation, goals and strategies.</p>	No	Representatives for DFFE and provincial departments of environment as well as entities	Yes, but there are some challenges with attendance and levels of representation in some Working Groups

Environmental Policy and Law Reform • Working Group XII : Communication				
EIP/EMP Sub-committee	The Sub-committee reports to Working Group III: Planning and Coordination and gives effect to procedures for cooperative governance outlined in Chapter 3 of NEMA. It scrutinizes every EIP and EMP and makes recommendations to the Mintech through Working Group III on desired improvements to, or the extent to which, the EIP/EMP fails to comply with NEMA principles; the purpose and objectives of EIPs; and any matter relevant to the EIP/EMP. This sub-committee has developed guidelines for the evaluation of the content of EIPs and EMPs.	No	NEMA Schedules 1 and 2 organs of state	Not all of the organs of state
IDP Forums	Looks at integrated municipal planning	No	Representatives from all spheres of government (including municipalities)	Not all of the organs of state
Environmental Forums	Looks at environmental planning functions within municipalities and implementation of local government support strategy districts	No	Representatives from all spheres of government (including municipalities)	Not all of the organs of state

Name of co-operation mechanism (including identification of whether it is a committee, MoU, etc)	Description of the purpose of the co-operation mechanism	Does the co-operation mechanism have a limited lifespan? If so what is that lifespan?	Who are the parties, role-players, etc. to the co-operation mechanism?	Are the parties, role-players committed to the mechanism?
Specific sector forums lead by municipalities (e.g. waste, climate change, air quality, coastal, wetlands)	These sector forums deliberate on specifics that affect relevant municipalities and provide advice on how to address them.	No	Representatives from all spheres of government (including municipalities)	Yes
Local Government Support Task Team	Coordinates provincial and national work meant for municipalities.	No	Representatives of DFFE, provincial departments of environment and SALGA	Yes
Transfrontier Conservation Areas (TFCA) Agreement	TFCA Agreements are normally in the form of MoUs and treaties signed by Ministers and Heads of State to establish TFCAs. These agreements specify boundaries, responsibilities of parties and conditions related to respect for national sovereignty of the parties.	No	South Africa and relevant neighbouring States	Yes
MoU between DFFE and the South African National Accreditation System (SANAS)	This MoU outlines the service agreement for the development of air quality standards for air quality monitoring systems.	No	DFFE and the SANAS	Yes
Memorandum of Understanding (MoU) between South Africa and range and consumer states on cooperation in the field of biodiversity	This MoU is signed with various countries and it defines actions to be taken by the parties. It is accompanied by an implementation plan that outlines specific commitments.	No	South Africa and range and consumer states on cooperation in the field of biodiversity conservation and management	Yes

Name of co-operation mechanism (including identification of whether it is a committee, MoU, etc)	Description of the purpose of the co-operation mechanism	Does the co-operation mechanism have a limited lifespan? If so what is that lifespan?	Who are the parties, role-players, etc. to the co-operation mechanism?	Are the parties, role-players committed to the mechanism?
conservation and management				
MoU between DFFE and the National Metrology Institute of South Africa (NMISA)	This MoU outlines an agreement between the parties on the provision of testing services of all air quality monitoring instruments according to international standards.	No	DFFE and the NMISA	Yes
MoU between DFFE and the South African Weather Services (SAWS)	This MoU outlines an agreement for the hosting of the air quality information system on behalf of DFFE.	No	DFFE and the South African Weather Services	Yes
Subcommittee on EIPs and EMPs	The purpose of the Subcommittee is to provide a platform for realization of the procedures for cooperative governance outlined in Chapter 3 of NEMA.	No	All NEMA Schedules 1 and 2 Departments	Yes
Intergovernmental Committee (Waste)	Addresses waste service delivery issues and implement a programme to build the capacity of government officials in waste management.	No	DFFE, National Treasury, Dept. of Cooperative Governance, SALGA, DoHS	Yes
TFCA agreements	TFCA agreements' purpose is to state commitments of the parties to the agreement on the envisaged TFCA as well as outline their roles and responsibilities.	No	South Africa and affected neighbouring state parties	Yes
South African World Heritage Convention Committee (SAWHCC)	The purpose of the SAWHCC is to coordinate and facilitate national implementation of the World Heritage Convention.	No	DFFE, Department of Sports, Arts and Culture, Department of International Relations and Cooperation (DIRCO), provincial departments of environment, World Heritage Management	Yes

