ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED MERU SEWERAGE PROJECT IN MERU
COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Tana Water Services Board, is proposing the construction of new sewage conveyance facilities and a Waste Water Treatment Plant (WWTP). The proposed works include construction of a sewer network of approximately 56.2 km of trunk sewers and manholes, inlet channel with screens, grit channel and parshall flume, waste stabilization ponds, overflow chamber, sludge drying beds, office block with a laboratory, two double grade 9 staff houses equipped with toilets, wash-up and changing facilities, perimeter fence, access roads and parking among other associated facilities and amenities in Meru County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Air quality	<ul style="list-style-type: none"> • Service and maintain machinery according to manufacturer’s instructions. • Spray water on access roads, stockpiles and cleared areas to minimize dust pollution. • Cover all vehicles ferrying construction materials such as sand or aggregate to avoid dispersal of particles/dust along the roads. • Provide personal protective equipment gear such as dusk masks to workers.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Soil erosion and Contamination	<ul style="list-style-type: none"> • Impose vehicle speed limits to 10 km/h in all areas within the site boundaries. • Vegetation should only be removed from clearly marked areas. • Excavated materials and stockpiled soils should be covered or kept at appropriate sites. • Undertake appropriate soil erosion control measures along the trenches and WWTP sites. • Construction vehicles and machines must be maintained properly to ensure that oil spillages are kept at a minimum. • Spill trays must be provided if refueling of construction vehicles are done on site. • Materials, fuels and chemicals must be stored in a specific and secured area to prevent pollution from spillages and leakages. The basic EMCA Regulations on of hazardous waste management must be applied fully. • Train drivers and workers on oil and fuel management.
Noise and excessive vibrations	<ul style="list-style-type: none"> • Schedule road traffic movements to normal working hours (0800Hrs – 1700Hrs). • Noisy equipment and vehicles on the site should be equipped with noise suppressing measures and kept in proper working conditions. • Provide personal protection equipment such as ear muffs to workers operating in noisy areas. • Pumps and generators should be stationed far away from areas that are sensitive to noise such hospitals. • Avoid unnecessary hooting and revving of engines.
Solid Waste	<ul style="list-style-type: none"> • Develop a Waste Management Plan in compliance with Solid Waste Regulations 2006. • Recycle or re-use solid wastes where applicable in line with sound environmental management practices. • Dispose of non-recycled wastes to sites designated by Meru Municipal Council as dumpsites. • Organic wastes from construction camps can be composted. • Solid wastes from sewage inflow and site offices should be collected and dumped at designated dumpsites. • Sludge if not suitable for agriculture should be disposed of by land filling.
Waste water management	<ul style="list-style-type: none"> • Regular monitoring and inspection of sewer lines to identify broken pipes and damaged manholes for repair or maintenance. • Use of high-quality materials that can withstand anticipated sewage loads and as recommended by the design engineers to prevent leakages and overflows. • Clear and unlog blocked sewer lines within the shortest time possible to contain sewage spills and overflows. • Clean and disinfect contaminated site.
Surface and ground water contamination	<ul style="list-style-type: none"> • Construct oil-water interceptors or sumps. • Provide pit latrines/portable toilets at the camp and construction sites for use by workers.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> • Store all raw materials away from the vicinity of water bodies along the project sites to avoid contamination. • Sensitize workers on proper waste disposal.
Damage to existing underground infrastructures	<ul style="list-style-type: none"> • Obtain maps of existing underground infrastructure from relevant institutions to avoid damaging them. • Locate, mark and exercise caution when excavating trenches to minimize chances of damaging such infrastructure. • Notify responsible institutions of any damage to ensure that services are restored within the shortest time possible.
Occupational health and safety	<ul style="list-style-type: none"> • Conform to all the requirements of the Occupational Health and Safety Act, 2007. • Provide ample warning signs and protection around open excavations, stacks of material, etc. • Train workers on the use of firefighting equipment and first aid. • Ensure that persons handling equipment and materials are suitably trained, and supervised. • Ensure that emergency contact numbers of the police, fire brigade and ambulance are available at the construction sites. • Provide sanitary facilities at construction sites and potable drinking water. • Report and record health, safety and environmental incidences as required by law.

