## HIGH ALERT: SCAM WARNING!!!

### TO ALL SUPPLIERS AND SERVICE PROVIDERS OF THE GOVERNMENT PRINTING WORKS

It has come to the attention of the *GOVERNMENT PRINTING WORKS* that there are certain unscrupulous companies and individuals who are defrauding unsuspecting businesses disguised as representatives of the *Government Printing Works (GPW)*.

The scam involves the fraudsters using the letterhead of *GPW* to send out fake tender bids to companies and requests to supply equipment and goods.

Although the contact person's name on the letter may be of an existing official, the contact details on the letter are not the same as the *Government Printing Works*. When searching on the Internet for the address of the company that has sent the fake tender document, the address does not exist.

The banking details are in a private name and not company name. Government will never ask you to deposit any funds for any business transaction. *GPW* has alerted the relevant law enforcement authorities to investigate this scam to protect legitimate businesses as well as the name of the organisation.

Example of e-mails these fraudsters are using:

[PROCUREMENT@GPW-GOV.ORG](mailto:PROCUREMENT@GPW-GOV.ORG)

Should you suspect that you are a victim of a scam, you must urgently contact the police and inform the *GPW*.

*GPW* has an official email with the domain as [@gpw.gov.za](mailto:gpw@gpw.gov.za)

Government e-mails DO NOT have org in their e-mail addresses. All of these fraudsters also use the same or very similar telephone numbers. Although such number with an area code 012 looks like a landline, it is not fixed to any property.

*GPW* will never send you an e-mail asking you to supply equipment and goods without a purchase/order number. *GPW* does not procure goods for another level of Government. The organisation will not be liable for actions that result in companies or individuals being resultant victims of such a scam.

*Government Printing Works* gives businesses the opportunity to supply goods and services through RFQ / Tendering process. In order to be eligible to bid to provide goods and services, suppliers must be registered on the National Treasury's Central Supplier Database (CSD). To be registered, they must meet all current legislative requirements (e.g. have a valid tax clearance certificate and be in good standing with the South African Revenue Services - SARS).

The tender process is managed through the Supply Chain Management (SCM) system of the department. SCM is highly regulated to minimise the risk of fraud, and to meet objectives which include value for money, open and effective competition, equitability, accountability, fair dealing, transparency and an ethical approach. Relevant legislation, regulations, policies, guidelines and instructions can be found on the tender's website.

## Fake Tenders

National Treasury's CSD has launched the Government Order Scam campaign to combat fraudulent requests for quotes (RFQs). Such fraudulent requests have resulted in innocent companies losing money. We work hard at preventing and fighting fraud, but criminal activity is always a risk.

### How tender scams work

There are many types of tender scams. Here are some of the more frequent scenarios:

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to a company to invite it to urgently supply goods. Shortly after the company has submitted its quote, it receives notification that it has won the tender. The company delivers the goods to someone who poses as an official or at a fake site. The Department has no idea of this transaction made in its name. The company is then never paid and suffers a loss.

OR

Fraudsters use what appears to be government department stationery with fictitious logos and contact details to send a fake RFQ to Company A to invite it to urgently supply goods. Typically, the tender specification is so unique that only Company B (a fictitious company created by the fraudster) can supply the goods in question.

Shortly after Company A has submitted its quote it receives notification that it has won the tender. Company A orders the goods and pays a deposit to the fictitious Company B. Once Company B receives the money, it disappears. Company A's money is stolen in the process.

Protect yourself from being scammed

- If you are registered on the supplier databases and you receive a request to tender or quote that seems to be from a government department, contact the department to confirm that the request is legitimate. Do not use the contact details on the tender document as these might be fraudulent.
- Compare tender details with those that appear in the Tender Bulletin, available online at [www.gpwonline.co.za](http://www.gpwonline.co.za)
- Make sure you familiarise yourself with how government procures goods and services. Visit the tender website for more information on how to tender.
- If you are uncomfortable about the request received, consider visiting the government department and/or the place of delivery and/or the service provider from whom you will be sourcing the goods.
- In the unlikely event that you are asked for a deposit to make a bid, contact the SCM unit of the department in question to ask whether this is in fact correct.

**NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT NO. 107 OF 1998)****CONSULTATION ON THE INTENTION TO EXCLUDE IDENTIFIED ACTIVITIES ASSOCIATED WITH THE DEVELOPMENT AND EXPANSION OF BATTERY STORAGE FACILITIES FROM THE REQUIREMENT TO OBTAIN AN ENVIRONMENTAL AUTHORISATION BASED ON THE BATTERY STORAGE EXCLUSION NORM**

I, Barbara Dallas Creecy, Minister of Forestry, Fisheries and the Environment, hereby consult on my intention to exclude certain activities identified in terms section 24(2)(a) and (b) of the National Environmental Management Act, 1998 (Act No. 107 of 1998), associated with the development and expansion of battery storage facilities, from the requirement to obtain environmental authorisation.

Section 24(2)(c),(d) and (e) of the National Environmental Management Act, 1998 (Act No. 107 of 1998) provides for the Minister, or MEC in concurrence with the Minister to identify activities and geographical areas within which identified activities may be excluded from the requirement to obtain environmental authorisation, while section 24(2)(d) specifically provides the ability to exclude based on compliance with prescribed norms or standards, the development of which is provided for in section 24(10).

This Norm, entitled "Norm for the Exclusion of Identified Activities Associated with the Development and Expansion of Battery Storage Facilities in Areas of Low or Medium Environmental Sensitivity" has been prepared to provide rules under which activities associated with the development and expansion of battery storage facilities identified in terms of the Environmental Impact Assessment Regulations, 2014, promulgated under section 24(5) of the National Environmental Management Act, 1998 (Act No. 107 of 1998), may be excluded from the requirement to obtain an environmental authorisation prior to commencement, while meeting the objectives of the Act.

The Department of Forestry, Fisheries and the Environment developed a screening tool to identify environmental sensitivities of a specific geographical location or site related to various identified environmental themes. Environmental sensitivities are rated as "very high", "high", "medium" or "low". The environmental sensitivities related to "medium" or "low" for specific environmental themes are applicable to this Norm.

This exclusion relates only to activities as identified in terms of section 24(2)(a) and (b) of the National Environmental Management Act, 1998 (Act No. 107 of 1998), while the requirements of any other relevant legislation remain applicable including the requirements of the National Heritage Resources Act, 1999 (Act No. 25 of 1999).

This exclusion is published in terms of section 24(2)(d) of the National Environmental Management Act, 1998 (Act No. 107 of 1998), and applies subject to compliance with a prescribed norm developed in terms

of 24(10) of the National Environmental Management Act, 1998 (Act No. 107 of 1998) as set out in the Schedule.

including any single activity or several of these activities combined.