Name of co-operation mechanism (including identification of whether it is a committee, MoU, etc.)	Description of the purpose of the co-operation mechanism	Does the co-operation mechanism have a limited lifespan? If so what is that lifespan?	Who are the parties, role-players, etc. to the co-operation mechanism?	Are the parties, role-players committed to the mechanism?
			Authorities; International Council on Monuments and Site and International Union for Conservation of Nature	
People and Parks Steering Committee	The purpose of the Committee is to coordinate the People and Parks programme	No	DFFE, DALRRD, national and provincial entities and communities	Yes
Man and Biosphere Programme (MAB) National Committee	The purpose of the Committee is to guide implementation of the MAB programme	No	SALGA, national and provincial entities, DBE, United Nations Educational, Scientific and Cultural Organisation (UNESCO) National Commission, DSI, COGTA, Non-governmental Organisations (NGOs)	Yes
Biosphere Regional Forums	The purpose of the forums is to coordinate regional MAB programmes	No	Provincial departments of environment, district and local municipalities, NGOs	Yes
Permit and Enforcement Planning Committee (PEPC)	The purpose of PEPC is to discuss permits and enforcement related matters	No	DFFE and all 9 provinces	Yes

Table 14: External cooperation arrangements

MECHANISM	DESCRIPTION / PURPOSE	LIFESPAN	OTHER DEPARTMENTS	LEVEL OF COMMITMENT
Land Claims Think Tank Task Team	The purpose of the Task Team is to fast track settlement of land claims within and affecting protected areas	Ongoing	DFPE, DALRRD, provinces and national and provincial entities	Co-chair
Integrated Energy Plan (IEP) Steering Committee	The Integrated Energy Plan (IEP) Steering Committee is an inter-departmental government committee led by the DMRE to oversee the IEP development process and ensure that legislation, strategies and policies that have an impact on the energy sector are taken into account. It is supported by various working groups whose focus is on more specific policy issues and, where relevant, the provision of technical input.	Ongoing since 2013	DMRE, DSI, DWS, DoHS, DoT, DALRRD, National Planning Committee	Participant
Carbon Capture and Storage (CCS) Task Team	The CCS Team is a DoE established inter-departmental structure of all departments on which CCS cuts across. This structure coordinates different views of relevant departments on policies, Acts and Regulations with the goal of developing a common government position.	Ongoing	DMRE, National Treasury, DSI, DTIC, DWS, Department of Public Enterprise	Participant
Co-operative agreement entered into between the National Nuclear Regulator (NNR) and the DFPE [Section 6 of the National Nuclear Regulator Act, 1989 (Act No. 47 of 1989) (NNR Act)] in respect of the monitoring and control of radioactive material or exposure to ionizing radiation	This co-operative agreement is entered into in compliance with the NNR Act (section 6) requirement that all organs of state, on which functions in respect of the monitoring and control of radioactive material or exposure to ionizing radiation are conferred by the NNR Act or other legislation, must co-operate with one another in order to amongst others: (i) ensure the effective monitoring and control of the nuclear hazard; (ii) co-ordinate the exercise of such functions;	Various agreements	DMRE and NNR	Party to agreement

	(iii) minimise the duplication of such functions and procedures regarding the exercise of such functions; and (iv) promote consistency in the exercise of such functions.			
Carbon Sequestration Leadership Forum (CSLF)	The CSLF is a Ministerial-level forum that includes 23 member countries and the European Commission and is established to advance CCS technology. Membership is open to national governmental entities that are significant producers or users of fossil fuel and that have a commitment to invest resources in research, development and demonstration activities in carbon dioxide capture and storage technologies	Ongoing	National departments, various Countries representatives	Participant
Biofuels Task Team (BTT)	The BTT is tasked with the responsibility to drive the outcomes of the Biofuels Industrial Strategy.	Ongoing	DMRE (Chair), DALRRD, National Treasury, Department of Public Works and Infrastructure, DSI, DTIC, DWS, DoT, COGTA	Participant
Spatial Planning and Land Use Management Act (SPLUMA) National Coordinating Forum (NCF)	The NCF is one of the structures that drives the SPLUMA implementation by coordinating four working groups dealing with: <ul style="list-style-type: none"> • SPLUMA Regulations • Various SPLUMA guidelines • Institutional capacity establishment • Training and capacity building 	Ongoing structures	All spheres of government	Participant
National Tourism Stakeholder Forum	The National Tourism Stakeholder Forum was established in 2011 by the National Department of Tourism as a delivery mechanism for the National Tourism Sector Strategy (NTSS). This forum provides an invaluable platform for coordinating the implementation of the NTSS	Ongoing	Members of all the NTSS Implementation Work Streams;	Participant

