SCHEDULE 1
CONCISE STATEMENT OF PURPOSE

1. The Frequency Channelling Plan sets out how the spectrum bands 694 – 790 MHz will be assigned. This is done in compliance with the Final Acts of ITU WRC-19. At international level, the planning of spectrum is the responsibility of the ITU, in particular the ITU's Radiocommunications Bureau (ITU-R). The mission of the ITU-R is to ensure rational, equitable, efficient and economical use of the radio frequency spectrum and to adopt recommendations for member states.
2. Nationally, the Authority is vested with the control, planning, administration, management and licensing of radio spectrum in terms of Section 99 of the Communications Act, 2009 (Act No. 8 of 2009). Further, in terms of Section 99, the Authority is required to comply with the applicable standards and requirements of the International Telecommunications Union (ITU) and its Radio Regulations.
3. Section 100 of the Communications Act, 2009 deals specifically with the prescription of a frequency band plan setting out how radio spectrum may be used to ensure utilisation in an orderly, efficient and effective manner, to reduce congestion and interference, to allow for the introduction of new services and to permit as many licensees providing services as possible. A frequency channeling plan is complementary to the spectrum band plan.

**PROPOSED FREQUENCY CHANNELING PLAN FOR THE SPECTRUM
BANDS 694-790 MHz: COMMUNICATIONS ACT, 2009**

In terms of section 100 of the Communications Act, 2009 (Act No. 8 of 2009) the Communications Regulatory Authority of Namibia -

- (a) makes the Frequency Channeling Plan as set out in the Schedule;
- (b) repeal the Frequency Channeling Plan for the Spectrum Band 694-790 MHz as published in Government Gazette No. 6160, General Notice No. 423 on 28 October 2016.

FREQUENCY CHANNELING PLAN FOR THE SPECTRUM BAND 694-790 MHz

Background

1. The following principles have been considered to define the IMT frequency arrangement:
 - (a) To facilitate in the implementation of mobile broadband communications for robust and reliable mission critical emergency services for Public Protection and Disaster Relief (PPDR) in accordance with Resolution 646 (WRC-19).
 - (b) Spectrum efficiency and high level of flexibility in order to adapt to national circumstances as well as to meet the changing need and demand for capacity in time and geography;
 - (c) Protection of broadcasting services below 694 MHz;

- (d) Use of a 5 MHz block approach which is in line with the foreseen mobile systems to be used in the 700 MHz spectrum band; and
 - (e) Facilitation of roaming and cross-border coordination.
2. Recommendation ITU-R M.1036-6 as approved by the ITU Radio Assembly provides as follows -

“International Mobile Telecommunications (IMT) encompasses IMT-2020, IMT-2000 and IMT-Advanced collectively.

Key features of IMT-2000 and IMT-Advanced are contained in Recommendation ITU-R M.1645 and ITU-R M-1822. Frequency aspects and unwanted emission parameters are contained in Recommendations ITU-R M.1580, IT-R M.1581, ITU-R M.2070 and ITU-R M.2071.”

Definitions

1. In these regulations, a word or expression to which a meaning is assigned in the Act or the Regulations has the same meaning, and unless the context otherwise indicates -

“Act” means the Communications Act, 2009 (Act No. 8 of 2009)

“IMT” means International Mobile Telecommunications

“ITU” means International Telecommunications Union

“WRC” means ITU World Radio Conference.

Purpose

2. To set out the Frequency Channeling plan for the provision of IMT services in the spectrum bands 694-790 MHz.

Frequency channeling arrangement for the 694-790 MHz spectrum band

3. As graphically depicted below, 2x 30 MHz (6 blocks of 5 MHz each) FDD spectrum will be allocated for IMT services. This frequency arrangement was approved by the ITU Radio Assembly as contained in ITU-R M.1036-6 and is shown in Figure 1.