<sup>1</sup> Where the activity relates to a watercourse the exclusion relates only to a natural channel in which water flows regularly or intermittently as defined in "watercourse";

<sup>2</sup> This exclusion applies only in so far as the activity takes place at a distance of 100 metres inland of the high-water mark of the sea or an estuary, whichever distance is the greater

<sup>3</sup> This exclusion applies only in so far as the activity takes place at a distance of 100 metres inland of the high-water mark of the sea or an estuary, whichever distance is the greater

#### 4. Site Sensitivity Verification

- 4.1 A proponent must ensure that a site sensitivity verification inspection is undertaken for the environmental themes contemplated in paragraph 2.1.1 to confirm whether or not the environmental sensitivity of the footprint is as identified by the screening tool<sup>4</sup>.
- 4.2 A “very high” or “high” environmental sensitivity rating can be disputed by the specialist provided that evidence and motivation to substantiate such a change of environmental sensitivity is provided.
- 4.3 The site sensitivity verification must be undertaken–
- 4.3.1 for the footprint on which the proposed activities contemplated in paragraph 3, are proposed to take place as well as for the proposed corridor for the linear infrastructure;
  - 4.3.2 by specialists, with demonstrated expertise in the field for which they are undertaking the verification and where relevant, the taxonomic group of the species being considered; and
  - 4.3.3 within the season which would be most relevant to identify the specific species or vegetation of interest.
- 4.4 The site sensitivity verification inspection must be a physical inspection, which may be supplemented by utilising any desk top information available, including any fine scale data available from the provincial department responsible for the environment, provincial conservation authorities or the relevant municipality, where available.
- 4.5 Where additional information identified in paragraph 4.4 has been used in the verification process, this information is to be identified in the site sensitivity verification report.
- 4.6 For the plant and animal species themes, the relevant specialist must confirm the presence, likely presence, or absence of a species of conservation concern within the footprint identified as “medium” sensitivity by the screening tool<sup>5</sup>.
- 4.7 Should a species of conservation concern be found on the footprint or have been confirmed to be likely present, this exclusion will not apply and an application for an environmental authorisation must be submitted.
- 4.8 It is advised that when undertaking the site sensitivity verification, that the verification work includes a buffer<sup>6</sup> around the footprint to allow for slight adjustments without the need to resubmit the request for registration contemplated in this Norm<sup>7</sup>, which buffer must be clearly indicated and must envelope the footprint.
- 4.9 The outcome of the site sensitivity verification must be recorded in the form of a site sensitivity report that confirms the “low” or “medium” environmental sensitivities as identified by the screening tool for the themes contemplated in paragraph 2.1.1 or disputes the “very high” or “high” environmental sensitivity for these themes, and includes the relevant evidence.
- 4.10 The site sensitivity report must be prepared by a registered environmental assessment practitioner or an environmental scientist and signed off by the relevant specialists, all of whom must meet the requirements of regulation 13(1) of the EIA Regulations, read in the context of this Norm.

#### 5. Application of the exclusion

- 5.1 This exclusion applies where the activities contemplated in paragraph 3, are to occur entirely–

---

<sup>4</sup> A very high or high environmental sensitivity rating can be disputed by the specialist with motivation and evidence and confirmed to be medium or low.

<sup>5</sup> The site verification to determine the presence or likely presence of SCC must be undertaken in accordance with the *Species Environmental Assessment Guidelines*.

<sup>6</sup> The buffer is set by the proponent and has no maximum threshold although the area within the buffer must have been verified.

<sup>7</sup> A buffer around the linear infrastructure is not anticipated as the width of the corridor must allow for a buffer.

- 5.1.1 in areas of “medium” or “low” environmental sensitivity and is confirmed to be such by the site sensitivity verification inspection for the environmental themes as identified in paragraph 2.1.1; or
- 5.1.2 in areas where the site sensitivity verification for a specific theme identifies that the “very high” or “high” sensitivity rating of the screening tool is in fact “medium” or “low” sensitivity;

with the exception of linear infrastructure, in which case the pre-negotiated corridor for such linear infrastructure may be located in areas of “very high”, “high”, “medium” or “low” environmental sensitivity, if –

- 5.1.2.1 the mitigation hierarchy has been applied to the pre-negotiated corridor and the environmental assessment practitioner or environmental scientist and specialists confirm in the site sensitivity verification report, that the proposed pre-negotiated corridor avoids, areas of “very high” or “high” sensitivity, as far as practically possible;
- 5.1.2.2 through the site sensitivity verification, the relevant specialist identifies mitigation measures for any identified environmental impacts for inclusion in the environmental management programme<sup>8</sup> and confirms in the site sensitivity verification report that any remaining environmental impact is insignificant after mitigation; and
- 5.1.2.3 the environmental assessment practitioner or environmental scientist and relevant specialist confirm in the site sensitivity verification report that the necessary mitigation measures have been included in the environmental management programme.

5.2 Where the exclusion does not apply to any portion of the proposed facility or associated infrastructure, other than linear infrastructure, the entire facility, including the associated infrastructure and linear infrastructure integral to that facility, is subject to the requirements of the EIA Regulations, Government Notice No. 113 in Government Gazette No. 41445 of 16 February 2018, Government Notice No. 114 in Government Gazette No. 41445 of 16 February 2018 or Government Notice No. 144 in Government Gazette No. 44191 of 26 February 2021, whichever applies.

## 6. Registration

- 6.1 Prior to the commencement of the activities related to the development or expansion of a battery storage facility, the proponent must register the proposed facility or infrastructure with the competent authority.
- 6.2 The following documents must be submitted for registration:
  - 6.2.1 a completed and signed registration form contemplated in Appendix A, prepared by an environmental assessment practitioner or environmental scientist;
  - 6.2.2 the screening report for the footprint of the proposed facility and the proposed pre-negotiated corridor, generated by the screening tool, to be attached as Appendix 1;

  - 6.2.4 the written consent of the landowner or person in control of the land constituting the footprint, to be attached as Appendix 3;
  - 6.2.5 confirmation of pre-negotiation with landowners in the case of linear infrastructure, to be attached as Appendix 3;

<sup>8</sup> The Generic EMPR relevant to an application for substation and overhead electricity transmission and distribution infrastructure which require environmental authorisation as identified in terms of Section 24(2) of the Act gazetted in Government Notice No. 435 of Government Gazette No. 42323 published on the 22 March 2019 does to apply to this Norm and the EMPR required in terms of this Norm must include the aspects of the solar photovoltaic facility, the substations and overhead electricity transmission and distribution infrastructure.