	and process alignment between Government and the private sector.		<p>Industry associations representing different sub-sectors;</p> <p>Provincial departments with the tourism mandate;</p> <p>Relevant national sector departments whose mandate impact directly or indirectly on tourism;</p> <p>National and provincial government entities responsible for destination branding, marketing and investment;</p> <p>Community and Non-Governmental Organisations with a tourism focus; and</p> <p>Research and educational institutions.</p>
--	--	--	---

Border Management Agency (BMA) Policy and Legal Task Team	The BMA Policy and Legal Task Team is one of the intergovernmental structures established by the Department of Home Affairs (DHA) to deal specifically with policy and legal matters relating to the establishment of the BMA.	Until BMA is established	National departments, entities and agencies dealing with border related issues	Participant
Local OR Tambo International Airport (ORTIA) Border Control Operations Coordinating Committee	The Local ORTIA Border Control Operations Coordinating Committee is led by the DHA to coordinate and align organs of states' efforts in ensuring border law compliance and enforcement at port of entry/exit.	Ongoing	All organs of state active at the ports of entry/exit	Participant
Eskom – DFFE Coordination Committee	Coordination of joint projects with this state owned company.	Ongoing	Eskom	Party to agreement
DFFE – Transnet Coordination Committee	Coordination of joint projects with this state owned company.	Ongoing	Transnet	Party to agreement
South African National Road Agency (SANRAL) - DFFE Cooperative Committee	Coordination of joint projects with this state owned company.	Ongoing	SANRAL	Party to agreement
Presidential Infrastructure Coordinating Commission (PICC)	Coordinate economic development contribution of different departments. Primary aim is to expedite infrastructure development of the country's 18 Strategic Integrated Projects (SIPs)	Ongoing	DTIC	Participant
Specific sector forums lead by municipalities (e.g. waste, climate change, air quality, coastal, wetlands)	These sector forums deliberate on specifics that affect relevant municipalities and provide advice on how to address them.	Ongoing	Representatives from all spheres of government (including municipalities)	Participant
DFFE-DSI Bilateral	MOU in place for promotion of evidence and science-policy interface in environmental, science and innovation areas of common interest between the two Departments.	5 years	DSI	DG-DG Chairing

4.7 PROPOSALS FOR THE PROMOTION OF THE OBJECTIVES AND PLANS FOR THE IMPLEMENTATION OF THE PROCEDURES AND REGULATIONS REFERRED TO IN CHAPTER 5 OF NEMA

LEM is a tool used to assess the environmental impacts of development and is designed to ensure that environmental consequences of development proposals are adequately considered in the planning process to mitigate any negative impacts and to enhance any positive aspects of development proposals. It provides a holistic framework that can be embraced by all sectors of society for the assessment and management of environmental impacts and aspects associated with each stage of the activity life cycle, taking into consideration a broad definition of environment and with the overall aim of promoting sustainable development. In the South African context, Chapter 5 of NEMA outlines the purpose of LEM as to:

- (a) Promote the integration of the principles of environmental management set out in section 2 of NEMA into the making of all decisions which may have a significant effect on the environment;
- (b) Identify, predict and evaluate the actual and potential impact on the environment, socio-economic conditions and cultural heritage, the risks and consequences and alternatives and options for mitigation of activities, with a view to minimising negative impacts, maximising benefits, and promoting compliance with the principles of environmental management set out in section 2 of NEMA;
- (c) Ensure that the effects of activities on the environment receive adequate consideration before action are taken in connection with them;
- (d) Ensure adequate and appropriate opportunity for public participation in decisions that may affect the environment;
- (e) Ensure consideration of environmental attributes in management and decision-making which may have a significant effect on the environment;

Identify and employ the modes of environmental management best suited to ensuring that a particular activity is pursued in accordance with the principles of environmental management set out in section 2 of NEMA.

