# REQUEST FOR INFORMATION ON CHEMICALS RECOMMENDED TO BE LISTED AT THE $10^{TH}$ CONFERENCE OF THE PARTIES (COP 10) TO THE STOCKHOLM, AND ROTTERDAM CONVENTIONS

The Department of Forestry, Fisheries and the Environment hereby request information on chemicals to be recommended for listing at the 10<sup>th</sup> Conference of the Parties (COP 10) under the Stockholm, and Rotterdam Conventions. Any company which manufactures, uses, sells, imports or exports, and/or is in possession of chemicals, indicated in the Schedule hereto, which are to be recommended for listing at the Stockholm and Rotterdam Conventions, are hereby invited to submit all the information requested in the Schedule to the Department of Forestry, Fisheries and the Environment within the 30 days of publication of this Notice in the Gazette. Written submissions of the requested information must be forwarded to any of the following addresses:

By post to: The Director-General Department of Forestry, Fisheries and the Environment Attention: Ms Noluzuko Gwayi Director (Senior Policy Advisor): International Chemicals and Waste Cooperation Private Bag X447 Pretoria 0001

By hand at: Environment House, 473 Steve Biko Road, Arcadia, 0083. By email: <u>gkhauoe@environment.gov.za</u>

Please note that anyone entering the Department's buildings will be subjected to COVID-19 procedures.

Any inquiries in connection with the Notice can be directed to Ms Noluzuko Gwayi, Senior Policy Advisor (Director): International Chemicals and Waste Cooperation at ngwayi@environment.gov.za or (012) 399 9854,

MS NOMFUNDO TSHABALALA DIRECTOR-GENERAL

Table 2: Chemicals scheduled for consideration for inclusion in Annex III of the Rotterdam Convention

# 1. REQUEST FOR INFORMATION ON CHEMICALS TO BE RECOMMENDED FOR LISTING AT THE 10<sup>TH</sup> CONFERENCE OF THE PARTIES (COP 10) TO THE STOCKHOLM, AND ROTTERDAM CONVENTIONS

Section 24 of the Constitution of the Republic of South Africa, 1996 states that everyone has a right to an environment that is not harmful to their health or well-being, and the Department of Forestry, Fisheries and the Environment has a responsibility to fulfil its mandate in this regard. The Department of Forestry, Fisheries and the Environment hereby affords the chemicals industry, interested and affected parties an opportunity to provide information with regards to chemicals indicated in **Tables 1 & 2** that would be recommended to be listed under the Stockholm and Rotterdam Conventions, respectively, during the upcoming Conference of the Parties (COP 10) to be held from 06 to 17 June 2022 in Geneva, Switzerland. The Stockholm and Rotterdam Conventions are global treaties and their respective primary objective is to protect the environment and human health from adverse effects of the listed hazardous chemicals.

The Department of Forestry, Fisheries and the Environment hereby requests the following information:

- Whether the chemicals in table 1 & 2 are being used in the country, and if so, for what applications are they used?
- Whether the chemicals in table 1 & 2 are being manufactured and sold locally?
- Whether the chemicals in table 1 & 2 are being imported or exported? If so, full details of imports or exports need to be provided within the 30 day period after the publication of this gazette?
- Whether you are in possession of waste containing chemicals listed in table 1 & 2?
- Whether safer alternatives to the chemicals recommended for listing have been or are being piloted for use in the various applications?
- If there are any valid reasons for not supporting the listing of the recommended chemicals?
   If there are; supporting valid data and reasons should be provided within the 30 day period after the publication of this gazette.
- What would the possible impact be, should the chemicals recommended be listed? Such an impact, if there would be any, should be valid, and rationalised in light of using safer alternatives.

The information requested above, will assist South Africa to augment informaton on the positions developed in preparation for the upcoming multilateral negotiations, to be held during the Conference of the Parties (COPs) from 06 to 17 June 2022 in Geneva, Switzerland, and in line with protecting national interests and observing South Africa's foreign policy. Furthermore, the information provided will assist South Africa to manage in an environmentally sound manner throughout their life cycle, the chemicals that have been recommended for listing, by utilising various instruments.