- 6.2.6 a locality map showing the location of the footprint including the linear infrastructure overlaid on environmental sensitivities, to be attached as Appendix 4;
  - 6.2.7 an environmental management programme for the construction phase of the facility which addresses as a minimum, each of the general environmental controls identified in Appendix 10, compiled by the environmental assessment practitioner or environmental scientist and signed off by the relevant specialists;
  - 6.2.8 evidence of the public consultation process followed to bring the proposed registration process and the location at which the registration documents can be accessed to the attention of adjacent landowners and land occupiers as well as relevant environmental non-governmental organisations, to be attached as Appendix 5;
  - 6.2.9 the signed declaration of commitment by the proponent to implement the environmental management programme, as contemplated in Appendix 6; and
  - 6.2.10 the declaration of independence, curriculum vitae and professional affiliation or registration certification of the EAP or environmental scientist and specialists to be attached as Appendices 7, 8 and 9 respectively.
- 6.3 Should the footprint be amended where such amendment results in the footprint falling outside of the verified buffer<sup>9</sup>, the requirements contemplated in paragraphs 4, 5 and 6 of this Norm are applicable and must be complied with<sup>10</sup>.
- 6.4 The registration of the development or expansion will expire if commencement does not occur within 6 years of the date on which the competent authority issued a registration number, in which case the process as identified in paragraphs 4, 5 and 6 of this Norm will apply afresh.

## 7. Re-registration

- 7.1. Re-registration of the facility is required when there is a change of ownership of-
- 7.1.1. the battery storage facility for which the activities contemplated in paragraph 3 were excluded prior to construction or prior to or after the completion of the construction of the facility<sup>11</sup> and associated infrastructure; and
  - 7.1.2. a portion of the registered facility after completion of the construction phase<sup>12</sup>.
- 7.2. In the case of a change of ownership of a facility, the issued registration number is retained by the new owner.
- 7.3. In the case of change of ownership of a portion of the excluded facility, associated infrastructure or the linear infrastructure, a new registration number must be issued by the competent authority for the portion transferred.
- 7.4. A re-registration form contemplated in Appendix B, completed by the new owner and a signed declaration of commitment by the new owner to implement the environmental management programme contemplated in paragraph 6.2.7 must be submitted to the competent authority, within 30 days upon finalisation of a change of ownership, for purposes of updating of the information and commitments, where change of ownership occurs prior to completion of the construction phase; and
- 7.4.1. the change of ownership relates to the entire registered facility; or
  - 7.4.2. the change of ownership relates to a portion of the registered facility being transferred to a new owner and such transferred portion will become a separate facility.

<sup>9</sup> Where the footprint of the proposed facility is amended and remains within the buffer considered as part of the site sensitivity verification, re-registration is not required.

<sup>10</sup> It is not intended that the site sensitivity verification and the site sensitivity verification report are to be undertaken or prepared for the entire footprint of the proposed facility but only for the area which has not yet been verified.

<sup>11</sup> The re-registration in this case is required to update the information on the records of the competent authority and to ensure that the new owner declares his/her intention to implement the mitigation measures in the environmental management programme where the facility is still under construction.

<sup>12</sup> The re-registration in this case is required to ensure that infrastructure is registered in the name of the new owner or to provide a registration number for any part of the facility which is transferred to a new owner and is now a separate unit.

7.5. When the change of ownership occurs after the finalisation of the construction phase, a re-registration form contemplated in Appendix B must be completed by the new owner and a locality map clearly identifying the portion transferred and the remaining portion, including the registration number, must be submitted to the competent authority within 30 days upon finalisation of a change of ownership, to enable the issuing of a new registration number to the new owner of the portion of the facility transferred.

## 8. Processing of registration

- 8.1. Within 10 days of receipt of the correctly completed registration form and supporting documentation described in paragraph 6, or the re-registration form described in paragraph 7 of this Norm, the competent authority must register the facility or any relevant portion of the facility in the case of re-registration.
- 8.2. On receiving the registration number, the holder must notify within 7 days, those parties consulted as contemplated in paragraph 6.2.8 that the registration number has been issued.
- 8.3. The proponent must provide written notice to the compliance monitoring unit within the competent authority at least 14 days prior to the date on which the first of the activities contemplated in the scope of this Norm, including site preparation, will commence, in order to facilitate compliance inspections.
- 8.4. The competent authority must keep a register of all exclusions registered or re-registered in terms of this Norm and must make the information available on the website of the competent authority, which register should include as a minimum:
  - 8.4.1. the location of the facility excluded;
  - 8.4.2. the name of the registered holder;
  - 8.4.3. the date of registration; and
  - 8.4.4. the location at which the registration documents can be accessed<sup>13</sup>.

## 9. General

- 9.1. The provisions of the Appeal Regulations are applicable to any registration issued in terms of this Norm.
- 9.2. Any amendments required to be made to the environmental management programme during the construction phase must be prepared by an environmental assessment practitioner or environmental scientist and signed off by the relevant specialist.
- 9.3. Registration or re-registration documents and the environmental management programme as well as any amendments to such programme must be available at the registered facility.
- 9.4. Non-compliance with this Norm constitutes an offence in terms of section 49A(1)(b) of the Act.

<sup>13</sup> This could be in the library of the competent authority, the registered holder's offices or at the site if construction has commenced or has been finalised.

and which meets the requirements set out in this Norm, including supporting evidence, may be used to support a registration request in terms of this Norm.

- 10.3. An environmental authorisation issued for developments and expansions contemplated in this Norm remains valid and are subject to the requirements of the EIA Regulations.

INVITATION TO SUBMIT WRITTEN COMMENTS IN TERMS OF SECTION 110 OF THE NATIONAL WATER ACT 1998 (ACT 36 OF 1998) ON THE PROPOSED UMKHOMAZI WATER PROJECT PHASE 1 RAW WATER COMPONENT AND THE ENVIRONMENTAL IMPACT ASSESSMENT RELATING THERETO

The Minister of Water and Sanitation intends to construct a government water works, the **raw water component** of the uMkhomazi Water Project Phase 1 (uMWP-1), as contained in the Schedule hereto.

In terms of Section 110(1)(b)(iii) of the National Water Act 1998 (Act 36 of 1998) interested parties are invited to submit written comments on the proposed government water works and the Environmental Impact Assessment (EIA) by 30 September 2022. Written comments must be submitted to the Director-General, Department of Water and Sanitation, Private Bag X313, Pretoria 0001; and marked for attention of Mr. JA Bester, Chief Engineer: Water Resource Development Planning (East).

SCHEDULE TO THE PROPOSED UMKHOMAZI WATER PROJECT PHASE 1 GOVERNMENT WATER WORKS, RAW WATER COMPONENT AND SUMMARY OF THE ENVIRONMENTAL IMPACT ASSESSMENT

1. SUMMARY OF THE TECHNICAL ASPECTS OF THE UMKHOMAZI WATER PROJECT PHASE 1

1.1. *Project Background*

The proposed uMWP-1, which is situated within the southern part of KwaZulu-Natal (KZN), is a mega water project to be constructed that will augment the water resources of the Mgeni System. The uMWP-1 will transfer water from the undeveloped uMkhomazi River to the Mgeni System. The current water resources of the Mgeni System consist of the Midmar, Albert Falls, Nagle and Inanda dams, as well as the Water Transfer Scheme from the Mooi River (Mearns Weir and Spring Grove Dam). These resources are insufficient to meet the long-term water demands from the Mgeni System. The eThekweni Metropolitan Municipality (MM), uMgungundlovu, ILembe and Ugu District Municipalities (DMs) rely completely, or partially, on the Mgeni System for their water supplies. The Mgeni System supplies water to the third largest economic hub in South Africa, including Durban and Pietermaritzburg, which is the second most populated area in South Africa (about 6 million people). The water requirements projections show that the Mgeni System has already been in deficit since 2016.