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (c) County Director of Environment, Meru County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED ASBESTOS DISPOSAL SITE (LAND FILL)
LOCATED IN MWAWESA, KALOLENI DIVISION, KALOLENI
CONSTITUENCY, KILIFI COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Kaminara Agencies Limited, is proposing to provide a facility that will offer solutions on safe disposal of asbestos from various entities that intend to dispose-off the asbestos roofings within the coastal region. The proposed site is located at Mwawesa about 18 kilometers from Kaloleni Town and approximately 10 km off Mombasa Road in Kaloleni Division, Kaloleni Constituency, Kilifi County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Air quality	<ul style="list-style-type: none"> • Air monitoring should be done continuously in areas related to asbestos removal works.
Affected flora and fauna	<ul style="list-style-type: none"> • Preserve as possible indigenous trees and other surrounding vegetation that need not be removed.
Cleanliness of premises and plant	<ul style="list-style-type: none"> • Workplaces are maintained in a clean state and are free of asbestos waste.
Solid waste	<ul style="list-style-type: none"> • Inform cleaning and disposal workers of their responsibilities in terms of the EMP. • Ensure that all waste removal workers comply with the Waste Regulations of 2006. • Collect waste paper generated at the work site in scrap paper bins.
Underground water contamination	<ul style="list-style-type: none"> • Construct a concrete lining in the asbestos disposal site. • The bottom to be at least 1m above the sea level.
Temporary storage	<ul style="list-style-type: none"> • Temporary site should be within the premises of asbestos material. • Double wrap in 500 gauge or higher plastic sheet and label appropriately. • Collect debris in sealed polythene woven bags or any other air tight containers. • The bags should then be wrapped, into stacks for easy loading into transport vessels. • Storage area must be restricted and secured on a 24 hour basis.
Management of temporary waste storage sites	<ul style="list-style-type: none"> • Ensure management of temporary waste storage sites is in line set procedures and legal requirements. • Register and monitor waste volumes at the temporary waste storage site. • Oversee the physical removal of the waste from the temporary waste storage sites.
Occupational health and safety	<ul style="list-style-type: none"> • Construction work will be limited to daytime only. • Workers to be adequately insured against accidents. • All workers will be sensitized before construction begins on how to control accidents related to construction. • Keep record of the public emergency service telephone numbers including: police, fire brigade, ambulance at strategic points. • First aid kits at strategic places in the site. • All workers to wear protective gear during construction e.g. helmets. • Provide clean water and food to the workers on accident response.
Disposal scheduling and hours	<ul style="list-style-type: none"> • The disposal and cleaning activities should be limited from 7 am or sunrise (whichever is later) to 5 pm or sunset.
Post-disposal	<ul style="list-style-type: none"> • All transportation vessels and re-useable containers in contact with the asbestos waste shall be cleaned at the disposal site.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> • The disposal site should be maintained including the warning signs, the fence, and the gate to prevent vandalism and interference. • Human activities which might interfere with the buried asbestos should not be allowed at the disposal site; • The waste generator shall notify the Authority in writing on completion of disposal of asbestos waste

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Nyanza Golf Club Trustees, is proposing to refurbish and expand the golf course to a modern sports facility. The proposed project will comprise of the expansion from a 9No. holes to an 18No. golf course with a club house and irrigation equipment and other associated support facilities and amenities on plot L.R. No. Kisumu Municipality/Block 2/16 along Kisumu-Busia Road in Kisumu City, Kisumu County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Air quality	<ul style="list-style-type: none"> • Provision of dust masks to workers. • Use labour intensive methods. • Properly stack construction materials. • Screen construction area. • Stop work during strong winds. • Water site to reduce dust emissions.
Noise and excessive vibrations	<ul style="list-style-type: none"> • Operation during daylight hours only. • Provision of ear muffs to site workers.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
	<ul style="list-style-type: none"> • Use noise barrier around the construction site viz plywood, corrugated iron sheets, blankets, etc. • Place noisy equipment far from nearest noise receptor. • Construction to be done only during the day.
Solid waste	<ul style="list-style-type: none"> • Sort out the waste from the source by providing easily identifiable waste receptors on site. • Ensure a central transfer point for collection. • Contract a registered waste collection agent.
Liquid waste management	<ul style="list-style-type: none"> • Adequate portable or permanent sanitation facilities serving all workers should be provided at the site. • Careful disposal of waters from equipment washings into public sewer system. • Ensure effective drainage into the septic tank. • Regular maintenance checks on drainage system. • Proper and constant maintenance of the premises plumbing system. • Workers should be notified of sanitation requirements in the premises.
Storm water management and water conservation	<ul style="list-style-type: none"> • Roof drainages installed and connected to street drains or collected into the underground tank for use in cleaning, toilet flushing and washing purposes. • Installation of water meters to monitor amount used. • Installation of water saving tap models.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED CONSTRUCTION OF HYDRO-ELECTRIC
POWER PROJECT AT NDANU FALLS ON RIVER YALA, SIAYA
COUNTY