Table 15 below illustrates the tools proposed for the promotion of the LEM

Table 15: Tools used for the implementation of IEM

No	Tools proposed and plans	Objective
1.	Development of indicators to report five yearly on the economic impact of EIAs in different sectors (transportation, energy, mining and etc.)	To document and monitor the economic contribution of EIAs to different sectors (e.g. energy). Ensure that the effects of the activities on the environment receive adequate consideration before action are taken in connection with them.
2.	Co-ordination and integration of EIAs with waste management licenses and atmospheric emissions licenses	To integrate environmental authorisations, licenses and permits.
3.	Development of the NEMA IEM training strategy	To develop IEM skills.
4.	South African Carbon Sinks Atlas	To understand the distribution of the carbon stocks and fluxes across South Africa, to identify the land based mitigation opportunities and to conduct policy review to understand the impact of policy on sustainable land management.
5.	South African Atmospheric Emission Licensing and Inventory Portal (SAAELIP)	To manage AELs as well as the estimation and reporting of atmospheric emission inventories terms of the NEMA: AQA. SAAELIP provides a seamless integration between the management of AELs and the reporting of atmospheric emissions into the National Atmospheric Emission Inventory System.
6.	Geographical Information Systems (GIS)	Provides access to baseline environmental geospatial data, map services, printable maps and relevant documents to users of geospatial technology, government as well as the public.
7.	South African Waste Information Centre	Provides the public, business, industry and government with access to information on the management of waste in South Africa.
8.	Environmental Indicators Database	To help support environmental monitoring and reporting.
9.	National Environmental Authorisation System (NEAS)	The main objective of the portal is to promote service delivery quality through the improvement of communication between the public administrators and the public.
10.	SAAQIS	Provides a common platform for managing air quality information in South Africa.

PART D

5. MONITORING AND EVALUATION

Efforts were made to select a suite of indicators that are generally appropriate for monitoring cooperative governance around environmental management, which is the main purpose of DFFE's implementation of the provisions of Chapter 3 of NEMA in line with section 16(2). Moreover, performance indicators of institutional compliance with the mechanisms and procedures for cooperative governance are provided in this edition of the EIMP as well as sustainable development indicators. This includes indicators related to development of plans, systems and processes, representation on indicated committees, and compliance with statutory environmental management procedures. In the next five years the DFFE will, amongst others, perform the following 91 indicators for the purpose of the EIPs and EMPs.

PERFORMANCE INDICATORS	Audited Performance 2019/20	Estimated performance 2020/21	Medium-term targets 2021/22	2022/23	Five-year target up to and including 2023/24
Number of public education and awareness campaigns implemented	4 environmental awareness campaigns implemented:	Public education and awareness campaigns	Public education and awareness campaigns implemented on 4 thematic areas:	Public education and awareness campaigns	20 Environmental awareness campaigns implemented:

PERFORMANCE INDICATORS	Audited Performance 2019/20	Estimated performance 2020/21	Medium-term targets		Five-year target up to and including 2023/24
			2021/22	2022/23	
	<ul style="list-style-type: none"> • Air Quality Management • Biodiversity Economy • Climate Change • Good Green Deeds 	implemented on 4 thematic areas: <ul style="list-style-type: none"> • Climate change and biodiversity conservation • Environmental protection and waste management • Fishing rights allocation process (FRAP 2021) • Oceans Phakisa, marine protection and sustainability 	Climate change and biodiversity conservation <ul style="list-style-type: none"> • Environmental protection and waste management • Fishing rights allocation process (FRAP 2021) • Oceans Phakisa, marine protection and sustainability 	implemented on 3 thematic areas: <ul style="list-style-type: none"> • Climate change and biodiversity Conservation • Environmental protection and waste management • Oceans Phakisa, marine protection and sustainability 	<ul style="list-style-type: none"> • Air Quality Management • Biodiversity Economy • Climate Change • Good Green Deeds

E. CONCLUSION

The 2020-2024 EIMP for the DFFE represents its commitment to environmental protection and management work in the sector being both a Schedule 1 and 2 departments as per Chapter 3 of NEMA. These includes, *inter-alia*, policy, programmes, awareness (education), legislation development and implementation thereof, and compliance monitoring etc.

APPROVAL

The DFFE's 2020-2024 EIMP is approved by the Minister as signed hereunder.