The Mgeni System has a stochastic yield of 334 million cubic metres per annum (m<sup>3</sup>/a) at a 99% assurance of supply, and the augmentation from Spring Grove Dam on the Mooi River increased the system yield by 60 million m<sup>3</sup>/a to 394 million m<sup>3</sup>/a. The uMWP-1 will increase the system yield by about 215 million m<sup>3</sup>/a to 609 million m<sup>3</sup>/a, which will be sufficient until about 2040 where after further augmentation will be required. The uMWP-1 also presents the

opportunity for the upliftment of, and water supply to, poor local communities within the project area as well as in the uMkhomazi River Catchment.

### **1.2. Planning Investigations**

Past pre-feasibility investigations concluded that the uMWP-1 is the next most viable option to supply the large volume of water required to augment the water requirements from the Mgeni System until 2040. The Department of Water and Sanitation (DWS) completed the Detailed Planning Investigations for the uMWP-1 in 2015, which confirmed the technical and economic feasibility of the uMWP-1. All the technical reports are available on the Project Website at:

<http://www.dws.gov.za/wrp/uMkhomazi/documents.aspx>

### **1.3. Project Description**

The uMWP-1 (see attached map) will consist of raw water and potable water components. The Minister of the DWS directed the Trans-Caledon Tunnel Authority (TCTA) to implement the raw water component. Umgeni Water (UW) who supplies bulk potable water to the eThekweni MM, uMgungundlovu, ILembe and Ugu DMs, as well as to the North Coast Areas will implement the potable water component.

The uMWP-1 raw water component will consist of the following infrastructure:

- A proposed large storage dam on the uMkhomazi River at a farm called Smithfield (the proposed Smithfield Dam) and its associated works;
- A bulk 32.5 km long 3.5 m diameter raw water conveyance tunnel (the proposed uMkhomazi – uMlaza Tunnel);
- A 5.1 km long 2.6 m diameter gravity bulk raw water pipeline;
- A potential hydropower plant (HPP) at Smithfield Dam, and
- Three (3) flow gauging weirs on the uMkhomazi River.

The uMWP-1 potable water component will consist of the following infrastructure:

- A potential HPP at the proposed Baynesfield Water Treatment Works (WTW);
- The proposed Baynesfield WTW with a treatment capacity of 625 Mℓ/day in the uMlaza River Valley, and
- A 21.3 km long gravity potable water pipeline from the proposed Baynesfield WTW to Umlaas Road where it will tie into the bulk potable water distribution system.

The proposed Smithfield Dam has the following characteristics:

\* The above details are subject to final design, which may require minor changes.

The proposed uMkhomazi – uMlaza Tunnel extends from the east side of the proposed Smithfield Dam to the upper reaches of the existing Mbangweni Dam in the uMlaza River Valley, and will be able to convey the peak demand of 8.65 m<sup>3</sup>/s. The proposed Gravity Bulk Raw Water Pipeline will connect the uMkhomazi – uMlaza Tunnel to the proposed Baynesfield WTW.

Baynesfield WTW could generate a potential 5.4 MW, which could feasibly generate additional income that can contribute towards the operation and maintenance costs of the uMWP-1. The Implementing Agent (TCTA) will undertake more detailed investigations to confirm the feasibility and economic viability of the potential HPPs.

The proposed Smithfield Dam will inundate several roads that must be relocated, and therefore about 16 km of new access roads will also be constructed. Furthermore, about 12 km of Provincial Road R617 will also be inundated and will therefore be deviated (re-aligned). A further 2.4 km of permanent access roads, and about 39 km of servitude roads along the tunnel and the bulk raw water pipelines, will also be constructed.

An Upstream Flow Gauging Weir will be constructed to measure inflows into the proposed Smithfield Dam. A River Flow Gauging Weir will be constructed approximately 1.3 km downstream of the proposed Smithfield Dam to measure the smaller discharges from the dam as well as the ecological flow releases. A second River Flow Gauging Weir will be constructed about 40 km downstream of the proposed Smithfield Dam to determine the incremental runoff downstream of the dam, and to assist with the Ecological Water Requirements.

#### **1.4. Land Acquisition and Servitudes**

Land acquisition and the registration of servitudes will be according to best practises in accordance with standing legislation, policies and regulations. The estimated total area of land to be expropriated and for servitudes to be registered is about 1 818 ha.

#### **1.5. Capital Cost and Funding Requirements**

The estimated cost of constructing the uMWP-1 Raw water component is R17 373 million, including 15% VAT and escalation to the year 2018.

#### **Cost Breakdown**

The cost breakdown (2018 figures) for the uMWP-1 Raw water component is as follows:

<b>DESCRIPTION</b>	<b>AMOUNT (R million)</b>
Smithfield Dam and Associated Infrastructure	2,842
Smithfield Dam Hydropower Plant*	47
uMkhomazi – uMlaza Tunnel	4,953
Bulk Raw Water Pipelines	384

<b>Sub Total of Activities and Value-related Costs</b>	<b>11,884</b>
Contingencies (25% of above Sub Total)	2,971

<b>TOTAL CAPITAL COST (Excl. VAT)</b>	<b>15,107</b>
<b>VAT (15%)</b>	<b>2,226</b>
<b>TOTAL CAPITAL COST (Incl. VAT)</b>	<b>17,373</b>

*\* Hydropower plant feasibility will be determined during the final design stage*

#### **1.6. Funding Requirements**

Municipalities requested grant funding for 50% of the social component of the uMWP-1. This will facilitate continued access to water for the poorer households supplied by the Mgeni System. Grant finding will lessen the total cost burden on those consumers that are required to pay the full tariff. The Implementing Agent will secure the balance of the funding requirements (50%) through private loans.

#### **1.7. Socio- economic Benefits**

The uMWP-1 will have an impact on both the regional and local economies in the short-term and long-term and has the potential to generate employment opportunities and thereby improve household income. This will stimulate business and human capital development as well as assist in the raising of living standards. All the appointed contractors and consultants will be required to have their skills development plans in order, which will ensure that skills development will have a long-lasting impact.