INVITATION OF PUBLIC COMMENTS

Pursuant to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Gem Gen Power Limited has proposed a Hydro-Electric Power Project which is expected to generate 9.5 Mega Watts (MW) of power in Phase I. The generation facility will be located within a natural island adjacent to Ndanu Falls on Yala River, Siaya County.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Construction material sourcing Impacts	<ul style="list-style-type: none"> Excavate gravel from a private land which the contractor has hired and rehabilitate the affected areas once the sourcing of gravel is over for the project. Carry out inspection of each of the site's soil stability before excavation. Burrow pits and quarries shall be located more than 20 meters from watercourses in a position that will facilitate the prevention of storm water runoff from the site from entering the watercourse. Cordon off the gravel site areas to keep livestock and children off. Maintain fences and "make good" of the sites afterwards. Prepare and implement burrow pit plans and burrow pit rehabilitation plans, which would minimize the risk of erosion. Decommission the burrow pits upon completion of the Contract and reinstate the land to its natural condition by grading excavations and planting suitable saplings. The Contractor is expected to follow the sand harvesting regulations published by NEMA.
Clearing of vegetation	<ul style="list-style-type: none"> Minimal vegetation will also be cleared at the Burrow Pit site. The Contractor will also ensure proper demarcation of the Project area to be affected by the construction works. This will be aimed at ensuring that any loss of vegetation is restricted to the actual Project area and avoid spillover effect on the neighboring areas.

Impacts

Noise and vibration pollution

Proposed Mitigation Measures

- Construction shall be carried out in accordance with the standard procedures.
- All plants and construction equipment's shall be fitted with noise control measures and shall strictly conform to the Environmental Management and Coordination (Noise and Excessive Vibration Pollution) (Control) Regulations, 2009 and the Occupational Safety and Health Act, 2007.
- Prescribe noise reduction measures if appropriate e.g. restricted working hours, transport hours and noise buffering.
- Inform the surrounding community on the permissible noise levels and best working hours.
- Use quiet equipment (i.e. equipment designed with noise control elements) and regular maintenance of machinery to ensure that noise produced from machinery is kept to a practicable minimum.
- Vehicles hired for bringing construction materials at site shall conform to the noise emission standards and shall be operated during non-peak hours.

Air quality

- The engine size of the construction equipment shall be the minimum practical size.
- The number of construction equipment operating simultaneously shall be minimized through efficient management practices.
- Construction machinery idling time shall be minimized.
- Equipment shall be properly tuned and maintained as per the Manufacturers specification.
- Alternatively fueled construction equipment shall be used where feasible equipment shall be properly tuned and maintained.
- All dusty materials shall be sprayed with water prior to any loading, unloading or transfer operation so as to maintain the dusty materials wet.
- Cover stockpiles of sand, soil and similar materials or surround them with wind breaks.
- Watering all working sites when necessary.
- Strict adherence to Air Quality Regulations, 2014.

Soil erosion

- The execution of major earthworks shall be restricted as far as possible to the dry season.
- Where structures are not fully completed before the start of the rains, temporary drains will precede the permanent drainage system such that storm water is directed and managed appropriately as construction proceeds.
- Soil erosion and siltation will be minimized by preventive measures and appropriately engineered storm water diversion, on a case-by-case basis.
- All excavated rock and aggregate will be used in construction where possible, while the spoil will be deposited in an area with minimum landslide potential, multi-layered and covered with soil, and planted with trees, shrubs and grasses.