#### 2. CHEMICALS RECOMMENDED FOR LISTING UNDER THE STOCKHOLM CONVENTION

The listing of chemicals in Annex A of the Stockholm Convention implies that Parties must take measures to ban the production and use of the chemicals. If there are specific exemptions for use or production, they will only apply to Parties that have applied for and granted such exemptions.

The listing of chemicals in Annex B of the Stockholm Convention for restricted use implies that Parties must take measures to restrict the production and use of the chemicals listed in light of any applicable acceptable purposes and/or specific exemptions listed in the Annex.

The listing of chemicals in Annex C of the Stockholm Convention are chemicals produced or released unintentionally and Parties must take measures to reduce the unintentional releases of chemicals listed under Annex C with the goal of continuing minimization and, where feasible, ultimate elimination.

UV-328 IUPAC name: 2-(2H- Benzotriazol-2-yl)-4,6- bis(2-methylbutan-2- yl)phenol) CAS No: Phenol, 2-(2H- benzotriazol-2-yl)-4,6- bis(1,1-dimethylpropyl)- Trade Names: BDTP, BLS 1328, Chiguard 328, Chisorb 328, Cyasorb UV 2337, Eversorb 74, GSTAB 328, Hostavin 3310 P, Kemisorb 74, Lowilite 28, Milestab 328, Seesorb 704, Songsorb 3280, Sumisorb 350, Thasorb UV328, Tin 328, Tinuvin 328, UV 2337, UV 74, Uvinul 3028, Viosorb 591	2-(2H-Benzotriazol-2-yl)- 4,6-di-tert-pentylphenol	<ul> <li>UV-328 is a substituted phenolic benzotriazole (BZT) used as a UV absorber in many products.</li> <li>BZTs absorb the full spectrum of UV light and are mostly used in transparent plastics, coatings, and personal care products (PCPs). Due to their mechanism of action, their uptake of energy from UV light is reversible and nondestructive. BZTs are preferred for thermoset plastics, organic substrates, and coatings that function against weathering.</li> <li>UV-328 in particular can be used in many types of plastic polymer matrices, typically in concentrations between 0.1 and 0.5% of mass. UV-328 is used as a printing ink additive in food contact materials. Because it is not bound to the polymer, UV-328 can migrate from within the polymer matrix and eventually diffuse out of the matrix and enter the environment.</li> </ul>

Long-chain perfluorocarboxylic acids, their salts and related compounds IUPAC name: 2,2,3,3,4,4,5,5,6,6,7,7,8, 8,9,9,9- heptadecafluorononanoic acid 2,2,3,3,4,4,5,5,6,6,7,7,8, 8,9,9,10,10,10- nonadecafluorodecanoic acid CAS number: 375-95-1 335-76-2	PFNA; C 1800; Heptadecafluorononanoi c acid; Perfluoropelargonic acid	<ul> <li>Long-chain perfluorocarboxylic acids (PFCAs), their salts and related compounds are members of the per- and polyfluoroalkyl substances (PFAS) chemical class.</li> <li>Long-chain PFCAs and their salts are infrequently used in products. Nonetheless, the ammonium salt of C9 PFCA was identified as being used for surfactant applications and in the production of fluoropolymers.</li> <li>Substances that are related compounds to long-chain PFCAs have, however, been used in a range of applications, including in coating products, fabric/carpet protectors, textile impregnation agents and firefighting foams.</li> <li>C9 - C14 PFCAs, their salts and related compounds may also be unintentionally produced during the manufacturing of PFAS, including those containing a carbon chain of less than nine carbon atoms, and in other industrial processes. As a result, long-chain PFCAs may be present in certain products and articles as impurities.</li> </ul>

#### 2. CHEMICALS RECOMMENDED FOR LISTING UNDER THE ROTTERDAM CONVENTION

Listing of recommended chemicals in Annex III of the Rotterdam Convention, implies that those chemicals should be subjected to the Prior Informed Consent (PIC) procedure. The PIC procedure is a mechanism for formally obtaining and disseminating the decisions of importing Parties as to whether they wish to receive future shipments of those chemicals listed in Annex III of the Convention and for ensuring compliance with these decisions by exporting Parties. All Parties are required to take a decision as to whether or not they will allow future import of each of the chemicals in Annex III of the Convention. These decisions are known as import responses. All exporting Parties are required to ensure that the export of chemicals, subject to the PIC procedure, do not occur contrary to the decision of each importing Party.