#### **1.8. Water Supply to Local Communities and Other Water Users**

The uMWP-1 will transfer water from the uMkhomazi River Catchment to the Mgeni System. The uMkhomazi River Catchment should however retain the ability to sustain its requirements in addition to the transfers out of the catchment. It will therefore be ensured that the water requirements of local communities and other water users in the catchment are met satisfactorily. The correct and timeous implementation of the proposed Stephen Dlamini Dam on the Luhane River, and the Harry Gwala DM Regional Bulk Water Supply Scheme (BWSS) that will draw from this proposed dam, will therefore benefit the implementation of the uMWP-1. The proposed Stephen Dlamini Dam and the Harry Gwala DM Regional BWSS will ensure

that local communities in the area have access to safe and reliable water supplies. The proposed Stephen Dlamini Dam will be implemented by Umgeni Water.

### **1.9. Operational Requirements**

The uMWP-1 is configured to augment the Mgeni System's water resources, as well as to release the required water for the downstream users and the ecological reserve. Water from the uMkhomazi River will be stored in Smithfield Dam and conveyed to the Baynesfield WTW via the uMkhomazi – uMlaza Tunnel and the Bulk Raw Water Pipelines. Treated water from the Baynesfield WTW will be conveyed via the gravity potable water pipeline from the Baynesfield WTW to Umlaas Road, where it will tie into the Umgeni Water Bulk Potable Water Distribution System. The annual operating costs for the uMWP-1 raw water component has been estimated at R46 million per annum, including VAT, and escalation to the year 2018.

### **1.10. Implementation and Funding Arrangements**

A Project Steering Committee (PSC) drawing membership from affected institutions shall be established to play an oversight role during implementation of the project. A key milestone for implementation is to finalise the financial and institutional arrangements which include back-to-back agreements.

### **1.11. Operating Entity**

Umgeni Water will be the Operating Entity to operate and maintain the uMWP-1 raw water component on behalf of the DWS.

### **1.12. Technical Specialist Studies**

To conclude the technical feasibility, study the following additional studies were done.

The **Economic Impact Assessment** found that the uMWP-1 has the potential to generate high levels of job creation. If the uMWP-1 is not implemented the positive economic impacts thereof, and the benefits associated with adequate and reliable potable water provision will be lost.

During the EIA process the **Potential Impact of Smithfield Dam on Coastal Sediment Budget and Shoreline Stability** was identified and proposed mitigation measures to reduce the impact of Smithfield Dam on the coastal sediment budget and shoreline stability were recommended.

The **Traffic Impact Assessment** found that the construction and operational traffic will mainly impact upon Provincial Roads R617 and R56, which will be mitigated

Additional engineering investigations for the **realignment options of the R617** Provincial Road were undertaken. Three (3) new route options were identified and investigated by taking into account the topography, river crossings, the affected communities, as well as sensitive environmental influences. The preferred realignment option also provides for a new gravel access road and a small bridge for access to land located to the north of the uMkhomazi River, which would have otherwise been cut off by the proposed Smithfield Dam.

## 2. SUMMARY OF THE ENVIRONMENTAL IMPACT ASSESSMENT

All the EIA reports are available on the Project Website at:

<http://www6.dwa.gov.za/iwrp/uMkhomazi/documents.aspx>

The DWS undertook an EIA for the uMWP-1 raw water component in terms of Section 110 of the National Water Act, 1998 (Act No. 36 of 1998) and the National Environmental Management Act (NEMA), 1998 (Act No. 107 of 1998). The Department of Mineral Resource (DMR) EIA Process for the Quarries and Borrow Areas was also undertaken in terms of the 2014 published NEMA Regulations. Environmental Authorisation for the uMWP-1 was granted by the Department of Forestry, Fisheries and the Environment (DFFE) by September 2021. DFFE approved the Pre-Construction Environmental Management Programmes for Smithfield Dam (2 March 2022) and Conveyance Infrastructure (4 March 2022).

### 2.1. The following Specialist studies were done:

#### 2.1.1. *Terrestrial Fauna and Flora Assessment*

The *Terrestrial Fauna and Flora Assessment* assessed the impacts that the uMWP-1 will have on the flora and fauna in the Project Area. It was found that there are no threatened flora species, but four (4) faunal species are of conservation importance in the proposed Smithfield Dam Area. The *Terrestrial Fauna and Flora Assessment* recommended that a search and rescue be undertaken prior to construction in order to confirm the presence of species of special concern in the Project Area. All relocations of fauna and flora must comply with the requirements of Ezemvelo KZN Wildlife (EKZNW), in terms of the National Environmental Management Biodiversity Act (Act No. 10 of 2004) and Natal Nature Conservation Ordinance (15 of 1974).

#### 2.1.2. *Aquatic Impact Assessment*

The *Aquatic Impact Assessment* assessed the aquatic and wetland ecological impact surveys for both the uMWP Raw and Potable Water Components. The *Aquatic Impact Assessment* recommended that offset mitigation measures be implemented to compensate for the loss of ecologically important habitat, as well as the implementation of measures to improve catchment management.

#### 2.1.3. *Heritage Impact Assessment*

The *Phase 1 Heritage Impact Assessment* was undertaken in terms of Section 38 of the National Heritage Resources Act, 1999 (Act No 25 of 1999), which identified the affected heritage sites and graves. The impacts on the affected heritage sites and graves will have to be mitigated and a Heritage Management Plan is therefore required. A Phase 2 Archaeological Impact Assessment is recommended, which must also include a search for unknown rock art sites that could possibly exist in the uMkhomazi River Valley. A Phase 2 Palaeontological Impact Assessment Site Visit will be required prior to inundation, as there is a high probability of finding fossil plants in the area.

#### **2.1.4. Agricultural Impact Assessment**

The *Agricultural Impact Assessment* evaluated the agricultural potential of the affected farming areas. The main impact on agriculture will be the loss of high potential land, which is irreplaceable on a national level, but replaceable on a local level by purchasing other land. Landowners and land users could also be compensated for the loss of income instead.

#### **2.1.5. Visual Impact Assessment**

The *Visual Impact Assessment* addressed the visual effects of the uMWP-1 Raw water component on the receiving environment. Predictable visual impacts during the construction and operational phases (when the dams are filled), as well as the mitigation thereof, will be addressed during the design phase prior to construction, in order to generate preventative measures that will influence design decisions.

#### **2.1.6. Avifauna Study**

The *Avifauna Study* identified and assessed the bird species that occur in and around the Project Area, their importance, the uMWP-1's impacts on them and the mitigation. The Blue Swallow is the primary bird species of concern in the project area and is critically endangered, since there are only a breeding pairs left in South Africa, and the species is known to be susceptible to disturbance.

#### **2.1.7. Vibration Opinion**

A *Specialist Opinion* was sought on the potential effects of vibration from tunnelling and other construction activities on the Blue Swallows and this matter was taken forward in further studies.