<i>Impacts</i>	<i>Proposed Mitigation Measures</i>	<i>Impacts</i>	<i>Proposed Mitigation Measures</i>
Land and water pollution	<ul style="list-style-type: none"> An appropriate Waste Management Plan (WMP) for the construction of the Project should be submitted to the Resident Engineer for approval and implementation. Good management and control can prevent the generation of significant amounts of waste. Waste reduction is best achieved at the planning and design stage, as well as by ensuring the implementation of good site practices e.g. Use the excavated materials for earth filling as far as possible, use the excavated soft materials for landscaping works. A collection area should be provided where waste can be stored and loaded prior to removal from site. An enclosed and covered area is preferred to reduce the occurrence of wind-blown light material. To avoid oil contaminant into water bodies, a system for the proper collection and disposal of lubricants at both site and maintenance depot should be maintained. The constant monitoring of ground and surface water quality should as well be maintained. Prepare a comprehensive list of all hazardous materials to be used, stored, transported, or disposed of during this phase. Develop a hazardous materials management plan addressing storage, use, transportation, and disposal for each item in the comprehensive list. The plan should identify specifics regarding local emergency response. 	Public health and HIV/AIDS	<ul style="list-style-type: none"> A comprehensive health awareness campaign, carried out in conjunction with the Proponent, Contractor and other stakeholders will be done to prevent outbreak of disease. This will include successful preventive measures such as immunizing the vulnerable population, and educating people about diseases and how they are contracted, and how to avoid them by using treated water and keeping living areas cleaner. Treating affected local and migrant populations will also be used in controlling the movement of disease vectors (through contaminated water and between people). The Contractor shall be responsible for the protection of the public and public property from any dangers associated with construction activities, and for the safe and easy passage of pedestrians and traffic in areas affected by the construction activities. All works which may pose hazard to humans and domestic animals are to be protected, fenced, demarcated or cordoned off as instructed by the RE. If appropriate, symbolic warning signs must be erected. The Contractor will provide condoms at appropriate places in the work camps. The campaigns will be continuously done by the relevant Government organization even during operation phase of the Project.
Generation and disposal of solid waste	<ul style="list-style-type: none"> Use of durable, long-lasting materials that will not need to be replaced as often, thereby reducing the amount of construction waste generated over time. Provision of facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. Use of construction materials that have minimal packaging to avoid the generation of excessive packaging waste. Use of construction materials containing recycled content when possible and in accordance with accepted standards. Adequate collection and storage of waste on site and safe transportation to the disposal sites and disposal methods at designated area shall be provided. To ensure efficient solid waste management, the Proponent in liaison with the Siaya County Government will identify proper sites for solid waste disposal. The Environmental Management and Co-ordination (Waste Management) Regulations, 2006 on how various wastes should be managed should be properly implemented. 	Occupational health and safety	<ul style="list-style-type: none"> Register the Project Site as a Workplace as required by law. Post the Safety and Health Policy Statement on the Project Site Notice Boards. Proper implementation of the safety and health plan to be in accordance with the Occupational Safety and Health Act, 2007. Arrange for occupational safety and health orientation training to all employees consisting of basic hazard awareness, site-specific hazards, safe working practices, and emergency procedures. Constitute and Train a Local Safety and Health Committee. Provide fire suppression equipment at the generating facility and in all vehicles. Ensure that the Safety and Health Committee operates in tandem to Rule 6 of the Health and Safety Committees Rules, 2004. Need to draw and post Emergency Evacuation Plans at various strategic locations. Establish and Mark a Fire Assembly Point. Posting of Emergency Numbers and Contacts of (and Photos) of First Aiders. Provide alternative/fire exit and carry out fire drills periodically.
Increased water demand	<ul style="list-style-type: none"> The Proponent of the proposed Project shall ensure that water is used efficiently at the site by sensitizing construction workers to avoid irresponsible water use. An assessment and evaluation of the identified water source should be done against the estimated water demand during construction. These details should be provided to the Water Resource Authority before a license for abstraction is issued. 		<p>The full report of the proposed project is available for inspection during working hours at:</p> <ol style="list-style-type: none"> Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi. Principal Secretary, Ministry of Environment and Forestry, NHIF Building, Community, P.O. Box 30126-00100, Nairobi. County Director of Environment, Siaya County.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE CODE OF REGULATIONS, SECTION D—

Kenya Gazette

"D 34. (1) Communications for the *Kenya Gazette* should reach the Government Printer not later than 9 a.m. on Friday of the week before publication is desired. The Government Printer will not publish communications received after that hour until the next subsequent issue of the Gazette.

(2) Ministries will be required to pay for the *Kenya Gazette* and to meet the cost of advertising in it.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