#### **2.1.8. Socio-economic Impact Assessment**

The *Socio-Economic Impact Assessment* found that the uMWP-1 has the potential to temporarily enhance living standards of those directly affected, as well as of the population in the region in terms of employment, small businesses and social development. The loss of land in the area will cause a negative impact, since subsistence and commercial agriculture dominates other industries in the area. Compensation for the loss of land, income, and infrastructure will be adequately planned, communicated, and controlled. All negotiations shall be fair and transparent at all times. At least twenty-eight (28) households will need to be relocated, and therefore a fair and transparent Relocation Action Plan (RAP) as well as a Stakeholder Engagement Plan will be required.

#### **2.1.9. Social Impact Assessment**

The Smithfield Dam Basin is located on land under control of the Traditional Authority and land owned by the State. The construction activities will result in a range of impacts that are common to most construction sites, such as dust, noise, traffic, influx of people, presence of construction workers, crime, cultural conflicts, increased risk of HIV/AIDS, use of the local road network for operation and maintenance purposes as well as the destruction of valuable flora and fauna.

#### **2.1.10. Relocation Framework Plan and Relocation Action Plan**

The *Relocation Framework Plan (RFP)* will inform and facilitate the preparation of a RAP and will focus on some of those matters that may be very time-consuming and should be scheduled for early attention in the Implementation Programme. The RAP shall be compiled and implemented in strict compliance with all the relevant legislation, policies and regulations. Best practices in compiling the RAP for relocating people who are displaced, either voluntarily or involuntarily, by the uMWP-1 are to be followed, where appropriate. All mitigation and compensation measures associated with the relocation of people from the Project Area must be implemented prior to construction.

### **2.2. Additional Environmental Specialist Studies**

#### **2.2.1. Noise Impact Assessment**

The *Noise Impact Assessment* determined the ambient sound levels in the area, potential worst-case noise rating levels and the potential noise impacts that the uMWP-1 may have on the surrounding sound environment (with a focus on Blue Swallows). It was found that the uMWP-1 will not introduce any potential fatal flaws from an acoustic point of view. With the selection of the required mitigation options the projected noise levels can be managed.

#### **2.2.2. Vibration Impact Assessment**

The *Vibration Impact Assessment* evaluated the background vibrations, identified and describes the key sensitive receptors (with a focus on Blue Swallows), explains ground vibration mechanisms, compared ground vibration thresholds against expected values and discusses the mitigation measures. The assessment concluded that with monitoring and mitigation measures in place impacts will be mitigated.

#### **2.2.3. Avifauna Bridging Study**

The *Avifauna Bridging Study* was built on the Initial Avifauna Specialist Study that was undertaken as part of the EIA. It primarily addressed several areas of concern and uncertainty identified during the Initial Avifauna Specialist Study, especially as relates to the Blue Swallows. Furthermore, the Avifauna Bridging Study also critically assessed the afore-mentioned Noise Impact and Vibration Impact Assessments. Due to mitigation measures put in place it was possible for the DFFE to approve the project.

#### **2.2.4. Invertebrate Impact Assessment**

The *Invertebrate Impact Assessment* determined the presence of the endangered Pennington's Protea Butterfly and the endemic Riverine Keeled Millipede. The potential impacts of the uMWP-1 on these threatened invertebrate species were assessed and suitable mitigation measures were approved by DFFE.

### 2.2.5. *Biodiversity Offset Study*

The *Biodiversity Offset Study* determined the feasibility of compensating for significant residual adverse biodiversity impacts arising from the uMWP-1 Raw Water Component. The required offsets (including ratios, recipient sites and budgets) for the loss of riparian zones, wetlands, critical biodiversity areas and habitat for faunal species of conservation concern associated with the proposed Smithfield Dam and Langa Balancing Dam options were investigated. The *Biodiversity Offset Study* concluded with a *Biodiversity Offset Implementation Plan*, which consists of the institutional arrangements, offset and compensation budget, implementation plan as well as specific implementation measures.

## 2.3. Public Participation

A Public Participation Programme (PPP) was launched during the Feasibility Study, as part of the EIA. The PPP was complemented by the activities of the PSC through its stakeholders and the ongoing consultation processes on water related issues. The National Environmental Management Act (NEMA) and Government Notice No R. 543 of 18 June 2010, which govern the Public Participation Process (PPP), were followed during the EIA.

The uMWP-1 was announced through the distribution of a Background Information Document (BID) and Reply Forms, as well as notification of Interested and Affected Parties (I&APs) via on-site notices, newspaper advertisements and public meetings during October 2014. Notification of Review of the Draft Scoping Report was undertaken during July 2014 and it was lodged for review from 29 July to 08 September 2014. The Draft Scoping Report was also made available for public review and a Database of I&APs was maintained and is also available on the Project Website.

In accordance with Regulation 56 of Government Notice No. R. 543 of 18 June 2010, registered I&APs were granted an opportunity to review and comment on the Draft EIA Report. A forty (40) day review period of the Draft EIA Report was provided for from 04 July to 15 August 2016. All the I&APs on the Database were notified of the opportunity to review the Draft EIA Report, and about the public meetings, through a notification letter to I&APs via email, and bulk SMSs to I&APs. Formal communication channels were used to notify the communities in the Western Part of the Project Area, which included direct notification of the Traditional Councils and Community Representatives.

Legal Notices were placed in the 29 June 2016 editions of the Star (English), the Witness (English), and Isolezwe (Zulu) newspapers. Hard copies of the Draft EIA Report were made available at the Baynesfield Club, Beaumont Eston Farmers Club, Buiwer Public Library, Richmond Public Library and the Camperdown Public Library. Copies of the Draft EIA Report were provided to the following parties, which include key regulatory and commenting authorities, such as the then Department of Environmental Affairs (DEA), KZN Provincial Department of Economic Development, Tourism and Environmental Affairs, EKZNW, DWS KZN Regional Office, DMR KZN Office, Amafa aKwaZulu-Natali, Department of Agriculture, Forestry and Fisheries (DAFF), Cooperative Governance and Traditional Affairs (COGTA), KZN Department

of Transport, Harry Gwala DM and Ingwe LM (now the Dr Nkosazana Dlamini Zuma LM), uMgungundlovu DM and Richmond LM, Traditional Authorities, as well as Eskom. The Draft EIA Report was also uploaded to the Project Website. Minutes of the public meetings are available on the Project Website, and the details of the public meetings that were convened to present the Draft EIA Report are as follows:

No.	DATE	TIME	TARGET AUDIENCE
1	13 July 2016	09h00 to 11h00	Amaqadi Traditional Council and Community
2		12h00 to 14h00	Deepdale Community
3	14 July 2016	09h00 to 12h00	Baynesfield Area
4		14h00 to 17h00	Umlaas Road Area
5	15 July 2016	10h00 to 12h00	KwaBhidla Traditional Council and Community
6		14h00 to 16h00	Impendle Tenant Community and Community on State Land
7	16 July 2016	10h00 to 12h00	KwaZashuke Traditional Council and Community

In accordance with Regulation 57 of GN No. R. 543 of 18 June 2010, the comments received from I&APs on the Draft EIA Report were incorporated into the Comments and Responses Report (CRR). All comments received following the public review of the Draft EIA Report were included in the updated EIA CRR, which was also submitted to the DFFE to inform the decision for Environmental Authorisation. Copies of all the comments and the CRR are available on the Project Website. All the I&APs were notified via email, fax or post after having received written notice from the DFFE on the final decision for the uMWP-1. Legal Notices were placed as notification of the DFFE decision, and included the appeal procedure to the decision and key reasons for the decision.

#### **2.4. Engagements during the Compilation of the Draft Addendum to the Environmental Impact Assessment Report**

Various targeted engagements took place during the compilation of the additional information requested by the DFFE. This included discussions and meetings with the Environmental Authorities to clarify their requirements regarding the additional environmental work that was undertaken to address the DFFE's comments on the Final EIA Report (November 2016). Meetings related to certain of the additional studies were also held. Topic specific meetings were also held, which included meetings with the Department of Rural Development and Land Reform to discuss Biodiversity Offsets and with the KwaBhidla Traditional Council, as well as community members to present the deviation options for the R617.

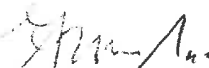

#### **2.5. Environmental Management Programme**

Environmental Management Programmes (EMPrs) have been prepared for the uMWP-1 in support of the EIA. It is a detailed plan of action to ensure that the recommendations for enhancing positive impacts and/or limiting or preventing

negative environmental impacts are implemented during the project life cycle. The Pre-construction and Construction EMPs provide a comprehensive list of mitigation measures for specific elements of the uMWP-1. This EMP was amended, as necessary, to include the mitigation measures that emanated from the required Additional Specialist Studies that were undertaken.

#### **2.6. Department of Mineral Resources Environmental Impact Assessment**

The DMR EIA Process for the Quarries and Borrow Areas was a separate EIA process administered by the DMR for seeking Environmental Authorization for the quarries and borrow areas. This EIA Process was done in accordance with the EIA Regulations of 2014 (Government Notice No. R. 982 of 04 December 2014) and were approved by 25 January 2019.

Harmony Gold Mining Company Limited (hereafter referred to as the applicant) has appointed Environmental Impact Management Services (Pty) Ltd (EIMS) as the Environmental Assessment Practitioner (EAP) to undertake the necessary environmental authorisation and associated consultation processes. EIMS will compile and submit the required documentation in support of applications for:

- Integrated Environmental Authorisation (EA) and Waste Management License (WML) in accordance with the National Environmental Management Act – NEMA (Act 107 of 1998)- Listed activity: Listing Notice 2, Activity 15 as well as the National Environmental Management: Waste Act – NEMWA (Act 59 of 2008)- Activity B11; and
- Water Use Licence (WUL) in accordance with the National Water Act – NWA (Act 36 of 1998). Water uses: Section 21 (c), Section 21 (i) and Section 21 (g).

The exact activities to be applied for will be confirmed during the process. Additional activities may be identified during the process. A full Scoping and Environmental Impact Assessment application process will be followed.

The current planned Life of Mine (LOM) of the Free State operations exceed the available deposition capacity of these TSFs and the applicant is therefore proposing to construct the proposed Nooitgedacht TSF to cater for this additional capacity. The TSF will cover an area of approximately 8.95 km<sup>2</sup>. The proposed TSF will be located on Farm portions Mijannie 66 Ptn 0/RE, Goedgedacht 53 Ptn 0, Nooitgedacht 50 Ptn 0, Jacobsdal 37 Ptn 0 and Rheedersdam 31 Ptn 0.

EIMS will be following the procedures defined in the Environmental Impact Assessment (EIA) Regulations (GRN982 of 2014, as amended) and in the Water Use Licence Application and Appeals Regulations, 2017 (GNR 267 of 24 March 2017) for undertaking a Scoping and Environmental Impact Assessment (EIA) and WULA process. In accordance with Chapter 6 of the EIA Regulations Section 41 of the NWA, a public participation process will be undertaken. You are hereby invited to register and comment on the proposed project and application/s. In order to ensure that you are identified and registered as an I&AP and that your comments are captured, please submit your name, contact details, the reason for your interest or any, in writing or telephonically, to EIMS within 30 days of the publication of this notice. Please note that only registered I&AP's will be informed of future project information and opportunities for participation.

By registering as an interested and affected party you consent to the collection and processing of your personal information as per the EIMS Privacy Notice available at [www.eims.co.za/public-participation](http://www.eims.co.za/public-participation). Harmony Gold Mining Company Limited (hierna na verwys as die aansoeker) het Environmental Impact Management Services (Edms) Bpk (EIMS) as die Omgewingsvalueringspraktisyn (EAP) aangestel om die nodige omgewingsmagtiging en gepaardgaande konsultasieprosesse te onderneem. EIMS sal die vereiste dokumentasie saamstel en indien ter ondersteuning van aansoeke vir:

- Geïntegreerde Omgewingsmagtiging (EA) en Afvalbestuurslisensie (WML) in ooreenstemming met die Nasionale Omgewingsbestuurswet – NEMA (Wet 107 van 1998)- Gelyste aktiwiteit: Noteringskennisgewing 2, Aktiwiteit 15 asook die Nasionale Omgewingsbestuur: Afvalwet – NEMWA (Wet 59 van 2008)- Aktiwiteit B11; en
- Watergebruiklisensie (WUL) in ooreenstemming met die Nasionale Waterwet – NWA (Wet 36 van 1998). Watergebruike: Artikel 21 (c), Artikel 21 (i) en Artikel 21 (g).

Die presiese aktiwiteite waarvoor aansoek gedoen moet word, sal tydens die proses bevestig word. Bykomende aktiwiteite kan tydens die proses geïdentifiseer word. 'n Volledige Omvang- en Omgewingsimpakstudie aansoekproses sal gevolg word.

Die applikant besit en bedryf 'n aantal Goudmyne en aanlegte in die Welkom-streek in die Vrystaat en deponeer tans uitskot op die Vrystaat Suid 2 Uitskot Stoorfasiliteit (TSF), St. Helena 4 TSF, St. Helena 123 TSF, Dam 23 TSF, Brand D TSF en Target 1&2 TSF. Die huidige beplande Life of Mine (LOM) van die Vrystaatse bedrywighede oorskry die beskikbare afsettingskapasiteit van hierdie TSF's en die aansoeker stel dus voor om die voorgestelde Nooitgedacht TSF te bou om vir hierdie bykomende kapasiteit voorsiening te maak. Die TSF sal 'n gebied van ongeveer 8,95 km<sup>2</sup> dek.

Die voorgestelde TSF sal geleë wees op Plaasgedeeltes Mijannie 66 Ptn 0/RE, Goedgedacht 53 Ptn 0, Nooitgedacht 50 Ptn 0, Jacobsdal 37 Ptn 0 en Rheedersdam 31 Ptn 0.

EIMS sal die prosedures volg soos omskryf in die Omgewingsimpakbepaling (OIB) Regulasies (GRN982 van 2014, soos gewysig) en in die Watergebruiklisensie Aansoek (WULA) en Appèlregulasies, 2017 (GNR 267 van 24 Maart 2017) vir die onderneem van Omvang- en Omgewingsimpakstudie en WULA proses. In ooreenstemming met Hoofstuk 6 van die OIB-regulasies en Artikel 41 van die NWA, sal 'n openbare deelnameproses onderneem word. U word hiermee uitgenooi om te registreer en kommentaar te lewer op die voorgestelde projek en aansoek/s. Om te verseker dat jy geïdentifiseer en geregistreer word as 'n B&GP en dat jou kommentaar vasgelê word, dien asseblief jou naam, kontakbesonderhede, die rede vir jou belangstelling of enige kommentaar, skriftelik of telefonies, by EIMS binne 30 dae vanaf die publikasie van hierdie kennisgewing. Neem asseblief kennis dat slegs geregistreerde B&GPe ingelig sal word oor toekomstige projekinligting en geleenthede vir deelname.

Deur as 'n B&GP te registreer, stem jy in tot die versameling en verwerking van jou persoonlike inligting soos per die EIMS Privaatheidskennisgewing beskikbaar by [www.eims.co.za/public-participation](http://www.eims.co.za/public-participation). Om te verhoed dat geleenthede

vir publieke deelname misgeloop word, dien asseblief B&GP-registrasies, of enige navrae, kommentaar of bekommernisse met betrekking tot hierdie aansoek, so gou moontlik in by EIMS by:

**NON-GOVERNMENTAL ORGANIZATION****NOTICE 1743 OF 2023****NOTIFICATION REGARDING OPPORTUNITY TO PARTICIPATE IN THE ENVIRONMENTAL AUTHORISATION PROCESSES FOR THE PROPOSED HARMONY VALLEY TAILINGS STORAGE FACILITY PROJECT, IN MATHJABENG LOCAL MUNICIPALITY, FREE STATE, SOUTH AFRICA**

Harmony Gold Mining Company Limited (hereafter referred to as the applicant) has appointed Environmental Impact Management Services (Pty) Ltd (EIMS) as the Environmental Assessment Practitioner (EAP) to undertake the necessary environmental authorisation and associated consultation processes. EIMS will compile and submit the required documentation in support of applications for:

- Integrated Environmental Authorisation (EA) and Waste Management License (WML) in accordance with the National Environmental Management Act – NEMA (Act 107 of 1998)- Listed activity: Listing Notice 2, Activity 15 as well as the National Environmental Management: Waste Act – NEMWA (Act 59 of 2008)- Activity B11; and
- Water Use Licence (WUL) in accordance with the National Water Act – NWA (Act 36 of 1998). Water uses: Section 21 (c), Section 21 (i) and Section 21 (g).

The exact activities to be applied for will be confirmed during the process. Additional activities may be identified during the process. A full Scoping and Environmental Impact Assessment application process will be followed.

A new deposition site will be required for Harmony One Plant to replace the FSS2 and St. Helena 4 Tailings Storage Facilities by July 2024. Several alternative sites were identified and assessed as possible suitable deposition sites for the tailings from Harmony One Plant but were found not feasible. Following a review of other possibilities for the One Plant's future tailings deposition, an option to utilise the space between the Free State North 1 (FSN) and Free State North 2 (FSN) TSFs and portion of the footprint of the FSN4 TSF as shown in the map has been identified as a possible deposition site. The TSF will cover an area of approximately 1.24 km<sup>2</sup>. The proposed TSF will be located on Farm portions Rietpan 14 (O) and Ouders Gift 48 (O/RE).

EIMS will be following the procedures defined in the Environmental Impact Assessment (EIA) Regulations (GRN982 of 2014, as amended) and in the Water Use Licence Application and Appeals Regulations, 2017 (GNR 267 of 24 March 2017) for undertaking a Scoping and Environmental Impact Assessment (EIA) and WULA process. In accordance with Chapter 6 of the EIA Regulations Section 41 of the NWA, a public participation process will be undertaken. You are hereby invited to register and comment on the proposed project and application/s. In order to ensure that you are identified and registered as an I&AP and that your comments are captured, please submit your name, contact details, the reason for your interest or any, in writing or telephonically, to EIMS within 30 days of the publication of this notice. ## PARLIAMENT OF THE REPUBLIC OF SOUTH AFRICA

## NOTICE 1745 OF 2023

## MS SIVIWE GWARUBE, MP

**NOTICE OF INTENTION TO INTRODUCE A PRIVATE MEMBER'S BILL AND INVITATION FOR COMMENT ON THE DRAFT LOCAL GOVERNMENT: MUNICIPAL STRUCTURES AMENDMENT BILL, 2023, WHICH AIMS TO, *INTER ALIA*, INSERT AN ELECTORAL THRESHOLD**

Ms Siviwe Gwarube, MP, acting in accordance with section 73(2) of the Constitution of the Republic of South Africa, 1996, intends to introduce the Local Government: Municipal Structures Amendment Bill, 2023, (“the draft Bill”) in Parliament. An explanatory summary of the draft Bill is hereby published in accordance with Rule 276(1)(c) of the Rules of the National Assembly (9<sup>th</sup> Edition).

South Africa is currently in a transitionary phase where the ruling party no longer holds majorities in a number of metropolitan, district or local councils across South Africa. This has resulted in many coalition governments being formed at local government level. With the 2024 National elections around the corner, these elections are poised to be the first instance where the ruling party will slip below 50% of the votes. What this means for South Africa is that coalition governments will now be the “new norm”, at a national, provincial and local government level. Parties and Independent Candidates will have to come together and form workable coalitions for the good of the Republic of South Africa.

However, the current issue with coalition governments at local government level is that a high number of political parties are needed to join together in order to gain a majority in the council. What this means is that coalition governments are sometimes made up of up to 10 or more political parties, the majority of these parties having obtained only one seat each in the council. Often, in practice, some of these parties gain a seat without even first obtaining the requisite votes needed for such seat (namely, the seat quota). Instead, such seat is obtained through the next highest remainder calculations. The effect of this is that opposition parties continuously lobby these smaller parties to retract from coalitions in exchange for positions or favour. These “one person” parties who obtain a fraction of the votes of a municipality, now become “king makers”, which can destabilise entire governments which in turn affects service delivery to the very people who voted these parties in.

The draft Bill thus aims to prevent these circumstances from occurring by seeking to amend the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998) (“the Act”), so as to insert an electoral threshold into the calculation and allocation of seats in councils so that parties must first obtain the number of the votes equal to the seat quota +1 before they are even entitled to be considered for seat calculations and allocations. This will ensure that smaller parties, who do not enjoy the confidence of the voters, are not let into council through “the
